patrons left the bar and drove off. Finally he started the car, switched the
wipers on and off (it was a fine dry night) flicked the blinkers on, then
off honked the horn and then switched on the lights. He moved the vehicle
forward a few inches, reversed a little and then remained still for a few
more minutes as some more vehicles left. At last he pulled out of the
parking lot and started to drive slowly down the road.

The police officer, having patiently waited all this
time, now started up the patrol car, put on the
flashing lights, promptly pulled sawed-off Raoul over and
carried out a breathalyzer test. To his amazement
the breathalyzer indicated no evidence of the man having
consumed sperm at all this time!

Dumbfounded, the officer said "I'll have to ask you
to accompany me To the Police station this breathalyzer
equipment must be broken."

"I doubt it," said Raoul, "Tonight I'm the designated decoy."

Chronic alcoholic like his illegal alien daddy "His Hermmaphroditess, Raoul Xemblinosky" <drunkard@bungmunch.net> gibbered:
>
>KPACHOE TEPPOP

From the State where drunk driving is considered a
sport, comes a true story from MA.
Recently a routine police patrol parked outside a
local Neighborhood tavern. Late in the evening the
officer noticed a man leaving the bar so intoxicated
that he could barely walk.

Raoul stumbled around the parking lot for a few
minutes,with the officer quietly observing. After what
seemed an eternity and trying his keys on five vehicles,
the mangled dwarf managed to find his car which he fell into.
He was there for a few minutes as a number of other
patrons left the bar and drove off. Finally he started the car, switched the
wipers on and off (it was a fine dry night) flicked the blinkers on, then
off honked the horn and then switched on the lights. He moved the vehicle
forward a few inches, reversed a little and then remained still for a few
more minutes as some more vehicles left. At last he pulled out of the
parking lot and started to drive slowly down the road.

The police officer, having patiently waited all this
time, now started up the patrol car, put on the
flashing lights, promptly pulled sawed-off Raoul over and
carried out a breathalyzer test. To his amazement
the breathalyzer indicated no evidence of the man having
consumed sperm at all this time!

Dumbfounded, the officer said "I'll have to ask you
to accompany me To the Police station this breathalyzer
equipment must be broken."

"I doubt it," said Raoul, "Tonight I'm the designated decoy."

I know that is right there. The 2 meter band sounds like a channel 19 cb
now.

A good troll gets people upset enough to respond. A great one gets
complaints to various organizations and federal agencies.

Two meter repeaters are not representative of most hams - especially in any
major city. Try working some two meter SSB, or better yet, spend some time
on HF. You will find a completely different type of operator.

: department, according to the article.
: Regards,
: Ken (NY)
```

Most of the APCO 25 digital will not be encrypted. And the only real limit is whether the department is willing to put out the money to have enough towers and repeaters to cover all the dead zones.

The problem with encrypted radios is that the first thing that will happen is that a group of LEOs will have the techs create a couple of talk groups that the bosses do not know about. Since it is encrypted, not even the bosses will be able to listen.

The other problem is that it immediately cuts everyone off from everyone else. With analog or unencrypted digital trunking systems (and that is all these are, trunking systems with digital modulation), every officer or fire fighter can buy a scanner to listen to other patrol areas or services. With encrypted radios, no one can listen so if the bosses do not put the talk group in the radio, you are screwed.

And the media is going to bitch about having to spend $4000 a radio just to listen. (no $400 scanners). Plus how often will the bosses lock the medias radio out?

: I've never been happy about unsecured radios. If I want everybody in town
: to know where I'm going, I'll use the PA.

Most of the APCO 25 digital will not be encrypted. And
the only real limit is whether the department is willing to
put out the money to have enough towers and repeaters
to cover all the dead zones.

The problem with encrypted radios is that the first thing
that will happen is that a group of LEOs will have the
techs create a couple of talk groups that the bosses do not
know about. Since it is encrypted, not even the bosses
will be able to listen.

The other problem is that it immediately cuts everyone
off from everyone else. With analog or unencrypted digital
trunking systems (and that is all these are, trunking systems
with digital modulation), every officer or fire fighter can buy
a scanner to listen to other patrol areas or services. With
encrypted radios, no one can listen so if the bosses do not
put the talk group in the radio, you are screwed.

And the media is going to bitch about having to spend $4000
a radio just to listen. (no $400 scanners). Plus how often will
the bosses lock the medias radio out?

Man! You hams are a nasty lot! Are you all just frustrated
or something? You really should try getting laid sometime.
(with someone of the opposite sex) Might take the edge off.

Carry on with your childlike fighting now, I'm outahere, you can
go and take all your shots at me know if that's how you get
your jollies. I'm going to get on with my life (another thing you oughta
try getting)

I am listing this for a friend.

All this equipment is like new. Very little use.
Ameritron AL-80B (1)3-500. This amp has only been on or about an hour. $900
PLus shipping

Yaesu FT-840 xcvr with supply. $775 shipped.

Daiwa wattmeters CN101L and CN103L $85 each shipped.

MFJ Versa Tuner 5 Model 989C. $195 shipped. (TENTATIVELY SOLD)

MFJ 407C Keyer 25.00 Shipped.

Hi Gain Ham IV rotator. $300 shipped.

MFJ Paddles Model 422. $65 shipped.

Mirage RS20A supply, $75 shipped.

Kenwood TM255A all mode 2 meter, $375 shipped

Thanks, Chuck

The business practices of an indivudual private company does NOT equal
a law, nor does it mean it's illegal to disguise yourself.

Committing a fraud with the aid of a disguise is no more illegal
than doing so without one, the fraud is the crime, not the disguise.

Nope. Ham Radio is not dying. Just getting weeded out. When all the dust settles and people like "Kooky Child 8 Just Being Obnoxious" has his license to JAM taken away by the FCC, and his shrink finally puts him away, if does not drink himself to death first, then Ham Radio and air waves will be a much better place.

As you make clear in a follow up to this trhead you are a LEO.
As might frequent post have made clear I am not much of a fan of law
enforcement. Either agencies of cops.
I have monitored police comms fro over 35 years. I have heard many crimes.
Being plotted by cops. Secure or not the public has no idea just how crooked
their guardians are.
LA's Rampart is just the tip of a sad iceburg.
Look at NY, New Orleans. The police are not our friends. They are our masters
afgents and our keepers. The hwole issue of secure vs open is pointless.
A lot of cops carry cell phones and use them to escape monitoring (or so they
think) by the public, thier bosses, the "media".
Disagree if you wish. But years of monitoring, local, state and feds
have shown that they are not the least concerned with lwas and justice, just
how much wieght they can throw around. I heard the police in Lexington Ky plot
and execute the murder of a sad, senile old man (Fred Featherstone).
No one cared. The media heard it all and reported nothing.
If you are honest, do good, refuse to abuse your position great, but you are
rare. And if you know which officers in your force do not follow the rules,
but you refuse to stop, report and testify against them then you are as guilty
as them. By not stoping your brother bullies in blue, you share their full
guilt.
I am just happy that all too few cops understand just how easy it is to
intercept cell calls, and that a lot are really so smart that they think "talk
groups" on a trunked analog (GE) system are "scrambled". IT was fun listening
to them make dope deals, call their girlfriends (or in one case a male lt
called his boy friend) all the time thinking they where scrambled.
Oh and just keep thinking that PCS and "scambled" are secure.
I should have made tapes or put it all on the web. Great fun!
If you are clean and decent then you have my respect, if, as is much more
likley, then you have my "thanks" for helping to ruin a great country.

Source record: 92412

Greetings!

I would like to trade my nice Icom IC-W31 dual band (2m/440) handheld for a Motorola field programmable VHF HT. Will consider any 'commercial' (maybe even another amateur) transceiver that does the PL tone of 229.1 -- That PL is an 'oddball' tone, and most amateur transceivers do not have it. There are some exceptions. I would really prefer a GP-68 in good shape with accessories. My Icom W-31 comes with 3 batteries (2 BP-173 batteries, 9.6V @ 650 mAh, and 1 BP-171, 4.8V @ 700 mAh), speaker mike (clip is broken, easily repairable), leather case, and charger. I know some of the Alinco HT's do 229.1 PL, but not all of 'em. The W-31 has cross-band repeat capability, dual receive, etc. Nice rig. Please e-mail with offers!

Sure you will, W6DKN. Have you been to 3.860 MHz lately? The two-meter operators are not any better or worse than any other ham. I take that back, at least the two-meter operators don't usually go around promoting bigotry towards their fellow hams.

Screw the media. They have ceased being whatever "watchdogs of freedom" they once were. Now everything is about hype and sensationalism and getting the most carnage on the nightly news to boost ratings. You're very naive if you really think the media's complaints regarding encrypted radios stems from feelings of some patriotic duty to protect the republic from its own government. The real source of their complaint is that without police radios to listen to, they won't be able to make it to the scene of a four-car pile-up in time to capture the blood and gore on camera before it's cleaned up by the cops.

Greetings...

I have a mint condition Yaesu FT-840 that I would like to trade for either an Icom IC-706 series radio, and FT-100, Kenwood TS-50, or Alinco DX-70T. Remote mount kit would be a plus in any of the above. I sold my IC-706 in a weak moment a couple of weeks ago, and really miss the convenience. Looking for either another one, or one of the other smaller rigs. E-mail with offers!

I'm glad you said that, because our equipement sucks. The vehicles are old, the front ends shake, most pull to the right, and they're dirty.

Also, our cell phones are shit, our station needs paint and repairs, a new control room, and while we're on the subject, we DO need better radios, with lots and lots of repeaters. Remember, we work nationwide. And what's with that useless, single ply toilet paper?

As a matter of fact, I've bought my own cell phone, shank resistant gloves, leather gear, handi-wipes, and just about every other expendable supply I use.

Plus, you have promised me and my fellow officers a raise, which has been denied by Clinton for the past 8 years. Make sure to include all the back pay and interest when you make out that check...make that money order. I don't take checks.

And about those encrypted radios; should I get ambushed, or the media and/or curious onlookers interfere with my job and cause further injury or death because YOU decided I didn't need encryption, expect a team of lawyers to tear your financial ass into little bitty pieces.

Frankly, sir, your not doing a very good job. I'll expect better in the future.

Mail that check Priority.

I very rarely use the radio. I also don't deal with personal crap on duty. What I don't like is, if I have to read a suspect's name or file number to dispatch, their info is thrown all over the place. By the same token, I'm none too please when some rookie babbles my name and location all over the airwaves.

So, if you know where the jerks are, why waste your time there? At least they occupy a small, known piece of the band so the trash is easy to avoid - unless you're the type that likes this stuff. (Yes, I have heard about the crap on 3.860, but I have no desire to waste my time with it)

Personally I prefer to work DX and do very little stateside work (which seems to be where most of the problem operators are on HF). I work 12, 17, 20, and 40 almost every day and I have never had anything but great QSO's. I do work VHF/UHF also, but I only do SSB or FM simplex and SATS. There are very few "garbage operators" in these modes.

At least on HF, the jerks stay in a small, relatively consistent spot and it is fairly common knowledge where they are, so they are very easy to avoid. Very different than the VHF repeaters in the big cities, where the jerks get their kicks from going from machine to machine to see what trouble they can cause (just like 11 meters).

That thought had not eluded me, however the gauge remains pegged when the
ignition is switched off and thus power is removed from the instrumentation.

Thank you for you response.

The point is that the 2-meter versus HF operator nonsense you mentioned earlier has absolutely nothing to do with it - the "jerks" are the same on both (the only difference between 2-meters and HF is the limited number of repeaters on 2-meters - harder to avoid the "jerks" if you stay mainly on the repeaters).

Therefore, you should not have said earlier that the "two meter repeaters are not representative of most hams" (you said "hams" here) and that he should "spend some time on HF" because he "will find a completely different type of operator." That is not true. There are no more "jerks" on 2 meters than on HF - they're only a little more difficult to avoid because of the limited number of repeaters.

If the "jerks" really disturb you, then I agree with your suggestion - simply avoid the repeaters. Its far easier to avoid them on the SSB frequencies (just like on HF).

Take care, W6DKN.

Lets take a survey of the number of jerks and lids out of 1000 QSO's on the
2 meter repeaters in Los Angeles, and do the same with 1000 HF QSO's on 17
meters. If you are correct, the ratios should be about the same...

It has certainly been my experience over the last several years in/around the Los Angeles area of So CA. Maybe in your area things are different. But, like most people, we base our opinions on our personal experiences.

And let's not forget that my original response was to a post stating that from listening to 2 meters, the poster concluded that ham radio in general was just like 11 meters.

> If the "jerks" really disturb you, then I agree with your suggestion -
> simply avoid the repeaters. Its far easier to avoid them on the SSB

They don't disturb me - in fact they have no effect on me one way or the other - because I choose not to pay any attention to them.

Wow! Cellphone war!!!

But wait, what if the cellphone user is aware of the jamming and just blast
out their ringtone anyway?,
Or turn the volume up high and keys morse code messages using the keypad...

How does the person with the cellphone jammer know for sure that the jammer
is only jamming frequencies only used by cellphones?

Hello everyone.
Kb9YXM here.
I would like to start to build my own antennas for VHF/UHF. To start, I would like to build what might be a strange 6 meter antenna design.
I am trying to build a 6 meter 2 element phased array.
I was hoping someone could send me some idiot proof instructions or direct me to a website that they know fdirst hand might have information on this type of antenna.
The other quesiton is a simple one. When building an antenna, why must one use a gamma match, isnmt it possible just to use a ballun as with a di-pole?

Thanks and73's in advance.

Brenda,
The individual who has been using foul language and character
assasination on this group is doing the same and far worse on another
ham radio news group. I would very much like to see his postings banned
from this and the other newsgroups. Who can I write to on this matter?
Is the moderator of this group available thru email?

One more thing. Recently I had the honor and pleasure of listening
to K4ZDH here in Youngstown at a local MVARA meeting. The subject of
this kind of verbal harrassment and poor manners/operating practices
was central to his theme that evening. We as a group can do more to get
rid of this type of so-called operator. Hollingsworth's message was on
this same line, that is, what we can do as a group to rid ourselves of
the verbal bullies and intimidators.

Thanks and 73s,

Fred Sole
WB8LVP

> the bosses lock the medias radio out?

As "open" traffic diminishes, the media will scrutinize more
and more mundane traffic.

After a while, they will learn that *ANY* transmission has the
potential to be politically embarassing at some later date.

The logical end will be the police chiefs setting policies to
work in encrypted mode at all times, unless specifically told

by the dispatcher to go into the clear....after a couple mistakes
by dispatchers, the dispatchers will then have to get an OK from
the shift supervisor before putting a channel in the clear.

Thus, we will have a police force operating with minimal
public scrutiny....

Heaven help us.

4221. Watch out Dan, the FCC can revoke your license on "character"

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-14 23:22:09 UTC
From: (unknown)
Message-ID: <3aaffc9b.183988808@news.mindspring.com>
Source record: 92300

The FCC says its Character Policy Statement "provides that violations of the Communications Act or the Commission's rules are matters which are predictive of licensee behavior and directly relevant to the Commission's regulatory activities." The policy "is applicable to Amateur and other wireless radio licenses," the FCC added. That sentence in the Order was footnoted to reference the case of Herbert L. Schoenbohm, ex-KV4FZ, who lost his Amateur Radio license on the basis of character issues.

Watch out Dan, your character isn't exactly great. I wouldn't call Riley a fool again, either.

Hi, Ron -

Autotune systems include a mismatch detector and control circuit. The detector can be a simple VSWR bridge going to a microprocessor which seeks a minimum (standard zero finding algorithms apply). Fancier systems have phase and magnitude detectors which drive the two servo'ed capacitors via the appropriate gain.

The latter approach is used widely in the plasma etching field - where 13.56MHz power is sent to a reactive plasma chamber via a tuning network. Here, the impedance of the load depends on the energy going to the plasma, which depends on the quality of the match. A design which always and quickly finds a stable tuning point is much valued. These designs also don't use pi networks, but L networks since the load is always a low (2 to 25 ohms) and capacitive impedance.

Best of luck with your designs!

Jim Horn, WB9SYN/6

Hello,

Here's one American who is appalled by his filthy mouth and immature insults. I haven't gotten involved with him simply because, in person, (and thank God I don't associate with him or know him) I refuse to engage in, or become embroiled in his trashy threads. I DO take umbrage at his insults towards Britain, and you must realize that a person of his low stature is not qualified to make statements of that nature. Walt Davidson was one of my first contacts in the British Isles, and altho I don't know him personally, I still consider him a friend thru Amateur Radio. I just finished an email to him expressing my outrage at Wiseman's attacks on him. But then, it is not difficult to see what sort of character this bugger is. Please do not judge all of us based on Roger Wiseman. I just don't wish to stoop to his level, and I surmise that many of the American hams just "killfile" his posts so as not to read his shocking, filthy posts. I don't read most of his crap. I only read this thread when he began to insult Walt, and, yes, it DOES anger me. I just won't allow the guy the pleasure of knowing it!

Personally, one of my favorite subjects is British history. My own family immigrated to America in the 1600's--both sides. So when somebody begins to put down England, I get upset. Finally, one of the things these lowlife, uneducated idiots like Wiseman forget is that, while we as countries don't always agree, Britain has always been America's best friend and has stood by us when world opinion was against us. Yes, our foreign policy is not always correct, and American citizens don't always agree with it. But no nation can survive without friends. And most of us consider Britain the best friend America could have anywhere. I think it is safe to say that if Britain were attacked, we would consider it the same as if Los Angeles were attacked. I think it is also safe to say Britain would respond to our aid if WE were attacked--at least, I, for one, hope so.

No matter what your opinion of us is, I wish you, both individually and collectively as a sovereign nation the very best, Godspeed, God Bless, and---

The very best 73,

4227. Incoming QSL Bureau question

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-15 00:59:42 UTC
From: Mike Barrett <zootv@mgfairfax.rr.com>
Message-ID: <3AB01382.42E58F71@mgfairfax.rr.com>
Source record: 92307

Hi, I was doing some research (finally) on the incoming QSL bureaus. It is my understanding that cards for me are sent to a specific local bureau and then divided further by my suffix. This happens whether or not I am an ARRL member. To retrieve my cards, I simply send a few SASEs to the bureau determined by my call area and suffix. Is that correct?

Thanks
Mike

Don't use the standard #10 envelopes, use 5 by 7-1/2 inch or 6 by 9 inch
envelopes. Your cards won't be folded up as they would be if the Bureau
tried
to stuff a bunch in a standard envelope. And yeahm, send enough postage
along,
the post office will help you with the rates, because it's charged by the
ounce.

[Looks like my NNTP server is screwed up, so this is a repost. Sorry if you see this twice. Please cc: to my e-mail, since I'm not sure how well my news will be functioning. I miss DejaNews... 73, KE1KD]

"HEY! An Icom IC-730 for only $100! Hmmm. Does that have 30 meters? How about a general-coverage receiver? It's all solid state, right?"

If you're like me, you've seen amateur radio equipment listed for sale and wondered exactly what it is. If you're lucky, the manufacturer is still in business and has specs for the rig on their web site. Often, though, you're not that lucky. (For the record, the IC-730 was an 80-10M, solid state rig that showed up just before the WARC bands. It would work 30, 17, and 12 meters with a simple "cut one wire" mod, and it didn't have a GC receiver.)

I would like to create a web database of specifications of used (and new, I suppose) amateur radio equipment. I have a bunch of spec sheets and old radio magazines as sources of information, and I'd like to solicit as much info as possible from the internet amateur radio community.

Before I create the database, though, I'd like input on what specs you'd like to see included. Here are my initial thoughts:

1. Manufacturer (Kenwood, Yaesu, Icom, Drake, Ten-Tec, Collins, etc.)

2. Model (TS-520S, IC-751A, FT-936R, AL-80B, etc.)

3. Class (for now just: transmitter, receiver, transceiver, amplifier)

4. Type (base, mobile, handheld)

5. Bands (1.8, 3.5, 7.0, 10.0, 14.0, 18.0, 21.0, 24.5, 28.0, 50.0, 144.0, 220.0, 420.0, 902.0, 1230.0, etc. or some such.)

6. Design (tube, solid-state, both)

7. Modes (AM, FM, USB, LSB, CW, FSK, etc.)

8. Power Requirement (13.8VDC/20A, 110VAC/3A, 220VAC/10A, battery pack, etc.)

9. Output Power (100W, 1.5W, etc.)

10. Dimensions (Height, Width, Depth, Weight)

11. Extended/General Coverage RX (yes, no, option, mod)

12. Keyer (yes, no, option)

13. DSP (yes, no, option)

14. QSK (yes, no, option)

15. VOX (yes, no, option)

16. Computer controllable (yes, no, option)

17. Frequency Display (digital, analog, or N/A [for amps])

18. Accessories (filters, power supplies, batteries, etc.)

19. Notes (stuff that doesn't fit anywhere else.)

I know this is probably missing lots of things that are important to you, so I need you to tell me what you'd like to see included. I'm not going to include a full spec-sheet (IMD, spectral purity, etc.) or review of the rigs, I just want to get enough info to help you figure out whether you might be interested in the rig and you'd like to contact the seller for more info. I'd like to keep the data to hard facts from the manufacturers datasheets, owners manuals, or printed advertisements, and probably leave out the anecdotal info like "blows filter caps if loaded improperly." That's partially to keep from starting flame wars, and partially to keep from getting sued.

So, what say you? Is this something you'd like to see? What specs would you like included? Are you willing to type in the specs from your owners manual?

73 de KE1KD,
Scott Babb

One doesn't jam the transmitter under "normal"
circumstances. It's the receiver that is usually
jammed.

> How does the person with the cellphone
> jammer know for sure that the jammer
> is only jamming frequencies only used
> by cellphones?

Let's clear this up. A "jammer" is a
transmitter. That's all. A transmitting
frequency is set on a "narrow-band" jammer
the same way it is with any other xmitter.

["Broadband" or "sweep" jammers are
generally only used on the battlefield.]

But jammers /are/ designed to defeat
reception and a lot of jammers cause
spurious emissions and they also,
generally, have filthy power supplies.

And that can get people killed if
there's even a tiny mistake made.

I'm looking forward, myself, to cafes
and coffee shops which advertise
themselves as being in Faraday cages.

Did you ever consider doctors that need to be contacted regarding their
patients medical emergencies? Probably not! Call Phone jammers are illegal
for a reason! Hopefully the FCC is monitoring this group.

4245. An ARRL letter that League members can use

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-15 06:52:44 UTC
From: cb-radio@arrl.org
Message-ID: <arrl_letter@get_the_message>

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.policy

ARRL members, Here is a letter that you can use and send to your ARRL section manager, Division director, and ARRL board of Director:

Dear (insert directors name here),

Why don't you wake up and pull your fucking head out of your ass? I am concerned about the quality of amateur radio operators, not quantity. If I wanted to listen to a bunch of stupid operators, I would listen to CB. Do us all a favor and propose something that will impove amateur radio, not dumb it down. Bring integrity and intelligence back into the amateur radio service. Thanks and 73.

(insert your name here)

I hardly know where to begin.

4248. AAVoice - digital voice of your radiostation

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-15 10:05:57 UTC
From: Alexander Anipkin <aia@fnmail.com>
Message-ID: <98q49f$311fs$1@ID-52750.news.dfncis.de>
Source record: 92225

Did you tire speak in to the microphone during 48 hours of contest?
Does your outraged neighbours knock on door of your shack?
Does your wife cover up her head with pillow during night in order to
doesn't listen how you call rare DX in pill-up?

Free yourself from problems - use the AAVoice!

Once saved several sound files into the computer you would able to finish
work telephone contests didn't say a word!

Download it ftom http://www.dxsoft.com/aavoice.zip (~600k)

More details http://www.dxsoft.com/miaavoice.htm

Actually, most sorters prefer a simple check.

They will buy the postage(Since it constantly increases) and envelopes as
needed,
out of your "account".

Now that we have sound cards and PCs connected to our radios, when will
the autotune routines go after our receivers for optimizations? That
could be pretty cool!

Dana wrote:

> [snip] the ham bands sounds just like the cb
> band. I have my extra ticket, and it makes me
> mad every time I listen to 2 meters [snip]

Then don't listen to 2 meters. Is there some reason you cannot turn the dial to another band? Are you disabled? Did you forget to read the owner's manual? If 2 meters is that bad, then go elsewhere. That shouldn't be too difficult for an intellegent person like you to figure out.

You know, I simply don't understand this animosity towards the newer hams. And that is exactly what this is (animosity towards the newer hams) because I rarely see such complaints about the many troublemakers on HF. It's not like the newer hams are taking anything away from the older hams (older as hams, not age). Before the no-code techs came, the 2-meter band was completely dead. There probably weren't 25 people in the entire country using that band on a regular basis, and the number of VHF ham repeaters could likely be counted on one hand.

However, now that the no-code techs are actually using the band, and have put all those repeaters up, the older hams sit around all day complaining. Its not like the older hams have lost anything - they still have all their HF frequencies. And absolutely nobody is forcing any of these people to listen to the 2-meter frequencies. So I just don't understand what all the griping is about.

Perhaps there is some strange twisted logic at work here. Can you explain it to me, Dana? If you don't like the 2-meter band, and nobody is forcing you to listen to it, then why do you sit around listening to it (like you claimed you did above). More importantly, why do you sit around complaining about it when the situation is so easily solved (don't listen)?

If your agency or department uses crappy or worn-out equipment, why
stay? Pensions are portable now, aren't they? What is your union
doing about working conditions? Why are you paying them dues if they
aren't fighting for you? And as someone else pointed out, since you
are your own boss too, why aren't you doing something about it?
Pensions, I'll never retire after 20 or 25 years with 2/3'ds pay and
3/4's medical benefits or after 30 with 3/4's pay and full benefits.
Also, to get back to the topic of comms, isn't everything you say or
do on duty a matter of public record? I can understand the use of
secure comms for certain types of operations, but for patrol or
traffic duty? Most shit'ems and assholes can't figure out how to make
an honest living, never mind figure out a scanner or talk groups in a
trunked system. The bad guys who can probably won't come to the
attention of the officer on the street. Don't let this make you think
I am hostile to the job or the people who do it. I just think that
the entire system needs to be audited and open to public scrutiny.
This goes double for the politicians, who also work for all of us, and
need to be reminded of that fact.
Ken, you're not my friend, Captain Cully, are you?

Russ

Hi Mike -- you are correct except for maybe the SASE's -- mine were returned stating wrong size despite the advice on the ARRL page -- so just supply them with a money order or a check. Or write them first to see what they require.

All about the ARRL Incoming "Burro" at URL:
http://www.arrl.org/qsl/qslin.html
And they do state "The service is free; ARRL membership is not required."
Your ham district is listed there as well.
May all your QSL's be reciprocated

Maybe what we really need to develop is a cellphone *detector*. Something
that looks like a metal detector, but serves to ring any cellphone within a
2-meter radius. You have to go through to get into the theater, and if you
ring on your way through, you don't get in...

I suppose a simpler alternative is to require anyone whose cellphone rings
during a performance to reimburse the rest of the audience's tickets...

>doing about working conditions? Why are you paying them dues if they
>aren't fighting for you?

The police union (PBA) is doing something about it. They are complaining as they have for the last thirty years or so. And if nothing is done by you people, they will complain more. In fact, that is precisely what I am doing now.
Police Officers as you are aware, are not allowed to strike or conduct job actions. If they do so, they suffer the penalty of dismissal. (NYS Taylor Law)

>And as someone else pointed out, since you
>are your own boss too, why aren't you doing something about it?

I never said I was a boss, you did when you wrote:
"Remember for whom you work. We pay your salary. WE OWN every piece of equipment you use or touch. We should be the ones to decide if your comms are encrypted."
So you are also responsible for improving the shoddy equipment the police have to use - including your lousy radios.

>Pensions, I'll never retire after 20 or 25 years with 2/3'ds pay and
>3/4's medical benefits or after 30 with 3/4's pay and full benefits.

Neither will police officers, at least here in New York State. It's 20 years with half pay here. And the medical benefits are the results of collective bargaining.

>Also, to get back to the topic of comms, isn't everything you say or

Yes, everything spoken or digitally transmitted is saved on
tape to be used for supervision as well as evidence in any court. Our
radios include programmed buttons for things like requests for
personal, request ambulance, request for assistance, officer needs
help, etc. There is no way of "hearing" these transmissions but they
are recorded somehow at communications. Use of verbal profanities is
cause for loss of pay so cops are very careful what they say.
In 34 years of police work, I got my only R&R conviction for
"innapropriate communication". I was assigned to an aided job two
precincts away from my own on a busy Friday evening in a one-man car.
When I requested directions to the location, before CB could respond
another operator in RMP ___ said, "It's east, Kenny." Which was a
flippant remark. My equally flippant response was "So's France." Of
course a two-star chief heard my response but not the other cop's and
directed a Sergeant to write me up. When I got called in, I was shown
a transcript of the tape and had to sign the "bitch book" which
details minor offenses and was fined four non-paid work hours to be
served after my regular tour. If I had used a profanity, I would have
been really ripped, probably two days pay or more.

news:3ab0c418.1652890@news.mindspring.com...
> If your agency or department uses crappy or worn-out equipment, why
> stay?

I've seen one department, just one, in this area (Los Angeles and Orange County) which has good equipment. It wasn't Beverly Hills either, although their stuff isn't bad.

In the last few years, I personally have spent about $3,000 on supplies, equipment, and other stuff strictly for use on the job. That's because I buy good stuff real cheap. Brand new, this stuff would have cost about $8,000.

This wasn't a bunch of fancy toys, either. Things like a voice recorder, to keep the liability low, and a small GPS capable computer for navagation when I travel, cell phone, and a host of other stuff that saves me time and saves YOU, the taxpayer, much money.

I just got my replacement baton. It's some kind of cheap imitation of the ASP expandable baton. Looks like crap, feels like crap, and it probably saved my agency $3...You know, lowest bidder. I'll use it for training, and buy a real ASP that'll cost about $70, and I won't have to worry about it falling apart or not opening when I really need it. This doesn't even faze me, although I sure had much better plans for that money. ;-)

> Pensions are portable now, aren't they? What is your union
> doing about working conditions? Why are you paying them dues if they
> aren't fighting for you?

Unions in jobs like these, police, firefighter, can, when working conditions are poor or when we are getting screwed in some other way, file paperwork. That's it. Type out a memo, place it on a desk. If it doesn't get fixed right away, they can...type out a longer memo, place it on a desk. If absolutely nothing gets done, reprisals take place, people get fired...well, type out a really long memo...

Can't go on strike. That's really the only teeth a union has. So no, there isn't much the union can do for us.

> And as someone else pointed out, since you
> are your own boss too, why aren't you doing something about it?

I don't know who pointed that out, but they were mistaken.

> Pensions, I'll never retire after 20 or 25 years with 2/3'ds pay and
> 3/4's medical benefits or after 30 with 3/4's pay and full benefits.

You also probably won't retire with bad feet, back, and whatever else gets beat up, shot or stabbed while chasing bad guys.

> Also, to get back to the topic of comms, isn't everything you say or
> do on duty a matter of public record?

No.

> I can understand the use of
> secure comms for certain types of operations, but for patrol or
> traffic duty?

If you get pulled over, do you want all your personal info going out to every kid with a cheap scanner? If your daughter gets hurt, do you want her personal info going out all over?

If a cop gets hurt or killed due to an ambush or the bad guys know they're about to be raided, do you want to pay his life insurance and possibly lawsuit settlement, plus the cost of recruiting, investigating, hiring, and training, both at the academy and OJT, of a new police officer to replace him or her? If memory serves, it cost about $15,000 to get little old me on the job, before training. That's about middle of the road for a federal officer.

> Most shit'ems and assholes can't figure out how to make
> an honest living, never mind figure out a scanner or talk groups in a
> trunked system. The bad guys who can probably won't come to the
> attention of the officer on the street. Don't let this make you think
> I am hostile to the job or the people who do it. I just think that
> the entire system needs to be audited and open to public scrutiny.
> This goes double for the politicians, who also work for all of us, and
> need to be reminded of that fact.

I don't have a problem with the public seeing and hearing what I do and how I do it, as long as:

It doesn't create a danger to me, my partners, or the public.

It doesn't violate privacy, either mine or the public's.

It doesn't interfere with my job.

That's about it. Short list, not unreasonable, and pretty much applies to anything else in law enforcement.

Unsecure communications have all the above faults. While it may be in the public interest to be able to monitor what we say, that interest wouldn't be served unless ALL three conditions above are met first. Our first job is to catch and keep bad guys, not put on a "show" for taxpayers.

There are other ways to see what police do. Aside from actually watching them, which is pretty easy as they stand out like sore thumbs, you can go on a ride along, tour local jails and prisons, and just flat out ask "What do

you do all day?"

If you stick around in this newsgroup, you'll get some insight you won't find by asking a cop on the street. As some officers here are retired, and others, like me, use an alias, we can speak more freely, without worrying that anything we say will be thought of as to represent our department views and policies. In other words, you don't get politically correct happy speak, you get the down and dirty facts.

There frequently is personal information being sent over the air about rape and robbery victims. I don't think you really want that kind of stuff being monitored by pimply-faced kids using scanners, especially if the victims are family members. And of course disclosure of personal information regarding victims is illegal but isn't that what happens when someone listens in to those transmissions? There has to be a happy medium somewhere in all this.

> Its not like the older hams have lost anything

They are losing, or lost, the PR battle that every no code Tech has a
burning desire to get on H.F. A surprising number of Tech class operators
don't care for H.F. much. I would dare say that some of the new Hams don't
even consider access to H.F. as the "crown jewel" of Ham Radio any more.

> - they still have all their HF frequencies.

And some like to go out of their way to tweak the noses of no code Techs
about too.

> And absolutely nobody is forcing any of these people to
> listen to the 2-meter frequencies. So I just don't understand what all
the
> griping is about.

With more things to do on V/UHF the lure of H.F. has declined a bit. As you
pointed out, in the past with little use of the V/UHF bands, a Tech class
had few choices for stations to work. That's now no longer true.

> Perhaps there is some strange twisted logic at work here.

Yup. The Tech class people are having fun, and some of the OTers are really
bugged about it.

There is a webpage devoted to the 4th area QSL Bureau at:

http://www.qsl.net/sterling/QSLBuro4.html

This particular bureau does not sell envelopes, so you will have to
provide your own. See the webpage for details. Keep in mind the 4th
area Bureau is divided into single letter prefixes and two letter
prefixes (yours). Be sure you address your stuff to the correct one.

Take your medications, relax and then re-read what I wrote.

Pay particular attention to my next to last para which I shall re-quote for you in case you have problems with being able to figure out which is the next-to-last paragraph:

">> And that can get people killed if
>> there's even a tiny mistake made."

And then I advocated Farraday cages.

Do you know what a Farraday cage is? From your rather silly response, it sure doesn't appear so.

As far as the FCC goes, you really need to learn what the FCC does as, apparently, you think they're some sort of agency which polices what people say about communications. There are resources available on the World Wide Web that will help you understand. Plus, almost any ham radio operator can explain the FCC to you in detail and nearly all of them will - if need be - speak very, very slowly.

When you type: "Call Phone jammers are illegal for a reason!" (what's a "Call Phone" anyway?), I would suggest that you remember that this isn't the "United States' Wide Web" nor the "Jim Wayda Wide Web" but the World Wide Web.
I would suggest that your statement "Call Phone jammers are illegal for a reason!" would be less ignorantly phrased as "Cell phone jammers are illegal in the United States for a reason".

Incidentally, I would never exaggerate my own importance by crossposting a message across a number of newsgroups ("I am important. hear me roar").

However, I shall answer this message by using the newsgroups in which you mega-broadcast your silliness, you supercilious twit.

You did a very fine job of bringing to light the many draw backs to 800 Mhz. trunking systems. One of the big problems with dead spots, that you started to point out is with Nextel. The Nextel sites are cause of problems to many public safety radio systems.

What is actually taking place is front end over load of the radio receiver. The newer portable and mobile radios that are being used in the public safety systems are part of the problem. The IF band width in them is not sharp enough to reject the strong off frequency signal from the Nextel tower site. Some of the older radios had a much better receiver in them and as such, the interference was not as noticeable.

If you start to do some checks on the radio system coverage, I think you will find that some of those holes are within a half mile or so radius of the Nextel tower location.

I have been told, that in most cases, the Nextel Rf engineering people will try to work the problems out. If you don't get a solution from the local people, try getting to the corporate office in New Jersey.

As long as the FCC allows the Public safety and the Nextel frequencies to be next to each other, these problems will continue. Maybe the move to the 700 spectrum might solve these problems. Only point to be made, is that it will do nothing to the multitude of existing systems in the 800 spectrum. All those systems would have to be changed out to get away from the Nextel problem. Not a very good move for the buck.

Maybe a better move would be to turn all the political power the public safety can muster and attack the problem in a different direction. Turn the political pressure on the FCC and congress. Most people forget that the FCC gets it directions and funding from the people in washington. Get these Washington paper pushers to start to understand the safety and finical problem that Nextel and the FCC have created.

Great on wanting to advance. Learning Morse can be easy.
The key is not so much how long your practice sessions are but
that you do practice every day.

bip is program which will work on unix-like systems, should
you have access to one. I work at a military comm center in the
Atlanta area, and we have had success using this program to teach
Morse to people with no prior experience. Most students, within
3-4 weeks, are at the 5 wpm level, with daily practice.

When I worked at Intel, a group of us would camp out together. We would
meet at a preset place on a Saturday morning, decide where to camp out,
and head out at a preset time. Somebody was always late and out of range
of CB radios. I talked the entire group into getting their Tech licenses.

We then used a mountain-top repeater to keep in touch with the late
comers and direct them to the camp site. It worked out well but only
a few of the campers saw any use for HF. After all, they had given
up their CB radios and gone to the trouble to obtain Tech licenses
because HF couldn't perform the required function.

You should do extensive reading and research, if you've
never worked with phased arrays before. I have had some
limited success with them, but then I am not an expert on the
subject. Watch your velocity factors very carefully on the two
downleads and the phasing line. The military still uses phased
arrays in certain limited special applications, so they are a
time-tested proven design. Good luck.

Everyone knows that public safety comes first, so I really doubt if the
local people would ignore you. Nextel has been know to keep cell sites
turned down that were proven to interfere with public safety. Most of these
were frequency related, and not technology related.

Our 800 MHZ trunking system had the usual problems when it was being
installed and activated for the first times....but we have had very few
problems. I like it a lot better than our old analog system.

W9WI said:

> Maybe what we really need to develop is a cellphone *detector*.

They already exist. Simply an alert receiver which looks for cell device transmissions such as "auto-registration" signals, and lights an LED or sounds
a buzzer. Commonly used in 'secure' conference rooms, cardiac care units, and similar environments, where sensitive conversations take place, or where 'EMI' from the cell phone transmission could upset sensitive electronics in patient care equipment, avionics, etc. Because they have no audio detection/amplification stages and therefore cannot 'listen' to the conversations, they apparently slide under the radar of "no monitoring of cell phone freq" rules.

HAMFEST/COMPUTERFEST CALENDAR 2001 - ILLINOIS
last updated February 4, 2001

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Ralph Zancha, and ARRL for providing some of the information.

MARCH 2001

Mar 4 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Mar 4 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM.

Mar 11 (Sun): Tinley Park, IL - Giant Computer Show & Sale (see below). Tinley Park Convention Center, 185th St. & Harlem Ave. 9:30 AM - 3 PM.

March 25 (Sun): Grayslake, IL - Lake County Fairgrounds. North Shore Radio Club (formerly LAMARSFEST.) http://www.ns9rc.org. ALL INDOOR, Radio, Electronic and Computer Swapfest V.E. Testing 9AM to Noon, Door Prize Drawing Every Hour, Admission $6 at the gate / $5 in Advance. Door Open at 8 AM. Set-up at 6AM. Vendors may set up on Saturday 3/24/01 Set up hours to be determined, probably noon till finish. Free Parking. Cafeteria Open. Talk-in Simplex 146.52 & NS9RC Repeater 147.345 +.600. No sales of firearms or food products will be allowed.

APRIL 2001

Apr 1 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM.

Apr 1 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Apr 29 (Sun): Arthur, IL - Moultrie ARK. 8AM - 1PM. Info: Ralph Zancha, WC9V, PO Box 55, Lovington, IL 61937. Daytime phone 217-543-2178 evening 217-873-5287. Email: rzancha@one-eleven.net Or write to M.A.R.K., P.O. Box 91,

Lovington, Illinois, 61937.

MAY 2001

May 6 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

May 6 (Sun) - Sandwich, IL - DeKalb Hamfest. Sandwich Fairgrounds (intersection of Suydam and Gletty roads). 8AM - 1PM. 3 indoor buildings. Admission $6.00. No VEC testing. Talk-in on 146.730/- or 146.520. Info: W9ICU at (815)895-3310, email w9icu@home.com. http://tbcnet.com/~jleonard/hamfest.htm (small to mid-sized hamfest. Nice drive in the country. Good restrooms. -AJ9S)

May 27 (Sun): Chicago, IL - Chicago ARC Hamfest. DeVry Institute of Technology, 3300 N. Campbell, Chicago, IL. 8 AM - 2 PM. setup at 6 AM. Indoor/outdoor flea market. Free parking. Tickets $5 at the door. Outdoor fleamarket space is free. Indoor table space is $1.50/ft. Info: George (773)545-3622 or Dean (708)331-7764 or write to CARC, PO BOX 410535, Chicago, IL 60641-0535.

JUNE 2001

Jun 3 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Jun 3 (Sun): Princeton - IL Starved Rock RC. Bureau County Fairgrounds. Exit 56 from I-80. Admission $7 (ouch!) at gate. Talk-in 146.955, -600, PL103.5 Hz. info: tel. 1-815-856-3773, (Usually an excellent hamfest. Unlimited space outdoor flea market, some indoor space, though few big name commercial vendors. Crude restroom facilities. - AJ9S)

Jun 10 (Sun): Wheaton, IL - Six Meter Club of Chicago. DuPage County Fairgrounds. 2015 Manchester Rd (north of Roosevelt Rd, east of County Farm Rd). Gates open at 7 AM, buildings open to public at 8 AM. Admission $6. VE testing. Talk-in on 146.52 and 146.37/97 (107.2 Hz PL). Info: http://cyberconnect.com/orion/hamfest.htm or contact Joseph Gutwein, WA9RIJ, 7109 Blackburn Avenue, Downers Grove, IL 60516-3925. Tel: 708-442-4961 . Email: wa9rij@mc.net

JULY 2001

Jul 7 (Sat): Oak Creek, WI - South Milwaukee ARC. American Legion Post 434, 9327 South Shepard Ave. Admission $5. Starts at 6 AM. Talk-in 146.52 MHz (WA9TXE). Info, call (414)762-3235.

Jul 8 (Sun): Peotone, IL - Kankakee Area Radio Society, Will County Fairgrounds. I-57 to Peotone exist 327 (East). Free parking. Talk-in 146.94 MHz repeater. http://www.w9az.com.

Admission $6. Info: Chip Moore, K9IOC, 289 S. Euclid Ave., Bradley, IL 60915. Email: karsfest@yahoo.com

Jul 15 (Sun): Washington, MO - Zero Beaters ARC Hamfest. Bernie E. Hillerman Park (Washington Fairgrounds) Free parking. Free admission. VE exams. Talk-in on 147.24 MHz repeater. Info: Keith Wilson K0ZH (636)629-2264, fax (636)629-1196. Bob Goza W0BOB (573)484-3718, w0bob@arrl.net. http://www.yhti.net/~w0bob/zbarc

Jul 22 (Sun): Sugar Grove, IL - Fox River Radio League Hamfest. Waubonsee Community College. Rt 47 at Harter Rd. Admission $5. http://www.frrl.org/hamfest.html (good, small to midsized hamfest. Easy parking. Modern restroom facilities. - AJ9S)

AUGUST 2001

Aug 5 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Aug 12 (Sun): Peotone, IL - 67th Annual Hamfesters Hamfest. Will County Fairgrounds. 45 mintues from Downtown Chicago, take I-57 to Peotone Exut 327 (East). 35 acres of free parking. 14,200 square feet of exhibits open at 8 AM. Flea market open at 6 AM to 3 PM. No additional charge for flea market space. Rain or shine -six covered pavilions for Flea Market. Tickets are $5.00 in advance with double stub, $6.00 at gate with single stub. Children under 12 free. Advance ticket sales and information: SASE and check by July 25th, Robert Nelson, WB9FWR, 1720 Vollmer Rd., Flossmoor, IL 60422. (708)756-7984, email WB9FWR@aol.com. Talk in on 146.52 simplex and 146.64-(107.2) Stars Repeater

Aug 26 (Sun): Joliet, IL - Bolingbrook ARS Hamfest. Inwood Recreation Center, 3000 W. Jefferson St (Rt 52). Outdoor flea market setup at 6 AM. Admission $5. VE testing. Talk-in 147.33+ MHz and 224.54- MHz repeaters Info: Tom Ballard N9LJY, (630)739-3740. (Small to midsize hamfest with good restroom facilities - AJ9S)

SEPTEMBER 2001

Sep 2 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Sep 22 & 23 (Sat & Sun): Grayslake, IL - Chicago FM Club Radio Expo. Lake County Fairgrounds. Admission $8, good both days. Ladies program - Arts and crafts. Grounds open Thursday at noon. Flea Market open both days at 6 AM. Exhibit buildings open Sat 8 AM - 4 PM and Sun 8 AM - 3 PM. VEC testing. Free camping and parking. Talk-n on 146.16/76 MHz (107.2 Hz PL). Info: http://www.chicagofmclub.org.

Tel: 630-628-1501 (the biggest and best hamfest in northern IL - AJ9S)

OCTOBER 2001

Oct 7 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

NOVEMBER 2001

Nov 4 (Sun): Davenport, IA - Davenport Radio Club. Iowa National Guard Hanger, Mt. Joy Airport. No tailgating. Talk-in 146.88 MHz repeater. http://www.gwltd.com/hamfest

Nov 4 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

DECEMBER 2001

Dec 2 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

COMPUTER SHOW NOTES

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Tinley Park Civic Center, 185th St. & Harlem Ave., Tinley Park, IL or at the DuPage County Fair-grounds, County Farm & Manchester Rds., Wheaton, IL. Admis-sion is $6. for adults and children under 12 get in free. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer expo. The event is held monthly from 9:30 AM to 4:00 PM. Admission is $6 with free parking. This show features com-puters, supplies, games, parts, software, accessories, CD-ROM, monitors, diskettes, printers, keyboards, modems, disk drives, cables, expansion boards, services, etc. Held in the Ballroom of the Holiday Inn, 6161 W. Grand Avenue, Gur-nee Illinois. For info, visit the web site at http://www.ccxpo.com.

4282. FQF's Character

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-15 20:20:42 UTC
From: "Public <Anonymous_Account>" <remailer@anon.xg.nu>
Message-ID: <64f0afcd725a32ff3b1eaf37a838c6d8@anon.xg.nu>
Source record: 92229

Polly, FQF, has opened a discussion on character. Here's a summary
of Polly's character:

Jammed for 12 years on 14313 unidentified, saying only one phrase, Herbie
number one, ad nauseam.

Jammed 3901 with LLI for 5 years, using 2kw to talk to LLI who was
across town from Polly, whole purpose was to jam Dan, W4NTI

Started the Stumpjumpers, an organization of white trash whose whole
purpose was to worship Herbie and conduct a campaign of malicious
jamming on the ham bands.

And Polly talks about character, ha ha ha ha ha ha ha ha ha ha ha ha ha

Different definition of 'tuning', John. The earlier discussion is about finding a adjustable matching network's setting which results in the best match for an unknown load. Tuning a receiver is actually an altogether different process.

If you are receiving AM, the carrier can be recovered via any of a variety of synchronous reception techniques and tuning with as much precision as you want is simple. Phase locked loops work well too.

For CW, a raft of methods are available too. In either case, ignoring spurious signals is the trick, not tuning once the desired signal is identified.

For SSB, automatic tuning is more challenging. With ACSB (amplitude compandored sideband), a pilot carrier makes it easy. For general SSB, I'd lean toward speech compressing algorithms to extract the speech parameters and try to determine the tuning offset from there. Definitely DSP time - which, as you say, a soundcard and software could do. But isn't it a bit of overkill?

A stable receiver local oscillator and backlash free tuning makes manual tuning both easy and satisfying, at least for me. Especially for weak, fading, or partially buried signals. I suspect that automatic tuning will have a way to go to beat the human ear here.

At least that's my guess. More power to anyone working to prove me wrong!!

Yes, we need a cell phone detector.
That way, in cases like a movie theater, we can jam the cellphones ourselves.
Jam it up their butts that is. :)

Disclosure generally means to a third party. Why is personal information about victims being broadcast on the radio? I can see DLs and tag numbers, but why personal information, or detailed info about the crime. That should be in reports that can be shielded until adjudication. Names, addresses and DLs are public information. SSNs should not be divulged under any circumstances. You (even in your official capacity) will not get my SSN unless I am compelled judicially. Unless, of course, you are going to withhold taxes from my pay or extend credit to me!

Anyone ever perform the extended range tx modification on the radio. I opened up my radio and followed the instructions according to those posted on the QRZ website and I am not sure where the diode is that they are talking about. Is it the surface mount component just below the (D16) label or is this diode supposed to be to the left of the label where the white brackets are? Incidentally if there is no component where the brackets are, it came that way!

Calls like this are generated every day in every busy
jurisdiction: A 911 operator gets a call from a woman who says she has
just been raped by a man wearing a mask. She says she lives at 100
Main Street and saw the man walking slowly down the street eastbound.
The 911 op then fills out a card and it goes to the
communications dispatcher.
Dispatcher broadcasts an assignment to several patrol units

with the address of the rape victim and description of the
perpetrator.
Now while the officers respond, 15 year old pimply-faced
Roger, who is armed with a scanner, has the information that a woman
was raped at 100 Main Street. It does not take long for Mr. Roger
Pimples to find out who lives there and he sends obscene mail to her
or calls on the phone to ask how it felt.
Don't laugh, this happened in this news group
(alt.law-enforcement), in a way. A woman admitted being raped,
divulged her address to someone she thought was a real cop via e-mail,
and since then she has been getting repeated obscene phone calls from
the scumbag.
Now I will give you the opportunity to tell us how that
information can be kept off the air by Communications Bureau, and
still be able to dispatch units to the correct scene of the crime
without delay so they can assist the aided person, look for the rapist
and initiate an investigation at the scene.

Would work for me, luv it! I've actually experienced the problem.
Popped $110 for a couple seats at the Philadelphia Academy of Music to
take in what I thought would be a nice Saturday nite with Swallisch
and the Philadelphia Orchestra. Dontcha just know some asshole nuevo
yuppy two rows back got on his cellphone FOUR times during the
concert? Answered two incoming and initiated two outgoing calls and
yakked his brains out about his Sunday golf outing. People left in
disgust. He din give a shit. Prolly drives an Expedition, too.
>
I think the Academy seats something like 4,000 and it's always sold
out. If we assume a $55 bucks a pop per seat that dipshit's fine for
using a cellphone during a concert works out to something like getting
tagged for $220,000 for yakking abt his golf date.

It made a pretty good market on Ebay.

> I'm just not intersted enough. Also, as another
> poster pointed out a few days ago, digital radio and encrypted,
> digital radio aren't that secure against a determined attack.

The technology exists, as the military uses some pretty mean encryption on
some of their systems. It's cheap, too. The only reason it's not available
to law enforcement or the public is, well, they like to keep their toys to
themselves...and the whole national security thing.

> If
> someone REALLY wanted to know, they could. The equipment and
> techniques would spread like hacking information.

This is true, but at what cost? What I'd settle for is where getting the equipment together and using it is more of a hassle than just following us around and using unidirectional mics to pick up what we're saying. Having a fairly long encryption code that's changed often would do a lot to keep this info private.

> Anyway, we agree to

That's breathtakingly incorrect. The no-code Tech license came to be in 1990. The 2-meter band has been home to thousands of repeaters and a huge amount of activity since the late 1960's. I'm sure plenty of no-code Techs have participated in establishing and maintaining repeaters during the last decade, and more power to them. But the amount of activity at VHF and above prior to that was tremendous, and to say that VHF repeaters exist because of no-code Techs is just a complete distortion of history.

Does anybody know the procedure for having an individual removed from the news groups if they are as caustic as this "gentleman"? This type of abuse and attacks are totally uncalled for. It is one thing for people to have a little fun with matching barbs but this individual and others are stretching the avenues of freedom of speech beyond civilized limits. How dare he be allowed to character assassinate with the ugliness of a devil. There must be a place to report him besides the "abuse" center.

And One does not expect to produce quality anything by sending such garbage to the FCC or the ARRL. W9FPJ

In article <3ab5cfd6.7342840@news.speakeasy.net>, Ken4bikes@usa.NOSPAMnet says...
>
I really wish you and the rest of the cops in this country would just be honest with the American people.
You have no obligation (or ability) to protect the individual.
Your "duty" is to to "society". IE your bosses and the "public good".
We need a lot less police.
We need people to protect themselves, their property, their family.
And not depend on the false promise of "protect and serve".
If you are unwilling to have public comms, comms that are RECORDED and can be accessed by everyone in a community then leave.
Get a real job.
Do not expect many of use you have had any dealings, or who have monitored your rogue brothers to respect you clowns. From a poor balck guy in NYC with a toilet plunger shoved up his anus, to another poor black guy blown away buy wome of NYCs finists, who could net tell their own bullets were bounncing back at them, to the Rampart murderers the nation is ful of bad, studip or corrupt cops. Too many only want "Secure" comms so they can hide thier criminal actions from the public. The very people they profess to protect.
Rampart, NYC, New Orleans the list is nearly endless.
I repeat, "good" cops become bad cops when they refuse to stop their fellow officers, fail to report and testify against their many criminal activies.
Or are you going to claim that any cop with half a brain did not know who the really bad cops were in the Rampart LA unit. And did nothing. Cops defend cops. Even the evil, dirty, and bad cops are a central part of your brotherhood.
Again, if you do not like the working conditions, leave.
Give up the "power", the ability to play God, to push the little guy, or gal around. To extract vengence for any percieved lack of respect. I have monitored LEO comms for over 35 years. And every unit that I have monitored is full of swaggering scum. And that is MANY agencies. Over many years.
The bully becomes the cop. Various state, city, county and federal agencies.
It has been a lot of fun monitoring their "secure", ie out of band(ham/frs/cb), and cell comms.
You are not my friend, you are not my protector.
You are a big part of the problem.
And remember the cop mantra, "The world can be divided into three groups, suspects, cop's family and cops". I first heard this quote at a police training facility.

One of the big problems with dead
>> spots, that you started to point out is with Nextel. The Nextel
>> sites are cause of problems to many public safety radio systems.

>And where is your proof.

It is obvious from your comments you have absolutely no technical idea what this discussion is about. It is widely known within the Land-Mobile industry that the proliferation of cell sites, and most specifically, Nextel sites, is causing widespread interference to Public Safety Radio systems. The Press has generally ignored or been unaware of this. That seems to be changing.

For reference, see the USA Today article:
http://www.usatoday.com/usatonline/20010312/3129392s.htm

For those working the amateur satellites, an autotuning sheme would be a plus.
I would love to see a means of correcting doppler at post detection.

How often does it happen that information like that is broadcasted? Like I said, every day where I worked. And every day somebody is listening in and taking down information that can be used against the victim. I would love to prosecute the crimes committed by stalkers like pimple-face and the police certainly do so. But for every guy like that that gets locked up, there are many more the cops can't catch because they are cautious and are not fooled by phone

traps.
Sorry, but I really don't care as much about any potential
climate of suspicion as I do for the rights of the victims. If secrecy
is the price of their protection, so be it. I'm on that side.
Regards,
Ken (NY)

Around here the cops have mostly switched over from the old system to a new spread spectrum system, more for performance than to evade scanners, although that's a byproduct. (The old system was so bad that a cop in a foot chase ended up having to call 911 on his cell phone for backup because his radio was useless).
Similar to the argument over whether radar detectors should be illegal, or whether you have the right to use a passive receiver or not just because the police are using that frequency for something.

Cells also cause alot of traffic accidents.
In Germany is is law that your cell has to be in holder and not in your
hands while driving

CT. That's what all the articles in the papers said when they switched over; ayear or maybe a bit more ago. I personally haven't seen the equipment so can't say one way or the other. You sure can't pick them up on the scanners anymore, except some of the smaller town where I guess they didn't switch over.

So Vince, during an emergency, are you and your family going to refuse
to be saved by an amateur radio operator who doesn't measure up to your
standards for quality? As far as emergency amateur radio operators go,
seems to me that halitosis is better than no breath at all.

Date: 2001-03-16 14:59:52 UTC
From: oldbooks78@aol.com
Message-ID: <20010316095952.04375.00000448@ng-mq1.aol.com>
Source record: 92090

I currently have for sale the following old books about Radio:

"Basic Radio; The Essentials of Electron Tubes and Their Circuits" by J. Barton Hoag, published in 1942 by D. Van Nostrand. The 379 page hardbound book is in very good condition, clean with no page tears or pen marks except for a previous owners name inside the front cover. Solid binding. Available for $10 plus $2 postage (book rate within the US).

"Radio Operating Questions and Answers" by J.L. Hornung, 10th edition, published in 1950 by McGraw-Hill. The 588 page hardbound book is in about very good condition. Clean with no page tears or pen marks, and a strong binding. The cloth covers scuffs and wear, but no tears in the cloth. Available for $7 plus $2 postage.

"Radio Fundamentals" by Arthur Lemuel Albert, published in 1948 by McGraw-Hill, first edition. The 595 page hardbound book is in very good condition, clean with no page tears or pen marks, and a strong binding. Nicely illustrated. Available for $10 plus $2 postage.

Or, all 3 books for $25 post paid. If interested in any of the above, please email to "Oldbooks78@aol.com" to reserve. Thanks, and best regards.

Dave

4333. FA Drake R4-C and AC-4, ending Sunday PM

Hi all. Just a notice about two auctions on Ebay that I'm running:

Drake R4-C.
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1221376865

Drake AC-4
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1221393733

As always with my auctions, they are both satisfaction guaranteed.

Thanks for your interest;
Neil, K1VY

I wish all that bleed over would bleed over into my cell phone where it belongs as cell phones pretty much suck
unless you are in an open field, at about 1/4 mile from a cell tower, sitting perfectly still.

4337. Save the ionosphere

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-16 18:47:37 UTC
From: K0HB@arrl.org
Message-ID: <98tn49$fn7$1@news.netmar.com>
Source record: 92324
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

About twenty-eight years ago on August 4th, 1972, the Ap index hit 223,the ionosphere was bombarded with all sorts of solar particles with hard-to-pronounce names, and amateur radio was at it's peak. It has never been that good since.

Also, on that same date, titanium dioxide was first released in a commercial product. It has led inexoribly to the decline of amateur radio as we know it. Titanium dioxide is directly responsible for the decline of the Ap index, and the resultant decline of amateur radio. It has also led to a horrible decline in well tanned girl torsos at the beaches of the world.

In the late 60's a group of induhviduals who were rankled by the advent of incentive licensing looked for a way to ruin propagation and thus amateur radio forever. Since propagation depends on a solar component known as freckles-del-sol (better known as sunspots), a means of stopping sunspots would destroy would destroy amateur radio.

The group discovered the sun-blocking power of a natural chemical called titanium dioxide, but they needed a way to deploy a thin mist of the chemical into the upper reaches of the earths atmosphere. Since it could be dispersed by evaporation, these diabolocal fiends found the perfect means of sending it skyward.

First they quietly obtained virtually the entire world supply of titanium dioxide, and then they started a rumor in the medical world that the tanning rays of the sun could actually be harmful. Incredibly, in 1972, people would believe anything.

Literally millions of bikini clad ladies, even on Gilligans island, were panicked! After all, it was August, the height of the swimsuit season, and most of them had not nearly amortized their investment in the latest Jantzen bikini, or partial bikini. What could they do?

Meanwhile, the titanium dioxide Cartel had formulated a mixture of their chemical and coconut oil and put it on the market as not only a sun-blocker, but also a means of replenishing critical skin oils depleted by exposure to the sun.

Millions of bikini-owners flocked to purchase the new sun blocker, spread it lavishly on their bodies, and returned to the world beaches. Little did they know the horrible ravages they were inflicting on the E and F layers of the ionosphere, as the gruesome chemical evaporated from their skin and rose into the skies of the world,

from whence it ruins propagation on a global scale.

Hams, UNITE! Help take back the ionosphere! Be part of the solution,
not part of the problem. Visit your local beaches today and check
the skin of everyone for traces of this harmful solution. It can be
easily detected by it's characteristic coconut smell, and even small
concentrations are dangerous. Carefully sniff all bodies on the
beaches for traces of this chemical. If detected, throw the offending
person in the water to dilute the effects, and burn on the spot
any garments known to be contaminated.

Save amateur radio....

.....to the beaches, now!

Small towns have way too many police and the big cities have way too little.
I suggest all the small town, pot belly bubbas all get transferred from their duties of making money for the city by pulling over everyone who speeds in their insanely unfair speedzones (which they can't obey themselves when they are off duty) and go to the cities and kill a few drug dealers, gang bangers, murders and rapists for us.
As far as racial profiling, hell yeah, there is a reason more black people get pulled over, because they are more likely to be up to something other than going to a church function.

There are 6billion people in this world.
There is always going to be some idiots out there who will do these stupid things.
Consider the amount of people in this world compared to the amount of incidents of these rare things happening and you realize how lucky you are that it doesn't happen more often.
It's all how you look at it and I know you cops like to look at things in worst case scenarios
and the negative part of everything.
As far as laughing, I don't find that incident funny at all, but it doesn't mean billions of dollars
should be spent to upgrade all the nation's systems so us handfull of people can't monitor your job performance and your serving us, the public. Also, you need to realize that what makes
you cops and firemen and so on is the same reason we like to listen to our scanners.
We all like excitement and to feel "official".

Get a digital phone. I used mine once on a cruise in the Gulf of Mexico (I figured we were around 120 miles off of Key West at the time) and it was clear as a bell. It didn't work the closer we got to Cuba so my guess was it was tracking a tower in Key West.

4341. Strange High SWR Problem

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-16 20:47:26 UTC
From: Pete Bluer <bluepeter@postmaster.co.uk>
Message-ID: <yZus6.479$e16.275961@news2.cableinet.net>

My aerials have a good SWR of (so the built in SWR meter says) of around 1.2:1 or 1.3:1. However, when I switch on my amplifier the SWR meter goes to 10:1 or higher and the radio outputs hardly any power. The leads must be okay because it all works fine until I turn the linear on.

The SWR seems to be highest on 10m, a bit lower (but not much) on 15m and about 2:1 on 20m. An SWR meter after the linear (to the aerial) shows a good SWR reading but the in-built SWR meter in the radio gives the very high readings.

Can anyone explain what is going on? Why is the linear affecting the SWR between it and the radio so much?

Thanks, Pete.

The Linear has two tuned circuits typically; on the input side a tuned
grid circuit which sets the SWR between the linear and TX and an output
tuned circuit (with anode tunning knob), followed by a simple ATU
typically a PI network with the load control. Thus you have a mismatch
on the grid side.

[Of course that tranlates intr semiconductor language, but the
only linear I have repaired (not used!) was a valve one]
>
>Can anyone explain what is going on? Why is the linear affecting the SWR
>between it and the radio so much?

Without knowledge of what the linear was I can't suggest the problem,
but is there ia grid tuning knob? Or is it supposed to be ganged to
the anode tune and the coupling slipped (sometimes happens when a gear
is secured by a grub screw). Another possibility is a faulty band
switch (TL922 ones sometimes fall apart!). You can usually
work on the input circuit without HT applied.

As soon as lots of people were facial "appliances" in protest or for
fun, etc. this technology will be rendered useless.

Pasting mirrors on your face might produce interesting results. Since
facial recognition uses a video camera and video cameras process light
and shadow, colors, etc. It should be pretty easy to wack what it
picks up to the point that it might not be able to determine that a
face is really a face.

By law you will have to look directly into the camera or be shot. This is just basic Nazi strategy.

Uh huh ... so you *really* think that "lots of people" are
going to go through their day wearing masks and disguises ?

Nope.

And, I'll remark once again that face-rec is just ONE of
a number of biometric technologies which will be used IN
COMBINATION. You can put a bag over your head, but your
thermal IR signature will still be a fair match, your
body language will still be the same, you will still
exude a distinctive spectrum of odor molecules and if
you speak your voice will have it's own distinctive
spectral signature.

Then there's the "regular" cops ...

There's NO ESCAPE from techno-Big-Brother other than to
stop him BEFORE he gets started. The next totalitarian
regime will likely be the LAST one - because the
technology will finally be in place to watch everybody
all of the time. In that environment, any sort of revolt
is impossible to organize.

Manual Needed - Help!

Greetings;
I'm looking for an operator's manual, in English, for a Yaesu FT101F.
Original preferred, good copy is fine. Please respond via email as I do
not frequent all of the groups. Thanks for your help!
73

I just got a Kenwood AT-250 but I have no manuals and I'm not sure if it is working properly. Can someone give me a quick run down on how to use it?

Thanks

Sure you can ,you may want to also make mention that the dues went up too !
You see now that all the people that did 5 wpm who are Generals are higher
are now supporting the
ARRL,because they think the ARRL is sooooooo great,but the sorry part of the
matter is they are going to pay for something the ARRL had no say in.
When it comes down to it the FCC has the Final say always the government!

4352. Will Swap Free Satellite Guide for Ham Radio Guide

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-17 00:30:53 UTC
From: "B. Allen" <sellacct@hotmail.comNOSPAM>
Message-ID: <tb5bvg9hcsv2b8@corp.supernews.com>
Source record: 92332

I'm looking for a guide on ham radio that will cover all aspects, such as types of radios, the different bands, licenses, antenna types, and even modifications. Are there any books that cover ham subjects that the Radio Shack books won't go into? If you have one, i'd like to trade you for a guide that I have on satellite TV, called "How to Receive Free Satellite TV Feeds and Obtain Low-cost or Free Equipment". It's a great guide. I receive hundreds of free legal satellite channels, more than I can possibly watch.

Also, I have a question - when I use my scanner, I can hear ham radio transmissions, but not from far-off places like other states or even other countries. I'm thinking that those transmissions are on bands that my scanner can't pick up. True?

Thanks! Can't wait to get into this hobby. I'm in the process of studying for the test.

No, Leland, no one is "bugged" about that. Many of us have dedicated a
huge amount of our personal time to help make that happen, in case you
didn't know what a VE does.
What many are "bugged" about is the lowering of requirements,
especially for the highest class of license. Nothing more.

> Ken (NY)
Yea, why worry about crrooked cops. Thye never hurt the inoocent.
Never prtcie thier own barnd of justice.
Never take bribes, or turn a blind eye to the powerfull elite of thier
commmunity, never drag race at 3:00AM, never do trfic stop just to "look at
the pretty ladies"(quote from actual comm intercept).
Yea, cops never have anyting to hide.
The fine boys down in New Orleans contracted a killing of a witness to
protect society.
The black guy in NYC got a plunger up his anus to protect the rest of us.
The boys in Rampart stole drugs, gramed people and even murdered
people to protect the rest of us.
No sire, we never need to wathc those cops, they are on our side,
ready to protect us.
Yea, and I have some swamp land at the north pole I would like to sell.
I started out thinking cops were the good guys. Like "Andy Taylor", but it was
not long before I found out they were the marginal jocks too dumb for
football. Too bad the rest of America never listenied in on your comms.
We would have had a revolution years ago.
Keep deluding yourself when you think cops are for our protection.
They never shoot, torture, frame rape, rob, or murder innocents.
Yea.......
And the few bad apples everyone keeps talking about, how do they exist?
Because their fellow officers protect each other no matter what.
Why do you think every cop hates the "internal affairs" people?
And keep deluding yourself that trunking, digital, cell phones, PCS phones are
really secure.

Just look who the "cops" where in the old west...the gunmen.
Bad guys gone "straight", hired thugs.
Not much has changed.
Yea, hide your comms from the people who pay your bills, who you are supposed to protect. After all, why would anyone want to listen to the cops.

Bill,
Thanks for the info. I have taken steps at YSU to have this person
blocked. But I think a tactic that is far more effective is to totally
ignore this individual. He gets his jollies by ataganizing others. If
no one replies to his postings, he will lose his audience and go away.
Right now thats what keeps him coming back. He has commanded
attention. If he gets none, he is the big loser.

> Why do you think every cop hates the "internal affairs" people?

Every cop doesn't hate IA. That's strictly movie and TV stuff.

Many (most) cops may have a low opinion of IA, but there are a host of reasons not related to police corruption. For instance, theres the perception they have been used in the past to silence whistleblowers, going so far as to ruin an officer's career and take their freedom. I don't doubt this was done in the past, and the possibility is certainly there now.

They are highly vunerable to political forces, while there is little if any oversite of IA itself.

Source record: 92244

I find I have operated much more HF SSB than 2M FM since I got my extra
"lite"
last spring. Seems to be fun to do some DX and "worked all states"
(still need ND).

Bought a used rig from HRO after getting my extra CSCEs a year ago
January.
That and a crude dipole in the attic and an upgrade last April got me on
HF
for most of my operating QSOs.

Any other new HFers in the newsgroup?

Seems to me 27MHz lies within that range. Is 7MHz HF? Is 4MHz HF?
Is 29MHz HF?

>Any other new HFers in the newsgroup?

right here. i'm in an apartment, and i just got my first hf rig last week.
yes, i would have to say that i use hf now more than vhf, mostly because
there are more people on hf than on the local repeater.

i also strangely find a lot more dx on 10 meters than on 2 meters.

now, i must patiently wait for a 6 meter opening...

It has everything to do with HF configurations not being able to
deliver the required performance. Along with CW, has HF also become
such a religion that nobody can admit that VHF/UHF repeaters have some
advantages over HF without repeaters?

: CT. That's what all the articles in the papers said when they switched
: over; ayear or maybe a bit more ago. I personally haven't seen the
: equipment so can't say one way or the other. You sure can't pick them up
on
: the scanners anymore, except some of the smaller town where I guess they
: didn't switch over.

News reporters are not trained in technology. They are humanities
majors. They do the same screw up with guns.

What they are talking about is trunking. This a system of five repeaters
(each has a receiver and transmitter, what the receiver hears is "repeated"
on another frequency by the transmitter). Since there are several repeaters
together on a tower, like cellular phones have as well, when you push the
mike button, everyone in your "talk group" is automatically switched to the
right repeater frequency pair. To make the best use of all the repeaters,
every time you push the mike button, you switch repeaters.

What you need is a trunk tracking scanner like the Uniden BC-245.

: >Russ
:
: Calls like this are generated every day in every busy
: jurisdiction: A 911 operator gets a call from a woman who says she has
: just been raped by a man wearing a mask. She says she lives at 100
: Main Street and saw the man walking slowly down the street eastbound.
: The 911 op then fills out a card and it goes to the
: communications dispatcher.
: Dispatcher broadcasts an assignment to several patrol units
: with the address of the rape victim and description of the
: perpetrator.
: Now while the officers respond, 15 year old pimply-faced
: Roger, who is armed with a scanner, has the information that a woman
: was raped at 100 Main Street. It does not take long for Mr. Roger
: Pimples to find out who lives there and he sends obscene mail to her
: or calls on the phone to ask how it felt.

: Don't laugh, this happened in this news group
: (alt.law-enforcement), in a way. A woman admitted being raped,
: divulged her address to someone she thought was a real cop via e-mail,
: and since then she has been getting repeated obscene phone calls from
: the scumbag.
: Now I will give you the opportunity to tell us how that
: information can be kept off the air by Communications Bureau, and
: still be able to dispatch units to the correct scene of the crime
: without delay so they can assist the aided person, look for the rapist
: and initiate an investigation at the scene.
: Regards,
: Ken (NY)

1) most departments with trunking systems are using MDT (mobile
data terminals) to convey confidential information. MDTs also allow
the LEO during a traffic stop to directly input license data without going
through the dispatcher. Saves a lot of time.

2) If you go to a totally encrypted system, you lose the ability to listen
to other agencies, which most LEOs do with scanners. A trunked, digital
system has talk groups, almost like private repeaters. If your radio is not
programmed with a talk group, you do not hear them. With encryption
it is impossible to hear them without you having your radio programmed.
The departments are not going to put 2 or 3 trunked radios (at the cost
of $4000 each) into every squad car and fire truck. Plus we had a situation
here where the ambulance service did not want the fire departments on their
talk group. Therefore the fire fighters could not talk in an ambulance
crew.

And in Indianapolis, the deputy who transports prisoners to court only has
dispatch in his radio. He does not have the court bailiffs talk group or
the
I'D downtown talk group. If he has an escaped prison, he has to coordinate
through the dispatcher.

Remember, a city like Indy has hundreds of talk groups. Seattle has over
a 1000! Now add the Indiana State Police trunked system and it gets even
worst. Add total encryption to that and no one can coordinate. It totally
shuts down everyone.

3) It is very easy for a group of corrupt cops to "bribe" a commo tech into
programming a talk group that no supervisor has access to. If the system
is totally encrypted it would be impossible for the supervisors to ever
discover
the existance of the talk group. Just too many talk groups in the average
big
city.

4) My guess is that encryption will wind up in the hands of the courts like
phone taps are now. You will have to have a court order and supervision
to encrypt. Too many abuses otherwise.

I think in such a blatant case, a more dramatic solution might be in order.
Like maybe getting the folks in your part of the hall to join you in getting
the conductor's attention & asking him to pause the performance -- then
publically explaining exactly *why* you need the orchestra to go back a few
minutes & start over.

Alternatively, get the offender's phone number, call him, and tell him a
close relative has died...

Suzy was allegedly put on notice that "her" nefarious activities were under active investigation. Suzy, it is alleged, is also undergoing yet another financial crisis and has by necessity been divesting herself of some of her radio gear. When queried as to why Suzie was selling so much of her Ham gear, Suzy was said to have stated that she was "tired" of the Ham operators and Ham Radio in general. This is nothing more than an attempt by Suzy to shade what really happened.
Recall if you will that Suzy has never told the truth and has no intent to do so any time soon.
If Suzy is selling her Ham gear, it is because Suzy owes a LOT of money to a LOT of people. Simple as that.

If Suzy was indeed banned, Suzy would be the last one to admit same.

Try placing a separate swr meter in line after the amplifier,
TX-AMP-SWR-ANT, you should find this gives a more accurate reading. IIRC you
will always get a high reading if using the radios own swr meter in
conjunction with an amplifier.

I for one would welcome the introduction of such a device here in the U.S. Would put an end to the constant nuisance of cellphones ringing, followed by inconsiderate people rudely yakking loudly on them in restaurants, movie theaters, etc.

In earlier times, people respected the rights of others, and such a device would not be necessary. But in today's junk society where nobody gives a damn about anyone besides themselves, the marketing of a product such as this would be a genuine public service.

Here we have a regional system we share with most of the agencies in
our county. We have trunked talk groups we share for interagency
mutual aid. The encryption codes are the same for everyone on the
system to avoid this problem. Our officers are each issued a portable
radio so they don't need scanners. Since we only have 205 officers at
our agency, it cost us less than $900,000 to equip each officer with a
portable plus a few spares for loan when a radio goes to the shop for
repair or reprogramming.

They don't have the non trunked national calling and tac channels
programmed? Our system is on 800MHz. All our radios have the
calling channel and all four of the tactical channels programmed. We

can talk to agencies not on our trunk system that have 800MHz radios
on these shared frequencies.
>
>3) It is very easy for a group of corrupt cops to "bribe" a commo tech into

>the existance of the talk group. Just too many talk groups in the average
>big
>city.

How does the group work without being programmed into the
communications computer system? Our system has to have each talk
group set up in the controlling computer. We can get printouts of
talk group usage by radio ID to see when, how long and what talk group
the user is using. Each user has to sign for their portable radio,
each car is assigned to a user for that shift so each radio ID is
traceable to an individual user or vehicle and driver. Each radio we
have is logged in a data base that includes a list of all talk groups
programmed into the radio. You should know how many groups are
authorized in your system. The talk group report from the master
computer should be able to count the groups currently in the computer.
If they don't match, start looking for the difference. At 50 lines per
page average (allowing for headers on each page) you only have to
review about 40 pages (20 pages for the authorized list 20+ for the
report from the computer list with the unauthorized groups) When you
find the group that doesn't match, run a report for the usage for that
group. Check those radios IDs that show up on the report and take
action against those officers who have unauthorized groups in their
radio. Ask the users who programmed the group in the radio. (Our
employees have no right to not answer questions in an administrative
inquiry. If they refuse to answer that is insubordination). Take
action against the tech for creating an unauthorized talk group.
>
>4) My guess is that encryption will wind up in the hands of the courts like
>phone taps are now. You will have to have a court order and supervision

Of course, police officers are uniformly (no pun intended) hostile to the idea of CIVILIAN coordination with or oversight of IA. Must be more to it than the fear of "political" forces. Generally, the police do not wish to be reminded that they might be answerable to anyone who does not wear a police badge.

I want to point out that, while I favor open access to routine police communications and operational information, I do not believe that scanner-monitoring citizens are an effective check on the abuse of police power. Abuse happens during direct encounters between police officers and citizens. There are few if any practical ways to monitor those events all of the time.

Civilian review and citizen monitoring seem to be the next best thing for now.

-Dave, NF2G
BSCJ, etc.

: >crew.
:
: Here we have a regional system we share with most of the agencies in
: our county. We have trunked talk groups we share for interagency
: mutual aid. The encryption codes are the same for everyone on the
: system to avoid this problem. Our officers are each issued a portable
: radio so they don't need scanners. Since we only have 205 officers at
: our agency, it cost us less than $900,000 to equip each officer with a
: portable plus a few spares for loan when a radio goes to the shop for
: repair or reprogramming.

And you listen to one talk group at a time on an HT (like the 3000 series).
An HT is good when you are out of the car and need only to talk to the
folks in your patrol group or dispatch. But in the car, if you do not have
radios to listen to adjacent patrol areas, fire department and other groups
that
may effect you then you are blind and deaf.

: >

: >a 1000! Now add the Indiana State Police trunked system and it gets even
: >worst. Add total encryption to that and no one can coordinate. It
totally
: >shuts down everyone.
:
: They don't have the non trunked national calling and tac channels
: programmed? Our system is on 800MHz. All our radios have the
: calling channel and all four of the tactical channels programmed. We
: can talk to agencies not on our trunk system that have 800MHz radios
: on these shared frequencies.

Of course, all radios have the five simplex freqs. And most trunked
systems are on 800 Mhz. BTW, what happens if you department uses
a Motorola system while the city next door uses the GE system? Your
radios do not talk to each other.

: >
: >3) It is very easy for a group of corrupt cops to "bribe" a commo tech
into
: >programming a talk group that no supervisor has access to. If the
system
: >is totally encrypted it would be impossible for the supervisors to ever
: >discover the existance of the talk group. Just too many talk groups in
the average
: >big city.
:
: How does the group work without being programmed into the
: communications computer system? Our system has to have each talk
: group set up in the controlling computer. We can get printouts of
: talk group usage by radio ID to see when, how long and what talk group
: the user is using. Each user has to sign for their portable radio,
: each car is assigned to a user for that shift so each radio ID is
: traceable to an individual user or vehicle and driver. Each radio we
: have is logged in a data base that includes a list of all talk groups
: programmed into the radio. You should know how many groups are
: authorized in your system. The talk group report from the master
: computer should be able to count the groups currently in the computer.
: If they don't match, start looking for the difference. At 50 lines per
: page average (allowing for headers on each page) you only have to
: review about 40 pages (20 pages for the authorized list 20+ for the
: report from the computer list with the unauthorized groups) When you
: find the group that doesn't match, run a report for the usage for that
: group. Check those radios IDs that show up on the report and take
: action against those officers who have unauthorized groups in their
: radio. Ask the users who programmed the group in the radio. (Our
: employees have no right to not answer questions in an administrative

: inquiry. If they refuse to answer that is insubordination). Take
: action against the tech for creating an unauthorized talk group.

You pointed out that your trunk sites have 12 to 20 repeaters on them.
In big cities, there may well be over a 1000 talk groups. After awhile
supervisers stop looking. Or everything gets buried in too much data.
And, after a few years, everyone gets too comfortable. Rules get bent.

: >
: >4) My guess is that encryption will wind up in the hands of the courts
like
: >phone taps are now. You will have to have a court order and supervision
: >to encrypt. Too many abuses otherwise.
:
: We have procedures in place to deal with abuses if they happen. They
: don't happen very often.

My guess is that encryption will be rained in after being used for awhile.
Departments are not going to be willing to buy $4000 encrypted scanners
so that LEOs and fire fighters can listen to each other. The $400 trunk
trackers
are just too affordable. And most radio traffic is not worth encrypting.
Look
back to the days before scanners. Most cops used their radios more like
CBs,
telling dirty or racist jokes. Once the public does not listen, most of the
professionalism
will go away. If LEOs feel that they are not being observed, their jock
nature
comes out.

It may take a few years, but encryption is just the "new toy". And it will
create
more problems than it solves.

The point is that VHF/UHF has some advantages over HF, Dick.
Mountain-top repeaters around the Valley of the Sun are one
of them. No HF frequency would do what we needed done unless
there were HF repeaters and there were not any. The only reason
most of those campers got their Tech licenses was to be able
to have reliable 2500 square mile full-time coverage. There's
no reason for those guys to want to get on HF, therefore no
reason for them to want to upgrade. A few of them who have
moved away from the Valley of the Sun have become interested
in HF.

4387. AF2Y's MOMENTOUS discovery!

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-17 17:08:10 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <99096lbfn1@slb7.atl.mindspring.net>
Source record: 92120

What I discovered in the field of computers is so important and momentous, I should patent it but being that all of you, friend and foe, are family I'll spill the beans right here and now. So sit back and read carefully because I'm going to show you how you can increase floppy disk storage space a "gazillion" times and still have plenty of room. This idea will make you think twice about ever buying a zip drive-in fact you won't have to. I just got off with MindSpring's online tech, outlined everything and the gent wrote, "Wha? Huh?

Let's begin with basics. A standard two hole floppy will hold 1.4 megs of data. How many times have you tried to put more data than that on one to be met with, "Sorry, not enough space. You need an additional 85 kbs?" And so you have no other choice but to begin another floppy or go out and spend $110 buying a zip drive in which floppies hold almost 100 times the data as that of a standard one.
I use a MAC but what I'm going to tell you will hold true for any PC as well. And the data being held will probabaly not be transferable meaning that if a MAC user for instance puts the floppy into another MAC, in all probability it will not open. That's based on what the tech wrote but I don't think he knew for sure because my theory floored him to begin with. Furthermore even though I proved to myself the info is correct, I don't know the reason behind it. I swear it. Maybe you can tell me?

Ever hear of an ALIAS? On my MAC under FILE there is an option, MAKE ALIAS. You have that too on your PCs. Therein lies the basis of my miraculous discovery. What then is an ALIAS or an alias icon to be more specific? It's supposed to be a short cut, lacking data, to open a program or application. Notice "lacking data?" That's what it's supposed to lack but THAT'S WRONG. It contains the exact data as the original from which the alias is made and like I, you probabaly never knew it.
However therein lies the puzzle. Because the data exists in an alias, why doesn't it show up in equal quantity on a floppy? Why doesn't it fill up a floppy the way other pieces of info do? I'll explain.

The floppy stores 1.4 megs of data. How much data is in your HARD DRIVE? I'm sure you have a hard drive icon so open it and get info about it. Mine shows 595.1 megs on it. So, let's divide 595.1 by 1.4 and that comes to 425.07. That means there are 425.07 more megs of info on that hard drive than a standard floppy can store. Okay, now stick a standard 1.4 meg floppy into your CPU. See the icon of it on your desktop? Now highlight the hard drive icon and make an alias of it. That alias should come up right underneath the original. Now drag that ALIAS, not the original, into that floppy and watch what happens. It's be totally copied. Now highlight the floppy and click on to get info about it. Mine says 659K is used which is equivalent to 50% of the total storage capacity of that floppy. We have

obviously done the impossible i.e.put more water into a glass that is incapable of handling the quantity without anything spilling over.

Alright let's take it a step further. The entire contents of the hard drive are in that floppy but I added something else. My MindSpring program opens by clicking on a logo icon which then opens a gearbox from which you can click on MAIL through Microsoft Outlook Express or a trip to the Internet by way of my browser Microsoft Internet Explorer 4.5. I dragged that icon into the floppy too, checked to see how much space it took up, and it read zero. The same amount is still left before adding that icon. I then took it a step further. On my desktop I have a lot of other icons which open a lot of programs and applications and I dragged them also into the floppy. How much space did the whole desktop kit and kaboodle use up? Nothing.

My next step was to prove that an alias contains data. I shut down my MAC and waited for a boot up. But instead of clicking on the usual MindSpring icon on the desktop, I clicked on the one in the floppy. Sure enough, it worked. The program opened exactly the way it would by the regular method. So much for the theory of an alias containing no data.

Now how about you guys and gals who collect pictures? You know how many megs there are in one-quite a bit, correct. I will bet you that if you made aliases of each pic and dragged them into a floppy, you'll be able to store a thousand. Can't prove it because I'm not into pix but if the basic theory is correct, then why not this one? Just keep in mind that what you store MUST be aliases of the original, not the originals because if not, you'll use up 1.4 megs in a hurry and then have to run out and buy a zip drive setup.

All the best,
Doc,AF2Y

A professional associate of mine in Europe had a small
side business of selling equipment manuals for older gear. I
think he has another friend of his who still stocks this manual.
Try sales@amateurmanuals.co.uk

The AT-250 is a proven rugged piece of gear and performs
well in a variety of environmental conditions. It might be worth
investing in a manual for 20 bucks or so. We still have one in
service where I work.

Doc,
Try this. After putting the 'alias' onto the floppy, rename
the directory in which the file you made the alias of is. Now,
retrieve that file from the floppy. I don't think you'll be
able to. I'm not familiar with Mac's, but I would think that
the 'alias' is accessing the original file for information.
If the various floppy/drive manufacturers could squeeze 500M
of information onto a standard floppy disk, don't you think they
would do it? Sure they would! There's only so much 'room' on
a floppy. Each byte of information will take up some of that
'room', and when you run out of 'room'...that's it. It would
be nice if you could do as you say, but I think your missing
something...

I have recently bought 2 Thomson T8100 transceivers. Unfortunately these work on the frequencies 433.065 - 434.775 MHz

As these are the amateur radio frequencies I was woneruing whether there is anyway to change which frequency they work on. I would obviously like them to work on the public frequencies so I can use them alongside the 2 that I allready own.

Any help appreciated.

Stuart

On the contrary, you can use any equipment on any frequency without a licence, I know, I have tried it and it works! In fact I can assure you that you can transmit just as far without a licence as you can with one.

Equipe every car with a camera/vcr (and the officer with a wireless mic)that the cop does not have access to VCR. Require all trafic stops to be recorded. No recording the arrest/citation is tossed. Require all interviews, all police "suspect" contact to be recorded, again with police unable to acess the VCR. I know of at least one city that backed away from in camera TV/VCRs because of the liablilty issues. They were afraid, with a lot of reason, of having every police/driver encounter "on the record".
In at least one central Ky city the traffic cops looked for attractive young

ladies and pulled them over. They were pretty blatent about it on the radio.
I sent the chief, the mayor, the county attourny and the head of the KSP
copies of the same saturday night recording. 2 good old boys retired. Others
were reassingned. But all I really accomplished was to warn the cops that they
are monitored. Then they switched to cell phones thinking that was secure.
And they got real careless about their comms. And yea, it is illegal to listen
to cell phones. But guess what major central Ky city had about 10 Pro2004
modified to unlock the cell coverage right after the ECPA was passed.
Adn I am sure that they never, ever listend to conversation that were not
approved by a court order. Oh, but a general purpose scanner can not lock on
to or exclude a certain NAM. And I loved it when a bunch of cops set up house
on the 2mtr ham band.
I still insist that cops are terrified of accountability. They like to be able
to toss their weight around in the certaintity that their fellow cops will
protect them.
Face it, cops want to hide behind the badge, behind the lie that they are
there to protect us. To "protect and serve"..yea, really?
Too bad the USSC has ruled many times that cops "have no obligation to any
single member of society". It is fun to show people the text of such rulings
and the cases that resulted in those rulings. If enough people knew that cops
are not their friends, not there to protect and serve. but only there to
collect the bodies and evidence, the police might lose a lot of support.
By keeping the lie alive that they protect us they manage to repress us.
Never, ever trust a cop.
They are not your friend, not your protector.
They are like the garbage collector or sanitary sewage worker.
A public servent, only they have illusions of honor.
Remember Rampart, NYC, New Orleans, or Lexington's own Drew Thorton.

4401. Re: Cellphones drowning out police radios

in europe you would be hard pressed to find someone hold on to a cell phone
while driving. But that does not mean they are not using the phone and
talking.

So is it talking on the phone that cause accident or holding a phone that
cause it ?
If holding than I guess we should also ban all drive thru fast food as well.
If talking than all radios in the car should be outlaw and the driver
compartment sealed off from passenger so that no one can talk to the driver.

Now we can see how dumb this become. AFAIC common sense should be the rule.

Most LEO think that MDT are secure.
About ten years ago I bought one from a legitimate surplus outfit.
Whiole touted as "super tough to break" it took less a Saturday afternoon to read the Loisville PDs MDT. And because they think they are "Secure" they are fairly loose mouthed (called a black guy the N word) I gave mine to a black friend who lived there. After a few years he got disguted with the city life, and moved back to his family's farm in south west Ky. He thought the police were a little funny but pretty "Damn stupid". They were running narc busts via the MDT and he thought that if the bad guys had half a brain they would have one of their own.

every
> police/driver encounter "on the record".

The problem with these recording devices is they are highly unreliable, and that's by design. You have the city, county or whatever government take bids, and the lowest bidder gets the job. In LA, an agency just scrapped their cameras because the company that maintained them went belly up. A defense lawyer finds out there's a recording device, but no recording, he's going to blast the case out of the water, like any good attorny. Somebody accuses a cop of brutality, the recorder malfunctioned, and BOOM, there's something afoot. Then you have the problem with wireless audio feeds, which aren't reliable enough for you to want to stake your career on.

Officers worry about this, and they worry about some civilian or polititon looking at this tape, seeing standard procedures, and, not knowing anything about real police work, call it abuse and use it to further their career or agenda, all the while crushing this cop's life.

I don't know many officers who don't like having a camera on them. As a matter of fact, several carry voice recorders, like the officers in the San Bernardino, CA, incident, where an illegal alien was finally caught after a high speed chase and clubbed.

Even those aren't the most reliable things going. I had to pay $300 for two of mine, just to make sure I got quality stuff.

I'd carry a portable video system, but there aren't any on the market that are suitable, much less affordable.

It's easy to see all of this as cops not wanting to be observed for crooked reasons. I wish these departments, especially my agency, did a better job of informing the public of what we do and how we do it. I read the press releases or the "No Comment" and I cringe.

I suppose any frequency which I do not need a licence for would be
acceptable!

Any ideas?

I have my HT set to scan the talk groups I need to monitor. My main
dispatch group is set to priority so I don't miss what is going on

there. I don't have access to the fire department groups and have no need to monitor them. If we need to talk, we go to a common group set up for that purpose. In a large city I doubt that an officer has the capability to effectively monitor all the groups that may effect him and do the other tasks needed while on patrol, even if he has the radios to do it. At home I have my police HT, a 300 channel scanner, 2M, 440MHz and a Kenwood TS850S. It is tough to keep them straight at times, and I don't have to drive or monitor my environment while trying.

If you checked I would be willing to bet that all of them do have at least one talk group in common that they could switch to if they needed to coordinate directly. If they don't, the person that designed the system should be fired.

Simplex? Ours are on a repeater, and have simplex also. Since they are analog there should be no problem talking to a GE system. No one uses a GE system in this area that we need to talk to so it doesn't matter for us. As I pointed out, most users in the county use the same shared system. Those that don't use Motorola.

That happens here sometimes, but it is monitored, by us. Recently one
of my officers got a reprimand for keying the mike and striking it on
his MDT in response to a comment he thought was funny. Last year an
officer was suspended for two days for mispronouncing Virginia as
Vagina on purpose. We monitor MDT traffic also. It is all logged and
randomly checked. We don't tolerate misuse. We take the FCC rules
seriously here, just like most good ham operators do. And like ham
operators, we police our own frequencies.

>
>It may take a few years, but encryption is just the "new toy". And it will

>more problems than it solves.

Encryption in one form or another has been in public safety systems
for decades. I doubt that it will go away any time soon.

Just another example of how the government is making itself further and further from the people. There will be a time where the to serve and protect will be a thing of the past. I saw a photo of FBI agents and they looked just like terrorists. They are make mister meaner crimes felonies now. That means less and less people have the right to vote. Its time to make some changes not just in the federal level but in the local level too. Taxes are to high. The police don't care about people anymore and as technology grows the more and more the government and its agencies will be further and further from the people.

WAKE UP PEOPLE! ITS TIME!

Who said it was??? The point is that a bunch of my friends who once
were CBers are now Techs because HF did not meet their needs and
VHF did. And HF still doesn't meet their needs.

Download AGWPE V2000.78 and WinPack 6.51, there are comprehensive instructions within the software, and even a diagram of a how to make up a lead for Packet. The software is all fully functional and free.

Usually the same lead can service both radios if you fit enough plugs, unless you link to a DX Cluster to hunt the PSK31 on HF, then a second lead/computer is required or you may want to look at getting hold of a TNC, since both applications can't use the Sound Card at the same time. You'll need at least two serial ports anyway.

Throughout Indiana, most LEOs have scanners plus their car
radio and an HT. Some even have CBs. That deputy just east
of Indy who caught those two kids from NH (they were arrested
for killing those two professors) was a ham and had CB as well.
He just happened to hear a trucker ask if anyone could give two
kids a ride to California and made it sound like he was a trucker.
It was a very good bust.

: >: >And in Indianapolis, the deputy who transports prisoners to court only

: a GE system in this area that we need to talk to so it doesn't matter
: for us. As I pointed out, most users in the county use the same
: shared system. Those that don't use Motorola.

The five common frequencies are not repeated, they are simplex.
And used for tactical commo.

We have cities where there are multiple systems plus the state
system. Plus cities that either border or cross county lines. We
are trying to get a state wide system that is under the State Police
control and have everyone use the same thing.

The new Motorola XTS 3000 has trunked, repeated and simplex
built in. Once APCO 25 is brought to market (it is the digital system)
then everyone should have the same standards so manufacturer will
not matter.

It depends on the department. Remember Bill Cheek? He was able
to break the Motorola MDT code and recorded the NYPD LEOs
doing all sorts of things like telling sexual and racial jokes. Departments
like that have huge professional problems. For one thing NYPD has
over 40,000 LEOs. Almost as many as the whole federal government.

:
: >Once the public does not listen, most of the
: >professionalism will go away. If LEOs feel that
: >they are not being observed, their jock nature
: >comes out.
:

: That happens here sometimes, but it is monitored, by us. Recently one
: of my officers got a reprimand for keying the mike and striking it on
: his MDT in response to a comment he thought was funny. Last year an
: officer was suspended for two days for mispronouncing Virginia as
: Vagina on purpose. We monitor MDT traffic also. It is all logged and
: randomly checked. We don't tolerate misuse. We take the FCC rules
: seriously here, just like most good ham operators do. And like ham
: operators, we police our own frequencies.

Your department has better leadership than most. It is most likely
a mid size department. The small and very large departments are
the ones that see the most abuse.

: >It may take a few years, but encryption is just the "new toy". And it
will
: >create more problems than it solves.
:
: Encryption in one form or another has been in public safety systems
: for decades. I doubt that it will go away any time soon.

I do not expect it to go away. I just do not expect it
to be used for daily traffic.

: >data terminals) to convey confidential information. MDTs also allow
: >the LEO during a traffic stop to directly input license data without
going
: >through the dispatcher. Saves a lot of time.
: >
: Most LEO think that MDT are secure.
: About ten years ago I bought one from a legitimate surplus outfit.
: Whiole touted as "super tough to break" it took less a Saturday afternoon
to
: read the Loisville PDs MDT. And because they think they are "Secure" they
are
: fairly loose mouthed (called a black guy the N word) I gave mine to a
black
: friend who lived there. After a few years he got disguted with the city
life,
: and moved back to his family's farm in south west Ky. He thought the
police
: were a little funny but pretty "Damn stupid". They were running narc busts
via
: the MDT and he thought that if the bad guys had half a brain they would
have
: one of their own.

Bill Cheek was among the first to break Motorola's MDT code. Then
he showed the NYPD was having huge abuse by some LEOs who were
telling sexual and racial jokes via the MDT.

OPSEC (operational security) within police departments is loose. Most
military units run tighter OPSEC. We need to have Army Counter Intelligence
Agents do a review of each department in the US and wake them up.

You can also drive any vehicle on any highway without a license. It works.
You can drive just as far illegally as you can legally. The glitch of this
is when you get caught. Then the feces hits the fan and you are made to look
like the lawbreaker you are.

I have a Icom 2700 mobile in very good condition with the tone decoder board installed. I am the second owner and it's been a base since I have had it for the last 4 months. I would like to trade for a Kenwood 733 or sell for 275 plus shipping. Any questions please email.

Scott

On Sat, 17 Mar 2001 21:55:15 -0500, Oris Grim <oris@dirtball.com> had
the unmitigated audacity to write:

>Just another example of how the government is making itself further and
>further from the people. There will be a time where the to serve and protect
>will be a thing of the past. I saw a photo of FBI agents and they looked just
>like terrorists.

I have it on the highest authority that the FBI has decided to
make their undercover agents wear 3-piece suits beginning on February
30, 2002.

>They are make mister meaner crimes felonies now. That means
>less and less people have the right to vote.

Good point. We have to downgrade those meaner crimes to
misdemeanors so more people can vote. We will get right on that.

>Its time to make some changes not
>just in the federal level but in the local level too. Taxes are to high.

Mr. Bush is working on that problem. Write your liberal
Senator and tell him to vote for the tax relief bill.

>The
>police don't care about people anymore and as technology grows the more and
>more the government and its agencies will be further and further from the
>people.

Definitely, we have to move the police stations nearer to the
people's houses and develop two-way communication devices - such as
telephones.

> WAKE UP PEOPLE! ITS TIME!

SHIT! You scared me with that scream. I'm up! I'm up!

Are you tired of having to weed through all the crap on the newsgroup,
dealing with message boards that are out of control?

Check out the Radio Classifieds.
It is a board designed to do away with the trolls of the internet, and
make a nice place where Radio enthusiasts like myself can post their
wares, trade, or get help information.

There are many features to this board and is very close to the
"Infopop's Ultimate Bulletin Board".

There is a wide variety of topics, like CB Radio, Export Radios,
Microphones, Test Equipment, Antenna's, Modifications, Ham Radios,
Scanners, Shortwave Radios Parts, Home Entertaiment, Car Audio & Video,
plus much much more.

Come by and join up today. You will be glad you did!

The Radio Classifieds:

ZF, ZK1/s, ZK2, ZK3, ZL, ZP and ZS.
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6, AGALEGA (Update/Progress). Hans-Peter, HB9BXE, sent out a press
release (3B6RF Bulletin Nr. 13) this past week. OPDX InterNet Subscribers
will receive the large release as an additional bulletin. In short, the
press release states that preparations for this DXpedition is running
according to plan. On April 21st, three members of the team will head for
Mauritius in order to make final preparations on the spot. The rest of the
crew departs on April 28th, from Zurich. The 3B6 team plans to arrive on
Agalega on May 3rd and plans to be active May 5th for 12 days. There is
the possibility of chartering an aircraft for their trip from Mauritius
to Agalega, and they are still working on it. Using an aircraft will allow
them 2-3 additional operating days. The crew now consists of 20 operators:
HB9BQI/Rene, HB9BQW/Christine, HB9BXE/Hans-Peter, HB9CRV/Hermann, HB9HFN/
Cedric, HB9JAI/Karl, HB9JBI/Friedhelm, HB9AAQ/Fred, CT1AGF/Luis, CT1EVP/
Antonio, DL3KUD/Matthias, DL6UAA/Mart, F6HMJ/Jack, G3KHZ/Derek, NK6F/Ken,
N3SL/Steve, SP9RTI/Stefan, 3B8CF/Jacky and 4X1DX/Seth. YAESU of Germany
has lent them the following equipment: 6 Transceivers FT1000MP, 6 Linear
Amplifiers VL1000, 6 Power supplies, 2 Transceivers FT 847 and 1 Transceiver
FT 920. They will have a huge arsenal of antennas to use. The group will
have 4 Diesel generators 5.5 kW each. The satellite activity from Agalega
will be the first ever from this remote place. They will concentrate on
using the satellite AO-10, but, however, they will also use RS-12/13
sporadically. There will also be 6 meter activity and also PSK31 since it
is becoming more popular. PKS31 will be used alternately with RTTY. The
PSK31 frequencies to be used are: 14068.15 kHz +/- 1.2 kHz, 21078.15 kHz
+/- 1.2 kHz and 28078.15 kHz +/- 1.2 kHz. SSTV will also be used but for
only 3 days. Split operation is a must for SSTV. Their complete frequency
band plan can be found on the Web site at: http://www.Agalega2000.ch
QSLs can be sent via the bureau or directly to: Ambrosi Fluetsch, HB9AGH,
Lerchenweg 29, CH 8046 Zurich, Switzerland. For USA only via N3SL:
Steve & Kimberly Larson, 22 N. Hidden Acres Drive, Sioux City, Iowa 51108.
There will be a log search available during and after the operation.
Please check their Web page for further developments.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, has been active recently on 17/12
meters with NO takers. Check between 24480 and 24900 kHz around 1330z.
Check 17073 kHz around 0300z. He can also be found on 20/15/10 meters
CW/SSB between 1230 and 1530z. QSL via Robert Felicite, Box 31, Rodrigues
Island, Indian Ocean, via Mauritius.

3V8, TUNISIA (Attention YL Chasers!). YL operator Zaida has been active at the controls of 3V8BB. You can usually find her on or around 14260 kHz between 1030 and 1300z.

3W, VIETNAM. Tom, 3W7CW, was heard on 12 meters working simplex on 24896 kHz between 0730 and 0830z. QSL via SP5JTF. Jurgen, 3W9HRN continues to be very active on 10 meters CW (as well as 15 meters) as early as 0630z and as late as 1300z. QSL via DL1HRN.

4S, SRI LANKA. Nelson, 4S7NE, seems to like the 30 and 17 meters CW. Generally he can be found on/around 10103 kHz after 1200z and 18075 kHz after 1830z.

6Y8A - DXU RESULTS. Kenny, K2KW, reports that the results and photos of the 6Y8A DXpedition University (DXU) trip can be seen on the Web page:
http://www.k2kw.com
DXU was the first of its kind to offer a training ground for hams wanting to learn the art of DXpeditioning. In total, the group made over 21,000 QSOs, and nearly 11,000 in the ARRL SSB Contest. The trip was a great success, and they are thinking of holding another trip in October or November 2001 (also to Jamaica). If you are interested in attending, please send an E-mail message (to express your general interest) to:
k2kw@prodigy.net

9N, NEPAL. Lawerence, 9N7RB, in Katmandu is a good catch on 10 meters around 28447 or 28487 kHz. Check around/after 1330z and again 0130z.

A5, BHUTAN. Just a few more days to work Dimitri, RA9CO, as A52CO. His last day should be March 21st. He has been very active on 10 meters CW (very little SSB) at various time during the day. There has been some activity on 15, 20 and 40 meters. QSL via UA9DD.

ALL ASIAN DX CONTEST. Suzuki, JJ1ANW, informs OPDX that this summer "The Japanese Amateur Radio League" (JARL) will be sponsoring the "All Asian DX Contest." For more details and the rules, please refer to the JARL Web site at:
http://www.jarl.or.jp/English/4_Library/A-4-3_Contests/AA_Rule.htm

C6, BAHAMAS. Bill, AA7X, will be operating from Treasure Key from March 24-31st including the CQ WPX SSB Contest. His callsign will be C6AKK. QSL via AA7X.

DL, GERMANY. Nilay (XYL), TA3YJ, will be active as DL/TA3YJ from March 25th to March 30th. She will be active on all bands using SSB. QSL via TA3YJ.

D68C PRESS RELEASE. "The Five Star DXers Association" has released a four page bulletin (Number 6) with details and statistics of their record breaking DXpedition to Comoros. Because of its length/size, the D68C Bulletin No. 6 is available in RTF format at the K8YSE EIDX Web site at:
http://www.papays.com/d68c_b6.rtf

DXCC NEWS..... Bill Moore, NC1L, DXCC Manager, reports that XU7AAZ has been approved for DXCC credit. It was on the bad list for lack of documentation. The documentation has been reviewed and it is OK. People

can now receive DXCC credit. Anyone who has submitted it and had it rejected can contact DXCC, and their record will be updated without having to re-submit the card. Send an E-mail to: dxcc@arrl.org. If not, it can be included in the next submission.

DU, PHILIPPINES. Larry, N6HPX, is currently on vacation and is signing as DU1/N6HPX until about April 10th. He is on IOTA OC-042. Most of his activity has been on 14260 kHz between 1130 and 1300z. He was also reported on 6 meters on 50225 kHz at 0929z. QSL via N6HPX:
Larry Fields, 1207 E. Victoria Ct., San Pablo, CA 94806

FRENCH POLYNESIA OPERATION QRT (FO0/A & FO0/M Possibly Next!). Eli, HA9RE, recently active from French Polynesia as FO0ARE between February 27th and March 7th, was active from Tahiti Island (OC-046, Windward Islands Group) between February 27-28th, and again from March 6-7th. The other place he operated from was on Manihi (OC-131, King George Islands Group) between March 1-5th. The QSL Manager is Kari, HA8IB. His current address is:
Szabo Karoly, Aradistr. 42., H-5525 Fuzesgyarmat, HUNGARY. QSL via the bureau is also OK. Eli and his girlfriend Sara, HA9SD, have plans to go back to the Pacific Ocean during the autumn, possibly to the Austral Islands or to Marquesas.

GM7, SCOTLAND. Keith, GM4YXI, will be active during the CQ WPX SSB Contest using the "North of Scotland Contest Group's" callsign GM7V. His activity will be a Single Op/Single Band (10m)/High Power entry. QSL as usual via ZS5BBO.

H40, TEMOTU PROVINCE. Just a reminder that Ron, ZL1AMO, will be active from beginning around March 21st for three week. This operation is a special one because it will be his last DXpedition. We are sure many of you have worked Ron from many rare places and have many of his QSL cards. Ron is a very special, interesting DXer and person. Your editor is glad he had a chance to meet him many years ago at a NODXA meeting. Please show Ron thanks by working him from H40. He will probably sign H40RW or something with the "RW" suffix.

HB0, LIENCHTENSTEIN. A team of five French hams will be active from here from Friday, March 23rd to Monday, March 26th. Activity will be on the following bands: 80, 40, 20, 15 and 10 meters. The team will use the callsign HB0/F6KQL. They will also be active during the CQ WPX Contest. QSL direct or throught the bureau to F6KQL: Radio Club MJC,
7 Rue de Longvic, 21300 Chenove, France.

HK0, MALPELO ISLANDS. Jairo, HK5MQZ, informs OPDX that he and Hiro, HK5QGX, will leave for Malpelo Island on April 6th. They plan to operate from April 10-21st. They will sign as HK5MQZ/0 and HK5QGX/0. Activity will be on CW and SSB, 80/40/30/20/17/15/12/10 meters. However, 160 and 6 meters will be optional. Jairo, HK5MQZ/0, will work SSB. QSL via Jairo Vargas, P.O. Box 10862, Cali, Colombia. Hiro, HK5QGX/0, will work CW. QSL via JA0MGR.

IOTA NEWS.....
AS-079. Take, JI3DST/6, will be active from Miyako Island April 28th

through May 6th. Activity is planned for 15, 28 and 40 meters SSB/RTTY/SSTV. QSL via JI3DST.

AS-155. Bob, EA7FGS, on the IOTA Committee, informs OPDX that Lan-Yu Island was given AS-155, and it is one of the islands in "Taiwan's Coastal Islands". BV9O was active from here during the past weekend.

EU-065. Bernard/F9IE and Alain/F6BFH will be active as homecall/p from Molene Island May 2-8th. Activity will be on the IOTA frequencies SSB and CW. QSL to the bureau or via their home callsign.

IOTA OPERATION. Bill, VK4FW, has made plans to visit three Queensland State IOTA groups within the next 2 months. He is expected to activate the North Coast (Centre) Group OC-172, the Torres Strait Group OC-138 and North Coast (North) Group OC-187. Bill expects to activate them one behind the other. QSL will be direct only. He also expects many of you to work him from all three locations, and if you do so, please include a minimum of 2 USD or 2 IRCs for cards. His callsign will be VK4FW/p. Bill will release more details as soon as all is finalized.

OH, ALAND ISLAND (and IOTA Operation). Ric, DL2VFR, reports that in less than one month he and Frank, DL2SWW, will be active from Aland Island (OH0 EU-002) from April 14-20th and Vland Island (SM7 EU-037) from April 21-28th. Their activity will be on CW/SSB/RTTY. He requests to please use the questionare on the following Web page to give them feedback (Where do you need them?): http://www.iota-expedition.com

QSL INFO AND NEWS.....
3D2TC QSL ROUTE. Bob, W7TSQ, informs OPDX that people continue to send QSL requests for contacts with 3D2TC to him. He reports, "I do not know of any reason that I should appear as a manager for this station, I am not, never have been, have no logs and no cards!!!!!!!!!!!!!!!!!!!!" The only route is DIRECT to 3D2TC, Craig Thompson, Box 273 Suva, Fiji Islands S. Pacific. As there is no effective bureau there, DIRECT is the only way to go. Craig does QSL and has a nice QSL card. Bob, W7TSQ is, however, QSL Manager for YB0AZ, YB3OSE, YB3ASQ, A35RK, A35SQ, 3D2RK, 3D2SQ, AH6PN/HR6, N7QXQ/HR6 and any W7TSQ operations ONLY!!!!!!!!!!

Alex, PA1AW, is the QSL Manager for 5A24PA. However, he is NOT the QSL Manager for 5A1A or any other activities by Abubaker. He is only expecting logs for 5A24PA only. Cards will be printed directly after completion of this special activity and after receipt of the logs. QSLs for 5A24PA go direct only to: Alex van Hengel, PA1AW, Schoener 85, 2991JK Barendrecht, The Netherlands. He is currently not committed to any bureau QSLing.

QSLs for Richard, CX2AQ, can be sent to his QSL Manager EA5KB.

Fran, EA7FTR, informs OPDX that he is currently the QSL Manager for the following stations: CX8BU, OX3CO, TG9RZ, UN7GCE, VK7KHZ, YB4JIM, YC1VBH, ZP8AE and ZP8BHA.

NOT THE QSL MANAGER. Denny, GW3CDP, informs OPDX that he still continues to receive QSL cards for EK4JJ/Serge and EK4GK/Alex for which he is NOT the QSL Manager. The only route for EK4JJ and EK4GK is DIRECT. PLEASE CHANGE YOUR DATABASES. Denny is, however, the QSL Manager for EY8XX and EW6WR.

HK3JJH/HK0 QSLs. Apparently, Carl, N4AA, Editor of QRZ DX, has worked a deal out with Pedro, HK3JJH, on QSLing for his 1999 operation. Cards should be sent to N4AA with an SASE. Carl will send the QSO data to Pedro by E-mail. Pedro will fill out the cards and send them to Carl in batches, and Carl will put them in the SASE for return to the sender. This might be a little slow, but cards will be answered without fear of losing them in the Colombian mail system.

The log for the PW0S (St. Peter and St. Paul Rocks) is now available on the Web page at: http://www.soutomaior.eti.br/mario
If there are any questions about QSOs not in the log or any other kind of problem, please send a message to the QSL Manager KU9C at: ku9c@arrl.net

Mike, KQ0B, informs OPDX that anyone needing cards for Eli, PT7BZ, and as PT7BZ/PY0F can either send them direct to Eli, via bureau to PT7BZ or to Mike, KQ0B. Please note: Mike is awaiting Eli's latest log entries which should be sent to him shortly. He has already received the cards and will reply once he get Eli's log.

QSLs for XW3QBR, XW3ZNR, XU7AAY and XY7AAZ. Roger, N4ZC, informs OPDX that IN3ZNR continues to be the correct QSL Manager for XW3QBR, XW3ZNR, XU7AAY and XU7AAZ .....but, for those USA stations that have not sent for their cards by now, or those wanting a faster reply, N4ZC has the complete logs and blank cards for those N.A stations that want a cheaper or faster way to get their cards. Those stations using U.S. postage may send a normal SASE for their cards to N4ZC. If you have already sent your cards to Italy, don't worry, all U.S. cards when answered will be sent in a box from IN3ZNR to N4ZC and mailed from N4ZC's NC QTH. If you must have a faster return for some reason, N4ZC can return N.A. cards within a day to two. Those stations outside N.A. should continue to use only IN3ZNR. They are working on answering cards at this time.

SPECIAL EVENT. Look for station TM0AR to be active during the "International Festival of Art and Technologies" from May 15-27th. Activity will be on 40/20/15/10 meters including the WARC bands. Reference DDFM - 72. QSL via F5TJC: Jean-Louis Briere-Lecomte, 18 Le Petit Saint Louis, 72400 Cormes, France.

TX8, NEW CALEDONIA (Update/Correction). Franck, FK8HC, informs OPDX that FK8GM, FK8HW, LA5IIA and Franck will sign with the callsign TX8G (not TX5G as reported last week) during the CQ WPX Contest as a Multi/Multi entry.

VB6, CANADA (Attention Prefix Hunters!). Todd, VE5MX, informs OPDX that he will be using the special callsign VB6A from VE6JY in the upcoming CQ WPX SSB Contest. All QSLs go via VE5MX, bureau preferred.

VP6CW AND VP6BK QRT. Robert, KD7H, spoke with Tom, VP6TC, Tuesday night, and he told him that Jacky/F2CW (VP6CW) and Kan/JA1BK (VP6BK) were on Pitcairn for the entire length of their VP6 operation. They were not on Ducie Island or any other island. The two operators are attempting to get Pitcairn admitted into the IARU and "then" perhaps Ducie will be a separate counter (new entity). The two operators left the island and might be active from other Pacific islands on their way home.

ZK1, NORTH AND SOUTH COOK ISLANDS. Victor Rivera, ZK1CG, on South Cook is back on the air again after being off for 10 years. This is thanks to Roger/W7VV and Sue for the very kind donation of an IC-751A and a G5RV vertical. Victor will be operating on all bands from 160-10 meters. If conditions are good he will change bands with you so you can work South Cooks on all bands. He was spotted this past week on 20 meters (around 14200 kHz) between 0430-0700z. QSL only direct to: Victor Rivera, P.O. Box 618, Rarotonga Cook Islands (or use the info on QRZ.com Web site). Victor is clearing a back log of old QSLs from the past contacts he has made. If you worked ZK1CG from South or North Cook Islands in the past and did not receive a card, please send again. Also, look for Victor/ ZK1CG, Tuatai/ZK1CY (ZK1MA) and members from the WWDXC Club Roger/W7VV (ZK1VVV), Bob/W7TSQ (ZK1TSQ), and three others to be going to Manihiki, North Cook for the CQWW SSB Contest this year in October for one week. They will have 4, 5 and 7 element beams and will be active on 160-10 meters. On the return from North Cook, all operators will be active from South Cook. ADDED NOTE: Look for ZK1MA to be active from North Cook. Tuatai, ZK1CY, is leaving South Cook and is heading back to Manihiki on the next boat. Tuatai lives in Manihiki.

Top ten signs that your home is in Hiram, Georgia:

10. Someone asks, "What died in here?" ...and you show them

9. Dust on TV screen gives everybody comical Andy Rooney eyebrows

8. When you are visited by the FCC, Riley Hollingsworth refuses to get out of the van

7. The so-called "Dust Bunnies" have sharp, snapping teeth

6. Your house gets hit by a twister and it actually looks better

5. Guests take one look at your bathroom and decide to use the backyard

4. When someone from the health department rings your doorbell, you say, "Not again!"

3. Every time you turn on a faucet, you hear a muffled barking sound

2. Even Roger Wiseman refuses to sleep on your floor

1. You've been receiving death threats from Mr. Clean

4431. Datong Speech Processor

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-18 18:21:57 UTC
From: Phil <philHSS@Breathemail.net>
Message-ID: <3ab4fe3d$1_3@news2.vip.uk.com>
Source record: 92060

Hello!

I'm not too sure if this is the correct forum for this, but here goes....

I bought a Datong 'Automatic RF Speech Processor' many moons ago.

After quite a while of sitting on the shelf as I had no radio gear set up, I decided to try it today.

It didn't work! Hence my email! Can I buy from you a workshop manual anywhere - anybody know? The unit seems to suffer from Rf getting into somewhere - and I suspect that it needs a re-alignment - but apart from the obvious output level pot on the rear panel, I've not got a clue which 'bits' to adjust.

Can anyone help at all please?

Thanks and Regards,

Phil Smeaton
G0HSS

4432. W4AMP is Psychotic

Sure, W4AMP knows W2ZB's email addresses. He knows lots of others, too. He keeps busy sending his sick, little spams day in and day out in an attempt to harass. Don't YOU send AMP any spam, though. If you do, the dork goes crying and whining like a diaper-clad little first-grader to the provider and stomps his itty-bitty hands up and down and cries that he is being harassed. HE is the victim. He sends magazine subscriptions galore to those he is mad at, and when confronted, he simpers that he is being wrongfully accused.
Hey, AMP. Where's that proof you were gonna find that those tapes of you calling Doc a, "God D..., lying, jamming mother-f...ing Jew". were forgeries? Riley gotcha, didn't he!! Waah! Waah! Waah!
Poor Dimmy. So deluded and sick.
How's your degree in Biomedical Engineering going? Get to Bed Pan 101 yet?

Hey...did you ever get that window in your car replaced or are you still running about with that Hefty bag taped over it?

4433. You Know You Are In Hiram When..

4439. Re: IS Ham Radio Dying? (Was Newark Store)

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-18 20:17:45 UTC
From: Charles Fregeau <n5hsr@sprynet.com>
Message-ID: <3AB517E9.6D38C0DC@sprynet.com>
Source record: 92066
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc

One of the biggest problem with the ham radio population is hams!

I wanted to be a ham ever since I started playing around with walkie-talkies in 1973, but it took me several years and a move to a different state before I actually met a ham.

Also, the current community I live in has a restriction on antennas because, apparently, because a ham a number of years ago behaved rather badly, so the community banned all antennas over 10 ft. high. One can get waivers now, but . . . another black eye for ham radio in the mind of the general community. And if we use PRB-1 to fight their rule, the community assumes we are still a bunch of jerks. Definitely a lose-lose situation.

Somewhere along the way, we've basically lost our appeal to the younger generations. I'm 43, and am usually one of the younger hams at any gathering. I've personally tried, one-on-one to interest kids in hamming, but they want something internet-like. Voice only, or worse yet, CW, bores them to no end. Communicating with the far ends of the world to them is only a matter of picking up a phone and dialing the right numbers. I remember when communication with far points was a matter of skill and luck and equipment.

Unfortunately, I'm now part of the problem, myself. I'm a computer programmer who starts to work early and gets home late, and move a good bit. Involved in the community? Not very much. Most community involvement involves couples and families, and that leaves me out, anyway.

Charles

Aw comeon Brian, you kiljoy... None of this tech stuff ever craps out,
haven't you heard? And the local authorities have it all under complete
and total control, every time, all the time. Right.

Dick

I can't find the posting from the gentleman who was
building a 6 & 2 meter phased array.

Here's some additional info. You may want to look
into the newer SkyGate technology. Their functionality
and cost are a cross between a parabolic and a phased
array. The advantage being that SkyGate technology
is more compact, electronically steerable AND self-aligning.

We still use phased-array technology where I work,
because the government is footing the bill, but SkyGate
technology is cheap enough for the common guy to afford.

All it takes is one counter example to nullify that argument "no one", and
Richard has provided one.

Quoted from a Richard McCollum post in rec.radio.cb

"Pecking orders come in several flavors. I will make no bones here that I
do not consider a Codeless Tech to be a full-fledged member of the
fraternity and in fact I refused to administer them as a VE"

> What many are "bugged" about is the lowering of requirements,
> especially for the highest class of license. Nothing more.

That maybe true, but for some I think it goes deeper than that.

Nonsense, Tony. He can use any frequency he likes - until he's
caught and prosecuted.

After he comes out of jail he can post details here so that we
can all benefit from his experiences.

Go to: http://www.mods.dk/pictureselect.php3?radio=kenwood&model=tr-7800

it is very close to looks of the 7800. I have one. 14 channels and it has a tone board but you have to manualy set the tones. I'm in a bad intermod area and not a peep comes thru on this unit. It has a helical in the ant circ. No broadband coverage but a solid performer on 2 meters.

I need a smaller sized HF antenna as I live in an apartment. It needs to be a vertical as there is no where to string a dipole. The following brands/models fit my needs but I would like to hear from people who have used them:
Solarcon A99
Hygain 12AVQ
Hygain 14AVQ/WB
MFJ 1796
I am very interested in hearing how these antennas work with DX. Any and all info would be helpful! Thanks in advance. Please email me direct at:
NZ8C@aol.com

In article <EsXs6.1351$f27.424620@dfiatx1-snr1.gtei.net>, n9nwo@amsat.org says...
>
>Bill Cheek was among the first to break Motorola's MDT code. Then
>he showed the NYPD was having huge abuse by some LEOs who were
>telling sexual and racial jokes via the MDT.
>
>OPSEC (operational security) within police departments is loose. Most
>military units run tighter OPSEC. We need to have Army Counter Intelligence
>Agents do a review of each department in the US and wake them up.
>
I believe that you and I are on oposite sides.
Whre I see evidence that the police are not to be trusted, you want to show the boys how to not get caught. I do not want to tech the boys in blue how to be more effective at their criminal activities. Until and unless we can clean the cops up, a task that I do not think can ever be managed, I do not want to give them any help in sweeping their attitudes under the rug.
It does no good to force cops to stop telling racist and sexist jokes on their comms system. You have not changed atitude only taught them to cover up.
Reread you comment about their off color jokes, behavior that is further proof that cops are not our friends. They already have the us vs them mind set and nothing is going to cahnge that. High school jokes withbadges, guns and the "forde of law" to back up their criminal activity.
At the risk of repeating myself, never, ever trust a cop.
They are the only legal organised crime gang in the USA.
Rampart is only the tip of an ugly iceberg.
Every smart cop want "secure" comms so they can hide their activites from their communities. Cops do not want civilian review and control.
Every cop I have known has admited that they know who the "bad apples" are. And admit that they are unwilling to end thier carrier to stop the abuse.
If you are a LEO, and if you are honest with us,don't you know which fellow officers can be counted on to rough a suspect up a "little bit", to stretch the truth to cnovert a questionalbe traffic stop into a legal one? If your dpartment does not have cops that beahve in such a manor, please tell me where you live. I will consider moving there next week. Over the last 35 years I monitored a lot of police comms, in over 20 states and many cities. I have heard questionable comms, comms that appear to denote activity that is plainly illegal. Traffice cops looking for pretty girls was a favorite activity of many agencies for years. And in smaller towns, stops are made without informing diaptch(no record), but the LEOs would talk to their buddies on cell phones about the dope they just scored. And what teenager is ever cgoing to complain that officer badge just stole his grass. In Richmond Ky the tennagers

knwe ot to have the cheap stuff, that would result in them being busted, but if they had good weed, it was "confiscated" and they walked. Happens everywhre.
In Mt Steerling (a dry community) the cops and bootlegers had a cool deal going. IF you had out of county tags, and bought booze at the bootleger the cops would stop you, confiscated the booze and send you on your way. Then resell the booze to the bootlegger. He even had a police radio.
Dayton had a similar deal. Buy dopein an out of county car, get stoped and the dope was "confiscated". The cops would call up the dealer and offer to sell it back. In Indianopolis the cops loved to pull over youn single driver ladies and offer to "forget it", if the lady gave them a blow job. I always hoped that a girl would bite somenumb nuts penis off. He would have ahell of a time explaining that assault. A jailer in easter Ky died with his pants down around his ankles, the young black lady killed the sucker. She walked and got a nice settlement, everyone knew his hobby. The jailer in Frankfort Ky just went to jail for the same activity. So excuse me if I have no respect for LEO etal.
Most of my refference are for central Ky, but they are just the ones that jumped out. I did not log this crap, and except in a few cases never made tapes. In Chicago I heard some cops bragging, over the police radio, about how they had sucered a little "sh_t" by telling him the photocopy was a lie detector. They thought it was funny. Maybe so, but it does not speak well of Marinda that thye did not care that the suspect had rights. Or the night in Ft Wayne where the cops were trying to get their story straight on just how that 17 year old black kid got beaten real bad. A cop thought he was ther perp in a nasty rape and decided that he was not going to take any more crap. Wrong kid, but nothing ever happened. He resisted arrest you see. But it sure sounded like they had him cuffed before they started the fun. Their sargent was even offereing hints as to what had happened.
And how many cops do you knwo have a peice of music that they love to play whilst in hot pursuite. It used to be the theme for hill street blues, but Bad Boys looks like number one today.
So trust a cop?
Respect a cop?
Not in modern America.

How does one put a cell in test mode? I assume it differs by mfg'er.
How about a motorola brick phone?

TIA

I would agree with private police comm only if transcripts
or audiorecordings were available to the public soon after,
if requested.

That would solve two problems : perps knowing the cops are
coming and cops hiding evidence of illegal acts or racial
profiling by securing comms.

I am looking for the file spec for the files in the two archives below.
This appears to be all the data on the Amateur radio licenses --
unfortunately any key to the meaning of all the columns in each file is no
where to be found. I would appreciate any pointers.

> That maybe true, but for some I think it goes deeper than that.

Yes it does. But on an individual basis, at least with me. What torques
my
tail is when one whines because he can't have it all on the strength of
his codefree tech written test, or yesterday's equivalent. It merely
indicated a lifelong whiner of the first magnitude, and I won't cut him
any substantial amound of slack. I have lots of tech friends who never
do that, or they would likely not be my friends.
But don't worry, not everyone is cut out to be a CW operator. Most who
aren't don't have a clue what they are missing and couldn't care less.

I think you have hit the nail on the head, Charlie.

The world has changed and the magic that once belonged to radio has lost its appeal to the majority of our population. There are still a few people that appreciate the "magic" of radio, but not many. The same is true of aviation, automobiles, etc. The novelty has worn off.

Couple society's loss of enthusiasm with the requirements for antenna space and the fact that our operations often prove to be a nuisance to others' electronic equipment and it's a miracle that we are permitted to operate at all.

What can be done to improve the situation? I don't think much can be done at all. Perhaps we would be wise to enjoy the time remaining for our hobby and make it a point not to be too cantankerous to those with other agendas. We amount to no more than a small bug in the grand scheme of things.

No, I don't feel I am being pessimistic. I love radio, or more precisely, communicating via EMR, but perhaps it is time to be pragmatic. Nothing lasts forever, not even life itself. Maybe that is why we should value it as much as we can while it's here. Instead of fighting over who is a "real" ham and who is a transplanted CB'er, we should appreciate all of the individuals that enjoy communicating via radio. We are a dying breed.

4461. A QCWA special Announcement

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-19 07:43:43 UTC
From: QCWA@integrity-radio.org
Message-ID: <qcwa@news.qcwa-radio.net>
Source record: 92139
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space

Based on on-the-air observations, it's been moved and seconded. The QCWA will no longer refer to tickets issued after April 15th, 2000 as licenses. We're going to call them 'Asshole Identification Cards' or AIC's.

4462. Re: Secure police communication protested

<zarlenga@conan.ids.net> had the unmitigated audacity to write:

>I would agree with private police comm only if transcripts
>or audiorecordings were available to the public soon after,
>if requested.
>
>That would solve two problems : perps knowing the cops are
>coming and cops hiding evidence of illegal acts or racial
>profiling by securing comms.

That is a good compromise. Tapes are always made of all
communications at my old place.

So eleven years from now, every US ham will have an 'Asshole
Identification Card'?

Truer words were never spoken. As a technical hobby, where skills in
electronics were obtained, the hobby is dying.

As to the "personal communication" aspects, even CB (with no license)
has greatly diminished use.

The problem is NOT morse code or testing, it is a social change. Radio
no longer has "magic" to 99% of the people who would have shown some
interest in prior decades. It is not a correctable problem, and
eventually the hobby will die as a technical hobby and training ground
for skilled communications people.

It'll happen, and there is nothing that can be done to change that.

Perhaps these views are correct. Lets assume they are. That being the case...what can be done? Why sit there and bitch and moan and offer no solution?

How about a major change in what Amateur radio can do. You want to attract the youngsters???? Ever hear of the ISS, the international space station? Tell me how you can talk to it via the internet....WITHOUT RADIOS???. Thats one idea.

It isn't going to be too long down the line when we have outposts on MARS and the MOON. No wires there either.

You ever hear of public service? Traffic nets?? etc.

How about Ham radio that interfaces with the computers for some LAN stuff?

Just some thoughts. Change is good. Use it to our advantage.

Gee, I've been struggling with learning Morse Code for the past three months, working on going the whole way to Extra from my Tech license, and looking forward to it! But I'm a little concerned here. We have people who hate newcomers because they are Tech's, people who hate newcomers because they are only starting at 5wpm, and people who hate newcomers because they apparently didn't pass a tough enough test.

I think that is enough disdain to make a person wonder what they are getting into. Certainly not a welcome mat thrown out here! Imagine a person thinking about possibly becoming a ham. Say they come to this group and simply read the messages. Does this seem inviting? Not very. Some of the messages are filled with enough vitriol to send some of the more timid running to take up a more friendly pastime, like playing ice hockey.

Perhaps some of us need only to look to ourselves to see why there may be troubles within the amateur radio service.

Cecil, Dick is not complaining about Techs as a group nor am I. We are reaping the results of fundamental dishonesty. I will give you two points to look up in your Funk & Wagnalls.

Point 1. The Tech is not and never was designed to be the entry-level license for HF amateur radio. It predates the codeless arguments so we can dispense with them. It was designed to serve a multiplicity of uses, all worthy but none of them in the mainstream of Amateur Radio. Some of them included:
a. Real honest experimenters - all 12 of them.
b. Wives wanting contact with the old man. The Bread-and-Milk thing which was the subject of a lot of dubious subterfuges of which I was once a major instigator. Every wife on our repeater was named Sally and had the same callsign, a 2x3 I once had for 2 months or so.
c. Personal communication of the type you describe with your camping buddies. The FCC whatever else one may think of them has a habit of encouraging communication. Good way to keep tabs on number one son when he is armed and dangerous on a hunting trip.
d. Taking some pressure out of CB. The spots were up then, too.

Without beating the point to death, selling the Tech as an entry-level ticket was and is fundamentally dishonest. In my VE days I did not administer them because I did not believe I was doing anyone a favor. As a practical matter I would not be called upon to anyway because of the necessity to keep the Advanced VEs occupied. In the context where Leland butted in, the discussion was advising the newbie. Guess what? I don't recommend taking Element 2 as an initial step either.

Point 2. This dishonesty, as lies have a habit of doing, has come back to haunt us -- certainly in the general environs of Newington CT. The Tech since it came into existence has been a dead end for a lot of amateur careers. When you get on phone, the time for code practice or working it

never comes again. Larry was in the trap, so was I. So if nothing else our level of tolerance is not as great as some but we know every self-deception in the book. As Billy Sunday once said of Satan, "I know there is a Devil because the Bible tells me so and because I have done business with the bastard personally". I won't lead a man there any more than I would lead him to an open door to unlit basement steps.

At least prior to 1991 the Tech, at least in theory, had to pass 5 wpm so he had some idea of what it was he was evading. Since then, we have developed Lifer Tech Syndrome, Dick's bugbear. Characteristics of this syndrome, a big campaign dedicated toward deceiving both the world and oneself, include:

a. Joining NCI and playing like the code requirement was even a debatable issue within a five-year horizon. Never miss the opportunity to say or write 'Morris Kode'. Note Leland's nearly-indecipherable tag line.

b. Joining everything, subscribing to everything, going to Dayton every year. Activity signifying not a hell of a lot.

c. Entering into every discussion on 'leading edge' technology. Nothing, of course, is ever done just talked about. Knowingly pronounce everything in existence as a 'legacy mode'. Become the resident genius on arcanity -- you too can be the guru of 160 meter gray line propagation.

d. Where anyone has actually achieved anything, even a simple-minded code test, he must be attacked, unhorsed, and mugged. Larry has built a whole new hobby on these dipsticks.

e. Whining endlessly about slights real or imagined. The object, of course, is to punish verbalization of what everyone in the vicinity already knows. In communities of the terminally incompetent the crushing line is "You think you are better than everyone else." When the response is, "I not only think it I know it" it is time for the riot squad. Equality is another word for nothing left to lose -- or more precisely never having gained it to begin with.

I do not play the game nor do I tolerate it.

Dick NBK

Well said! Too many geezers sticking their heads in the sand and contributing to the problem.

Hang in there, Mike. You are welcome into the ranks of Amateur Radio (capitals here) with no disdain, animosity or judgment. For every vocal comment to the contrary, I think you'll find many more hams who are anxious for new blood and willing to lend a helping hand; it's what the hobby is all about; it always has been that way. Unfortunately, too many of the "old timers" tend to be shy and silent about growth in the hobby, but amateur radio always was a melting pot of differences, ages, philosophies and backgrounds. I may or may not agree with your politics, but I respect you as a person and a fraternal member of a wonderful community and that's always what made this hobby great.

I've always been amazed at the sincerity and openness of the amateur radio community. Someone on this newsgroup voluntarily sent me a couple of spare crystals at his expense when I needed them; another eagerly copied an instruction manual and schematic for an older piece of test equipment I was working on. It was all voluntary, with no expectation of remuneration or recompense of any kind. I think you'll find, by and large, that this community is like that. I believe that the brotherhood is still there and I believe it will rally when it really needs to.

Am I overly optimistic? I don't think so... I think there are enough folks who care about this hobby to make sure it doesn't end.

73...

Hi All,

A friend of mine has a couple of AWA RT85 transceivers (Type 1LM 82272)
covering 148-174MHz that have had their "frequencies removed", according to
the texter note on the wrappings.

He is activly involved with out local Volunteer Coast Guard and would like
to use these radios with our marine radio channels (around the 156MHz area).

Does anyone have any information of programming frequencies into these
units?

Any clues much apprciated.

TIA,
Gary MacMinn

> ftp://ftp.fcc.gov/pub/Bureaus/Wireless/Databases/uls/complete/l_amat.zip

The file formats are explained somewhere else (try another sub-directory below .../uls).

The files starting with "a" are applications filed.
The files starting with "l" are actions taken (license grants, cancellations, vanity calls granted, etc.)

If you're looking for something specific to happen soon, look at the files in ".../uls/daily/...." There is one file for each day of the week except there are no "l" files for Sundays.

You know, when I was a young lad, I always had an interest in things electronic and especially radio..... Once I actually found out there was a hobby called Amateur Radio, I wanted to become one of them. However, other things got in my way, like growing into a teenager with wild oates to sew, like work, like motorcyles and cars, partying etc etc.....
I was led astray for many years by the above but once I got my head sorted out and settled down (not throught marriage etc), I refocused, once again on the radio world. I got into scanners and receivers. CB radio was always a poor alternative to what I really wanted but it DID stir up the blood AND I did get in a huge amount of international contact AND I loved it. The only thing that really marred the CB excursion was the absolute idiots that persisted in interferring whilst on the air with their stupid noises and comments. These guys will always be losers in the radio world as they lack the self-discilpine needed to move on to something more serious and so they take it out on others a little more dedicated to their radio hobbies, by acting childishly.
Anyway,,, a friend who worked in and around government circles in the radio world over here,, saw that I was always interested in radio and asked me why I don't go for the Ham license. I porcrastinated for a few years then one day whilst helping him to install a few repeaters, with his encouragement I decided - I am going to get that license, come hell or high water.
I was always dead keen and good at mathmatics and knew a little on basic circuitry and electronics - Why Not???? I mean to say, I always wanted to become a "Ham"....
I enrolled in the very next radio course at the local Ham Radio Club. This went for 6 months - every Tuesday night for 2 hours after dinner. As it turned out, I started telling the tutors how to work out many of their own equations and could often work out the results in my head, quicker than them with a calculator. No!!! Not brain power,, just a good memory...
I studied for more than an hour in the morning before work (from 5am - 6am) and another 3 hours after dinner (apart from the above Tuesday nights) every night and mostly all weekend for the next six months. I got together with a few of the others on the course who were having troubles keeping up and helped them in the art of rememberring things, like equations etc. They knew the "radio" stuff but the mathmatics was getting to them....

Anyway,, came the BIG day and we all went into the exam room and sat down for the "up to" 3 hour long exam. I lasted just 28 minutes and was out the door. All that studying really payed off.....
I missed out on just one of the theory questions and got all of the law questions correct - a 99% pass rate. Once again, NO!!! not raw brain power, just a good memory.

Once the license came through the mail I was really proud, REALLY proud of myself and went out and bought some gear. The license entitled me to VHF/UHF only as to get the Full license, you have to do the dreaded CW test. For now the VHF/UHF license would do though.
I enrolled into the local radio club and was as happy as the old pig in sh_t for a while..... However, it was at the AGM (Annual General Meeting) that I got really put off the club along with a huge handful of some other more senior Hams.... The club was sort of split into little factions and each of them was only interested in their own little empire. All smiles on the outside but out came the knives at the election of the new club president etc...
I couldn't believe what I was watching as the whole club virtually split down the middle... To be honest, I personally think that a few of the older members just don't like newer younger members. Even a few older guys that sat the license with me said the same....
I too am 43 yrs and am every bit as self-disciplined and serious as anybody when it comes to my hobby... I even threatened to report a friend for illegally using another hams callsign and purchasing equipment, as he didn't have his own ticket and was constantly calling me now that I had mine. I never replied to him on the air but emailed him and told him on many ocassions to stop or else...
This went on for months and became very annoying. As soon as I popped up on the local 2m repeater, there he was calling me. He even followed me to more distant repeaters. I trasmitted from my base while he would drive to a nearbly hilltop and use his handheld. How I never replied to him in this time, I will never know.
He and I were both going to sit the exam together but he was just too layed back at the time and started calling me names when I got mine.... I also said that I would help him through the next exam but he only replied to that suggestion by telling me I was a "Know-all" and a few other names etc..... That was when I was going to report him. No not a case of 'tit for tat' but more that I told him that once I sign that dotted line, I would live by the rules... I still do.

In the last handful of years since I have been on the air, I have noticed that many older hams live in a world of their own with their head in the clouds. One big fault is that they think that all younger hams are nothing more than ex CBers and not of the blue blood so to speak and refuse to have anything to do with you if you don't have your CW pass...
I have absolutely refused to do the CW course as I cannot see the sense in torturing myself for another 6 or more months, then to sit the test and hopefully pass,,, only to NEVER use this outdated mode of dots and dashes. I truly can't see the point in it. Of course this puts me right off-side with "those types" who have passed the test. Honestly, some of them think their turds don't stink. I just stay right away from them. I quit the club and moved on.
HF ham radio is going downhill very quickly here and its because nobody wants to rack their brains for this ancient ritual called CW or morse or whatever you want to tag it. I have voiced my opinion on the matter with the correct authorities but they are all from within the "blue blood"

society and will have nothing to do with it. Oh ,,,, They did drop the number of words per minute needed to gain a pass (I am not sure from what - to what) it is now but I still think it's like bandaging an open wound rather than getting it stitched up....
In my opinion... CW needs to go,, just for starters. Then a few of the ancient Old Boys need to be axed and some newer thinking needs to be injected... The internet and cellphones are killing the enthusiasm here and the great gods of the radio world over here cannot see through their fogged up glasses.....
Also, in my opinion, anyone who thinks that CW actually has anyhting to with Ham Radio (apart from a nostalgic reminder of its roots) then they are part of the demise and need to re-evaluate their outloooks on Ham radio. I am not saying that CW should go altogether but it should not be a part of any testing.
I did download a few CW programs from the internet AND I started to learn a few strings of dots and dashes but I just cannot mentally understand why this ancient ritual has to be used in the testing procedure. It is for enthusiasts only. It reminds me of blood rituals that some people go through to get into some occults. That type of think is for that type of person.
NO insults to those who like CW, of course. BUT it's time to move on.

I am not sure if this is a worldwide trend or not but I do know that unless something is done quick-smart, then Ham Radio may well disappear from the face of the earth before you and I feed the worms. New membership here is down to about one-quarter, one-fifth of what it was when I went through. That was only 6 years ago.......
What has happened since then...? You and I know what because we are communicating via it right now....
Many of the older hams don't really get into the internet so they don't see how it is stealing prospective new members from the hobby.
At a guess I would say that there are many jealous eyes just watching and waiting for Ham radio to lose the use of many of their frequencies so they can get their claws into them....
We had better not loose any of them or they will be gone for good!!!!!

Hi Mike,

People always resent seeing something they worked for being "given
away", although I accept the lowering of requirements as a reflection
on the change in technical perspective.

I don't resent newcomers at all, or feel bad about them.

What I feel bad about is the devaluing of my license. Factually,
extra class tickets are not extra class any longer. They have been
downgraded. That isn't the fault of anyone except society as a whole.

The same thing happened to the First Class Commercial ticket. The same
thing happened to degrees in our schools.

I'm not complaining, that's just the trend in everything today. It
won't fix the lack of interest, it won't speed it along. It is the
lack of interest in how things work....and in doing work....by
most people today that drives the results....not the other way
around.

Someone said why not offer a way to improve things...but no one can.
It is a social issue, it isn't going to be cured by letting one peson
out of ten thousand or ten million talk to someone orbiting in space.

All the bitching in the world, or all the suggestions offered, won't change that. It's a fact of life, not a emotion. People as a group have to get excited about learning about how things work, and making things work or it won't change. It isn't WHO we talk to, but rather what we talk about, that has changed.

73 Tom

So keep struggling, like the rest of us did. Don't worry about the A-holes out there. They are just jealous and ill because they had to pass the code test.

If the truth be known there has not been a real code test since the VE's took it over.

I NEVER took a test under a VE. I took it all under uncle Charlie. And Im an EKTRA....Big deal. DOn't make me a better ham. Just makes me more diversified. In July I'll be a ham for 40 years. Another big deal....see what I mean?

Welcome to ham radio. Again...don't worry about the idiots.

Correct and well stated. Bottom line is don't blame the folks that take advantage of it. Are challenge is to help the new comers into the fold and show them how to do it right. Are we up to it guys and gals?

4487. Europe now has 5wpm Morse code standard

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-20 01:27:58 UTC
From: WIA Victoria <wiavic@XXwiavic.org.au>
Message-ID: <3AB6B21E.E1EB6DDF@XXwiavic.org.au>
Source record: 92166

All European countries are expected to adopt the 5-words per minute Morse code test standard for amateur licences, following a revision of the CEPT (Conference of Postal and Telecommunications Administrations) Harmonised Amateur Radio Examination Certificate (HAREC) regulation.

On 6 March 2001, the European Radio Committee (ERC) adopted a revision of the CEPT Recommendation T/R 61-02.

The ERC consists of representatives of the radio regulatory authorities in all 44 CEPT member countries.

More details can be read about the global trend of the 5wpm standard at "Morse code watch" wiavic.org.au/mcw

Ed --

It depends on what you mean by "we". If "we" is the average ham in general, I don't think we are really a dying breed. I would say that "we" are an evolving
breed. Ham radio has evolved from what it was years ago, and that is the natural progess of our technically based hobby. This is to be expected, and desired.

If by "we" you mean those of us that would rather tinker with old radios and nurse
them back to life, then yes, I concur that we are a dying breed.

I don't think amateur radio will ever completely die off, if for nothing else than the
reason that we can provide emergency communications as a public service. The
more our communications networks become integrated, the more fragile they become.
Look at any of the recent disasters in which hams have provided emergency communications;
why weren't cell phones or the internet used? The answer is that the infrastructure
for both of these technologies was knocked out. It will only get worse.

Ever hear of "information warfare"? Consider how our integrated communications are
suseptable to viruses etc. Think this is an unrealistic scenario?
Think again. War is no longer as we think of it in WWII or Viet Nam; people fighting on a
battlefield. It would be far more beneficial for a potential advesary to cause us massive
economic damage by shutting us down for a few days (if not longer) than an actual
physical attack.

God help us, but a well placed tactical nuclear weapon could shut down a sizeable portion

of our comm networks. That might take out a lot of ham gear too, but I'll wager we hams
up and running in a short time. Gads, are we actually at the point in our world where we
need to actually seriously think of EMProofing some part of our gear?

Finally, during a disaster, Joe and Jane Sixpack don't think to keep an emergency
communications system up and running. We in the amateur community do.

It is up to the Amateur community to sell itself to the public for what we can do to serve
the public. And, regardless of what particular facet of ham radio an individual likes (CW, SSB,
PSK31, BA, Computers etc), we all need to be prepared to render this service when needed.

Just my $0.02!

Mark K3ZX

Source record: 92169

Greetings!

I would like to trade my nice Icom IC-W31 dual band (2m/440) handheld for a Motorola field programmable VHF HT. Will consider any 'commercial' (maybe even another amateur) transceiver that does the PL tone of 229.1 -- That PL is an 'oddball' tone, and most amateur transceivers do not have it. There are some exceptions. I would really prefer a GP-68 in good shape with accessories. My Icom W-31 comes with 3 batteries (2 BP-173 batteries, 9.6V @ 650 mAh, and 1 BP-171, 4.8V @ 700 mAh), speaker mike (clip is broken, easily repairable), leather case, and charger. I know some of the Alinco HT's do 229.1 PL, but not all of 'em. The W-31 has cross-band repeat capability, dual receive, etc. Nice rig. Please e-mail with offers!

73~~~

> equivalent. [snip]

What a bunch of bullcrap, Dick. I don't know of a single person that wants to "have it all on the strength of his codefree tech written test." Instead, what most of us (Techs) want is to be able to use the capabilities that the FCC has authorized, without constantly being harrassed for using those capabilities differently then you might use them (in other words, stop endlessly judging us).

In addition, like all human beings, we would not mind a little respect - not as a ham operator (I know we'll never get that from you, no matter what we do), but simply as a human being who wants to enjoy life without all the endless insults (the crap you wrote above or the "no-code equals no ham" nonsense, for examples).

And finally, some (not all - some don't mind the code tests and some have no desire to upgrade at all) want an opportunity to upgrade without spending weeks learning an absolutely antiquated communications mode that very few, if any, outside of ham radio uses anymore. By the way, describing code as an "antiquated communications mode" is not a judgement, a put-down of code users, or even an opinion - it is a fact.

Now, every single person that I've met who feels that way is more than willing to meet reasonable requirements (the written tests, for example), so it is not an situation of wanting something for free. Instead, they all seem to be saying they want a fair price for what is offered (and learning Morse Code is not a fair price simply because you once had to pay it).

The EPROM is mounted on a dedicated module Z-273 which includes
latches. If you don't have the module, the radio isn't any use to you
as these modules were extinct seven years back and the replication
cost is about $60 apiece.

Programming is NORMALLY done on a dedicated standalone box. There are
ways ....

If you have the modules, ping me an email (remove the obvious) and
I'll help where I can.

It also doesn't help that so many existing hams seem determined to run off anybody who wants to join, or does join, this service. For example, the resistance the codefree Techs have faced is more than enough to drive almost anybody away. I've never personally experienced such pervasive, and incessant, hatred in my entire life.

Richard McCollum wrote:

> repeat after me: Usenet is not amateur radio.

This is not limited to Usenet, Dick. I've seen what he describes throughout the ham community - club meetings, on-air contacts, ham fests, and almost anywhere else newcomers run into other hams.

Heck, I've even seen this in action recently at a local civil defense meeting. An Extra was promoting a certain civil defense procedure involving hams and suggested during his presentation that Technicians be excluded (no reason given). Had I not been present to speak up, and had I not once worked for this civil defense office, I'm sure he would have gotten his way.

Whatever the case, Usenet doesn't exist in a vacuum - the negative opinions about newcomers voiced here by older hams (older as hams, not age) remain with them outside of Usenet when they're participating in "real" ham activities. And the anger, and hurt feelings, because of the opinions voiced here remain with the newcomers outside of Usenet also.

Good observation. :) I personally think that the level of technology has gotten too high for our own good. I am not all that old.. and when I was young, preteens to mid twenties, people were still curious about how things worked.. kids took things apart (and attempted to put them back together) just to see what made them tick. In the past 25 years or so, technology has reached a point of everything becoming basically a "black box".... which is to say, if you put everything in a VLSI chip, it's not easy to know what it does, or how it does it. I'm sure many of you built crystal radios when you were kids.. now, you can't even find the parts to build them (except the cheap, worthless kits at RS). Also pretty sure that you opened up a table radio or two (or a pocket transistor radio) and played with the IF and RF circuits to see what they did. (I opened my folks brand new table radio, $59 1965 dollars, and pulled out all the tubes to see what they were..... I didn't know there was a tube diagram on the bottom of the radio, so put them back from memory... this resulted in a $12 repair bill and an ass beating..*ggg*)

Now, if you open a radio.. you MAY see a variable capacitor.. but everything else is IC and/or ceramic/crystal filtering... (which, btw, offers a very BAD sound compared to an actual LC tuned circuit)... no wonder no one cares anymore... there's nothing there to gain anyone's curiosity.... :(

Since when is giving an opinion to be considered bitching
and moaning? If your house was on fire and I noticed it
before you did, would I be bitching and moaning if I told
you about the fire? I guess I know what to do if this is
ever so. I surely wouldn't want to disturb you by laying on
those negative vibes.

There is no solution that would enable us to reacquire the
magic that has been lost. It occurs for only a certain
period of time during the development of a technology and
cannot be recaptured.

I used to work on cars as a teenager for hours without end.
I'd hate to see a kid trying to do that today with today's
cars. It just isn't within reason. It's not the kid's fault.
Technology has changed cars, just as it has changed amateur
radio. We are merely stating a fact.

In the respect that you have mentioned, nothing has changed
at all.

Ever since I can remember, hams have been just like every
other group of people I encountered throughout my life. Some
are friendly, some are shy, some are curmudgeons, some are -
well, you get the idea.

Get this notion out of your head that you have joined some
huge fraternity of pious people that belong to a secret
society and who will gladly embrace anyone with a ham
license. It may have been that way in the spark-gap days (I
wasn't there), but it hasn't been since then. Yes, there may
have been (and still be) clusters of hams that behave this
way, but they are the exception.

Get your expectations in line with reality and you will
enjoy the hobby much more. Hams are just people - like
everyone else. No more, no less.

Some of the attributes ascribed to "geezers" are part of the
natural aging process. With any luck at all, you too may get
to the aspired rank of "geezer". Wouldn't it be nice if
those of younger years and clearer minds had a little
compassion for someone, such as yourself, whose mental
acuity and physical deterioration has affected their outlook
on life?

Once a noted wealthy ham went on a safari to Africa and came
home with a monkey. He brought the monkey to a club meeting,
and cornered the ham class guru. "I'll give you a hundred
bucks to get my monkey ready to take the Tech test". The guru
demurred. "Five hundred bucks." More denial. "A thousand
bucks." Finally the guru said "OK, but it will take 18 months."
"Deal" said the ham with the monkey and departed.

"Hey, old buddy, what kind of a deal is that?" said the guru's
pal. "Look", the guru said "in 18 months anything can happen.
The ham can die. The monkey can die. And even if not, you
ought to see some of those folks that I have to prepare....."

As I have stated elsewhere, in other posts on this thread,
there are curmudgeons, or worse, in every venue life offers.
Unfortunately, it only takes one to sour someone's
afternoon. I wouldn't take it personally, but would look for
another contact with someone that wants to communicate. Like
me, for instance! I don't care if you know the code or not.

What's currently achieved on V/UHF used to be done with MF groundwave.
Power aside, look at the coverage your local AM broadcast stations have
on MF. 73, Jeff KH6O

Hello,
i have a big problem with a JRC 345 HF Receiver, i have made a PERL
program
to control this radio with my Linux pc. After a few remote command from
PC
to Radio is not possible to control the radio.. i can switch the
frequency from remote only 10 times and then the radio will stop the
remote controll. I have try other
pc and other tipe of program but the problem is back again. Anyone is
using
here a JRC 345 with any type of Remote Program ???

Best Wishes and thanks in advance Andrea Borgnino IW1CXZ - Rome Italy

I see that you are one of those people that need to have
something that tells you what you can and cannot do.

"It" doesn't have to say so. The Constitution tells the
government what to do, not the people. In fact there is
no statute that tells the people what they should or must
do.

The people may do whatever is lawful. The presumption of
responsibility is for the people to have sufficient
knowledge to guard themselves and direct their government.

If this means monitoring certain communications and
movements of the government, so be it.

And how long does it take to cut through your state's red tape to get a
request processed? FOIAs are barely worth the paper they're written on.

>Reread you comment about their off color jokes, behavior that is further proof
>that cops are not our friends. They already have the us vs them mind set and
>nothing is going to cahnge that.

You cannot regulate an officer's thoughts or mind set. We can and do
regulate how the officer works with the community as well as how the
officer performs on the job. Officers that can not adjust to the way
we want policing done here don't usually last long.

>High school jokes withbadges, guns and the
>"forde of law" to back up their criminal activity.
>At the risk of repeating myself, never, ever trust a cop.
>They are the only legal organised crime gang in the USA.
>Rampart is only the tip of an ugly iceberg.

Back to the original statement. The reason that a lot of no-code
Techs don't upgrade is that VHF repeaters reliably perform the
desired functions much better than HF. Therefore, a lot of no-code
Techs have absolutely no incentive to upgrade.

You know, that isn't my point at all. I don't need to be embraced by anyone. I'm just making note that there is an element in the service that has a surprisingly strong dislike for newcomers. This can be discourageing to some. I haven't seen that level of disdain in any of the other organizations I've belonged to. Not to this level.

I'm already age-qualified, Ed, but I like to keep my mind open to the natural progression of change. It keeps me way behind my physical age. More folks ought to try it sometime. It'll make them feel good about themselves and the world again.

How true! I've only received my license recently after being away from radio for 40 years. Yes, I read the book and did the internet practice tests, but that gave me book knowledge, not the practical knowledge only an "Elmer" could provide. Sure I'm licensed, but it's gonna take me a long time to learn anything about this hobby! Needed info that was regularly shared in the days of olde! Let's stop bitchin' and start keeping up with the times. And for you "Geezers" - how about realizing that you are the masters and the youngsters can't take that away! But true masters readily pass along the knowledge and experience they've accumulated in all their years!

Another valid statement by Dwight Stewart. Now all you that love to
badmouth the 'new guys' I challange you to pull out a QST. Check out the
articles concerning emergency and disaster communications. Check out the
calls of the operators....

Notice how many 'new guy' calls are there? Now check the database and see
how many are 'no code geeks'.

What have you oh no it all old timer done FOR THE SERVICE LATELY???

Now shut up.

Thats true...but...most new comers seem to think they know it all. Perhaps both groups need to knock it off and pay attention to whats important...keeping Amateur Radio alive and viable.

Look folks...this argument is not new. It was the same when I got on in 1961. The difference was I was willing to listen, and some were willing to teach. See my point?

Dwight, if you think it thru there are bits and pieces of this picture that do not make any sense. You are getting pervasive and incessant hatred from a group that by and large could not agree on lunch, when to have it, or the merits of pastrami on white with mayo. HF amateurs could not qualify as an armed mob let alone an army. Why might this be??

Since its inception in the early 50s the upgrade rate for Techs has been about 15% at best. This is an entry-level license?

Yes it revolves around Morse testing, not however Morse itself. The reality is that in most HF stations the key exists to allow tune-ups (it's a bitch on SSB) and precious little else. Determined dittyboppers would much rather see no-code than 5 wpm for the good of the mode. You learn so many bad habits at 5-10 wpm that zero is a better starting place. So what is all the flap about. How are they related?

Better yet, walk into your club with the 5wpm cert and the tension level will drop about 40db. You are no more savvy about anything than you were before and have earned a learner's permit to dittybop. Why? Pass Element 3 with the code cert and you become a part of the woodwork.

It is not about VHF, it is not about operating practices, it isn't about age, and those who value their seniority get about as much flak from their contemporaries as they get from you. It is all about a lousy code test and at 5 wpm at that. But the same problems existed when it took 5 for the Tech and General was 13.

The fact on the ground is that for at least the next five years HF Amateur licenses are going to require an inconvenience called a code test. We can argue shoulda coulda hafta from now on but that is the reality. The 15% I

mentioned have long since downloaded Morse Academy from http://ah0a, and blunderfutzed their way to success or are doing so in silence, calmnity, and dignitude. These guys you don't hear from long enough to generate pervasive hatred. Hmmm.

So knowing about the success rate of Techs in general for 50 years (and incidentally being one of the 15%) just what is my ethical duty when he walks in to the club, the restaurant table, or my life seeing the call sign plates? The fresh newbie unless he lays his freeband stories on me as if I should give a shit will get nothing but positive ego-boo. After 90 days he gets the prod in the ass to get going with the code. At somewhere in the 6 mos to a year, he gets written off as one more loser swallowed by the Tech trap. Sorry if it bothers you but that is the size of things. In the days of 5-year licenses the word was that the only dishonor to a Tech was renewing it.

Now we come to Lifer Tech Syndrome. When the decision is made not to pursue the code for whatever reason -- remember that you do have something of the Cathedral Problem here; the OTs did pass a more substantial code test so you are unique -- strange things seem to start to happen. Now I am over 25 years since my Extra and forever since the Advanced (never held a General) so my viewpoint may not be among the best but from this exalted pulpit it looks like things in the following categories seem to happen to those afflicted:

Morse is defined out of existence as a 'legacy mode' and pissed upon at every opportunity. The Lifers never miss a chance for Morris Kode.

Great and lengthy discussions occur about wonderous digital techniques none of which ever get built.

Great mythology gets built up and believed about OTs, Wouff Houng rituals, the nasty ARRL (one of the world's truly clueless operations) and the vast conspiracy to deny the codeless their due.

Any one who ever passed 20 must be attacked, unhorsed, and mugged. Even tho we see thru the self-deception it does cause us old guys to get a little testy.

Vast effort is expended at the peripheral aspects of the hobby, every publication is memorized, and periodic pilgrimages taken to Dayton and Hiram Percy Maxim's grave.

When prodded about the code requirement they scream "Bigot" and worse.

OK, the view from the other side. A lot of us read a good part of the frenetic activities of the lifers as a big smoke screen to cover their unwillingness to simply clear the 5wpm hurdle and move on. When faced with self-deception the OT has an ethical problem: people who go along with and encourage unrealistic behaviors are known as 'enablers'. Most of us are of an age where we have dealt with alcoholics, addicts, or simply loafers. We do not play the game and in fact can not without becoming part of the problem. Kind of like talking with pirates on 10 meters.

Are us OTs a bit quick on the trigger? Yes, more than likely. Do we simply define Techs as lifers when they are merely slow to grasp reality? Certainly.

Are we killing the new blood of the hobby? Probably not. One cannot kill the already dead.

Always ready to be educated. You have a better explanation???

Dick N&#65533;BK

I don't think so.

> but I meant it then and mean it now.

I have no doubt about that Richard. Fortunately there are few like you out there. How I, or any no code Tech, chooses to follow their interests in Ham Radio is up to us. We don't have to meet your personal list of "approved activities" to be considered "real" Ham Radio operators. If that does not sit well with your vision of things, too bad, cry in your coffee, and move on.

License class advancement is not the sole goal in Ham Radio just as it is not in other areas of life either. Not everyone wants, or needs, to reach the Extra Class level the same way as not everyone needs to get a Ph.D. in their chosen field.

You strike me as the type of Ham who feels one is not worthy of being called a Ham UNLESS one follows in the foot steps you seem to feel is the only path to that title. You also seem to be unwilling to let others follow their own course, their own interests, and make their own choices in Ham Radio. Your vision of the path to being a "real Ham" is not the only one, nor is it necessarily even a good one. So you attempt to do what little you can to impede to process by refusing to help, instead you elected to hinder the process by shifting the burden to others. Seems a pathetic attitude where if you can't have it your way, you just wash you hands of the whole thing, such as being a VE, when it has anything to do with no code Techs.

As far as my tag line goes, if you can't understand it, try harder. I know plenty of other Hams, and non Hams too, who know exactly what I'm talking about. I will give you a hint however, it's a tongue-in-cheek joke about CW. If you can't figure it out after that, then your a lost cause.

"Whatever is lawful" is another way of saying "Whatever we deem is ok for you" or another way of putting it is "Whatever we give you permission to do".
Who is "we" and what authority have they been given and by who?
Something is wrong with the whole system if some old worn out cronie on a supreme court seat
or the group of old cronies who could give a crap about "we the people" in the senate and care
more about their golf and how they appear in their fancy speeches to their fellow house members
and these goons are deciding what we can and cant do.
All I did was be born here. I owe nobody nothing. Nobody has done anything for me so why do they think I owe them something including submitting to an authority that doesn't exist except by
weapons and threat of death. No wonder that guy said "Give me liberty or give me death". Now I
understand fully.

Well, it is for me. I got my tech licence toward the end of '99, and
when I freed up enough time, started the Morse work at the beginning of
this year.

> Better yet, walk into your club with the 5wpm cert and the tension level

Well, at least for the effort I've put into the Morse code so far, I
would guess that they might think I was a bit serious about hamming.

> dishonor to a Tech was renewing it.

Hmm, I guess I failed that one because I was around a year before I got
to studying the code and missed the deadline! I know I'm going to feel
dumb for asking this, but what is ego-boo?

> Any one who ever passed 20 must be attacked, unhorsed, and mugged. Even

> little testy.

Could be a chicken and egg thing here, Richard, I'm not sure. I
certainly don't want to disrespct the OT's, I have often thought how
much more difficult it must have been for them to pass thier tests,
especially the Morse Code part. Honestly, that has been just about the
most difficult thing I have ever worked on. I think it is because I have
bad tinnitus, and am used to tuning out my ears. Obviously I can't do
this with Morse Code, so I'm having to relearn something pretty fundamental.

My congratulations to all the stations who on the Maritime Net 14.300 rendered aid to a vessel who had a person shot aboard. Their quick thinking and coordination with the Venezuelan Navy, Trinidad and Tobago Coast Guard as well as the US Coast Guard, San Juan Puerto Rico, made the rescue possible

In many locations the LEOs use etra-departmental, or "supplamentel" comms. Like cell phones, PCS, FRS, Ham Radio, unlicensed business band, and even CB. Given that I monitored a fair samp[ling of thes un-official comms, I can assure you that in Cincinatti, Dayton, ft wayne, Indianopolis, Ashville, Knoxville, Atlanta, the list is way to long to list, that the comms had nothing to do with legitimate law inforcement. A lot to do with getting stories straight, placing bets (for some reason this is really big in Ohio only heard this one there), several cases of cops buying drugs. For personal use. HEard cell phone call where an officer made it clear to his wifes divorce attourny, lover ,family that people where "going to die". I was olny in the places on a near random intervals, my former job took me all over the south and for a faithfull, non drinking man, that HATES tv, scanning and SWL was the oly thing to do. Lots of time to listen and fogure out how each hell hole operated. I used to have all the results, ie in which town what form of bypass comms did the police use. If theose in charge really wnated to get a hnadle on "Whats happening?" they would outlaw, bar, make an imediate terminatin offense to use "non-official" comms for any official worrk. In many, many towns I have heard the officers use cell phones. Most cops know that the official comms are monitored and recorded. (except for "mobile extenders that allow car to car, simplex, non repeatered comms) And will go to great lengths to aboid talking over their "police radios", but even on the official radios there are lots of of "bad", ie illegal, comms. If any civil rights attourny wants to nail most "racial profilling" all they have to do is get the tapes.

>Yes I am a LEO. We take action when abuse is discovered. We expect
>our officers to obey the law. I don't have any tolerance for
>dishonest or unethical officers.
I trust you and have no reaon to doubt you. I envy the community that you live/work in. Being on the road so much, and monitoring all the while, I have heard many "thugs". bullies laughing about pushing people around. And I have had more than my fair share of "traffic stops". In a state or federal vehical. Always with speed control, never was in a hurry. As an "mustang" engineer, who has worked with many electronics systems, I have some real doubt about the

average cops ability to use RADAR (microwave X/Ka etc) accuratly, I have seen too many police officers runing radar in no-no places(deep cut throughs, bridges etc) and attribute some of the problem to bad training and misuse of equipment. So some is just honest over zeal. {LIDAR is hard to make mistakes with!} But I have been stopped by many un-polite "officers". Non of whom ever thought to see if I had a recorder. I used to entertain fellow cow-orkers by playing the tapes back. Never got a ticket, always smiled and was polite even to the most thugish officers. Got lots of warnings "to keep it slow", when I was the slowest thing on the highway. got stoped once in Atlanta and was threatened with arrest if I did not keep up with the flow of traffic. Since it was my last trip I smile, said ok, and took off. Called 911, played the tape back to the dipatcher and offered to play it back over several of the Atlanta Ham repeaters. Officer idiot keyed his lights, whipped around me and gave me a rod, with the reddest face I have ever seen. But I suspect he is still a cop.
Our experiences differ. I know of too many cases where the cops, prosecuter etc go light or ignore infractions by the soicla elite, but hammer the powerless. Perhaps my own families tragidies have embittered me a little. But I had already lost respect of the law and its menions before I found out that a well respected member of the central Ky "society set" liked little boys. And that the police knew about it for at least 10 years before he raped my youngest son. The SOB is dead (after a long painfull bout with AIDS), and it would only hurt the other young men who were powerless to protect themselves. But our experience is not rare. I have several friends, from widely differening geographic areas, that had similar stories. Of young firls raped by "prominent' men, and nothing happened. Of politicians who drive so blind drunk that they kill people. Two examples, both from Ky.In Northern Ky Pete Worthoigton had a head on collison and killed a young mother, the fact that he was the local state representative had nothing to do with the local/state PD failing to ever arrest him. so he and another died" In Lexington a former Coach was fond of drive while blitzed. After a few wrecks, even the local police accepted they had to stop this. But the mayor forbade it. So they had the KSP do the bust. Coach was gone in three days. But the sad part is the local cops knew he had a bad drinking and driving problem over a year befroe even they even tried to arrest him. Thye were just lucky that he killed no one in the mean time. Because I had tapes of their cell calls(this was Pre ECPA) and would have given them to the victums family.

Good luck and stay safe.
And may you always know right from wrong and act appropriatly.

You may well be the exception that proves the rule. The only reasonable suggestion I might make is to find some software (if this is what you are doing) that allows, as Morse Academy does, one to vary the tone from the usual 750 Hz or so.

When the exam comes, by all means get with the VEs beforehand. Aside from being a nice and competent bunch they are required to make reasonable accommodation for physical conditions. I have done several oddball exams in my time.

Circumstances alter cases and yours is one I am surprised some of the locals have not at least tried to help you with.

Drug runners grow fearless along border

Mark Shaffer
The Arizona Republic
Mar. 19, 2001

When Tombstone Marshal Paul Kostellic comes to work and switches on the radio, he needs both a translator and an encryption specialist.

That's because Mexican drug traffickers have figured out how to tap into his department's new, high-tech radio relay system and are using the police band at will for their communications.

"There's more chatter this morning by narcos than by our own officers," Kostellic said one day last week.

Using police bands in southern Arizona is just one example of how criminal organizations around Agua Prieta, Sonora, just south of Douglas, are becoming increasingly fearless in their efforts to move drugs across the border.

Seven times in the past five months, vehicles loaded with drugs have sped northbound past the Douglas port of entry into oncoming southbound traffic.

In addition, drug cargoes captured recently are about twice as large as those of the past.

Officials attribute these moves to stepped-up law enforcement along the border.

The primary smuggling routes have moved to more isolated areas such as the Peloncillo Mountains near the Arizona and New Mexico state line; the border with the Mexican state of Chihuahua; and in the Coronado National Forest between Sierra Vista and Nogales.

"What we are seeing here is the effect of having 1,600 Border Patrol agents," said Lee Morgan, lead criminal investigator for U.S. Customs in southeast Arizona.

"It's forced the dope smugglers into the mountains and desert and into desperate measures if they stay in town. But they always have a lot of time to think about things like, 'Why not crash the port against traffic during high-traffic times?' " Morgan said.

Douglas Mayor Ray Borane said it's an appalling trend.

"We've already had one of the drug vans smash into a tourist car going south," Borane said. "I have a feeling that if the drug interdiction effort continues at this level, this problem could get worse and worse."

Jimmy Tong, Customs port director in Douglas, said law enforcement officers recently captured four of the seven smugglers who drove in the opposite lanes of traffic. Security against the wrong-lane intrusions has been hampered because the Customs Service is building an inspection booth for southbound traffic, Tong said.

In two of the cases, a 15-year-old Agua Prieta male was driving the drug vehicles. In the first, he lost control of his vehicle and smashed into a desert arroyo just north of the border. The teenager was thought to have suffered spinal and other injuries after an air bag activated, and officials decided not to prosecute the youth.

Ten days later, the same teen was arrested after another port-running incident in the same fashion, Morgan said, and was prosecuted.

"In all but one of the cases, we believe that marijuana was involved," Tong said. "Before, in our normal stops, we would take 30 to 50 pounds of marijuana, and now the average is 80 to 100 pounds or more."

Officials say fewer loads are being smuggled across, but those loads are much larger.

According to Border Patrol statistics, nearly 108,000 pounds of marijuana have been seized in southeast Arizona this fiscal year, which began Oct. 1, a 3 percent decline from the same period last fiscal year.

Cochise County sheriff's deputies also have made two of their largest seizures in vehicles since the beginning of the year, with more than a ton of marijuana in each, spokeswoman Carol Capas said.

"We're thinking that there may be some new drug organizations entering this market," Tong said.

That thinking was reinforced last week when a joint operation of U.S. Customs and Mexican police seized an airplane carrying nearly 800 pounds of marijuana 15 miles south of Nogales, Sonora.

The drug traffickers also once used their own radio-transmitting equipment.

That began changing four years ago, when the Federal Communications Commission closed a monitoring station it had operated in Douglas, said Al Haines, a microwave engineer for Cochise County.

Haines has sent letters to Sen. John McCain, R-Ariz., among others, trying to get about $3 million to purchase a secure communications trunk system for the county.

"That (FCC closure) left Tombstone police, especially, in a bad situation as it turned out," Haines said. "We installed more sophisticated equipment for them a few months ago, but we are always left with the problem of the strongest signal capturing the receiver."

"Mexico has really been cranking up the wattage on the new towers down there, and it's easy to see why we have so much interference. We've recovered radio equipment from some of our recent stops of drug smugglers that is more advanced than ours," Capas said.

All of which is no surprise to Kostellic, Tombstone's top cop.

"Every time we take one step with technology into the future, it seems like those people take two steps."

I'm 38 and have experienced this already. Hopefully I can at least stay
"moderately" deteriorated until I'm OLD! Age has nothing to do about this...
it's all ATTITUDE!

I learned a LOT about radio working with my OT chief engineer who took the time to mentor me and work with me. I always felt that no question was stupid. A lot of other engineers I've worked with assume you know it all and get pissed when you ask them something. Again, it's all in attitude.

> Needed info that was
> regularly shared in the days of olde!

The same can be said of the internet. Five years ago, it would have taken five minutes to find how to open up this Motorola SP10... I've looked for 5 hours straight and all I've found that wasn't ads for 2-way shops was someone else who asked the same question in a forum somewhere, but never got a reply. SO, the 'net has turned into a big, frustrating advertising medium and the useful info is either gone, buried or "pay to access" now... what a joke!

> Let's stop bitchin' and start
> keeping up with the times.

I'd be a Ham but for the stupid code. My brain just can't seem to catch it. As for code tests, liken it to having to understand how black and white television works in order to get cable TV.

This is a true statement. IMO, the old "retro" circuits are the best. You
can usually tell what fried in them and fix them, let alone that they
sounded better.

Wouldn't exCBers use 10 codes? Besides, saying "QRZedd" is a lot quicker
than saying "who is calling me?"

You know you're a ham when during a teleconfrence call on speaker phone,
you say "blah blah blah, over". Because the speakerphone behaves like a
simplex comm channel, like radio.

OK...is there any truth to the rumor that a certain Hiram Ham is once again dodging a local bill collector? Story we get is that the Hiram Ham is in the red over some long over due bills and that the creditor is extremely upset that he has not seen one single nickel of his money.
The business owner said that it makes no sense to sue this Hiram Ham, since the Hiram Ham owns no property, has no visible income, and has no bank accounts whatsoever.
The Creditor was extremely upset, saying, "You'd think that a forty year old man would have a means of income and at least own a little bit of property by this time of his life."
As usual, the Hiram Ham walked away and left others "holding the bag".
The story continues.....

"Respond" or "provide the requested information"?

4565. Not all "NO-CODE" amateurs are bad apples

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-21 05:43:52 UTC
From: Eric Oyen <n7zzt@hotmail.com>
Message-ID: <3AB83F98.F38B708F@hotmail.com>
Source record: 91944

Contrary to what a lot of "old timers" and a number of the more vocal in this group will say, not all "no-code" hams are bad apples. Like any group,
we have our share of "bad eggs".

Granted I may not have a sterling reputation, I do try to help others and often
participate in public service events (as well as emergency drills and disaster
relief events). I does make me feel as though I am being dumped on when others
use the image of the "no code" ham in an adverse way (see several examples
in this group). It is also regrettable that such behavior can (and often does) show
up on local repeaters from time to time (there are at least 2 such in the
phoenix metro area that often get drunk and behave to the point of disgust
on the air).

Point is, most of the "no code" community is a good one, and the rest of the amateur community is not without its share of problems.

DE N7ZZT
Phoenix, Arizona

I was speaking metaphorically and did not intend to ruffle your feathers. However, I do see so many people become disappointed when they discover that this or that group of hobby enthusiasts are merely people, just like everyone else.

Our hobby of amateur radio is one that consists of mostly talking. Naturally, those with hostile attitudes will be revealed much sooner than in a group of model airplane or motorcycle enthusiasts. The loudmouths really stand out in our hobby.

Your statement sounds typical for a 38 year old. No
disrespect intended. I was 38 once myself.

Wait until your hearing and carotid artery has deteriorated
enough that you actually hear wrong words and sentences that
bear no resemblance to what was actually said. I can tell
you with certainty that this happens and it has nothing to
do with attitude.

Wait until every day you endure pain without end that
interferes with your sleep. Ever hear of sleep deprivation?
Until you've been there, you haven't a clue. Attitude has
nothing to do with this.

Wait until nearly all of your family and friends are
deceased, the culture is speaking a foreign language and
even the damned television doesn't make any sense. This WILL
affect your attitude.

Whatever happened to looking out for children and old
people? Whatever happened to having respect and
understanding for those that built your world and took care
of you when you were young and helpless? Do you take to
heart every word that a child says in anger? Of course not.
The same tempering should be used for some older
individuals. Give them the benefit of the doubt. It doesn't
cost a thing.

With any luck at all, most of us will reach the age when our
presence of mind and our body will not function properly. I
hope when that happens that you will find yourself among
compassionate people.

I'm not speaking directly to you, Johnny, but to all of the
readers of this newsgroup. If the shoe fits, wear it. If
not, just nod and move along without taking offense.

I've had my best success so far with the ARRL CD's. That and by being sure to be relaxed before training sessions. That helps a lot. The local club members have had a few suggestions, such as changing frequency of the audio, and listening to W1AW for their lessons. I did get a pretty good program from one, and on the Mac, I have Morse Mania, which I like. Mostly, I've been doing it on my own. Fortunately, I'm just about there, I only have a one or two letters that I get hung up on. I expect to be ready in another month, or less.

One of the examiners told me about a test where the person taking the test held a finger against the speaker cone to read the Morse code by feeling the vibrations. My hat is off to that person.

Check out the updated radio mods at
http://www.qsl.net/w8mmq/mods/

Also, the W8MMQ Antique Radio Page is at:
http://www.qsl.net/w8mmq/

I am always looking for new, antique radio related sites to add. If you
know of one, let me know, and I will be happy to consider it for the site.

4578. Re: CB Trash

Newsgroup: rec.radio.amateur.misc

The use of 'Q' signals on voice has been a topic of discussion in Amateru Radio for decades. Probably ever since the first AM phone guy said "QRZ".

I never have, nor do I , understand why the big deal.....unless it is just another example of being too lazy to learn them and then complaining. Sorta sounds like the pro/con CW arguement, eh?

What a surprise.

Like I said....get a life.

Dan/W4NTI

Yeah, I thought that was pretty funny.

But...it makes sense, in a Sun Tzu sort of way.

Use your opponent's resources (relay towers) against him.

Dwight,

Don't let those old grumps bother you at all. Actually, I have seen more griping on the newsgroups than on the air. It is just a part of human nature that *some* people cannot accept change. Even my dear old Dad lives for and like 1950. If the phone rings, it MUST be answered! Nevermind that we have an answering machine to screen calls--if the phone rings, he will almost break his neck to get to it. I keep the ringers off so he won't hurt himself charging thru the house like a mad bull. If he goes outside, he MUST wear a hat--one of those old 1940's homburgs. And so on. I'm not making fun of him, just using him for an example. Whether we notice it or not, we are just like him. Some of us wear our hair long and over our ears because that's the way we did it in 1970. And other generations wear their hair (men) in a pony tail-bald on top but a long tail at the back--because that's how it was when *they* were young. It is a part of our struggle to prevent our youth from slipping away--we want ourselves and our environment to be as it was in our youth.

Likewise, hams *sometimes* try to hang onto to their youth and the way *it* was when they were first licensed. Therefore, if it is different, if "them" dadburned whippersnappers don't do it the way *I* did it, then they AIN'T real hams.

Still, I don't think you will run into the opposition on-air as you do in this forum. Just ignore 'em!

This post mis-represents the official position of the QCWA.
In fact, QCWA supported the introduction of the no code tech license
and supports the elimination of the incentive licensing program.

I've been using WF5E for years... Same return rate as bureau cards or
just a bit better and a bit faster, All in all, a better deal than the
ARRL now that they have increased proces again.

4588. WHEEL STATIC ON AM B'CAST BAND

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-21 19:39:33 UTC
From: jder8745@aol.com
Message-ID: <20010321143933.27520.00000371@ng-mj1.aol.com>
Source record: 91967

Need help with what may be wheel static in my car when listening to AM radio.

Car in the vicinity of "noisy" power lines:

When car is still, no "popcorn" noise
When car is in motion, Loud "popcorn" noise

Car not in the vicinity of power lines:

When car is still, no "popcorn" noise
When car is in motion, no "popcorn" noise

This started after two new front tires were installed on my 1996 Honda Accord.

Isn't this strange?

I'm gonna look in some old ARRL Handbooks fer ideas.

How do I eliminate it?

I would appreciate hearing from y'all at my email addy (or here):

I have severe tininnitus (ringing) which is around equivalent of 6-8kHz tone @SPL +8dB. Years of working around blaring studio monitors and loud enviornments have knocked out the high frequency response of my ears. Everything sounds like a muddy AM broadcast. And they wonder why I can't learn code? It blends right into the ringing. Five minutes trying to hear code and I've got such ear strain that I'll actually get a migraine. I also get frequent ear infections which have required me to have drain tubes in both ears for the last 15 years.

> I can tell
you with certainty that this happens and it has nothing to
> do with attitude.

I know... at 38, my doctor says I'm in about as good of condition as an 80 year old. I've been on sickleave on and off for a good majority of the last two years. I work in a car factory since all the consolidation in broadcasting made radio engineering a less than desirable position. Low seniority=worst jobs. We run 75 cars an hour and there's not enough time to spit between cars and it literally has ripped my body apart.

> Wait until every day you endure pain without end that
> interferes with your sleep. Ever hear of sleep deprivation?
> Until you've been there, you haven't a clue. Attitude has
> nothing to do with this.

I have an unknown problem in my back that keeps causing ribs to break free from the spine. MRI's and Nuke scans can't find what's wrong. The pain level is 7-9 ALL THE TIME. The cartilage around my ribs and spine are so messed up that it hasn't healed for over two years. The nerves around my spine are all inflamed.Sometimes I can't take it and have to go to the ER. The hospital attending will occasionally give me Vicodin (like they help or something) but my doctors will not. They're too scared that the FBI and DEA are going to bust their door down at 4AM for prescribing sched 2 pain meds. Change doctors? Been there, done that... they're ALL that way around here because of years of "drug seeking" GM patients. So, I'm no stranger to sleep deprivation. Even have a hard time sleeping with klonopin and ativan.

> Wait until nearly all of your family and friends are
> deceased, the culture is speaking a foreign language and
> even the damned television doesn't make any sense. This WILL
> affect your attitude.

The only survivng kin are my brother (he's having bad heart problems and I don't expect him to be around much more than a couple more years) and sisters (thet're both over 50) and one aunt. Most of my friends are either dead or lost. You can't hardly trust anyone enough nowdays to befriend them as most people today would rip off their own mother. Culture and society as a whole make me ill anymore. The world is a big "market" and we're merely "demographics". And I HATE TV...

I'm so fed up with pain and suffering (mine and others'), being ridiculed for not being "rich" and being expected to just pull large amounts of money out of thin air that I've been in treatment for depression for over two years now. Has it affected my attitude? YES! I keep trying new antidepressants every so often and none of them ever help because none of them can change the surrounding mess we call the world. I feel like half the person I was five years ago and they wonder why I often have suicidal thoughts!

> Whatever happened to looking out for children and old

> heart every word that a child says in anger? Of course not.
> The same tempering should be used for some older
> individuals. Give them the benefit of the doubt. It doesn't
> cost a thing.

The problem is society cares about ONE thing: MONEY! The prevailing attitude today is 'if it doesn't line my pocket, screw it". Anything else is "inconvenient" and "too time consuming". GREED. It makes my blood boil to be around greedy types for just five minutes. I come from an upbringing where we did the best with what we had and the WASTE and VANITY of people today just blows my mind.

> With any luck at all, most of us will reach the age when our
> presence of mind and our body will not function properly. I
> hope when that happens that you will find yourself among
> compassionate people.

I'm getting there fast. I know I won't be around "compassionate" people as they are just too few and far between.

> I'm not speaking directly to you, Johnny, but to all of the
> readers of this newsgroup. If the shoe fits, wear it. If
> not, just nod and move along without taking offense.

I just don't take offense much anymore as it doesn't do any good anyway. My point is, there are people my age who aren't in any better shape than someone much older, so age isn't the main factor here. I have to accept that the world, my friends, my body, etc., has changed. As much as I'd like to

have it otherwise, as much as I hate it, I can't stop it. It would be the ultimate in futility to try. Some people can't accept change and think that if they fight it hard enough, it'll go away and all will stay the way it is. I't called "sticking their head in the sand and blowing hot air out their rear".

As bad as code is anyway, I have physiological barriers to passing the code test. This has kept me from getting a license for years. HF is the only thing in amateur radio that I feel would justify having a license. But do I want to punish myself trying to learn code just to pass a 5wpm test for novice? Hell no! I'd NEVER use code, so I'd have a little piece of paper. I'd NEVER pass 10 - 13wpm with my hearing, so what's the point? I don't have any need for a Tech ticket as I already have GMRS from my engineering business. I paid for that license and the radios and I will continue to use it when I need it. I always heard how Ham radio catered to the handicapped, which it has. Except for my case. I'm not really considered to be "handicapped so I get "can't hear good enough to learn code? Too bad! Learn it visually. Well, my eye's aren't too far behind my ears where problems are concerned.

So, I guess I can just forget a Ham ticket until the ARRL decides to let the old CW requirement fall by the wayside.Then if I'm not a "good enough" ham because I got a license without a code test in the opinion of the "old timers", well too bad. Three options for you Old Timers: Accept it, quit Ham radio because it's pissed you off. or do as you are now and act like a 65 year old kid about it. If you choose the latter, fine! I just don't have to worry about you. It's like arguing" I have to pay $30k for a hardly decent new car today, while YOU OLD TIMERS only had to pay $3k in 1965 and it was built of metal not plastic... it's all *your* fault that it costs more today, so I'm not going to drive because of it".

I suffer from severe tinninitus as well... 6-8k @ an equivalent SPL of
+8dB... I've tried that idea before and it just didn't help. My mind is so
well trained to ignore it that it just plain disregards any steady state
tone. Also, using tone generators all the time in radio engineering has only
magnified that situation.

The attitude in my area is "that's too bad... wait until the ARRL does away
with code requirements in about 10 years!" Granted, in the city I'm near,
there aren't many "nice" hams around here and they have become nothing but
"cliques" fighting amongst each other for the last decade or so. Wars over
clubs. Wars over channels and frequencies for repeaters. Wars over CTCSS
tones and whether or not to use them. I've heard it all on the local
repeaters. I've heard fights on the 2M that rival anything I ever heard on
11 meters.

I've even heard fights and attitudes on the weather net from the spotters and net control during severe weather. Next to the code issue, that's the one thing that's always put the final nails in the Ham radio ticket goal for me. I have no use for a Tech ticket. I have a GMRS license, so I can do what I need to on UHF without all the arguements and attitudes. It's just not productive to go through the disappointment of yet another code test for a Novice ticket when I'd never use it. As for trying to get to 13wpm for HF privs, it'll never happen. So, until the code tests are relinquished, no ticket for me.

Uh, Johnny, not to be ugly, but you don't get out much?? You missed a couple facts and changes.

(1) ARRL does NOT determine whether Morse is a requisite for Amateur licensing.

(2) The Morse requirement is now part of an international agreement that *most* nations have signed. Licensing requirements for all spectrum use is determined by the Federal Communications Commission within the USA. Since the USA is signatory to the inter-NATION-al agreement, the Morse requirement will remain until it is changed further or deleted at the next "treaty" conference in 2003.

(3) There IS no 13 WPM requirement anymore. That was reduced to 5 WPM for access to ALL amateur classes and the respective HF bands. Most of us, except for the stoop-shouldered, "old" grinches who can't stand change, accept the fact that Morse will be removed as a REQUIREMENT within this decade. OK, let's move on and forget it. One thing is sure in this life, and that surety IS change!

With those things said, let me comment on a few more points. One is, I rarely see or hear the "Old Buzzard" types around here, nor do I hear them pontificating on the local repeaters. In 12 years of being a ham, I only had 2 run-ins with one of the "you-better-do-it-the-way-I-do-it-or-else genre. I straightened him out VERY quickly, and I haven't had any more trouble. In these parts, new hams are welcomed and encouraged. If they make errors or "slang" faux pas, they are gently corrected off-air, and we find that people make an effort to fit in. No problem there. You'll usually hear one of the "older" hams say, "No problem, man, it wasn't so long ago that I was taking my first test and making boo-boos. You'll be sounding like an old pro in no time". Or something to that effect. Most of the "Old Buzzard" stuff, I see on the forums instead of on the radio.

(4) There is no Novice ticket anymore except those who held this license prior to April last. They can renew if they so choose.

You should remember this: Using myself as an example, I did not obtain my license to please anyone but me. In order to be, at least, somewhat accepted, I conformed to the normal operating practices/procedures of the other hams I heard on the air. Beyond that, my goal was to obtain access to HF, be able to legally talk with my contemporaries in other lands, and to LEARN more about electronics, radio communications, and build projects to see them work. I spend as much, or more time, making radio-related stuff as I do talking. Thusly, I don't usually hear the

junk that goes on on 3895, 3950, or 14.313. I mostly read about it here. I do not have any interest in childish antics or infantile behavior, and those who have not developed the maturity to hold an intelligent QSO are coldly ignored.

The fact is that there are enough bands, frequencies, and intelligent, helpful hams to be found that I can seek out those of like mind as myself and hold interesting QSOs without being bothered by ignorant buffoons. Or I can build a project that my on and off-air connections in the hobby taught me to do and have just as much satisfaction, likely more, as I can endlessly yakking on the radio about nothing. People often assign to the Amateur hobby only one aspect: talking on a radio, when, in fact, Amateur Radio is MUCH more than that.

Lastly, the buffoons are a very small minority, and, in order to obtain all the things I came into the hobby to achieve, I am not about to allow a few curmudgeons to prevent me from doing what I enjoy. One should approach Amateur Radio in this way; achieving the goals one sets for himself and not allowing any group to discourage him. If one allows self-appointed critics to prevent him from reaching attractive goals, then the fault is found in the mirror.

4597. Standard C510a Dual Band HT 4 Sale.

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-21 23:41:17 UTC
From: rbird2@peoplepc.com
Message-ID: <3ab93bf8.4411022@trialnews.peoplepc.com>
Source record: 91977

I have a Standard C510A dual band (144/440) hand-held for sale. Here are a few of the C510A features:

- Direct entry, back lit keypad
- 1W out (300mW low power)
- Frequency Coverage: Tx 144-148 MHz 438-450 MHz Rx 100-180 MHz 340-480 MHz 720-950 MHz
- Vest pocket size (2-1/4" W, 4" L, 1" D)
- Penlight powered! (3-AA batteries)
- Battery save: 3 steps
- 200 memories + VFO and Call
- CTCSS 39 tones-Encode/Decode
- 28 menu selections
- RF squelch - 6 settings
- Freq. steps, 5, 10, 12.5, 15, 20, 25, 30 and 50
- Scan modes: Busy, Pause or Hold; Scans 1 MHz, Entire band, Program, Memory, Specific memory frequencies, Block and CTCSS Tones
- PTT, Frequency and keyboard lock
- 1750 tone burst
- Auto power off: programmable
- Weight: approx. 5 oz without batteries
- AM programmable for aircraft

Expanded TX for CAP-MARS

Asking $150.00 which includes the C510A soft case and shipping within the continental United States.

Please do not reply to this group, send email to: rbird2@peoplepc.com

Thank you,

I just got one about 2 weeks ago and really like it. It has some short comings, but it's not a $1000 rig either. I picked mine up used for $400. I plan to use it for back packing trips. I have been using it with my attic dipole to check it out for the last week and have worked Japan, Australia, Europe, Costa Rica, Jamaica and other good DX with 15 watts out. I like the rig, and its built like a tank. You might want to subscribe to the SGCI mailing list at yahoo groups, you can look over alot of information about the rig, mods, shortcomings etc. Ken

You may have boogered up something on the board when you did the mod. Also, that ribbon cable is VERY susceptible to breakage. I know... mine is cracked now and parts of the radio don't work right anymore. I can still use it at least. You may have to send it back to Yaesu. My 530 lost it's mind when the cpu went bad. Yaesu had it back to me in a couple of weeks. Their service dept. is excellent! Mine will be going back there soon.

73 & good luck.

I am having a strange problem.

I have a FT-530 that I have modified a number of years ago, and it has always worked perfectly. I put it away for about a year and when I went to use it again, the display was garbled (I assume the lithium battery had died). I reset the radio and it is working normally again, but without the mod.

I have tried everything I can think of. I have reset the radio a number of times, then, holding the up and down arrows while turning on the radio but the mod will not reactivate!

How can I get expanded receive back again? This radio is worthless to me in its current condition.

: Just out of curiosity, what does this have to do with amateur radio?

Couple of reasons. 1) we may be asked to track, or DF, them.
The US Army has limited Signal Intelligence assests.

2) we may see those in law enforcement blame us. There is
an attitude in the US that blames the technology thus wants
to ban it instead of controlling people. Sort of a Luddite mentality.

3) Our repeaters and frequencies are being used by drug smugglers
and those engaged in espionage against the US.

Part of this I can agree with, and part I must disagree with. Learning Morse code is actually a fair price to have to pay; not because I had to pay it or because anyone else had to pay it. It is a fair price to pay because that is what is required (at least for now). That may change in the near future. You can't go to Wal-Mart and say, "I think the price for this doohickey is too high, and that isn't fair. You need to give it me for less." When you go to Wal-Mart and see something you want, you either dig through the pocket lint to find enough money to get it, or you tell yourself it's too high a price and wait for them Rollback the price. Either that or you try to steal it and get nailed by the little old lady at the door. You can stand there and gripe at them for their outrageous asking price until your face turns four shades of blue and your head falls off. It doesn't matter. You don't get to set the price. They do. So, you just have to decide what you willing to pay. The very same principle holds true for amateur radio.
I'm not advocating one side over the other. Personally, I paid the asking price at the time. I started out as a no-code tech, but I sat down and studied the code and passed it, albeit at only 5wpm. I know there are those out there who say I am no more of a ham than they consider the no-code tech (it makes no difference that I was in the process of studying 13wpm when the current restructuring went into effect). I have a very dear friend who moved about 100 miles away making contact via 2m quite complicated I keep hounding him to upgrade, but he just won't do it. He plans to wait until they drop the code requirement completely, and that is his right. The price right now is too high. That's his decidsion. You have to make yours.

The above is just an opinion, and do you know what they say about opinions? They are like @ssholes. Everyone has one and they usually stink.

That's okay, we also say "CQ" on HF phone, even thought it's
a CW prosign. Its ITU phone-equivalent is "Hello All Stations."

Even when I was a kid back in the 60's, I also thought it was
ludicrous to have to learn code in order to get a license.
Especially since I had no intention of ever using it.
But when I did finally tackle it, it became fun and I was hooked
on CW.
So, its kinda silly to criticise something you don't know about.
5 WPM is indeed simple to learn, but it doesn't come without
effort. The written test these days is milquetoast, so at least
that 'incumbrance' to obtaining a license has been eliminated.
One thing that has contributed to some degree of sanity on the ham
bands is the fact that the users must qualify in some manner to
obtain a license. 11 m is there for those not interested in
making any effort at all. If there is a difference between the
two services, it lies therein.
I also suffer from tinnitis (and bad memory) these days and I'm
sure starting from scratch would be more difficult than it was
when I was a teenager. The ringing in the ears has brought me
down from being comfortable at 40 wpm, and I can't imagine this
being an impediment at 5 wpm. At my age, staying awake while
copying 5 wpm would be a bigger problem! hihi.
Its a mindset...if you want it bad enough, its easily obtainable
in spite of physical problems, etc. I have taught Novice classes
with folks from 10 to 70 years old and will say without exception
that those who truly had the desire were always successful in
obtaining their license.

As of 15 April 2000 the maximum and minimum speed for all amateur licenses
is 5 wpm. The Novice is no longer available but will be renewed.

I would suggest you get in touch with the ARRL for no better reason than
they are a central point for information on things done to help people in
positions similar to yours.

Given the local clubs, it wouldn't surprise me if the sane one's claim a
QTH in the next town.

I can safely assume you're not in any kind of urban school system here stateside by that nice little "Hawaii" in your address. You wouldn't LOVE teaching anything around this hell-hole of a country we have here stateside.

> Once you realize your limitations, move on to excel in some other
> field rather than seeking sympathy or handouts.

Exactly where did I seek sympathy or a handout? I could care less about, and fully don't expect, your sympathy and don't insult my intelligence with your handouts.

I simply stated this as someone implied that because I'm 38, things can't possibly be anything but great. Go visit alt.support.chronic-pain sometime and find out just how young some people are when the suffering starts. This all started because I was run off the road by some drunk in a big pickup truck who didn't even stop when he seen my car roll as I hit the ditch to avoid being hit head on, so it's not like I CHOSE this.

Also, I've already excelled for 20 years in a field that disintegrated from within. I had to move on to something else to pay the bills and put food on the table. I jumped into something that had good pay and benefits but now I've found I can't handle it physically because of my back injury. I've seen it KO plenty of others my age too because the jobs are designed for someone 18 years old and full of piss and vinegar.

What this originally had to do with was that my hearing is a barrier to being able to pass the code test. Your response is typical of what I've heard from all the Hams. I guess because my hearings screwed, I'm not good enough to be a "Ham".

You know, my interest was piqued in possibly considering trying for a ticket again. But since I've been checking out the ham groups, it seems like I've done nothing but get flamed and insulted most of the time. What I've been through here in the last few weeks echos perfectly the mess I hear on the repeaters and HF. Arguments and bickering. I think I'll just shelf the ham ticket idea for good. Why should I actually study for a ticket so I can just go through the same crap on the air? Screw it, I'm outta here!

Not a good analogy. Wal-Mart is engaged in a relatively free market
with lots of competitors. If one doesn't like the price asked by
Wal-Mart, one can go to any number of competitors. If one doesn't
like the price asked by the FCC, what competitor can one go to?
Again, if one is to obtain amateur radio privileges, one is forced
to pay the price set by the FCC which holds a monopoly.

Ummm... no, I didn't know about the code req being dropped to 5. And as of late, I really *don't* get out much. I guess now I understand why there is so much turmoil.

Maybe a lot of my trouble are with the newsgroups. I tend to get flamed and insulted over simple statements and questions and then have to be on the defensive. I guess I'd be better off to just quit reading them as they seem to attract a lot more pricks than decent people. Seems like I can't go onto any group anymore without filling up a killfile. It's not like it was in 1992 and I guess maybe the whole internet just isn't worth the time anymore.

Maybe living in an auto town seems to be the reasons that there's so much crap on the repeaters. It's all as bad as 11 meters except for the absence of skip and AM noise. There's a lot of assholes around here anyways. It must be time to start thinking about a smaller town up north or out west somewhere.

So what? If you want it, pay the price. If not, don't. There's no other
hobby I know of which provides so many rewards for such a small investment.

Obtain a business license, driver license, hunting license, fishing
license, etc. These are all "monopoly" controlled. If you want one, you pay
the price (and they are a lot costlier than that of a ham ticket).

I agree and disagree with parts of it also, JW. As for my specific case, CW has never interested me, nor has HF. In other words, I'm pretty happy with what I have. Perhaps one day I'll make the effort to learn code (if I can every get away from the long list of other things that seem to eat up all my free time). In the meantime, I don't waste much time worrying about it.

Yep. Also, it's a damn shame the Department of Transportation holds a monopoly on traffic regulations in this country, 'cause I'd like to switch to one that'll allow me unlimited speed on highways, as well as the right to drive the wrong way in a one-way street while drunk like a skunk.

> northbound past the Douglas port of entry
> into oncoming southbound traffic.

As bad as this is, I think we're focusing way too much on vehicles moving drugs across the border. If you think about it, it would take dozens of these vehicles moving across the border each day just to supply enough drugs to supply a single large city (look at the amount of drugs used daily by each drug user and the number of drugs users in each city).

Therefore, if we look at the number of large cities, and add in the even much greater number of small towns or communities, it is clear that hundreds, even thousands, of these vehicles would be needed each day to meet the demand.

Since it is obvious that not even close to that number of vehicle drug shipments are coming across the border each day, then most of the drugs have to be getting into this country some other way. Even the number of private boats sneaking drugs in, or the number of people bringing drugs in through airports, cannot account for more than a small percentage of the total drugs (even when added to the vehicles coming across the border).

So where are most of the drugs coming from? I suspect the lion share is being shipped in by some of the largest corporations in this country. Only these largest corporations have the import shipping volume necessary to hide the huge amount of drugs needed to supply this country each day. And only these corporations have the means to hide the huge profits involved (and you wondered where all the money to finance all those corporate mergers was coming from).

In addition, only these largest corporations have the means to move this amount of drugs around the country (truckloads to each major city). And finally, only the largest corporations have the means to hide the huge bribes necessary to cause law enforcement, and politicians, in this country

to ignore all this illegal activity.

So, in the end, if we really want to cut the drug supply, we should stop wasting so much effort chasing small-time hoods running drugs across the border. Stay after these small-time hoods, but instead focus our main law enforcement efforts at searching every single box in those corporate-owned crates shipped in from overseas through the ports of this country. And, if necessary, we should be prepared to use the military to search if the federal agencies can't muster the necessary manpower.

If we did this, I suspect some of the richest corporate people in American would have a lot of explaining to do before a judge. And I also think the drug supply in this country would be reduced dramatically.

: can't afford it.

Local law enforcement does not have an form of signal intelligence,
to include DFing. And the federal assets usually do not show up to
help local authorities. So the local cops use hams to local folks who
jam their frequencies. But the cops do the actual criminal contact.

: > 3) Our repeaters and frequencies are being used by drug smugglers
: > and those engaged in espionage against the US.
:
: Do you have some evidence in support of this rather remarkable assertion?

We are seeing the drug runners using ham equipment, both HF and VHF HTs,
to coordinate their activities. This is mostly happening along the border.

And we have spotted number stations, these are transmissions that consist
of nothing but numbers and are usually transmitted in CW mode, working
within the US. Several have been heard in the Chicago area and along the
toll road in northern Indiana. From what friends have said, it sounds like
mobiles as they overload your radio if you get near them. Such spottings
have been reported to the FBI, naturally.

And the "price" set by the FCC is not based on any
competitive concerns.

Cheers,
Bill K2UNK

As long as the "price" set by the FCC is rational you'll get no
argument from me. If the state you live in set a driver's license
price of $1000, would you just pay that or would you join the
voice of public discontent and demand rational fees.

Cheers,
Bill K2UNK

I wasn't making a moral judgment, just an observation based on the
way things are. Wal-Mart was not a good analogy to the government.

> Obtain a business license, driver license, hunting license, fishing
> license, etc. These are all "monopoly" controlled. If you want one, you pay

Yep, that's exactly what I said. In return for certain privileges granted,
the government forces citizens to meet certain requirements. That's what
governments do.

If we did this, we would no longer be living in a free democratic constitutional republic. The United States would be something new (or something old) - a totalitarian police state with military law enforcement.

And there would still be drugs....

If corruption of the government is part of the problem, then why would you expect giving the government more power over the situation to help make things any better?

There is a big qualitative difference between DFing police radio jammers and
helping to find drug runners. Police jammers tend to be non-violent.

4631. Looking for Yaesu FT-90 Software

Dave,
Don't know about repeaters or drug smugglers, but I do personally know
of an instance within the past several years where large scale marijuana
growers purchased Icom 2 meter handhelds and used them on a simplex
frequency for their operations. Local hams ran across them and after
hearing the coms, advised local law enforcement. Arrests (on drug charges)
and seizure of the equipment came very quickly. None of the participants
were licensed hams. The Icoms were sold at a Sheriff's sale and some local
hams got some nice handhelds are a good price. So, here is a documented
case of unlicensed persons using 2 meter radios to break the law.
I'd bet it's not an isolated case...

Yaesu produce the ADMS-2E programming software and cable kit for the
FT-90R & FT2600M transceivers. I have not seen any details of other
software. Iit is for Win3.1, 95 & 98 (check for later versions). Not sure
of price in US.

Nope, we're doing our best to establish that in order to gain certain
privileges (amateur radio privileges, driving privileges, flying
privileges, etc.) a citizen is forced to meet the requirements
dictated by the government.

ah yes, the typical sign that one has lost the debate: name calling and
attacks on the credibility of the opposition....

My record in the community speaks for itself (including the fact
that I have had only 1 single complaint with the fcc, and that was
actually determined to be a receiver fault and not my equipment).
1 complaint in nearly 10 years!!!! only the real old-timers
and many of the newer hams can boast a better record than that (such
as NO COMPLAINTS)

I really wanted to stay out this but ole weird Roger is in so many newsgroups and he is the type of guy that everyone would love (to put duct tape over his mouth). But I find myself wanting to show him what I was told about libel laws.

Libel is proven in a court of law when the words, spoken, uttered, written, and or published which caused the libeled to be embarrassed to the point of duress. Do you think Roger has reached that point?

Some one near Roger's city should try to find out if Roger, cross dressing as a person, and the gall of imitating as an Amateur Radio Operator, has a job. (I doubt it.)

Someone should find out if the EM99 in his signature is related to Emergency Management or the local police identifier number for one weird mental impaired first class nut.

Why. Because if someone could find this information out I am sure the employer would not keep him around and certainly not the Emergency Management Agency of "it's" county!

Times getting short Roger. Repent your wicked ways my son. The end is coming sooner then you think. (my son! If you were my son you would not be on the internet you would be sitting in the hospital recovering from having fallen into the computer monitor.)

:
: Let me get this straight. Drug runners in the state of Indiana are
: setting up in cars or vans along roads and using CW (Morse code) to
: transmit numbers-encyphered messages to their cohorts? I don't think
: so.
:
: If this is a "tactical" situation, why would these drug runners use
: such a slow, inefficient method of hand-encrypting and hand-sending
: (in CW) messages of time-critical importance? Why CW when voice would
: be much quicker? Why not laptop computers with cellular modems and
: PGP encryption?
:
: I would be interested in the details of these alleged drug-related
: communications - frequencies, message formats, etc.

I did not say that they were drug runners. More likely someone engaged
in espionage like the Serbs (which there are many in Chicago). Or the
Russian Mafia (ex KGB).

As to why CW, numbers transmit better via CW than voice. The problem
with laptops, cell phones or the internet is that you can trace both sides
of the conversation. It is easier to target not only the sender but who you
are sending to. The sender might be only a diplomat who has protection.
His target, however, needs protection.

Remember this is how the pros work.

: > jam their frequencies. But the cops do the actual criminal contact.
:
: There is a big qualitative difference between DFing police radio jammers
and
: helping to find drug runners. Police jammers tend to be non-violent.

Does it matter if it is some kids jamming the police radios or
if it is drug runners doing so?

But these people would argue that the "price" set by the FCC (the code testing requirement) is not rational - it is not rational to still maintain testing for morse code when all other radio services have long ago dropped a similar requirement, or when code has been virtually eliminated in all other radio communitions (commercial, military, governement, marine, and so forth).

The code test requirement once served a purpose - to provide a means of code education for those who might enter other radio services and to provide a pool of trained operators to serve as a backup for other radio services during emergencies. Those purposes no longer exist today - the other radio services don't need people educated in code and CW is a very poor backup for cellular telephones, satellites, and electronic mail.

1) Morse code is easy to learn.
2) The equipment is EXTREMELY simple, and easy to hide and/or disquise inside
other electronics equipment
3) no infrastructure support needed
4) it's very easy to hide something "in plain sight" where nobody bothers
to look (it's VERY easy to hide many things IN DIRECT LINE OF
SIGHT of searchers...by merely putting it above eye level)

primitive CW fits that description. Americans are overly-fascinated
with modern technology, and thus, tend to ignore older technology
which still works just as well as it always did.

5) If you've got a good plan, pre-set messages with fill-in the blank
variables, off of a "one-time pad" is even more secure than
PGP will ever be.

Not only that, but there is no way for the drug runners to find out
who is DF'ing them.

Lets not overstate things, Stark. I was not talking about using the military for law enforcement. All I was suggesting was the use of military personnel to search shipping crates (something police say they cannot do effectively now because of personnel shortages). If drugs are found, the police would investigate, gather evidence, and make any arrests. Therefore, something like this would not result in any threat to your "free democratic constitutional republic."

Amateur radio covers a wide spectrum of methods and modes. Some people specialize in SSB, others AM, still others TV, low power, EME, and yes some CW.

Qualification for an amateur radio license covers that same spectrum. We are tested on the Rules and Regulations governing the service. We are tested on our understanding of proper and appropriate operating technique. We are tested on how a radio signal is generated and detected. We are also tested on modes of operation i.e. ssb, am sstv, atv, antenna design and operation. And. We are tested on our comprehension of digital modes of communication to include morse code. To say that we should not be tested on a segment of the service just because it is old, outmoded and not used for anything ignores the fact that code is part of our general knowledge and an important part of our heritage.
I, personally, have a tin ear with some hearing damage due to loud noise encountered during my working career. I passed the 5 wpm code test for Novice/Tech Plus Plus many years ago. As a novice I made a number of CW contacts poorly. I upgraded to Tech and remained such until last year when I was able to upgrade to Extra. No I am not a fully qualified Extra as defined by some but I did work to learn that which was required by the FCC to qualify for the license. I also learned more than that which is required. This is the price I paid for my chosen hobby. I have also used my knowledge so gained over the years as a communicator in Civil Defense, Civil Air Patrol, various places of employment for a total of atleast seven radio services. All of this because I took the time and effort to learn the code. I have not, to date, used my morse code knowledge for anything other than to take the test but I am glad that I do know it.

Let me say in closing that the comments of Dwight Stewart, while contrary to what I believe, are just a valid as mine and, who knows, may be right. I have noticed some comments in this thread that are mean spirited and meant to agitate not convey rational argument. So, by all means lets continue the dialogue but lets keep it civil.

Source record: 91837

Greetings!

Up for SALE now is a most excellent dual band (2m/440) handheld transceiver, the Icom IC-W31. Included with the HT are 3 good working batteries (though I cannot gaurantee batteries...they are working good and holding a good charge at this time.) Two of the batteries are BP-173's (9.6v 650mAh), and the other is a BP-171 (4.8v 700mAh) battery. Also includes Icom leather case, AC trickle charger, speaker mike with independent volume control on the mic (Nifty feature, but I have to be honest, the clip on the mic is broken -- easy fix for you to do if I don't do it first!), as well as original box and manual. AWESOME package with WIDEBAND receive! First $295 via PayPal gets it shipped to their door via USPS Priority 2 day mail! Priced to move quick!

Well, at least you passed the test, which adds a lot of validity to your opinion, pro or con CW. I personally find it hard to validate the opinions of those who condemn what they have never achieved.

In a trial, there is a thing called an expert witness. This person is allowed to enter their personal opinion on a subject as evidence because of their experience and expertise in the field of questioning. However, a common layman's personal opinion is disallowed due to lack of expertise on the subject.

Amen. It is obsolete, totally irrational, and part of the very definition
of an Amateur in the treaty and will be for the next five years or so.
Anything over 12 always was ridiculous.

Given that, what are you going to do about it? You could pass it, you
could simply shut up and wait, you could send out for a pastrami on white

with mayo, have sex, or expect rain. There are any number of wondrous things to be accomplished.

So for why are we treated to the self-serving observations on the obvious? Why not try to sell someone who matters? We are just a bunch of people who cared enough to DO it and know bullshit when we see it. I don't care if you pass it or not but please do not insult my intelligence.

There's a newsgroup, news.admin.net-abuse.sightings over half of whose
postings consist of the posting of private (generally spam) email.

On occassion I've edited postings although not to change the meaning
but in the name of length and bandwidth. For example, I've snipped a
long attached binary or in the case of one of these pyramid scam chain
letters with the four or five reports I've snipped boilerplate which
could be cut and pasted from any one of dozens of other postings.

I understand though that there's a new Aussie law under which this
might be technically illegal. Since I'm in NYC I would tend to ignore
this.

Wrong. Having the military searching property IS using the military for law enforcement. Using the military to perform a police function is a large step in the wrong direction.

For "the police" to search shipping crates, there has to be probable cause. Customs border inspections are one thing; WOD searches for drugs should be another. In either case, the military have no legitimate role in domestic policing, regardless of whether the agency they assist is federal or not.

: step in the wrong direction.
:
: For "the police" to search shipping crates, there has to be probable
cause.
: Customs border inspections are one thing; WOD searches for drugs should be
: another. In either case, the military have no legitimate role in domestic
: policing, regardless of whether the agency they assist is federal or not.

When the military works in law enforcement, they have to abide
under the same laws and defend civil liberties just as law enforcement
does. It really is only a matter of laws, and some training, that separates
the military from law enforcement work.

The problem is that we have so much crime, so many people no
longer wanting to obey the laws or even just get along with their
family, neighbors and co-workers that it looks like we could use
a police force of over 5 million officers just to settle the US population
down. The problem is that there are not 4 million additional US
citizens that we can trust.

That's true and I am one of those that believes the
price (code testing of any sort) is no longer rational.

All true, but you don't consider that none of the other modes
are tested on a separate pass/fail basis as code is today.
I have no problem with adding some test questions to the
overall test/knowledge syllabus on code as a mode. There
is,however, no longer need to test anyone's individual
code ability as a stand-alone skill test on sending/receiving.
That's no different than not testing on ability to type
using a keyboard for packet or RTTY.

>I, personally, have a tin ear with some hearing damage due to loud noise

You are an excellent example of why there is no longer any
need to mandate code skill testing. If and when you ever decide
to use code, you will be relearning much of the skill and ability.

The only "rights" involved are as follows:
1 - Everyone has a right to become a ham as long as they
meet FCC requirements.
2 - Everyone has a right to expect that the FCC requirments
are rational and justified.

The same can be said about pregnancy and child birth. If you can't get
pregnant, or give birth to a kid then I guess that person's views on
abortion are not valid either, right?

The argument that if you don't know CW you can't have a valid opinion about
it is crap. I'm sure you can't get pregnant, but I'll bet you still have a
valid opinion about abortion none the less, which is the same argument about
CW, but in a different context.

Just picked up a Sinclair Duplexer, Model R-312CR
that appears to be a "reject" type of setup. Four cans and tunable rods in
the middle. I wanted to use this for a low
power repeater in our area and the tech who sold it to me said it would be
good for up to 50 watts but it really kills the sensitivity of the receiver.
Has anyone had any experience with these duplexers? Any pros or cons?

I am looking for any information pertaining to this duplexer. Thanks!

Anyone replying to me rather than the newsgroup should
remove NADASPAM from the email address.

1984 comes a bit late, but people like you will probably be wondering how
Big Brother got to be so powerful when he comes after your family and
friends because you can't be "trusted."

The criminal law is not, and should not be, the only tool for fixing social
problems.

It's not an argument, Leland, it's a fact. It is only considered an
argument
by those of you who have some reason to ignore the facts.
Only by learning it, gaining skill in how to do it, and working
radiotelegraphy can you come to know the essential facts concerning it
as a working communications mode.
You codefree types would much rather not even consider it to be a
communications mode, and for darn sure you would never bring yourself to
acknowledge that it is truly the most simple, easily implemented mode of
radiocommunication, useful under the most wide range of daunting
circumstances when virtually all other modes in common use are in the
toilet, or not even available due to their heavy overhead amd
infrastructure requirements. Nothing else even comes close.

So don't try to convince us that you will ever be a "Real Ham" ï¿½ until
you, too, are at least minimally qualified as a CW operator. Till that
time you will be an Amateur Radio licensee.

Nevia:
Could you be a little more descript about the duplexer? My sinclair catalog does not list it.

Basically there are two common types of duplexers, the hybrid ring and the pass/reject type.
The hybrid ring as a closed ring phasing harness for each cavity and there are coaxial taps on it to interconnect the rings. The cavities have only one port vs two for the pass-reject type.

Sinclair discontinued the hybrid ring sometime in the mid 80's and no longer supports it
It was too costly to manufacture and provided no out of band attenuation thus requiring additional filtering..

You did not state the dimensions of the cavities. Generally speaking the larger the can, the higher the Q. Most are about 7 inches in diamter and about 26 inches in length.

For two meters and the 600KHz separation at your power level, you need a duplexer with at least 95-100db isolation to avoid desense. To get this sort of separation you need at least a six cavity duplexer of the pass/reject type. The best results that I have ever been able to acheive was 80 db with only four cans It is simply not enough.

The four can hybrid ring variety can get you over 120 db of isolation if properly tuned. The dimensions of the phasing harness are critical and most commercial band duplexers will not work in the two meter band unless of course you manufacture new harnesses for the frequencies you want to work.

Also there are no standardized input to output frequency offsets for the 152-174MHz band and if this duplexer came out of commercial service it may have been setup up for a megahertx or more separation in which case it probably worked well.

>
> Cheers,
> Bill K2UNK
>

Actually, the price the FCC sets is based on international treaty. Of course, that treaty will likely change in the next few years by dropping the code requirement, and the FCC will follow suit. Those that want HF priviledges will either pay the price and learn code or they can simply wait a few years until HF priviledges go on 'clearance'.

Nevia:
Could you be a little more descript about the duplexer? My sinclair catalog
does not list it. I assume it is a reslock type which is a pass/reject type. Reslock duplexers were popular for VHF mobile telephone use because of their compact size. I have never seen one successfully used for two meter repeater duplexing.

Basically there are two common types of duplexers, the hybrid ring and the
pass/reject type.
The hybrid ring as a closed ring phasing harness for each cavity and there are
coaxial taps on it to interconnect the rings. The cavities have only one port
vs two for the pass-reject type.

Sinclair discontinued the hybrid ring sometime in the mid 80's and no longer
supports it
It was too costly to manufacture and provided no out of band attenuation thus
requiring additional filtering..

You did not state the dimensions of the cavities. Generally speaking the larger
the can, the higher the Q. Most are about 7 inches in diamter and about 26
inches in length.

For two meters and the 600KHz separation at your power level, you need a duplexer with at least 95-100db isolation to avoid desense. To get this sort of
separation you need at least a six cavity duplexer of the pass/reject type. The
best results that I have ever been able to acheive was 80 db with only four
cans It is simply not enough.

The four can hybrid ring variety can get you over 120 db of isolation at 600KHz if properly tuned. The dimensions of the phasing harness are critical and most
commercial band hybrid ring duplexers will not work in the two meter band unless of course
you manufacture new harnesses for the frequencies you want to work.

Also there are no standardized input to output frequency offsets for the
152-174MHz commercial band and if this duplexer came out of commercial
service it may have
been setup up for a megaHertz or more separation in which case it
probably
worked well for that service.

In tuning a duplexer you should never use transmitter power to do it.
What I do is to use a sensitive receiver with an S-meter and a signal
generator with a calibrated attenuator. I separate the cans and tune
them one at a time and set the pass properties for minimum attenuation
and the reject notch for maximum attenuation using the appropriate
frequecies, of course.

Good luck with it and 73...Dick K7RNZ

Well, I do agree with you that the laws do not fix social
problems. Religion would seem to be better at that. Yet
we do have problems and until people decide to grow up
and be self disciplined then it looks like the police will be
society's "babysitter".

As far as the government coming after me, well the secret is
to be the "government". Those with political connects, wealth
or power (like working for government) have much less to
fear.

I don't think YOU comprehend the discussion. We were talking about involving civilians (such as volunteer ham operators) in the effort to locate drug runners who are abusing the police radio system around our southern border. My point was that there is a huge difference in the risk to one's personal safety between tracking down some teenager who's having some fun annoying the police and tracking down a heavily armed and highly motivated drug courier.

Comprende?

Bill;

A comment you made below seems to fit the solution to the problem. If the code test was made part of the scoring of the written test just like the various segments of the present written then those who want to do code can study the code and have a section of the test that they will pass and have other sections that they can slide on and still get their passing grade.

Common sense and basic survival instinct are completely different than
trying to impose your personal opinions to the general public on a subject
in which you have no first hand knowledge or experience.

A perfect example of this is the anti-gun crowd - the vast majority of them
have never even fired a gun, and yet they would have you believe that based
on their feelings and opinions, you should have to give up your guns.

I understand how a nuclear reactor works, but I would never be allowed to
testify in court as to the value of such a device to the general public.
This is because no matter how well intended, the fact remains that my
opinion on the subject is moot due to the fact that I do not possess the
expertise necessary to present a legally valid opinion.

Hi, can anyone please identify the teletype unit on the right in this picture of my father's hamshack? At least I believe this is a rtty terminal - perhaps it's only a typewriter?

http://home.earthlink.net/~vanderk/shack2.jpg

Thank you for the help in advance,

Chris, N4JOY

Check the back of the unit. If it has only one wire for the wall plug and no other connections or cable hook ups most likely it is a typewriter. If you can post a picture of the back end, what brand, and what the "tags" on the back say about it that should help. 73 W9FPJ

Sorry, I should elaborate on the pic. The picture was taken around 1980.
The shack is no more and my father passed away 10 years ago. Unfortunately,
this is the only pic I have.

Thank you,

Chris, N4JOY

Oh Roger you go to so much trouble to find peoples information. You are so
sad as I said before. But this has gone on way to much especially since you
went from having fun with me to my family and we just can not have that.
See you soon Roger. By the way you psycho freak, what have you done for your
country? Can you spell it. I will not see your reply because as I said this
has gone on way too long. Your plug will be pulled......soon.

> I did expect more of you, though.

You are a stupid fuck aren't you?

1. In which case is publishing private email illegal? The only
case where it could even be conceivably construed as
illegal is when the email is obtained via illegal means, in
which case, publishing the email is not the illegal part, obtaining
it is. It is morons like you which are trying to prevent the rest of
us from exercising our right to free speech.

2. I don't think Joel has any preconceived notions of who you are,
but he probably knows WHAT you are (see above)

3. Why would you figure anyone in here cares what the
opinion of "non-hacking" newsgroups is of cotse? If their opinion
of cotse is so low, why don't they just make a kill filter to filter
out all of the posts originating from cotse. It's really easy, and it's free!
Maybe, if you are a little nicer to Steve, he may explain to you how
to make a kill filter, and then you can tell all your stooges how to
block cotse posts. Then you will really be their hero!

4. Why should Steve do a "damned thing"? You have demonstarted
time and again that you have not read their TOS policies. Until you do,
you had best keep your petty foolishness and criticisms of cotse to
yourself. Of course, since we live in a free society which allows free
speech and all, you can say what you like, but every time you do, you
just look stupider than the last time you opened your mouth to shit.

5. Steve has repeatedly stated in this group (and probably others), and,
just in case you haven't read their TOS (I know you haven't), that he
will promptly comply with any and all valid court orders for his logs should
the need arise. Cotse is only providing a service to facilitate free speech
on the internet. How people decide to exercise that right is of no
consequence to cotse outside the scope of their TOS. Thus, if you
see any illegal activity being spawned from cotse, I suggest you
immediately contact authorities to subpoena cotse's logs, lest you should
find yourself an accessory to a crime or party to a lawsuit.

So all the digital communications experts who don't possess actual
Morse code skill don't know the "essential facts" about Morse code?
If Shannon didn't possess Morse code skill, do you think he didn't
understand the theory? You think the FCC doesn't understand Morse
code? You're still beating that poor old dead horse. Hams who want
to use Morse code use it. Hams who don't want to use Morse code
don't use it. Every ham has a choice of his/her favorite mode(s).

Woger and his step daddy, Jesse Jackson recently attended a town hall meeting so they could meet the local residents.
Woger showed up with his pet parrot on his shoulder and entered the room proud as can be.
The moderator took one look at Woger and said,"Where the heck did you get that?".
The parrot looked at the moderator and said, "In Africa. The jungle is full of them."

The keyword here is "Hams". As used in your sentence, the implication is
that a person you classify as a "Ham" possesses the skills to use CW if
they choose to do so.

> Every ham has a choice of his/her >favorite mode(s).

Agreed, according to your definition of a "Ham". But what about those
persons who do not possess the skill to operate CW? They do not fit the
definition of a "Ham" as you use it here... because they cannot operate CW
if they wanted to because of lack of skills.

Which is basically what the whole discussion is about... There are some who
may have access to the bands, but since they do not possess the skills
necessary to operate CW, by definition they can't be included in the group
commonly referred to as Hams...

Just why the heck would anybody in his/her right mind pay the ARRL to be a
member? For what?
Who cares?
The ARRL is losing members day in and day out. They have to ask themselves,
"Why?"

The real reason for this loss of members is simple.
1. It costs too much and you get nothing back.
2. The magazine is too full of voting and political agendas.
3. Nobody really cares about the ARRL.
4. The ARRL really doesn't care about you.

Well, Dick, I've already said what I'm going to do about it directly (since I have no interest in HF right now, I'm going to do nothing). However, in the context of what you said above, I don't like pastrami, so that's out. But I do expect to enjoy the radio capabilities I have, barbeque steaks on the grill, enjoy the coming summer, and hope the rain goes away so I can sit around on my boat and soak up some harmful UV rays. In addition, I intend to address this topic occassionally when it comes up in this newsgroup.

Sorry, I hit the send button before responding to this. Anyway, unless your name is Bill, I wasn't trying to "sell" you on anything. And, since you want to be so huffy about this, let me add that I was also one of those who cared enough to do it - when I was about thirteen in the Boy Scouts. Since then, I grew out of flashing messages with my Boy Scout flashlight and beeping messages to kids on the playground with my little decoder ring. Since then, I learned the best way to communicate is to talk, and I have used my knowledge about radio to improve my station enough to do that effectively without having to resort to an 18th century telegraph key. Perhaps you should learn more about radio so you can do the same. :-)

Okay, Stark, if it will please you better, we can instead have the Coast Guard and Navy stop every ship coming into U.S. waters, at which point the military can board to search every single crate. In other words, when we're talking about shipping crates coming into this country, and drugs imported into this country inside those crates, it is not just "domestic policing."

By the way, it is utter nonsense to suggest the police have to have probably cause. Probable cause, or a warrant, is not needed to search any person, package, crate, or vessel, entering our national borders. Such searches are done all the time. For example, you, your bags, and your luggage, are subject to search anytime you fly into this country - no probable cause or warrant required. Likewise, the Coast Guard and Navy routinely stop vessels to search for illegal drugs.

Therefore, there would by no probable cause, or warrant, needed to search shipping crates at the docks as those crates enter this country. And, I see no reason the military cannot conduct those searches as long as that search is done under police, Customs, or Coast Guard, supervision.

Actually, when it comes to our national borders, the military already has authority to act. However, years ago, the Coast Guard was transferred to the Department of Transportation (during peacetime) so that it would have full police authority throughout the United States. It would be just as easy to transfer any number of military personnel to whatever government agency (DOT, Customs, etc) to fully give those personnel the same police authority.

What other "tool" would you suggest, Stark? Obviously, simply asking people to stop using drugs is not going to solve the problem, and neither is a bunch of liberal "feel-good" counselling sessions. In the end, if people insist on breaking the law, then the law is the best, and only, answer to the problem.

And that is especially true for the scum who import drugs into this country and for those who sell it on our streets. As far as I'm concerned, they can put these people under the jail and throw away the keys. And we can save money on keeping them in jail by cutting back on benefits like heat, lights, water, and excess food. ;-)

Yes, it is.

ALL persons on U. S. soil have the same rights, including coverage
under the 4th Amendment.

Use of Military to search ships in territorial waters is
unconstitutional, and it's ALSO unconstitutional if
they're in International waters (as the U. S. military
has no jurisdition there except in times of war)

No one is getting huffy but I do have a certain difficulty calling a
manure pile a 'fertilizer storage facility'. New does not imply good, old
does not imply bad. All things in context.

The context here is a lot of breast beating self-justification for not
taking the code test. We can talk coulda, shoulda, hafta from now til
Independence Day but the cosmic interplay of choice and chance has made it
a requirement to do 5wpm in the easiest manner possible for at least the
next five years.

What you choose to do about it if anything is purely up to you. You don't have to justify it to me or anyone else. If it is a self-worth issue, it is YOUR self-worth issue. So stop with the justifications already. It is not about the mode, it is not about VHF-UHF vs HF, it is about a code test that is more of an inconvenience than a hurdle for most people. Obfuscation merely irritates.

It is particularly irritating when the audience is composed of people who, for whatever reason and by whatever method, passed a code test. There is a time and place to call golf a stupid game -- the gallery at the Masters is more than likely not that time or place. Preaching the Gospel on the road between Mecca and Medina is not the best context either. So why in hell are you doing it?

>73 de W6DKN

Except this is not a court scenario...nor is the FCC arena
when it asks for or otherwise accepts comments on rules.
One need only examine the use and role morse code now plays
in any communications service to see it is significantly
diminished in need. The value of code to an individual
on a personal enjoyment basis is not the rational the
FCC uses in determining value or need.

Additionally, as a counter-point to your court "expert-witness"
scenario, you must admit that in the end, it is the jury
of people that do not possess that expertise that
makes the decision.

By the way, it doesn't take that much effort to be deemed an expert witness in most cases. The opposition will use its crossexamination time to discredit any expert witness...but in the end it goes to the jury for the final choice.

Cheers,
Bill K2UNK

No such implication can be made from that statement.
By current regulations, hams are hams with or without
morse knowledge. That has been so for 10 years.

>> Every ham has a choice of his/her >favorite mode(s).
>

> The keyword here is "Hams". As used in your sentence, the implication is
> that a person you classify as a "Ham" possesses the skills to use CW if
> they choose to do so.

That's not the implication at all. This ain't rocket science. Hams who want to use Morse code learn it and use it. Hams who don't want to use Morse code don't learn it or don't use it and forget it. Hams are hams whether they know and/or use Morse code or not. I know quite a few hams who learned Morse code and NEVER used it at all. They simply didn't like it.

There were many thousands of early Technicians who passed a General written exam and a 5wpm code test who never copied a single character of code after that. They were issued 1x3 calls starting with a 'W'. In those days, you couldn't tell a Tech from a General by knowing his call. Everyone with an amateur radio license was a ham.

According to the ARRL survey, a majority of hams use CW "rarely or never". Would you say a majority of hams are not "real hams"? I got news for you. "The Amateur's Code" doesn't mean Morse code. What is wrong with live and let live?

> What other "tool" would you suggest, Stark? Obviously, simply asking

How about saving all those billions of dollars and drastically reducing the level of violence on our streets by calling off the War on Drugs That Are Used by People Without Political Influence?

Many lies are told in the pursuit of marijuana prohibition, for example. The mere placement of THC into Schedule I is a lie - medically, chemically, and in any other dimension that applies. We wouldn't have the problem that started this thread if the United States was not pouring dollars and lives into an effort to stop the flow of chemicals and herbs into the country - an effort that simply cannot succeed and that produces consequences far worse than those of the behavior that we are attempting to stop.

People should be responsible for controlling their own behavior. The hard part about being an educated conservative is the realization that people generally do not evince a capability for taking proper care of themselves. Despite that, I still do not believe that every ill-advised behavior should be a felony or that everyone who misbehaves should be locked up.

I found out the terminal is a Teletype Corporation Model 42 or model 43.

The 42s were a 5-level (or 5 code bit) machine, and the 43s were an
eight-level or ASCII device.

Thanks for everyone's help,

Chris, N4JOY

Specifically, they can only make their determination by weighing the evidence presented during the trial. They are not allowed to consider any personal opinion or facts other than what has been admitted as evidence in determining guilt or innocence.

> By the way, it doesn't take that much effort to be deemed
> an expert witness in most cases.

True, you just have to show the court that you have the experience and expertise of the subject necessary to validate your opinions, and therefore allow them to be admitted as evidence.

> The opposition will use its crossexamination time to discredit any expert
> witness...

They will try... But this is how the game is played. Nevertheless, the court will recognize a person as an expert witness based on their qualifications. If they are qualified to testify as an expert witness, their opinions will be entered into the case as evidence. The jury will never be allowed to hear a layperson's opinions.

>but in the end it goes to the jury for the final choice.

Again, to be based solely upon the evidence presented during the trial, not their personal opinion or feelings on the subject.

With your alleged intelligence one would think you could understand
terms like
"basic, very effective, most simple, easiest to implement under the most
austere conditions". All of which describe radiotelegraphy. But you
choose to ignore those descriptives in favor of your personal choices in
the ongoing effort to rid ham radio of CW.
We know, Cecil, all the other techies would dump you like a prince
turned into an ugly frog if you said what you actually know to be true.

The Navy doesn't and can't stop every ship. They are part of the military. The Coast Guard can because they belong to the DOT not the DOD. Big difference and completely different rules. All it would do is change the method of t

> routinely stop vessels to search for illegal drugs.

The Navy does not routinely search for illegal drugs. That would be considered a military action and to some countries and act of war. The Coast Guard can routinely search for drugs because they aren't a military group, see above explanation.

> Therefore, there would by no probable cause, or warrant, needed to
search
> shipping crates at the docks as those crates enter this country. And, I
see
> no reason the military cannot conduct those searches as long as that
search
> is done under police, Customs, or Coast Guard, supervision.

Because the military should not be involved in the enforcement of civilian legal issues. Those are left to police, customs and the Coast Guard. When the military starts enforcing civilian law we are one step closer to a military leadership making civilian laws. No thank you, lets keep them seperate like they are now.

Glenn

I strongly disagree with the subjectline here...
Also, considering that itis someones opinion on the subject, I'll take it with
a grain of salt...

I might also want the original poster of this to realize that all hams
agree (by act of possession if the amateur license) to proper rules of
conduct as set forth in the Rules of the FCC (at least in the US,
its territories and possessions).

If an expert witness testified the sky isn't blue, would they
be required to accept that as fact? The reality is that
the jury gets to make their own determination as to the

accuracy of whatever they hear is. They do not automatically accept everything as fact.

Cheers,

In just four posts, Roger used the following filth:

Shitholelicker
Pubic Hair
Spankard
Cunt
Sack of Shit
Fuckhead
Jacking Off
Cock Sucker
Fellate
Fagass
Sperm-sucker
Aids-Infested
Transvestite
"Hermorphadite" (His spelling, not mine) Look it up, Woger, you syphillis addled idiot.
Ignorant Fuck
Asshole
Bastard

It is hard to imagine him eating with that same filthy mouth. I guess that is what life on the public dole does to one. Growing up in a trailer park warped poor little Woger at an early age when he used to listen to his mommy cuss at the neighbors.

4760. Roger's Swimming Lessons

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-25 02:11:35 UTC
From: Dumb As Roger <KiddieLove@boyskouts.comp>
Message-ID: <99jk08$bn9$0@pita.alt.net>
Source record: 91739

Way back in the early sixties Roger's mother took him to the local YMCA to sign Roger up for some swim classes. The Director took Roger and his mom out to the swimming pool area so they could see the facilities. Now, at that time it was the custom that all the little boys wore no bathing suits when they took these swimming classes. Roger and his mom were ushered into the swimming pool area and lo and behold! There right in front of Roger was a whole room full of pretty little nude boys! Roger's mom was a bit shocked at this and said, "Let's go home, Roger. I don't like this."
Roger looked up at his mom with tearful, pleading eyes and begged, "Mommy. Please, can I stay? I LIKE it here. Just look at this smorgasbord!"
The rest is, as they say, history.

No they used to be Treasury but now are Transportation.

Try http://www.uscg.mil/ the Coast Guard home page. Notice the icon and
words "Department of Transportation" to the right of the US Coast Guard
banner or you can go to http://www.uscg.mil/hello.html where you will see
"Founded in the 1790's as part of the Department of Treasury, the United
States Coast Guard is now part of the Department of Transportation...."

> >The Navy does not routinely search for illegal drugs.

> Mexico or South America).

The Navy will assist the Coast Guard with a Law Enforcement Detachment on
board the naval ship in charge of the drug operation. Do a WWW search for
Navy involvement with drug busts and you will find they all are in support
of the Coast Guard.

> >That would be
> >considered a military action and to some countries and act of war.
>
> Right, like any country that isn't _already_ fighting us would
> complain about it.

Scoff at it if you want. The Navy is only involved in a role supporting the Coast Guard. Countries that aren't fighting us would complain. It would be an act of war to have a vessel under the direction of the Navy stop and board ships.

> >The Coast Guard can routinely search for drugs because they
> >aren't a military group, see above explanation.
>
> WHAT law gives any national government agency, from ANY country,
> to stop, board, and search another countrys ships in international
> waters??

Usually they have cause when they do it with a Coast Guard Law Enforcement Detachment. Boarding of ships is usually not a random thing. The majority of busts are through tip offs or investigations by the Coast Guard. The Navy acts in a supporting role only.

I don't want to rid ham radio of CW, Dick. Each and every one of those
digital communications experts understands the usefulness and utility
of CW, whether they use the mode or not. I encourage all hams to learn
Morse code and try CW. It's fun for me and sometimes useful. What I
object to is the Morse code *requirement*, but you know that already.
You seem to think eliminating the Morse code requirement is the same
thing as ridding ham radio of CW. In that, you are simply delusional.

Woger. Is Dimmy your latest "fluff-buddy"? Is he letting you speak for him?
Birds of a feather and all that....

Maybe Riley has sent Dimmy into hiding. Life on the cheap must be difficult, too. Dimmy has to concentrate on saving enough pennies to purchase a box of Hefty Bags so he can replace the broken window on his junker. Wheel bearings are expensive, too. Garsh. Just one wheel bearing costs as much as two cases of Pabst Blue Ribbon. One must get the priorities in order, eh?
Not that Dimmy is missed...we know he is probably busy studying for his latest "degree" so he can lift himself from the depths of poverty and garner an instantaneous six figure per year income. That "six figures" likely equates to $6,000. 00 per annum. But again, that is Dimmy's story and he can tell it any way he likes. He has what? Two, three degrees now by his latest estimation? Not bad for six months in a trade school. At this rate if Dimmy stays sober long enough to complete his first year, he should have, what? Six or seven degrees? Garsh...next thing ya know he is gonna have a PhD! He is already well on his way if he were to major in Recreational Pharmaceuticals.
He has prior experience in drug sales, but that didn't pan out too well in the past since his career was rudely interrupted by Mike Deaver.
Life is hard.

Roger is a victim. He means well but cannot get a real grasp on life. Bear in mind that his single mom tossed his father out when Roger was but a child. Roger never had a real male influence in his life save for Jesse Jackson.
Roger's mom moved in and out of several trailer parks when Roger was still a child. Roger was 14 years old before he ever knew what a permanent address was. West Virginia transients are like that...
Roger had a hard time assimilating himself to his latest "home town" . His mobile home was in disrepair, his mommy worked at the local tire store as a receptionist and money was not forthcoming.
Roger learned early on that he could bolster his meager income by picking the pockets of the pants that his Mommy's boyfriends left on the end of the bed while she entertained them.
Roger was pretty good at sneaking in just when the moaning and groaning built to a crescendo..he could slip that wallet out and steal a quick twenty dollar bill before his mommy was done with her orgasm. Roger got away with that time after time. His mom's 'friends" never caught on.
Roger must have made at least sixty dollars. Trouble is that the room was dark and Roger never knew if he was stealing a twenty or a one dollar bill. He could have asked his mom, but it is difficult to have a mom/child conversation when Mom's ankles are held aloft at a 45 degree angle. Roger's viewpoint would not have helped either, as he was usually looking upwards from beneath the lower end of the mattress and all he probably saw was flailing ankles.

While this is true, it won't stop legislators and
prosecutors
from piling on charges such as is done with gun proximity
during the commission of a crime, or possession of "burglary
tools" anytime. These jokers have thousands of regulations,
few of which are constitutional let alone ethical, with
which to hound the public.

So you can bet that the lawyers will be sure to have
"laws" against any type of masking or deflection. I
expect a case to make the SCOTUS in the next few years.

Okay, using your own words, why are we treated to this self-serving observations on the obvious? I'm fairly certain all of us know the current state of affairs when it comes to the code test, so all that "coulda, shoulda, hafta," nonsense is just that.

> What you choose to do about it if

Again, and again using your own words, why are we treated to this self-serving observations on the obvious? Of course what I choose to do about it is up to me, and of course I don't have to justify it to you. Why state the obvious?

> It is particularly irritating when the

For the exact same reason that the person who passed the code test made the statements he did. And for the same reasons you made the statements you did. And both of those collection of statements were just as irritating when the audience is composed of people who, for whatever reason, have decided against the code test.

Not a chance. I've personally seen the effects of drugs on my family, and on my friends, and on my neighbors, and on others I've known, and I'll never support an end to the war on drugs. If anything, I would much rather see a dramatic increase in that war.

> Many lies are told in the pursuit of
> marijuana prohibition, for example.

Yes, and most of those lies are being told by those supporting the legalization of drugs. For example, contrary to popular myth, marijuana is extremely harmful - both in itself and as a gateway drug (see below).

> [snip] an effort ... that produces
> consequences far worse than those of the

A couple of years ago, I spent four days on a Navy frigate photographing a drug intradiction patrol. During that period, crew from that vessel boarded six ships - two for a full search, three for a check of papers, and one for a quick check of the crew for illegals (a number of other vessels were questioned by radio). If the Navy is not allowed to stop vessels and search for drugs, then someone needs to inform the Navy (because they are doing it).

No, the Coast Guard used to be DOD, then they were Treasury, and now they're DOT (except during wartime, where they fall back under DOD again, as part of the Navy). Confusing enough? Imagine how confusing it is for Coast Guard personnel.

Or those "people who aren't Christian" could stop acting like "they" don't know what the "mark of the devil" is, especially since "the mark" has been featured in popular movies, music, and literature, around the world for a great many years. Of course, ending the facade of stupidity would eliminate this opportunity for those "people who aren't Christian" to engage in the agenda of trashing those who are once again.

Don't fall for silly nonsense like this, W6DKN. This guy is either the most ignorant person on the planet (which I sincerely doubt) or he is simply baiting you into an argument about religion.

Baloney. I know lots of people who have tryed or used marijuana
without moving to hard drugs.All drugs have certain bad side effects
but alcohol is one of the most dangererous and sordid drugs around,it is
highly addictve and chnages people's personality to a violent demeanor.
How many thousands of drunk driving deaths do we have in the U.S.?

Marijuana having some negative side effects still has several medicinal
uses and it does not cause people to become violent and go into a stupor.

First of all, there is no "freeband," Ed. Second, the only frequencies that I'm aware of that have been referred to as the "freeband" are those just above CB, which the FT-50R is neither capable of receiving or transmitting on (even after modification). Third, the FT-50R's hardware has to be modified to extend frequency coverage (as far as I know, it cannot be done just with software). And, finally, without a posted ham radio callsign from you, I'm certainly not going to give instructions on how to modify this radio. Have a nice day.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K2FRD, N2OO, W3UR & The Daily DX, N4AA & QRZ DX, K4VUD, N4GN, K7ZZ, K8YSE, KB9YXM, A35RK, CX6VM, DL1EK & DX News Letter, EU1EU, F6AJA & Les Nouvelles DX, G3PJT, HK5MQZ, I2MOV, IW5BZQ, LU4FM, ON4AAC, PA3AXU, PS7JN, VK4AAR, YS1RR and YV5EED for the following DX information.

DXCC COUNTRY/ENTITY REPORT:According to the AR-Cluster Network for the week of Sunday, 18/Mar, through Sunday, 25/Mar there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week. CQ Zone that were not active are: 2
There were 50 ITU Zones available during the past week. ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,26,31, 34,35,43,58,59,69, 70,71,72,74,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its

size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO. A group of Italian operators will be active for 3 days from here (grid JN33RR) during June 1-3rd. They will mainly concentrate their activity on 6 meters, but they will also be active on HF and 2 meters. Look for the following callsigns (operators) to be active: 3A/IK5GQK (Fabrizio), 3A/IK5YOJ (Giuseppe), 3A/IW5BZQ (Stefano) and 3A/IW5EDQ (Virginio). Their activity on 6 meters is as follows: 50.210 SSB, 50.600 RTTY and 50.620 MHz PSK31 (using an Icom IC-706MKIIG with 6 element yagi and HQ50 Halo Loop). Their 2 meters activity will be on 144.290 MHz SSB (using an Icom IC-706 with 9 element yagi). Their HF activity will be on SSB, RTTY, PSK31 and SSTV (using two Yaesu FT-100 and vertical antennas). You can send E-mail for skeds to: 3a@mannelli.com
They mentioned that while they are on air they will check their E-mail every hour at the top of the hour. For the latest news, check their Web page at: http://www.mannelli.com/3a
Direct QSL (SASE) for VHF QSOs (6/2 meters) via: Stefano Mannelli (IW5BZQ), P.O. Box 569, 50123 Firenze Centro, ITALY. QSL HF QSOs to: Fabrizio Vannini (IK5GQK), via Forlanini 68, 50127 Firenze, ITALY.

3G, JUAN FERNANDEZ ISLAND. Look for Key/JE6JYT, Chip/N6CA, Jack/N6XQ and Roman/XE2EED to be active from the Isla Robinson Crusoe (IOTA SA-005) between March 27th and April 3rd signing 3G0Z. They will have two stations active to cover many directions: one in San Juan Bautista village, the other on a nearby hilltop operating part-time. Activity will be mainly on 6 meters, transmitting on 50102 kHz and receiving on 50140 kHz. Their pilot stations, N6RV and KB6NAN, will be on 28885 kHz. QSL via N6XQ. For more details, check/watch the Web page: http://www.ham-radio.com/ce0z/ce0z.html

5R, MADAGASCAR. Stations 5R8FL, 5R8FU and 5R8GO have been active over the past week. Claude, 5R8GO, has been active on 20 and 10 meters. He was also active SSTV on 28680 kHz around 1245z. Ake, 5R8FU, has been active mainly on 15/12 meters CW. Check 12 meters around 0915z and 15 meters around 1815z. QSL via SM5DJZ. Andre, 5R8FL, has been active on 20 meters (14206 kHz) around 0430z and 10 meters (28496 kHz) around 1445z. QSL via F5TBA.

7X, ALGERIA. The "LNDX" reports tha Yannick, F6FYD, will be here for the next 2 months starting very soon (mi-March). There was no callsign or bands of operation mentioned. However, Mohammad, 7X4AN, has been very active lately on 10 and 15 meters, mostly SSB. Activity has been between 1700 and 2200z.

7Z, SAUDI ARABIA. Joe, W5FJG, is expected to be active about April 15th from Jeddah as 7Z1AC. He will be working as a technician for the U.S. Consulate and is expected to be here for two years. According to his Web page, Joe works both CW/SSB, but will spend 60% of his operating on SSB. He likes and probably will spend most of his time on 20 meters. He will have equipment and antennas for 20/17/15/12/10 meters and expects 30/40/80 meters may come later. His operating time will be Saturday through Wednesday after 1530z and on Thrusday and Friday (his weekend) anytime. He does have equipment for the digital modes, so expect to possibly see

him on Packet/RTTY/SSTV. QSL via WA4JT. More details can be found on his homepage: http://sites.netscape.net/joeyjeep99usa/homepage
Joe mentions on his Web page that the American Embassy in Riyadh has received permission to restart amateur radio operations using the callsign 7Z1AB. Look for them soon to be on the air.

9G, GHANA. Derek, 9G5MD, has been very active on 15/10 meters, generally between 1200-1800z. Check around 28500 and 21250 (and above). QSL via F5VCR.

AP, PAKISTAN. Bob, AP2JZB, continues to be active on 12 meters, as well as 10 meters. Check these bands between 1430 and 1530z around 28492 or 24946 kHz.

ASIAN TRIP PLANNED. Charly, K4VUD, reports that he has purchased his airline tickets to Asia for the period of early May through mid-August, 2001. He plans to operate as HS0ZCW again and will apply for India (VU) and Laos (XW) licenses. He states that it will be not likely for him to be active as/from 9N7UD nor A52UD this trip.

EP, IRAN. Abdullah, EP2FM, is a nice find on RTTY on 20 meters after 0330z. You can catch him on SSB on 20 meters generally after 1430z and again around 2000z.

EV21, BELARUS (Arctic Expedition, "POLAR RING"). There is currently an expedition going on in the Arctic and is being helped by the members of the "Activity Group of Belarus" (AGB). The expedition/operation started February 1st in Minsks and will travel the southern part of the Arctic and the Polar Area. The expedition will pass through Yama (R9K/), Taimyr (R0B), Yakutia (R0Q) and Chukot (R0K). Currently, R0B/EV21ABG is now on from Taimyr. Igor, EU1EU (AGB#001 - President of AGB), informs OPDX that there is usually traffic being passed every Monday, Wednesday and Friday on 14120 kHz at 0500z. However, most of the information is in Russian. The operators are Yuri (AGB#124) and Vladimir (AGB#123, Leader of expedition). There is an award available for working this station. Some information can be found on the club's Web page at: http://www.qsl.net/eu1eu
A special link for the English language can be found at:
http://www.qsl.net/eu1eu/EV21AGB_eng1.txt
In a week the group plans to be active from Yakutia and sign R0Q/EV21AGB.
Any questions/messages can be sent to either/or:
Igor, EU1EU, at: eu1eu@qsl.net
Vladimir, EU1CQ, at: eu1cq@usa.net

FM, MARTINIQUE. Gerard, FM/F2JD, has closed down his station from here and he will be back in France sometime this week. He made 11,200 QSOs (6600 CW, 1000 RTTY, 3600 SSB).

H40, TEMOTU PROVINCE. Ron, ZL1AMO, now active as H40RW, has been very active on 15 and 10 meters CW.

HK0, MALPELO ISLAND (Update). It has been reported that Jairo/HK5MQZ and Hiro/HK5QGX will be embarking off to Buenaventura on April 6th arriving on Malpelo Island April 8th in the late evening. They will disembark April

9th and expect to start operation April 10th until April 21st. They will operate on all bands 80/40/30/20/17/15/12/10 and 6 meters. They will carry a Hygain TH3-MK3 Tri-Bander and home brew 3 element monobands for 17 and 12 meters. For 80/40/30 meters they will use wire dipoles. The group will also use a Yaesu FL-2100B linear amplifier and two HF transceivers: One Icom model IC-706-MK2 and another Kenwood TS-430S. Jairo will be active as HK5MQZ/0 only on SSB. QSL direct ONLY, via HK5MQZ (Jairo Vargas, P.O. Box 10862, Cali, Colombia). Hiro will be active as HK5QGX/0 and will operate on CW only. QSL his contacts via his QSL Manager JA0MGR (direct ONLY).

IOTA NEWS.....
EU-065. Didier, F5BWJ, will be active as TM2A from Noirmoutier Island from March 31st to April 7th. QSL via F5BWJ.

EU-126. Lawrence, KB9YXM, reports that the Finnish Club station, OH8TA, is planning an IOTA DXpedition to the Island of Hailuto in the Gulf of Bothnia off of the Finnish coast near Oulu. They will be operating for three days from the University of Oulu's marine research station on the island. They will be operating on HF, VHF and UHF. The frequency for 6 meters will be 50110 kHz. For other bands and frequencies please send an E-mail message to: oh8ta@oulu.fi
Operating conditions for 6 meters will be a Cushcraft 3 element Yagi, Yaesu ATAS-100 with GP and counterpoise, Yaesu FT-100 at 100-500Watts. The Yagi and ATAS-100 will be mounted atop the lighthouse station at 30-35 meters above sea-leval. The dates will be April 6-8th. KB9YXM is a U.S. operator currently living in Finland and very active on 50 Mhz and above. QSL to KB9YXM will be 100% via OH8TA.

EU-174. Eddy/ON6HE, Dirk/ON5CT and Frank/ON4AAX will be active from Thasos Island between May 27th and June 3rd. Their activity will be on all HF bands, CW and SSB. They will try to have a special callsign. QSL via the bureau or direct to ON4AAC: Frank Pletinck, Potaardestraat 72, B-9190 Stekene, Belgium.

OC-087. Tom, K7ZZ, informs OPDX that plans for the expedition to Enewetak (part of the Marshall Island group) on April 19-26th are going smoothly. An antenna mast will be loaned from Force 12. Support has been obtained from the makers of Mountain House freeze dried foods. And a donation to cover part of their QSL expenses is expected from the Island Radio Expedition Foundation. The only real snag has been the failure of a second amplifier to material-ize. The two Stateside team members will depart the West Coast on about April 10th to join the rest of the team on Kwajalein. From there they will fly on to Enewetak. Although only one station will have an amplifier, two additional tranceivers will be included. Antennas are a small tri-bander, a log for 10-6 meters, and a R-7000 vertical plus a wire dipole for the low bands. Propogation predictions show a slim chance of a 10 meter opening to Europe, but lots of chances on 15 meters. All other

areas should have lots of openings. The callsign V73E has been issued/assigned. QSL cards go to WF5T.

SA-035. Dr. Rick, NE8Z/HC1MD, will be active as YV5/NE8Z from Los Roques roughly between March 31st-April 2nd. He will be using a TS50 + dipole mainly on 28.460 SSB. If propagation is poor on 10 meters, he will operate on 21260 or 14260 kHz SSB. No CW this trip. QSL via NE8Z: Rick Dorsch, Box 616, Hamburg, MI 48139 USA

JW, SVALBARD. Per, LA3FL, is currently active in his spare time from Hopen Island (EU-063) as JW3FL. He is the only radio operator on this little island with many polar bears. He will be here until June 2001. He was recently heard on CW on 21025 kHz at 0915z and 1833 kHz between 0045 and 0330z. QSL via LA3FL.

PACIFIC TRIP 2001. Gerard, PA3AXU, has announced another DX trip into the South Pacific. This time during September 2001, he will be heading to T30, C21 and 3D (Fiji). He reports that like his last trips, this will not be a holiday but work on the radio. He also hopes to give everyone a new one on SSB/CW/RTTY/SSTV and/or PSK31. Gerard will start his activity on Tarawa, West Kiribati, as T30XU, beginning September 4th. He will then travel to Nauru and sign C21XU beginning September 11th. Gerard will end his activity in Fiji signing as 3D2XU, from September 20-28th. For more details and up-to-date information, check the Web site at:
http://www.qsl.net/pa3axu/2001
Gerard requests to please submit any comments/remarks/suggestions on his 2001 Pacific trip in the guestbook on his Web site.

QSL INFO AND NEWS.....
3D2CI Update. Hrane, YT1AD, in Belgrade, reports that the logs are going to be on the Web site soon (they may be there!). They are currently having problem recovering some QSOs from a damaged hard disk, but they hope in a few days all will be consolidated into one log on the Web site. There are some photos of the Conway Reef operation on the Web site. Check them out at: http://www.kragujevac.co.yu/3d2/photos/photos.htm
Hrane is going to be at the Dayton HamVention with a 1 hour video of Conway Reef.

LAST MINUTE CHANGE: The Hillview Gardens ARC (9M6AAC) was assigned the special callsign 9M6A for this past weekend's CQWW WPX SSB Contest with Peter G4MJS as the operator. Please QSL 9M6A via N2OO:
Bob Schenck, PO BOX 345, TUCKERTON, NJ 08087 USA.

Paul, A35RK, would like to remind everyone that the Kingdom of Tonga (licensing authority - Tonga Communication Commission) has no national amateur radio society, no radio club of any sort, and NO QSL BUREAU. At present, it is a waste of time and money to send "bureau" cards to Tonga. Currently licensed A3 operators are certainly not receiving any "bureau" cards, and therefore they are unable to reply. In his own case, "QSL A35RK via W7TSQ" is the only possible route. The postal address for A35RK, in any database that he has seen is incorrect: "via direct", using that incorrect information, will most certainly

result in a "dead letter" and no response.

Gerard, F2VX, can confirm the contact made with A51AA ONLY for the contacts made in September 2000, NOT for the new operator that was newly autorized.

Charly, K4VUD (aka A52UD), reports that all direct mail requests for A52UD QSLs have been answered to date. The bureau QSL will be done next fall.

QSL CW6V, which was active in last weekend's contest, to W3HNK.

Yannick, F6FYD, informs us that all direct and bureau requests for his operation as 5T5YD and 5T5YD/P are on the way.

HI9/DL7AFS and HI9/DJ7ZG QSL and Log. Babs, DL7AFS, informs OPDX that as of the early morning of March 23rd, the duo have arrived back in Germany. They thank the many for the interest in their Dxpedition. They made 16340 QSOs and plan to begin printing the QSLs next week. The log search is now available at: http://www.qsl.net/DL7AFS

L40F was active in the CQ WW WPX SSB Contest as a Multi/Multi category. The LU4FM team was: LU1FAK, LU1FAM, LU1FGE, LU1FGZ, LU1FZR, LU2FT, LU2FP, LU2JCW, LU3FCK, LU4FPZ, LU5FA, LU6FEC, LU8FCM, LU8FPT and LU8FQQ. QSL Manager is LU4FM: Radio Club Rosario, Zeballos 811/817, (2000) Rosario, Republica Argentina.

The Finnish Army Signals School is celebrating its 60th anniversary this year with their station OI3AY that was activated during the CQ WPX Contest. Also, Martti Laine, OH2BH, was one of the operators from the OI3AY station during the contest. A special QSL card will be issued for this special event. The QSL Manager is Teuvo Kaistila, OH1BV, Ahventie 5B1, 25410 Suomusjarvi, FINLAND.

Alan, VK4AAR, announced that all QSL requests for VK0MM cards received through March 20th have now been processed. There were some "not-in-log" replies sent out, but please be assured, that they were not sent out without a thorough check. Alan states, "My wife opened and checked the incoming card against the computer log. If she found any sort of problem she gave it to me to look for obvious typos etc etc.. If I could still not resolve the situation I would E-mail Alan, VK0MM, who would then search his own master log and get back to me. Therefore, it is useless to contact me for further checks.... I have already done all that is possible. Donations for Camp Quality (a charity supporting children who are dying of cancer etc..) are coming in regularly though some still expect a card when they don't even send reply postage and SAE. But a donation will NOT "buy" a card for a QSO that is not in the log. To those who have not yet sent their card to me..... be warned .... DO NOT PUT AUSTRALIAN STAMPS ON YOUR REPLY ENVELOPE. It is most likely that you do not have the correct series of international stamps. Most are putting the wrong amount on their SASEs, too. Let me do the stamps. Just send SAE and USD or IRCs (dollars are preferred as the surplus can go to the charity...IRCs only buy stamps). Those that have the wrong stamps on

will be mailed back to you but I don't guarantee if you will receive them. Finally, and for the umpteenth time, **DO NOT** SEND REQUESTS FOR VK0LD OR AX0LD CARDS TO ME. I HAVE NO AUTHORITY ON THOSE AT ALL !!!"

The Grupo DX Caracas which participated in the CQ WW WPX SSB Contest this past weekend as YW4M gets QSLed via W4SO.

ZL4CC QSLs for the March 2001 operation. Bob, G3PJT, informs OPDX that the correct direct QSL route for this operation is to Bob Whelan, G3PJT, 36 Green End, Comberton, Cambridge CB3 7DY UK. Bob states, "Do not send cards to any other address which may appear in old callbooks as the call was reissued to me for this operation. Bureau cards are OK via G3PJT and the RSGB QSL bureau. An E-mail log request is OK for a bureau card." Bob's E-mail address is: Bob_g3pjt@compuserve.com

TX, NEW CALEDONIA. Jacky, F2CW, is now active as TX5CW. Look for him mainly on CW. His activity this past week was on 30/20/17/15 meters. QSL via F2CW.

VO2, LABRADOR, CANADA DXPEDITION. Fred, K2FRD, reports that he is planning a DXpedition to Labrador; not a DXCC Entity, but an uncommon contact nevertheless. He will be operating from about June 6th through August 31st, as VO2/K2FRD from a tent. His QTH is about 90km WSW of Churchill Falls, Labrador, Province of Newfoundland, Canada. His activity will be mainly 10, 15 and 20 meters in that order. Suggested frequencies are: 28415, 28515, 21315, 21415, 14215 and 14295 kHz. He does plan to be active on some nets. For more details on bands, frequencies, schedules, QSL info, etc...., check the Web page at: http://sites.netscape.net/thefred3/labr1

ZD8, ASCENSION ISLAND. The UK team is now active from here as ZD8K until March 28th. They will move onto St. Helena and sign ZD7K and be active until April 12th. QSL via GW0ANA.

ZY0, ST. PETER ANS ST. PAUL ROCKS. Joaquim, PS7JN, reports that he will be active from "Sao Pedro and Sao Paulo Archipelago" beginning April 1st through April 15th, as ZY0SAT during his free times (afternoons and evenings). His primary objective there is Geochemical of Sao Pedro and Sao Paulo Archipelago. He will be active on HF and the satellites. His suggested operating frequencies are:
HF - 3780, 7085, 14180, 21280, and 28450
SAT - AO-10 (145.9), UO-14 (435.07), FO_20 (435.850) and FO-29 (435.850)
His equipment will be a FT-480R, 20dB amp., XY 7+7 element, 4800 Standard, 20W PA, XY 15+15 element and a HF Atlas 210 with inverted V all band.
QSL Manager is PS7JN: Joaquim "Kim" das Virgens, Rua Carlos Serrano, 1969, CEP: 59076-740, Natal-RN, Brasil (Send 2 IRC and a SASE. Any contribution will be welcomed).

Hello Porky,

Yes, the AH-4 will operate on any frequency between
3.5 and 54 mhz with a 23 ft whip and between 7.0 and 54 mhz
with an 8 ft whip. The AH-4 is a great little piece of gear and
can be used in a mobile application as well, something which
makes it popular with U.S. long-haul truckers. Truckers fed
up with the CB bands are flocking to any clear freq. on HF
and finding the AH-4 a great little aid in doing this. Of course
it is not legal to pick any HF freq. and operate, but the FCC ended
traditional monitoring-for-enforcement in 1996. HF freqs. are full
of long-haul truckers and pleasure boats wanting to get away
from crowded fixed freqs. on the maritime bands. In the U.S.,
it is illegal to use ham gear on maritime freqs, but again, who is
checking up on this? No one.

I'm sorry you have so many druggie friends, but the actual impact of illegal drugs on society is not nearly as dramatic as the hype. Alcohol and nicotine do more widespread harm than virtually any other recreational drug regardless of legal status.

> Yes, and most of those lies are being told by those supporting the
> legalization of drugs. For example, contrary to popular myth, marijuana
is
> extremely harmful - both in itself and as a gateway drug (see below).

The "gateway myth" has been thoroughly discredited already by actual science. The (federal) government may not be too cooperative with anyone who wants to publish that information, but it exists.

Marijuana is not pharmacologically similar to other Schedule I drugs. It is not addictive, does not create any physical dependency, does not cause overdose conditions, and does not seriously depress the central nervous system.

> Sorry, but I've seen that young drug overdose victim (who started down
the
> path of drug addiction with marijuana) laying on the floor, so you're

> going to fool me with that nonsense.

Sorry, but NOBODY HAS EVER DIED FROM A MARIJUANA OVERDOSE. And, as above, the gateway path idea is A MYTH!

Get some facts. They are available, but you won't get many of them from the Feds.

Believe it or not, not everyone is familiar with the tenets of your religion. It's the height of arrogance to assume that merely because you believe in your religion that everyone else knows all about it regardless of their own personal beliefs. I have no idea what "the mark of the devil" is and I don't particularly care since your devil is of no concern to me.

All this guy said was "where do you plan to wear the mark?" I had no idea what he was talking about. You should go find someone and talk out your problems. You really are wound far too tight.

4787. Roger Learns To Swim At The Y

I can see it now. Little Woger in the swimming pool at the YMCA. Thirty, forty naked little boys sitting on the edge of the pool with their feet dangling in the water. Little Woger in the swimming pool, head furiously bobbing up and down like one of those spring-loaded little dogs you see in the back windows of cars. Little Woger in the swimming pool scurrying from boy to boy. So many boys, so little time before Mommy comes to take him home. That, my friends is how Roger learned to swim.

Source record: 91767

I don't know about anyone else, but I have always had a lot of trouble finding 5 x 7 1/2 envelopes (the preferred size) for the QSL Bureaus. So I special ordered a bunch. Now I have a lot. If there are other hams interested in some of these envelopes, I will send (10) envelopes to you if you send me $3.00 and a 6x9 (or whatever size you have as long as it is bigger than 5 x 7 1/2) S.A.S.E envelope with enough postage to get them back to you. Ten of these envelopes weigh about 2.4 ounces. So add the weight of your envelope to the 2.4 when figuring the return postage. Send everything to me at my Callbook or QRZ.com address.

Regards,

Duffy - WB8NUT

Jason;
My situation required 're-learning' about grounds as I operate my shack from the second story of my house.

My ground rod does indeed serve as my protection against lightning strikes and defective equipment shorts, etc.
However, the connection was far too long (about 16 feet) to keep my shack equipment at zero RF potential. (My antenna is a vertical, thus even more importance attached to having a good RF ground at the shack)
Many reports of RF in the audio, poor results with otherwise reputable antenna tuners, etc. caused me to install a seperate RF ground system.

I used the MFJ Artificial ground unit to optimize a counterpoise antenna consisting of multiple wires (bundled) but each cut to approx. 1/4 wavelengths for 80 thru 10 meters, fed from the MFJ. The results were immediate, though not in the way I expected. My performance at 80 and 40 meters was vastly improved, with the MFJ showing a pronounced increase in RF current into my counterpoise radial(s). I expected my Ground stake to provide a reasonable ground for these bands, but not so.
What I expected was to see substantial ground current flowing into the coutnerpoise at higher bands (with the theory that my lead from the ground stake was too close to a 1/4 wavelength for these bands) Yet, 20 thru 10 meters seem less dependant on the RF ground system.

Anyway, the RF problems are gone and the system improvement with an effective RF ground is pronounced.

So much for the concept that 'one ground fits all'. You need at least 2 types. (common mode ground systems are another, even more difficult to install system, but highly regarded for RFI reduction)

Now you know what I know.

Really? When was the last time somebody was assaulted, robbed, burglarized, or killed by someone for a beer or a pack of smokes?

And before you mention traffic accidents, whether high or drunk, the driver is just as deadly, but a doper is much more likely to cause a pursuit than a drunk.

Hello,

I am looking for information on the Peirce Wire Recorder, type 55B
(electrical schematics, how big is the magnetisation of the wires,
the speed of playing the wire....).

I have some other, more specific questions:
At university, we got a wire that is meant to be played on a type 50A
or B (i forgot). We only have this Peirce wire recorder 55B.
Should it be possible to play this wire on our recorder?
What are the differences between the 50 and 55 types?
And a last problem: the record button doesn't seem to work (play and rewind
do
work). Is that because we need a pedal to record? Or should it also work
without a pedal?

Every little thing you know about this matter, is welcome!
Regards,

Our Sherriff Dept. installed a digital system for the SWAT teams only.
Efficiency?
I doubt it.

That is not a "perfect example" unless the end result of removing the code
requirement is that you can no longer use CW. If, after removal of the code
requirement, you or anyone else that wishes to learn and use CW is free to
do so there is NO parallel.

> I understand how a nuclear reactor works, but I would never be allowed to

Again, unless the end result is that it becomes illegal to use CW the
comparison is invalid.

Sure it is. The outcome of the argument is not the issue. The issue is that
you have a group of people with absolutely no expertise on the subject
forming an opinion based on personal feelings and self interest, that they
are trying to convince others is correct.

John Byrd, Democratic senator from West Virginia and former member of the KKK recently slipped and used the term "nigger" again, creating a storm of protest from all sides. Truly, John Byrd is a real work, and one wonders how the Democrats have managed to support this man for so many years and still lay claim to being the refuge of minorities.

But take a look at KC8JBO and the posts he makes which are potentially seen by up to one million Usenet readers. He too appears to represent his state in a very negative way until you look more deeply into matters.

The answer is simple. Both people are exactly what they seem to be: archetypes of a backward population in a backward state -- West Virginia. KC8JBO therefore represents his peers with exquisite truthfulness. He is, like his senator, a crude person from a state filled with crude people, and he will never understand why the rest of the world reviles him.

To do that would have required that he grow up in a different environment.

: > Okay, Stark, if it will please you better, we can instead have the
Coast
: > Guard and Navy stop every ship coming into U.S. waters, at which point
the
: > military can board to search every single crate. In other words, when
: we're talking about shipping crates coming into this country, and drugs
imported
: > into this country inside those crates, it is not just "domestic
policing."
:
: The Navy doesn't and can't stop every ship. They are part of the military.
: The Coast Guard can because they belong to the DOT not the DOD. Big
: difference and completely different rules. All it would do is change the
: method of t

It has been an ongoing discussion about moving the Coast
Guard back to DOD. What is now being proposed is to
put the Coast Guard, along with the National Guard, under
the new Homeland Defense Agency at DOD.

Besides there are many LEOs in the Guard and most
LEOs come from the military. The Navy, and the Marines,
still have full law enforcement powers over US citizens. The
Army has a few restrictions, most of which are now being
removed by new laws.

: > By the way, it is utter nonsense to suggest the police have to have
: > probably cause. Probable cause, or a warrant, is not needed to search
any
: > person, package, crate, or vessel, entering our national borders. Such
: > searches are done all the time. For example, you, your bags, and your
: > luggage, are subject to search anytime you fly into this country - no
: > probable cause or warrant required. Likewise, the Coast Guard and Navy
: > routinely stop vessels to search for illegal drugs.
:
: The Navy does not routinely search for illegal drugs. That would be
: considered a military action and to some countries and act of war. The
Coast
: Guard can routinely search for drugs because they aren't a military group,
: see above explanation.

In US coastal waters, we can do whatever we want. On the high
seas, not even the Coast Guard can stop ships.

: > Therefore, there would by no probable cause, or warrant, needed to
: search shipping crates at the docks as those crates enter this country.
And, I
: see no reason the military cannot conduct those searches as long as that
: search is done under police, Customs, or Coast Guard, supervision.
:
: Because the military should not be involved in the enforcement of civilian
: legal issues. Those are left to police, customs and the Coast Guard. When
: the military starts enforcing civilian law we are one step closer to a
: military leadership making civilian laws. No thank you, lets keep them
: seperate like they are now.

Stop being paranoid. Look, we in the military are already
pushing our people into elective office. Congressman Buyer
is a LTC in the USAR. I served with him. I have judges,
school board members, mayors and all sorts of other elected
offices that are being filled by reservists or retired military.

Now we could just get rid of the military and give the police
military duties.

: > > activity - absolutely!
: >
: > If police violence against jammers worries you, I suggest that
: > you not engage in that activity.
: > COMPRENDE???
:
: I don't think YOU comprehend the discussion. We were talking about
: involving civilians (such as volunteer ham operators) in the effort to
: locate drug runners who are abusing the police radio system around our
: southern border. My point was that there is a huge difference in the risk
: to one's personal safety between tracking down some teenager who's having
: some fun annoying the police and tracking down a heavily armed and highly
: motivated drug courier.
:
: Comprende?

Very little danger. I expect that you know very little about
DFing. Much of it can be done from a distance. Even the
last bit of triangulation can be done in a police car with the
ham as a passenger. It would only take a two to three teams.
Once you have a good ideal of where the transmitter is (within
a football field area), the cops can move in to do the search.
Hams would not have any contact at all.

The same technique would be used in the military was involved.
The cops would do all the close in work.

: >
:
: So where do you plan to wear "the mark" ???

First, I do not plan to be here when the "mark"
is issued. And the mark of the beast is of a spiritual
nature, not physical. It has to be in order to have the
effect of blocking the new birth. In fact those who
are "born again" in the tribulation will not be able to
receive the "mark".

Second, the tribulation only effects Europe (the ten
nations of the restored Roman Empire). My guess
is that most of the world will be depopulated by the
Gathering Together (Rapture). What folks are left
in the US will be at a survivalist level. No fuel, no
food, nothing. However, the US will be a place
of escape for those in Europe, if they can make it
here.

It does rather look like we are seeing the beginnings
of a "Great Harvest" as more and more Americans
come back to church. And Asia and Africa already
have huge church growth. So does South America.

But for now, either working in government, having money,
political power or political connections seems to keep
the worst of our current "neo-Victorian Age" at bay.

4808. KC8JBO's origin?

>Efficiency?
>I doubt it.

If your sheriff was sold a P25 digital system that is UNENCRYPTED with the understanding that this implied privacy, your sheriff was misled the same way that others were misled by statements that trunking was going to provide "privacy" from eavesdropping! P25 is an open architecture format that is available to manufacturers who are signatories to P25. This can include scanner manufacturers - if they thought it would be profitable enough to make those devices. You can even buy a P25 radio from a number of manufacturers (Motorola, Racal, Transcrypt/ EF Johnson, and a number of other non-Motorola manufacturers), if you were inclined to spend so much.

If your Sheriff was sold a P25 digital system that has DES-OFB encryption as well, then he has a secure system.

Encryption in a digital radio is easy enough to do and is a $400 option (per radio). You do need a $3200 Key Variable Loader, though.

Steve

Okay, let's suppose that your teenage daughter is raped. An ambualance has to be dispacthed, *with info about what to expect.* Police have to dispacthed, with info. After the police arrive, suspect descriptions have to be *broadcast,* with details about what they are wanted for. All of that, contributes to why too many victims don't want to call police/prosecute. There are *sick* bastards out there, ready to prey on those victims. OTOH, there could be more people looking for the perpetrator, so they _can_ be prosecuted. I don't have any answer, much less and easy one.

Why use it as a backup rig George? Why not set it up for use on another band? I have the FT 920 set up on 10 the FT 1000 MP set up on 75 and the FT 847 set up on 2 and 70 cm. I have the FT 757 GXII soon to be set up on 20. I also have a
DX 302 that I use for WWV. So a back up rig in my opinion is nice but its a waste of table space if it is not being used. Just a suggestion.

Now if we could get the FCC to monitor this many freq. at one time. We could get allot of the trash off the air have you listened to 3.901 lately? the QRM not QRN but QRM is back in full force. He surly has a week signal though. You think that he might be a CBer loading up a CB antenna on 75? Just a thought. Sounds like something a idiot would do. BTW my little illegal technician is still in business. The FCC knows he is there and NOTHING IS being done. Next time you hear a CBer on the 10 or the 12 meter bands or interference form one, you can thank the FCC. I know for a fact that they know about this guy and refuse to do anything about him. I think that he is going to move out of Danielsville. He has a land lord problem. I'm glad I don't rent.

"W6DKN" <w6dkn@qsl.net> wrote in message news:yivv6.3230

> Sure it is. The outcome of the argument is not the issue. The issue is that you have a group of people with absolutely no expertise on the subject forming an opinion based on personal feelings and self interest, that they are trying to convince others is correct.

The people who oppose the Morse code exam statute 47 CFR 97.503(a) are not required by law to be proficient in manual Morse code reception in order to petition their government to delete the rule. The Amateur Radio community have ignore the facts and laws for too long. Your delusion that only Morse code experts can decide this matter is pure non-sense.

In its 1999 License Restructuring Decision , the FCC acknowledge the effect technological changes on the need for Morse code proficiency:
"the design of modern communications systems, including personal communication services, satellite, fiber optic, and high definition television systems, are based on digital communication technologies. We also note that no communication system has been designed in many years that depends on hand-keyed telegraphy or the ability to receive messages in Morse code by ear. In contrast, modern communication systems are designed to be automated systems."

In a October 27, 1997 briefing paper prepared for digital television broadcasters, Mr. Erwin G. Krasnow noted the effects of technology on regulation: "The Supreme Court has observed in CBS v. DNC that the FCC must "walk a 'tightrope' to preserve the First Amendment values written into the Radio Act and its successor, the Communications Act." After referring to its Red Lion decision, the Court noted that "[t]he problems of regulation are rendered more difficult because the broadcast industry is dynamic in terms of technological change; solutions adequate a decade ago are not necessarily so now, and those acceptable today may well be outmoded 10 years hence." Columbia Broadcasting Systems, Inc. v. Democratic National Committee, 412 U.S. 94, 117 (1973)."

Because of technological and operational changes, the manual Morse code exam is unnecessary. Its use as a licensure examination element to authorize frequency bands and emission types, other than manual Morse code operation, is arbitrary and capricious. The exam is even arbitrary to authorization Morse code operation, since such operations can be conducted by computer control.

The ITU rule S25.5 forces the FCC to impose a requirement upon its citizens that is unlawful. 5 U.S.C. 706, "Scope of review" provides:

To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall - (1) compel agency action unlawfully withheld or unreasonably delayed; and (2) hold unlawful and set aside agency action, findings, and conclusions found to be - (A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law; (B) contrary to constitutional right, power, privilege, or immunity; (C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;
(D) without observance of procedure required by law; (E) unsupported by substantial evidence in a case subject to sections 556 and 557 of this title or otherwise reviewed on the record of an agency hearing provided by statute; or (F) unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court. In making the foregoing determinations, the court shall review the whole record or those parts of it cited by a party, and due account shall be taken of the rule of prejudicial error.

The FCC has dealt with the Morse exam matter more directly. The telegraphic examination was removed as a requirement to qualify for Technician Class operator license in 1990. In its Report and Order (FCC Record 7631), the FCC stated:

(a) "For the amateur service to achieve its purpose it must have the participation of as many qualified persons as possible who desire to pursue that purpose. Modern commercial and military electronic systems require engineers to design them, technicians to install and maintain them, and a technologically literate citizenry that can use them. The amateur service should, as it has in the past, attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves where the United States needs expertise. We do not foresee that telegraphers will be in as great demand by future systems as will electronics and communications experts."

(b) "Telegraphy skill has been required for each person who has ever been issued an amateur operator license in the United States, including the current 493,000 licensees. Mastering the Morse Code was an arduous task for many of these licensees, and by developing their telegraphy skills they expressed their intense desire to become amateur operators. It is understandable, therefore, that there are licensees who are reluctant to share the amateur service frequencies with new licensees who have not made a similar effort to master the Morse code. We conclude, however, that telegraphy skill is not so essential to proper operation of a station that transmits exclusively above 30 MHz such as to justify turning away otherwise qualified persons who do not possess the skill. The Notice, furthermore, did not propose to delete the telegraphy skill requirement for a licensee to be the control operator of a station transmitting below 30 MHz where telegraphy communications take place extensively and worldwide communications are possible. The sharing of frequencies between codeless class licensees and other licensees can take place on frequency bands above 30 MHz where telegraphy operation is minimal and where the transmission of

the more modern emission types such as data, image, phone, pulse, RTTY, and spread spectrum, predominate."

(c) "We do not concur with the comments alleging that the passing of a telegraphy examination is an indication of the examinee's good character, high intelligence, cooperative demeanor, or willingness to comply with our rules. These traits are also found in individuals who have not passed a telegraphy examination rather than being exclusive to those who have passed such a test. For regulatory purposes, passing a telegraphy examination is no more and no less than proof of the examinee's ability to send and receive texts in Morse code at some specified rate. With respect to comments that make claims for the superiority of telegraphy over other types of communications, we do not consider these arguments as germane to this proceeding. The Notice did not propose to discontinue the authorization of telegraphy CW emission types on any amateur service frequency. The amateur service in the future, as it has in the past, can provide to those who personally desire to do so the opportunity to communicate by telegraphy."

The 13 and 20 word per minute telegraphy examination was removed as a requirement in 1999. The FCC stated in its Report and Order (FCC 99-142) for WT Docket #98-143 that:

(a) "the public interest will best be served by reducing the telegraphy examination requirement to the minimum requirement that we have found that meets the Radio Regulations" ;

(b) "an individual's ability to demonstrate increased Morse code proficiency is not necessarily indicative of that individual's ability to contribute to the advancement of the radio art" ;

(c) "such a license qualification rule [Morse code exam] is not in furtherance of the purpose of the amateur service and we do not believe that it continues to serve a regulatory purpose" ;

(d) "the amateur service is fundamentally a technical service, the emphasis on Morse code proficiency as a licensing requirement does not comport with the basis and purpose of the service" ;

(e) "reducing the emphasis on telegraphy proficiency as a licensing requirement will allow the amateur service to, as it has in the past, attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise" ; and

(f) "telegraphy proficiency is not a significant factor in determining an individual's ability to provide or be prepared to provide emergency communications" .

The Morse code requirement is finished. Give it up before you destroy the entire Amateur Radio Service.

Larry, KC8EPO

First you tell us to stop being paranoid. You immediately follow that
advice with the exact reason Americans should be terrified.

Your comment about the military having full law enforcement powers over
American citizens was excessive as well. There are serious limitations on
the circumstances under which those powers can be excercised. They cannot
do domestic policing, and MPs have virtually no authority over civilians
outside military reservations.

Another 40 countries (see earlier report Europe CEPT adopts 5wpm Morse code standard) are lowering their amateur licence code test speed. Who will be the first CEPT country to adopt the CEPT recommendation CEPT Recommendation T/R 61-02, which recommends member countries to adopt the 5-words per minute standard?

What is happening in your country, whether it is in Europe or anywhere in the world?

Stay tuned, WIA Victoria's "Morse code watch" will announce soon the first Asian country headed towards 5-wpm.

> on their feelings and opinions, you should have to give up your guns.

Kind of a silly example, wouldn't you say? A vast majority has never fired a thermonuclear device either, and yet they would have you believe that based on their feelings and opinions, you should have to give up your personal thermonuclear device, if you had one.

Or taken even further, take the anti-drug crowd - the vast majority of them have never even shot heroin, and yet they would have you believe that based on their feelings and opinions, you should have to give up your needle.

> Just why the heck would anybody in his/her right mind pay the ARRL to be a
> member? For what?

Because it is the only national ham radio association in the US, and as such is the sole protector of every US ham's interests, rights and privileges. Because without it, ham radio would cease to exist after losing every Hz of spectrum to special interest groups who, unlike you and your CB buddy, are well organized and represented.

> Who cares?

Whoever cares about the future of ham radio, not only in the US, but in the entire world.

> The ARRL is losing members day in and day out. They have to ask themselves,
> "Why?"

Provide data to support this claim, please.

> The real reason for this loss of members is simple.
> 1. It costs too much and you get nothing back.

Bullshit. See above. What's the cost nowadays, $34? You mean to tell me that you "can't afford" lousy $34 to be a part of the organization that protects *your* interests? You probably blow more than that daily on beer.

> 2. The magazine is too full of voting and political agendas.

Bullshit. Nobody forces you to read those pages, nor the rest of the magazine for that matter.

> 3. Nobody really cares about the ARRL.

Bullshit. Nobody meaning you.

> 4. The ARRL really doesn't care about you.

What do you want? Flowers for Valentine's? Chocolate on your pillow?

> 5. The ARRL has an agenda that does not help Hams.

Ah, yes. Now we're talking... They shot Kennedy, too, didn't they? And they covered up the Roswell conspiracy.

Of course the outcome is the issue. If it weren't then there would be no
debate either way. Besides, what "expertise" is needed to see that
mandatory testing for only one mode out of dozens is wrong? Those that have
"expertise" on the subject are also basing their opinions on personal
feelings and self interests and trying to convince others they are correct.
And it isn't only those that have yet to pass the code requirement that are
```

against it. If it was about to be made a criminal offense to learn or use the mode you would have an argument. As it stands, I can only see the code test being valid if EVERY mode that might possibly be used is tested for proficiency. Then and only then would the code test have a valid leg to stand on.

Actually, war ships can halt and board *ANY* vessel on the high seas
to inspect their paperwork and cargo.

It's all entirely legal.

This came up in the USS Pueblo (unmarked electronic eavesdropping trawler) debacle.

The ship's crew on board were told to comply with ANY routine boarding
operation by foreign naval personnel. The ship's spooks were told to
treat any boarding as an imminent emergency, and to get rid of all of
their collected data, and to attack all of their equipment using certain,
precise methods which were specifically designed to *NOT* break it
(such as using sledgehammers against equipment with very strong chassis
rather than thermite grenade which would melt right through), so as
to "deliver" a bugged decoding teletype machine to the Chinese sphere

of influence...thus, allowing the Chinese to think that the were getting
hot info by listening into US intelligence traffic...when it was actually
all a set up to see if the Chinese would give the information to Moscow
(because we could read Moscow's "mail")

The military *IS* allowed to conduct contraband searches...in fact
on the high seas, they *ARE* the law.

Not only that, but DF'ing works BEST when the initial work is done
from several widely seperated points, to more accurately pinpoint
the initial football-field sized patch of groudn to search.

In that respect, the hams never even have to leave the house.

This is easily explained when one considers that there is a significant
percentage of the population that has long since lost the ability to think
independently and use logic and reason to form their opinions. For these
people, it's a Pavlovian response to present emotionally based opinions on
most issues, and simply regurgitate their social groups' pre-programmed
official "mantra"...

YOU believe them to be arbitrary and capricious, Larry. You also
believe that running a computer controlled morse contact is a snap.
That'd make you one of the folks basing an opinion on something you know
little about. Your posting would indicate that you would try to sway us
toward believing that you are correct yet you've based your views on
your tiny bit of knowledge and your "I don't wanna" feelings about morse
testing.

> The Morse code requirement is finished. Give it up before you destroy > the entire
Amateur Radio Service.

Oh puhleeze, Larry. Cut the melodrama.

: enforcement.
:
: -Dave, NF2G

Sorry, but I feel that the biggest mistake we have made in
the US is pushing "professionalism", ie fulltime careerism.

The US military reserves have shown that part timers can be
as good, if not better, than those whose income is totally dependant
on active service. Every police and fire department should
have, by law, a reserve force. A reserve force should be
used to screen, train and help select those who might be hired
fulltime. By this I mean that those wanting to be police or fire
would join as a part timer, be trained then work along side the
fulltimers. In time there would be enough evaluations that everyone
would know if this was a person who could make it as a fulltimer.
Then there would be more training. Also, most police and fire
officers leave within five years of joining. A reserve force would
be a great way to retain trained and experienced officers.

In other words, it would be a "militia" of type. Just like the National
Guard. But volunteers do have a place in law enforcement.

:
: First you tell us to stop being paranoid. You immediately follow that
: advice with the exact reason Americans should be terrified.
:
: Your comment about the military having full law enforcement powers over
: American citizens was excessive as well. There are serious limitations on
: the circumstances under which those powers can be excercised. They cannot
: do domestic policing, and MPs have virtually no authority over civilians
: outside military reservations.

Only a matter of laws. The Army was there long before the US Marshals
or the FBI doing federal law enforcement. And the Army is being given more
authority (a weaking of the PCA) with respect to domestic terrorism and
drug enforcement. Also look at the new Homeland Defense plans. The
National Guard has a huge mission.

: > First, I do not plan to be here when the "mark"

: If you had told us up front that you were a radical fundamentalist, it
would
: have saved a lot of bandwidth. No rational discussion is possible, and I
: don't have time to exchange wild rants.

Since I am not a protestant, especially a Baptist, I can not be a "fundamentalist". And what I described as an ecclesiology that is accepted by most throughout Christianity. The fundamentalists are more likely to believe that everyone will suffer through the Tribulation.
(A smaller camp of thought.)

As far as my beliefs, well I practiced Orthodox Judaism in the '70s, have studied under an number of scholars with respect to Christianity and learned a great deal about Islam (enough to respect them) while living in Saudi. The study of religion is sort of a hobby.

Dave, what the court was saying is that technological change will change the
validity of FCC rules. The Morse code exam requirement was valid at one
time, but today it is not.

> > Because of technological and operational changes, the manual Morse code
exam

> Oh puhleeze, Larry. Cut the melodrama.

You don't think that the Amateur Radio community can not lose frequency
allocations. The FCC must allocate frequency in the public interest.
How is the public interest satisfied by maintaining a non-conforming
requirement?

There are just as many or more of those kind of people on the other
side who operate entirely on feelings and have adopted Morse code as
their creed without considering the long term effects.

What about all the thinking hams who use their logic and reason to
agree with the FCC and conclude that arbitrary and outdated requirements
are bad for the Amateur Radio Service?

John,

I think that you place way too much importance
to the internet and r.r.a.p in particular.

I am at least one subscriber who has managed to
reduce the QRM here to a very manageable level
through the use of kill files.

For the longest time, I simply ignored the .policy
and .misc. groups as cesspools, and I suspect
that many other hams do likewise.

Life is simply too short to place much importance
on the various fools here.

That being said, on occasion, there are interesting things
going on here. Because of that, I maintain and update
the filters. It makes r.r.a.p and r.r.a.m readable.

:
: 73,
: David K5DEL

Just look at the 10m/CB problems. The Indiana State Police
now stop people because they have too many antennas on their
cars. Drug traffickers are using a chase vehicle with scanners and
either CBs or ham equipment. The scanners listen for the cops
and the two way radios are used to warn off the "mules". Also
the chase vehicle has the weapons to fight off rival gangs.

We had a discussion on this within the NGs are few months ago.

How so, Matty boy? Baby Boomers are increasingly
going back to church, especially to evangelical churchs
like the Assemblies of God. And the AG church, which
John Ashcroft belongs to, is now the largest non catholic
church in the world. It has seen its growth in places like

South America, Asia and Africa.

: > the worst of our current "neo-Victorian Age" at bay.

Matty boy is just another feminized male in America. Part
of the neo Victorians. Wonder if he wears a Buster Brown
suit that his mommy bought him.

It's not the same logic at all. A slave would possess first hand experience
with slavery, therefore his vote would most definitely be valid.

> if they wanted to because of lack of skills.

And what about those code tested "Hams" who don't have knowledge of the various digital modes, ATV, satellite operation, and the list can go on and on? By your logic those code tested Hams are not "REAL Hams" either. They don't "possess the skill to operate" as you put it. What goes around comes around. If you want to conjure up some logic, like yours above, just be prepared to have it applied universally, then we shall see if the shoe fits or not.

> Which is basically what the whole discussion is about...

Amateur Radio elitism organized along the Code / No Code dividing line. You can dress up the CW elitism up anyway you like, but it's bigotry anyway you look at it.

>W3UR

Nominally, yes, but I have not yet received cards for QSOs 1-2 yrs ago.
Bernie W3UR told me that there have been some problems getting the logs,
but after this weekend's M/M operation from A61AJ there will be great
pressure on the ops to get some logs to him, I assume. We can hope that
this includes operations before then.

I mistyped. It should have read: Following the same logic, it figures
that you believe that non-slaves should not have a vote on the subject
of slavery.

Actually they didn't get to vote. But of course, people who
did not have slaves had a lot to say about the matter.

The Morse code exams requirement is challenged on
the grounds that it not in the public interest and not in
conformity with law. Attacking the petitioner/plaintiff is
irrelevant.

The problem is is that the witness could not be cross-examined. However, the videotape could be treated as an affadavit. (I'm not a lawyer, this is not expert advice).

Something for the few police who support gun control to think about. I could envision a frightened witness refusing to testify, even with "police protection," because he/she would be unable to protect him/herself 24/7. If I lived in DC and could not own a gun, I myself might decide "I don't want to get involved." Since I live in PA and could acquire my own "witness protection program" if I thought I was in danger, I'd be far more willing to take a chance and give my testimony.

Well actually, they're the sole protector of ARRL's singulara
interests, first, then if there's anything left, US hams as a group
might get a little attention.
Back in the days of HPM it was as you say. But HPM is long gone.

Apparently, it's too tough for YOU to figure out, because you're in complete denial.

Let's turn this around, shall we? If the real KC8JBO were being intentionally impersonated by someone for all these months, don't you think that he would have by now posted a denial or ten? Don't you think he'd be getting the people at cotse to cancel the account through which the spew arrives (it is against the cotse TOS to impersonate someone)?

For that matter, why don't YOU write to abuse@cotse.com and provide them with your seemingly unique knowledge? They'll dump the imposter in a flash.

The reason, of course, is that you can't, because you know better.

Your statement is preposterous and an attempt to obfuscate. The reason that KC8JBO posts as himself is that he's basically stupid. His actions prove it.

Larry, you are citing a court case pitting a commercial broadcasting
network against a national political party. That the case and its
issues have little to do with amateur radio seems to have escaped you.

Can lose? I don't think that amateur radio will lose any of its HF
allocations though we might see 40m realigned in future.

We don't have a "non-conforming requirement". There is still a 5wpm
requirement for HF access. I don't think you should waste time blowing
smoke up the asses of those congregated in this newsgroup. Mount your
soapbox and spout your homemade semi-legalistic rantings where they
might make some difference. Here your stuff is just cheerleading.

You are clearly uninformed as to who is forming opinions
as to the rational and need for code testing. Many, including
myself, have "been there, done that" as to passing the
code test at speeds greater than 5 wpm. Not all those
opposed to continued code testing are so "uniformed"
as you think.

Cheers,
Bill K2UNK

In the absense of any contradicting comments,
the FCC sure seems to think so too. I haven't read
one FCC comment that put any rational into
why code should be kept as a test...with the singular
exception being that for now, it still is a treaty
requirement.

Cheers,

That the fundamental concept has as much to do with
amateur service (as well as any other service) seems
to have escaped ole Dave. Case law is not so narrowly
viewed as you might wish.

Cheers,
Bill K2UNK

Let's see, people ride horses, shoot black powder not to mention arrows, buy old cars and do a lot of things that have no commercial value but require an operator to actually operate and apply something other than his Visa Card to the problem. Heavens to Murgatroyd. And they actually enjoy it. And bicycles yet -- how quaint.

So why in hell is it necessary to denigrate a mode you know zip about just because you can't or won't do it??

It is the requirement and will be for at least five years if you could sell this line of horseshit to every amateur in the world and every government in the world in the next five minutes. The issue is not CW, the issue is your wandering around waving your arms, fingers, and gums in the face of existential reality. We can argue should, could, would, etc. from now on and it would still be the same. Do you really believe we don't recognize denial mode when we see it?

Whether you take or pass the code test or why makes no difference to anyone. How you justify it to yourself is strictly your problem and tends to be a bit of a bore to everyone else.

For readers not burdened with the emotional baggage over CW I recommend Morse Academy from http://ah0a.org. For those with the personal problems, I recommend the chaplain down the hall in the Methodist Episcopal Novitiate, a room so small it has to have its name abbreviated on the door with only the first letters.

I don't know about you but here in Dallas/Ft. Worth Tx, I've never heard open communications about anything
that was remotely understandable except for accidents and disturbances.
Everything is coded around here. Like a code 7 is a dead person, and so on and that's just an example as I don't
have a chart of what the codes mean.
Also, the real personal stuff is sent over MDT that noone but law enforcement can see (except for illegal reception
by nerds).

UNRUMORING THE RUMOR MILL: ACCUSED SPY IS LICENSED RADIO AMATEUR

Over the past week ARNewsline has received a large number of phone calls and e-mails asking if a man named Robert Hanssen who recently arrested by the FBI and charged with spying is a ham. A story along these lines first appeared as a rumor in Internet news discussion groups. It remained a rumor until last week when Fred Maia's March 15th W5YI Report headlined a story as "Ham Charged With Spying For Russia." This item has not only sparked further debates on the Internet. It has also lead to many heated discussions on the air. This is because a Robert Hanssen, with the call sign K9QVL is listed on the FCC database to the same address in the Virginia suburbs south of Washington DC. ARNewsline(tm) asked reporter Paul Courson, WA3VJB to find out what is real and what is speculation. He has this report:

--

Hanssen, K9QVL, is shown on the database with a General Class license last renewed in 1997. At that time, he filed to an address in Vienna Virginia, where he was arrested in February and charged with espionage.

Hanssen, as widely reported, is accused of passing thousands of documents to Moscow in return for diamonds and cash worth more than a million dollars over a time span of more than a decade. Authorities have described the impact of his alleged activity as very grave.

A visit to his neighborhood March 2nd found NO antennas outside the residence to suggest Hanssen, the ham radio operator, was active on the airwaves. Video footage of family cars at the home in the days after his arrest also failed to show any ham-radio type antennas.

Interestingly, in the affidavit supporting the government's charges against him, Hanssen was quoted as telling his Russian handlers that he thought US authorities might have been on to him. The affidavit quoted Hanssen writing to his contacts that he believed he detected radio signal microbursts coming from his car.

What those microbursts might have been is anyone's guess. But Hanssen's familiarity with counter-espionage tricks of the trade, and his being a licensed ham radio operator, suggest he was well aware of any technical complications if the alleged spy case against him proves to be true.

Hanssen has been described by former colleagues as brilliant -- so intelligent that he had little patience with those around him who failed to immediately grasp his ideas. One former co-worker reportedly said he had the nickname of The Mortician because of the dark suits and intense personality

he displayed.

As government authorities removed various items from the Hanssen home in the days after his arrest, video footage showed a variety of computer terminals, monitors, printers and other such equipment. But the broadcast coverage did NOT show any ham radio gear like a Kenwood or Yaesu or other station equipment he might have had at his home to operate as K9QVL.

In Washington, Paul Courson WA3VJB, reporting for Newsline.

From http://www.strongsignal.net
The ongoing problems of digital trunking.
Encryption will only make it worst.

Sunday March 25 07:20 AM EST
FDNY in a Radio Daze
By PATRICE O'SHAUGHNESSY and MAKI BECKER
The firefighters union accused department brass yesterday of trying to dupe employees and the public by saying the new radio system yanked last week after reports of malfunctions was used by two other major cities.

The Uniformed Firefighters Association - representing the city's 8,100 rank-and-file firefighters and fire marshals - demanded that Mayor Giuliani and the City Council investigate who authorized the digital radios as well as the claim they had been field-tested in Boston and Chicago.

"I think someone screwed up and someone has to be held accountable," union President Kevin Gallagher said at a hastily called news conference.

Steve MacDonald, a spokesman for the Boston Fire Department, told the Daily News yesterday, "We don't use digital, and we have never used digital."

The Chicago Fire Department declined to comment to The News. But union officials and WNBC-TV said Chicago representatives told them they did not use digital radios, either.

A senior adviser to Fire Commissioner Thomas Von Essen predicted heads would roll in the wake of the radio fiasco.

"Von Essen is incensed over the amount of misinformation that was given to him by certain of his staff, and there are going to be personnel changes," the adviser said.

So far, the city has shelled out $7 million for 2,700 new two-way digital radios.

The city switched to the new radios March 13. But within days, firefighters were reporting serious communication problems. On several occasions, calls that couldn't be picked up between firefighters working at the same fire somehow got transmitted to radios in other boroughs, the union said.

"It just caused mass confusion," said Rudy San Filippo, the union's Manhattan trustee.

On Monday, a Queens firefighter whose oxygen supply ran out in a smoke-filled basement made seven Mayday calls on his new digital radio that

union officials said couldn't be heard by his colleagues on the scene.

The next day, Von Essen ordered the new radios taken out of service and the old analog radios put back in.

Gallagher chastised the Fire Department brass for what he said were attempts to downplay the Queens incident.

"How dare the department question the use of a Mayday?" he asked.

Von Essen's adviser said yesterday that the firefighter would not have had a radio at all before the digital switchover and that he might not have been used to having one.

another bad rap for scanner hobbyists
and ham radio operators.

Gangs Go Hi-Tech to Silence Witnesses
Saturday, March 24, 2001 By Christopher Newton

WASHINGTON - On a street of closed blinds and downcast glances, neighbors remember Chrishanna Gladden's final days as the beginning of the silence.

The 20-year-old office worker was a familiar face, a lifelong resident of southeast Washington's most crime-ridden housing project. A place of violence and desperate want, where some hardened young mothers push crack for grocery money.

In 1996, two policemen rattled her screen door, asking about a neighborhood party that ended with gunshots and the death of her friend. She agreed to testify against those accused - three members of a drug gang called the K Street Crew. She was promised safety and set up in a small Holiday Inn across town.

It was not enough.

Days before the trial, gang members used a scrap of information, the Internet and police scanners to track Gladden down, prosecutors said. They allegedly ambushed her on a poorly lit street and shot her.

Gladden was one of seven witnesses killed in a three-year period, each before they had a chance to testify against the gang.

Investigators in some of the nation's largest urban neighborhoods say the case, now on trial in federal court, is part of a phenomenon that is slowly choking their efforts to police the streets.

They say gang members are becoming sophisticated in the use of public records and technology to wage war against witnesses and thwart local witness protection programs. Gangs seem more relentless, too, in using conventional methods.

"It's getting to the point where I struggle with what to tell people who are thinking about whether they should testify," said Sgt. Ray Rodriguez, a gang unit specialist in East Los Angeles.

The result, often, is silence.

In the 1950s and 1960s, it was the mafia that confounded police with inside connections, rooting out witnesses and jurors. Their method was simple: bribe police for information.

Now, police say street criminals have perfected ways of hunting witnesses that are less dependent upon inside sources.

Nationally, the Justice Department estimates witness intimidation has been growing since 1990 and is now a factor in about two-thirds of violent crimes committed in some gang-dominated neighborhoods.

The prey: residents of their own neighborhoods.

"They use license plate numbers, whatever scraps of paper they can to get an address," said Peter Zeidenberg, an assistant U.S. attorney who is trying seven members of the K Street Crew for the murder of Gladden and six other witnesses. "They were ruthless, they were sophisticated and they were efficient."

Much of the case relies upon the statements of those who never made it to the trial.

The hunt for Gladden began with a phone number on a scrap of paper that gang members somehow found, according to prosecutors.

Prosecutors say gang members punched the number into an Internet database and matched it with addresses near their neighborhood. Many online services let people get personal information on someone by using only a name, phone number or address.

With the address in hand, getting a name was easy.

Gang members intimidated people in her neighborhood, mapped out her movements, shadowed her friends across town and bought radio scanners to monitor conversations of officers patrolling the neighborhood, investigators say.

The trail led to Gladden. She was gunned down while running errands with friends.

According to court records, the K Street Crew also found witnesses by cross referencing bits of information with voter registration cards and marriage licenses.

Gang members are using public resources and technology in other places as well.

In Los Angeles, assistant district attorney Jennifer Snyder says gang members recently took a tidbit of information about a witness and then used house and car titles to pinpoint the witness' home.

Just five years ago, such a search would have taken weeks and some amount of record searching know-how. Today, the title office operates under a CD-ROM system, which can provide computerized records in seconds.

"Technology is part of the language of youth," said Snyder, who speaks at seminars about witness protection. "They have access to public information at school and at the library. They've made the link between technology and crime and we have to respond."

In Philadelphia, gang members have combed through police reports to extract witness names, which sometimes are included. They also use e-mail to stay in contact with their franchises in nearby towns, trading descriptions of witnesses they believe have been moved by police.

Philadelphia officials recently offered $50,000 to entice witnesses to come forward after a gang shootout left seven dead. Those who knew the most did not step up, police say.

"It is the reputation for intimidation that is keeping people quiet," said Lynne Abraham, Philadelphia district attorney. "It happens so much that it has become a part of our neighborhoods."

And witness intimidation in high profile cases adds to the fear, regardless of how the witnesses were found.

An 8-year-old boy was murdered in his Bridgeport, Conn., home in 1999 after agreeing to testify against an alleged drug dealer.

Four witnesses to the killing of a Chicago police officer reversed their testimony on the stand in February, leading to a mistrial.

With every death, with every incident of changed testimony, the silence spreads.

In East Los Angeles, Rodriguez the detective has a hard time making "the sell."

Walking toward a potential witness' home, he tallies the reasons why someone might choose to take the stand.

Civic duty. Social justice. Compassion for the victim's family.

He doesn't push as hard as he used to when told, "I didn't see anything, I don't know anything."

"How can you guarantee safety when every night there is a new story about a witness killed before a trial?" Rodriguez asks.

Of the six cases on Rodriguez's desk, only three contain witness testimony. The rest rely on police testimony and circumstantial evidence, and Rodriguez says they may be rejected by the district attorney for lack of evidence.

"You do what you can to make them believe that there is some inherent good in not being silent," Rodriguez said of potential witnesses. "You hope they believe in participating in the fight for their community. But at the same time you don't lie - you don't try to tell them there isn't a very real danger."

He laments that witness protection, offering people many nights away from family in a cheap hotel room, does little to entice people to testify.

"The problem with witness protection is that, at some point, the person wants to go home," Rodriguez said. "Gangs have long memories and just because the case is over, doesn't mean the danger for the witness is gone."

Witness murders help create neighborhoods of frightened people who won't talk - sometimes, not even to each other.

Gladden's housing project is one.

Along a street that shares nothing except a name with Washington's K Street power corridor in another part of town, residents spend as much time as they can inside their homes.

Outside, gang members and dealers posture on the corner and perch atop cars. Some smoke marijuana. Many of them sell it.

Not a single window has opened blinds. Several homes have signs hanging on the doors with messages such as "Don't smoke, no thanks."

"They are vicious killers," said Katherine Jackson, a single mother of three children. "And it just works better to keep to yourself and not talk about anything you see. It didn't always used to be that way."

Once, a street sensibility allowed mothers to feel safe about letting children play outside even with drug dealers around. "You didn't hurt your own," said Lamesha Davenport, another resident.

But that sensibility has been shattered.

The gang members revel in the silence.

"We take care of this hood," said Jerome, a 17-year-old selling drugs in the dusty courtyard. Jerome, who would not give his last name, says he's proud to be a member of the K Street Crew.

"We are better able to protect each other than the police," he says. "The police try to play us off each other and we don't take that."

Aaron, you really need to learn the rules of subject-verb agreement
before you go around calling somebody else an idiot.

Actually the Fundamental Baptists believe that any saved christians will be raptured out, to Heaven, at the beginning of the seven year tribulation period, during which the false christ will reign. 3 1/2 years of false peace, and 3 1/2 years of WAR. We believe the Bible is the inerrant Word of God, and it should be taken literally. Thats the fundamentalists beliefs anyhow.

Anyone not saved, or born again, after hearing the Gospel, will be eternally damned once the Rapture happens. The only people born again during the tribulation will be people that have never heard the Gospel or the Word of God. We also believe the mark to be very physical, having been said in the Bible. It will be required to purchase anything during the Tribulation period, food, clothing, water, etc... I would put it this way. The Bible says do one thing, but most do another. If I were a gambling man, I would go out and party until I died, but if I were wrong, the price is eternal pain and suffering. However if I stick to the Bible, and stay with God, and I am wrong, then nothing happens, I just die, but if I am right, then I am rewarded with eternal life.

Best place to look for it might be the same place where they gave rationale
for keeping any of the other requirements - wherever that is.

I guess that I am running into hardshell or other non standard
Baptists. They are very focused on the Beast (and not focused
on God), worry about surviving the Tribulation. That is not standard
beliefs that most Christians have been taught. And from what I
understand, even the Catholic church believes much as you do.

But look around us. There are a lot of fundamentalist type Christians
here on the NGs who are very fearful of government, see the "Beast"
in everything. It is like they do not trust God, or something.

That was why I made my comments. Especially after the guy made
the smart remark as to "where I was going to wear the mark". Sorry
but too many gun owners, ham radio operators and such have these
types of fears. False teaching, I guess.

If I were KC8JBO and the victim of all the defamation, I'd think twice about running to COTSE with complaints. It'll get him nowhere. COTSE, from what I read, is oblivious to such complaints.You condemn Roger without a shred of proof therefore my suggestion is to cool it because gossip means nothing. Mr. Bowers, you have an axe to grind and will parrot anyone who feels the same way about Roger. Act like a man instead of an over-the-clothesline washerwoman.

That singular exception makes HF morse testing the law of the land, Bill
so it must have some bearing. That is certainly more than comes from a
homemade lawyer quoting from a court case between a commercial
television network and a national political party. Larry's chants of
his new age mantra are a bit premature.

```

The two matters have very little to do with each other, Bill, no matter how much you might wish they did. Why can't our "I-found-a-law-book-under-a-tree" expert cite a case involving amateur radio? Could it be because there aren't any such cases?

Balderdash. Commercial rules have zero applicabilty to amateur radio.

Even if true, that does not excuse you from learning (and using)
elementary rules of English subject-verb agreement, especially
when you're trying to say someone else is an idiot.

Everyone:

I now have a low-cost, "plans-only" version (e-mailable), and a new lower-priced kit version, of my Curve Tracer. Check them out, at:

http://www.fullnet.com/u/tomg/gooteect.htm

I also have lots of good used Tektronix and HP and other test equipment for sale, very reasonably, at:

http://www.fullnet.com/u/tomg/gooteesu.htm

Thanks for looking.

Tom

Ya...no shit...What a bunch of bozo's.

Most PD's in the first world counties and states deal with this request a lot. There are procedures in place and the police in California seem to respect a FOIA request in a proper and timely manner.
I have filed probably 20 or so...
One department asked for a 2 page form,another 5 questions on a 3x5 card...and another took a request a very polite request over the phone and provided a free copy in about 18 hours from the time of the request.

Yes, a similar case happened recently when they finally pulled over a suspected drug dealer after following him around for over 3 HOURS. The recording was used to show the police were engaged in harassment as well as unreasonable search.

The car involved was driven by an off duty officer who "accidentally" (except it was set up over the police radio) cut off the other driver causing him to "brake suddenly" which the police used as an excuse to pull him over, and of course the drug sniffing K-9 just "happened" to be in the area and the dog was "allowed" to wander by the car.

Needless to say, the dog did react, but NO drugs were discovered. He sued to the tune of $400,000.

The town is now looking at a trunked 800Mhz system because normal scanners won't track a conversation which jumps from channel to channel.....except of course the NEW scanners which are designed to do exactly this...

Hugo, they'd still do it, because it would create deterrence for the next
witness thinking about talking to the cops.

Most of those gangs are really early forms of organized crime-- what the Mafia was in the 20's and 30's, having outgrown their streetgang roots.

And because they have huge amounts of money, they can afford technology and they can afford to learn how to use it effectively, just like the Mafiosi did.

And, while that article discounts purchasing inside information, the fact
of the matter is that the amount of cash they've got is more than enough to entice crooked cops to divulge confidential information. Policework is becoming more and more corrupt as time goes on, and the probability of being able to find a corrupt cop increases as things degenerate. And the gang bangers, having more than a little insight into the nature of human vice from close contact with their customers, are as competent at entrapment and recruitment as the old KGB was. Money and ruthlessness make lots of things possible, and suborning cops is one of them. The Ramparts situation is just the tip of the iceburg.

And if you think that the gangs are bad now, give em another 20 years to send their little brothers to college like the Mafiosi did, and see just how sophisticated they become.

They're not stupid to begin with and with time and experience they'll only get smarter.

You guys are assuming that the gangs are really gangs when they're not. They've outgrown that. They retain some of the trappings from their old streetgang days, but they're really crime syndicates like the Mafia was in the 20's and 30's. And because of that, those tapes won't mean a thing because they'll still kill the witnesses to make a point to anyone else who might want to consider testifying.

While it's true that Morse for all practical purposes has ceased its usefulness, it is still used in some very important applications and not just as a backup. One place is the U.S. military. All the military services still have Morse training programs. I work at a military installation in the Atlanta area, and I see some of our young troops using Morse every day.

Stay tuned for developing news folks. It seems that Roger Wiseman has
the franchise for a new NAMBLA chapter in Glendale, West Virginia. Roger is
rather proud of this "first" in the Glendale area and he said he also hopes
to put an Adults Only section in the nearby Village Video on First Street so
he can distribute and share some of his very best videos.
NAMBLA, North American Boy Love Association, is mostly an underground
group but Roger hopes to change this to a more mainstream group.
Stay tuned for more.

I love it.
In an attempt to keep the public from monitoring a service that they pay for, those in charge are tring a new system that smells a lot like "vaporware". A product that never quite seams to work. That is always "going to be fixed".
I always try to bass my comms on KISS.
Keep it simple, stupid.
Complex system are pie in the sky fantasies.
The evil empires (Motorola{AKA the Batwing}/GE-Eriksonp-etal) having sold all the conventional comm system that the world really needed, and faced with a saturated market, came up with fantasticly expense and complex ssytems to help their lagging sales.
And us the tax paying sod gets screwed by our governments paying large amountsof money for systems that just do not work.
Back in Lexington the US MArshall service had "secures" radios. Sadly the battery drain was so bad that thye had ot run in the clear to get any battery life on thier HTs. I loved it.

I installed Erricsons with RCMP in B division, that system included the M-rk's ORION's and Mark III's. The ht's had a battery life of, oh, about a week with a 10% T/R ratio. That is common place for most peace officers.

The EDACS system worked fine, no problems (less over heating of repeater stations with indoor generators)

So, I don't really see why you guys down south would have such trouble ...

To eliminate most of the incentive to murder a witness, she should be
videotaped the first time she talks to police, and on every later
occasion she says something new. If she should die before the trial,
her testimony on the videotapes should be admissible as evidence.

I'm sorry, but you're not getting my thermonuclear device until you pry it from my cold deap fingers (not to mention a few hundred thousand other cold dead fingers).

Anyway, lets not be silly - the two examples just don't fit together. Private ownership of firearms is a tradition that goes all the way back to the very start of this country (every person who signed that Constitution, and the Bill of Rights, owned a gun), but I'm not aware of anybody who is honestly suggesting a right to privately own a thermonuclear device, nor is there any tradition of such ownership. In other words, these two are not even in the same ballbark - in either capabilities or political debate.

Oh, good grief. Your defense of legalizing drugs is to point to another dangerious drug - the "that kills people so we should allow drugs to kill people" defense. Sorry, but that is hardly going to convince me to support the legalization of drugs.

First of all, I don't have so many "druggie" friends, but that also doesn't make me blind to the ones who are. And perhaps if you weren't so busy defending drug use, you might be able to honestly see what is right in front of your nose also.

And the alcohol and nicotine defense (those kill so we should legalize drugs so they can kill also) is absolute BS.

> The "gateway myth" has been thoroughly

It hasn't been discredited by any "science" that I would respect, because that goes directly against what I've seen with my own eyes.

>Does any one know how to perform the freeband modification by software?

It's so easy I don't know how the radios slipped past the FCC.

Use a hex editor to change address 0CE7 to 06 in a saved .tpl file.

On receive you gain 200 to 222 Mhz, and cellular.
TX is around 115 to 222 and 315 to 505 Mhz.

Later versions of the FT-50 may not be software modable.

First of all, I'm "wound far too tight" because I've seen far too many people like yourself trying to start religious debates in these newsgroups. To be honest, I'm getting real tired of hearing it.

Second, where did you come up with this "your" religion bullcrap? I have never said that I was religious, or what religion I might belong to if I were. So it is "the height of arrogance to assume" that just because I don't happen to agree with you, you have the right to assign me a religion.

And, finally, I just don't buy your claimed ignorance about "the mark." Like I said, it has been featured in popular movies, music, and literature, around the world for many years. So, unless you've hid out in a cave for most of your life (no movies, television, music, or books), it would be almost impossible for you to not have seen a reference to this (not once, but a great many times).

Rather odd coincidence that AF2Y and KC8JBO have BOTH been chastised by Riley Hollingsworth for jamming, deliberate interference and operating not in accordance with good Amateur practices. Odd, is it not, that Mr. Hollingsworth made Roger, KC8JBO RETEST for his General license? AF2Y is no stranger to Mr. Hollingsworth, either. How did that warning go Doc? How long did Riley order you to stay off the HF bands?
There you have it. Two jamming peas in a pod. One no better or worse than the other. Neither one innocent and neither one a very good example. Read the RAIN report and see for yourself if you doubt this. Does the word, "Hypocrite" come to mind here?
These two miscreants are such wonderous stalwarts of what a good Amateur should NOT be.
As Doctor Laura has said so many times since her nude photos were bantied about the Web, "Now go do the right thing."

Not that time. I was the only person, with any connection to the coast guard, that was involved. And I was there only because I was doing some public affairs stuff at the operations center and someone in the Navy liked my photographs (or their photographer was busy elsewhere, so they were desperate). Nope, while I'm sure the CG had some involvement somewhere (how else did the Navy learn about me), there were no CG personnel directly involved on that vessel.

The REAL mark of ignorance is Julia Roberts. Stop yer bickering and take time to chortle at the whole outlook.
The next mark of ignorance is Hillary Klinton....but that goes without saying.
At least Julia Roberts has breasts that can be seen and legs that are not akin to sawed-off telephone poles. She is, however, just as left-winged and equally as doltish.

You're absolutely right. Coast Guard personnel get military ID cards (the same as all other military personnel), access to all military facilities, and access to all military benefits (shopping facilities, medical facilities, on-base banking, credit unions, etc). In addition, they get paid on the same pay scale as other military personnel (with the addition of hazardious duty pay). As stated earlier, during times of war, the Coast Guard falls under the Navy.

I'm not sure I follow you... What might those "ARRL's singular interests" be and what do you propose as an alternative to the *only* national amateur radio organization? Cutting off one's own nose to spite the face is usually not a smart choice.

Look, clearly it is in every US ham's interest to retain as much spectrum as possible for as long as possible. Fiber optics in every house will alleviate the pressure, but it will not eliminate it. Everything else is petty stuff which is not critical for the survival of amateur radio. Once we absolve this fact, the choice is simple: we either support our one and only ham radio representation in the world or not - we keep our hobby alive or not.

Alcohol is a legal drug as is nicotine. If you are so taken by the damage drugs have done to your friends and family you would feel the same about these two and the horrors they have put famlies through and the many deaths they have caused. The numbers are astronomical compared to illegal drugs.

OTOH if it's just a legal issue you need not bring up the family and tragedy side, it has nothing to do with the legal issue.

> And the alcohol and nicotine defense (those kill so we should legalize
> drugs so they can kill also) is absolute BS.

Then you should be in favor of banning the more harmful legal drugs, alcohol and nicotine, right?

I think your flip to a moral stance caused it. It is hard to tell if you are
taking a moral or a legal stance on the issue. Which is it?

Well, geez, every person who signed that Constitution was also a slave owner,
but you could hardly condone that nowadays, especially with all these nutcases
running around demanding their $1 million retribution in gold bars.

> , but I'm not aware of anybody who is
> honestly suggesting a right to privately own a thermonuclear device, nor is
> there any tradition of such ownership. In other words, these two are not
> even in the same ballbark - in either capabilities or political debate.

Why not? I am simply asking for consistency: a thermonuclear device falls into
the same category of "firearms" as a six-gun. They are both devices used for one
purpose only: to kill people. Everything else is a smokescreen. Now, it would
seem to me that the very same amendment you guys are pulling in the case of
handguns, rifles and automatic weaponry must cover *all* firearms. One person's
definition of danger is another person's definition of safety. What this boils
down to is this: that amendment is somewhat anachronistic.
Btw, neither you nor Dick commented on the second part of my example - the
narcotics use. But I admit, here we are dealing with one of those things that
make people feel good and politicians re-elected. War on drugs. Any day now.

73 ..... Zoran WA7AA

And in case anyone's wondering: I own neither a handgun nor a TND, but I do
support a right to bear a handgun or two; I also support legalization of all

drugs except to minors, followed by revamping of the legal system with the emphasis on expanding a death penalty. Too radical? Hell yeah, but with 1% of the US population in prison, something better be done before it gets worse.

I wouldn't call the ARRL the "sole" protector of amateur radio in the U.S.
Many amateurs, whether as individuals or as groups (clubs, repeater
coordinators, or others) comment on pending FCC rulemakings and write
Congress-critters (as they are called in another newsgroup). Only if the ARRL
were the only entity talking to the government would the title of "sole
protector" be appropriate. Nothing says that each individual licensee can't
comment directly and must go through the ARRL.....

Nice idea, but not workable. A defendant has the right to face his
accusers. Most jurisdictions do not allow depositions or video tape of dead
witnesses.

Nothing says that - you're right. However, how much clout do you think US hams would have with FCC and congressmen if they kept showing up in groups of 5 to 10, without unified representation, on a strictly individual basis? We could all comment ourselves right out of all the spectrum.

Nothing says each individual US citizen can't fight an invading army on his own and in groups, but doing that would be the biggest mass suicide since Jim Jones. That's why we have the US Army. And that is also why we have the ARRL - to have a strong, unified and committed representation so we don't look like a bunch of jokers. Frankly, I don't understand what's all this dislike of the ARRL - what's the big grudge? Would someone care to explain?

The highly organized ones already have gone that way. The others are
in a position of either adapt or get eaten.

I couldn't care less about religion and have no desire to debate it here but even if I did, the fact that you're "getting real tired of hearing it" would be of exactly zero concern to me.

> And, finally, I just don't buy your claimed ignorance about "the mark."
> Like I said, it has been featured in popular movies, music, and literature,

> almost impossible for you to not have seen a reference to this (not once,
> but a great many times).

Just because someone doesn't immerse themselves in the garbage that currently passes for popular media hardly means they live in a cave. And I think you're being disingenuous when you claim that someone would have to forego all movies, television and books in order to be ignorant of this beast-mark concept. Is it your position that every single film produced by Hollywood makes reference to the Christian devil's mark? The same for every TV show aired and every book published? I personally read mostly biographies and historical novels and watch the History and Discovery channels almost exclusively. I have yet to come across any Christian devil mark themes evident

in those media. As for movies, I have no time for them.

And finally, my concern for whether you "buy" my claim or not rivals my concern for what you're getting tired of hearing.

Come on now, even Clinton couldn't make that one fly.... A gun can only
kill a single person within the shooters' direct line of sight per
discharge. This weapon targets a specific person, and has the option to
only wound, as well as kill. It does not destroy the surrounding buildings,
all life forms in the surrounding area, and pollute the land with radiation
for the next several centuries.

If what you say were true, then the ATF would be enforcing the laws
regarding Nukes... :>)

There is a Sixth Amendment issue, as you noted. Nevertheless, it is
worth examining whether the law might be modified, perhaps even
without the need to modify the Sixth Amendment.
(1) The accused and/or his lawyer, could be offered a videotaped
Sixth-Amendment chance to "confront" the witness during the original
"deposition" or immediately thereafter.
(2) Possibly, courts might rule that a defendent who murders a
witness has waived his Sixth Amendment right to cross-examine said
witness.

Polly doesn't live in Memphis, he lives near Collierville TN.
And he didn't take his test via the VE program.

But.......does conditional ring a bell?

Dan/W4NTI

You are just as wrong as you can possibly be, as most anti gun people consistantly are. I have absolutely no intention of killing anyone with a gun, but I also have no intention of allowing you to confiscate them. I DO have an intent to use them - the mere existance and presence - to deflect those who would cause bodily harm to me and my family. Almost always, the mere sight a weapomn of defense is more than enough to put the coward to flight. Should the assailant be in an unusual state of mind, such as drugged or insane, and insist on forcing me to use a firearm to stop him, of course that would be the natural progression of things.
Soit was when columnist Mr. Carl Rowan, a rabid anti-gunner, shot an intruder. He sure changed his tune in a hurry. Curious thing, that he even OWNED a gun, what with all his anti-gun rhetoric, isn't it? Do YOU own gun, by the way?

Now, it would
> seem to me that the very same amendment you guys are pulling in the case of

I'm not real eager to take seriously the opinion of anyone who can't differentiate between a personal firearm and a nuclear weapon. Looks like a screw may be loose somewhere.

Or tap into the BIG federal database that is
fed by:

- state county and metropolitan court, tax
and property records
- state courts, professional & driving
licenses and tax records
- federal courts
- other federal and state agencies
- all births and deaths (from states to the
Commerce Dept.)
- medical (MD & DD) records
- hospital records
- insurance policies

- bank account records
- credit card (revolving credit) records
- the big three credit approvers
- that primo government "partner" - AT&T
(Verizon, Bell)
- the other phone companies
- gun sales (FFLs)

All of these have agreements, or are required
by some
regulation or law, to give this information
to various
departments within the federal government
which then
"share" this information.

> I'm not sure I follow you... What might those "ARRL's singular interests" be

First and formost, selfpreserveation, on a the BOD level. Consider the
January vote on whether or not to support code testing at the next ITU
meeting.
The vote to drop code testing was by a voice vote, with no identity of
who voted how. There was a lone effort by a BOD Member to poll the BOD
for each member's vote, which was quickly voted down. None of those
voting against keeping code testing wanted his vote made public, and
without a individual poll of the vote it will not be, officially at
least. Since the BOD members are elected as individuals, the entire BOD
can't be held accountable for such a vote since they can't be elected
nor unseated en masse.
Just a bit of defense against the will of a large bloc of ARRL
members' wishes. Selfpreservation at it's finest.

and what
> do you propose as an alternative to the *only* national amateur radio organization?
> Cutting off one's own nose to spite the face is usually not a smart choice.

Oh, no, alternatives haven't proved viable to date. Just understand that
the enemy is not always outside looking in.

>
> Look, clearly it is in every US ham's interest to retain as much spectrum as possible

> for as long as possible.

Not at all. We use little of our UHF/SHF allocations, and it might very
well be in our best interests to "trade" some of that unused real estate
for some we could make better use of, maybe on HF or VHF. I think that
most of the Part 15 intentional radiator devices would be much better
off above UHF instead of on HF where they do far more damage, but that
battle was lost long ago.

Fiber optics in every house will alleviate the pressure, but
> it will not eliminate it. Everything else is petty stuff which is not critical for
> the survival of amateur radio. Once we absolve this fact, the choice is simple: we
> either support our one and only ham radio representation in the world or not - we

Actually, pistols are most often used as a deterrent to avoid killing
people. All I had to do one night was to display my 9mm and the mugger
with the knife broke an Olympic record running away.

Did you hear about the eight year old who got suspended for pointing a
chicken strip at a teacher and saying "pow"? One wonders what would have
happened if he had pointed the chicken strip at a teacher and said, "yum".

I had diphtheria when I was three years old. I would have died without
antitoxin shots. The doctor didn't want me to hate him in later life
so he had my mother hide my eyes so I wouldn't see who was hurting me
for my own good. That's what the ARRL BOD did for you, Dick.

It is also a symtom of our erosion of privacy (there is none) married
to technology. Gangs get addresses from the internet databases which
are full of info on everyone...in the US at least. Other nations
respect peoples privacy more, probably a painful lesson learned the
hard way.

And the US wants European nations to ease any privacy restrictions they
may have.

Hi,

there is a discussion in the german newsgroup de.comm.ham
what the translation for the german word "Rundspruch" is.
It means a periodically transmission of weekly or monthly
amateur radio news using repeaters or HF.

Could it be QTC or QST?

I have a pair of KLM amateur radio satellite antennas for sale. Both antennas are in good condition and each has the optional polarity switcher. Because these antennas are already assembled I can not ship them. I am willing to meet someone halfway up to about 100 miles or so. I am located in Union County, NJ.

I will sell both antennas for $150.00 or any reasonable offer. I want to sell the pair together.

You can view the antennas at the following URLs:
http://headhamster.homestead.com/files/ForSale/KLM_VHF.jpg
http://headhamster.homestead.com/files/ForSale/KLM_UHF.jpg
Please take a look!!!

I think this is a prime reason for the reputation of New York City
residents ignoring cries for help and never admitting to being a witness
to a crime. New York has had gun control laws longer than any other
part of the US, dating back to the Sullivan Laws of 1911. Helpless
people make poor citizens of a republic.

What got me interested in radio was my Science teacher and Math teacher. One taught the theory and the other taught the code. We started a class after school. Not everyone was interested. People are being flooded with tons of high tech gadgets like never before. If I want to work New Zealand I can get onthe internet with a voice program and chat and still exchange qsl cards. (I dont). Hard to beat that. I hear there will soon be direct internet link from home to satellite someday soon.
Do people want to build anymore???? Hard to beat the selection of stuff available. Just a day away from the mailbox. I was interested in electronics so it didnt take much to get me hooked. I used to build my own weather satellite receiving equipment from surplus stuff back in the 60's but heck now it is on the internet. Now I read about the old days and keep a tube rig in the shack so that if it breaks i can fix it. I can see the tubes, resistors, caps, etc. Not surface mount stuff. I cant afford to throw it away if it breaks.
Other hobbies have gone the same way to a degree. I fly radio control planes and it has changed over the years. Got a lot better. I dont have tobuild as much due to ARFs. Radios are better. Thank God I dont have to fight with a gas filled superregen receiver tube. We couldnt fly 5 at a time then like we do now.
My 2 cents.

On June 14, 1988, Carl Rowan shot and wounded Neil Smith,
a young intruder who had trespassed onto Rowan's property
to take a dip in his swimming pool.
This black kid was in his backyard, not his house.
This was in Washington, D.C., where handguns are illegal.
Mr. Rowan used unregistered .22 pistol.
He is also black.

I think you are gravely mistaken.

In any event, my beef is with the idiot Stagger Lee, not you. I could care less. However, Mr. Lee is repeatedly crossposting to alt.2600, and criticizing a much respected member of the group and the internet community at large. In response to Lee's idiocy, somebody else was posting funny stories about him. I happened to comment on those posts and Lee started attacking me. Thus, as is normal "netiquette" if Lee posts his ridiculous rants to alt.2600, he will correspondingly be spanked. You are not involved, but if you want to take sides, flail away.

> Why not? I am simply asking for consistency:
> a thermonuclear device falls into the same
> category of "firearms" as a six-gun. They
> are both devices used for one purpose only:
> to kill people.

Oh, come on. Surely even you can see the difference. A gun can be used by an individual for self-defense, recreational shooting, hunting, and so forth, in addition to it's use as a weapon in warfare situations. A thermonuclear device, on the other hand, is strictly a weapon of war - it cannot be used by an individual for self-defense, hunting, or anything else not related to warfare. In other words, these are not at all in the same catagory (hince are not treated the same when it comes to the law).

> Now, it would seem to me that the very same
> amendment you guys are pulling in the case of
> handguns, rifles and automatic weaponry must
> cover *all* firearms.

Again, handguns, rifles, and automatic rifles or handguns, can all be used for self-defense, hunting, and recreational shooting. And, yes, contrary to the opinions of most anti-gun advocates, an automatic can be used for hunting. In fact, the primary appeal of the automatic is that it can fire a single round in hunting situations, but can also be used an automatic when needed for self-defense. And both modes offer value for the recreational shooter (target practice, competitions, etc). Therefore, it is perfectly reasonable to say that all of these should be covered by that amendment.

Now, perhaps you can answer a question I have about anti-gun advocates. The clear goal of these people is the total elimination of private gun ownership in this country. At the same time, most of very these same people also tend to be anti-police - they often advocate a reduction in the number of police and advocate restrictions on police authority and activities. It these two agendas are accomplished, exactly who is going to defend my family? Are you, an anti-gun advocate (and most likely an anti-police advocate), going to do it?

No, I'm not. It was your argument that alcohol and nicotine are harmful, not mine. I was just pointing out how silly it was to use something you consider harmful to justify legalizing something else that is harmful.

> So your personal experience is far more
> perceptive than 3 Presidential commissions,
> the AMA and hundreds of university studies.

When it comes to my personal opinions (and the way I will continue to vote on the drug issue), yes, my personal experience absolutely outweighs anything else, including any studies done by pro-drug advocates.

> I think your flip to a moral stance caused
> it. It is hard to tell if you are taking a
> moral or a legal stance on the issue. Which
> is it?

Neither, both, and more (I'm not that single-minded). In addition to the moral and legal issues, it is also a health issue when it comes to the individual, and a health and public safety issue when it comes to this society as a whole. And, when it comes to my opinion, you lose the dabate when it comes to all of those.

Okay, to end the argument, I'll accept your self-proclaimed ignorance of "the mark," even though I still find it very hard to believe. That phrase, in the context used, has become so commonplace today, it has become part of popular vernacular (having little to do with religion, other than it's origin). Take care, what ever your name is.

D.C. Police Probe Blue E-Mail
Racist, Vulgar Messages Sent on Patrol Car Computers

D.C. Police Chief Charles Ramsey talks with D.C. Police Executive Asst. Chief Terrence W. Gainer during a Senate Subcommittee on Oversight of Government Management. (File Photo/Ray Lustig - The Washington Post)

By Arthur Santana and Allan Lengel
Washington Post Staff Writers
Wednesday, March 28, 2001; Page A01

D.C. police officers have sent each other hundreds of racist, vulgar and homophobic messages on their patrol car computers, and the department is investigating, top officials said yesterday.

The messages "seemed to be a potpourri of hate where apparently black officers were saying negative things against white officers and white against black," Executive Assistant Chief Terrance W. Gainer said.

He said the communications included almost every kind of "idiotic, hateful, spiteful comment" and clearly indicated a problem that calls for drastic action.

Chief Charles H. Ramsey said the police internal affairs unit is investigating the messages. He said he also has notified the U.S. Justice Department about the possibility that they indicate the presence of racial profiling in the department.

"There were comments in there about, 'Let's go punch this person,' or, 'Let's go stop this person,' based on their race or gender or sexual orientation," Gainer said.

The objectionable messages were found among about 4 million computer communications sent over a one-year period. They were accessed by officials at Ramsey's behest to determine how the computers were being used.

The number of offensive messages was not clear last night, but Gainer said there were "hundreds and hundreds of them." He said they had been sent by as much as 10 percent of the 3,600-member force.

"I'm sickened that this type of language and behavior has infected our department," Gainer said. "They embarrassed themselves, insulted this department and sullied our profession. That type of conduct . . . will not be tolerated in this agency."

Gainer said several messages include the "the F-word [and] the N-word."

Also used, Gainer said, were " 'whitey' [and] almost every derogatory term you can come up with for the race or gender of a person."

Ramsey said many of those messages including the N-word were sent by black officers about other black officers, but Gainer said the word is nonetheless objectionable and "doesn't belong in our police department."

Based on preliminary analysis of the objectionable messages, Gainer said vulgarity was the most common offense. He also said there was considerable banter about sexual relations. Many derogatory comments were about citizens, he said.

Gainer said most officers in the department do not share the racist attitudes.

But, he said, "there appear to be significant numbers of people who are either ignorant or racist or homophobic or a terrible combination of all three."

Of the 4 million messages sent via computer, three-quarters were simple requests for license checks and similar information, police said.

Officials said car-to-car messaging was intended to reduce traffic on police radio channels. The computers warn officers that their transmissions are accessible by their superiors. The search of the messages included looking for certain "keywords," officials said.

Gainer said the department condemns the objectionable messages. "We're reinforcing what our policy is and what our core business is -- and that's to help and not hurt people," he said.

Gainer said the investigation could take as long as a month. He said it is not clear what action might be taken against those found to have sent offensive messages. Penalties could include dismissal, officials said.

"I'm going to take very harsh action," Ramsey said. "There is absolutely no room for that kind of behavior in our department."

Sgt. G.G. Neill, chairman of the Fraternal Order of Police, said the messages were unprofessional but that department policy had been unclear and that officers shouldn't be suspended or discharged.

"I think it's just a lack of proper training for officers and an understanding that the communications are public record," Neill said. "I'm sure if officers realized the communications were in the public review, they wouldn't have said what they said."

Deputy Mayor Margret Nedelkoff Kellems said the mayor's office approves the chief's position that "this is intolerable and unacceptable." One police sergeant, who spoke on condition that he not be identified, called the messages unprofessional. He said to the senders, "We don't need you on the department."

D.C. Council member Jack Evans (D-Ward 2) called for action. Racist remarks and profanity, he said, "shouldn't be happening."

Chief Ramsey said, "I thought we [Americans] had come a little further than this."

Staff writer Martin Weil contributed to this report.

A.C. plans for radios spark static

- March 23, 2001 - 12:36 AM
By BRIDGET MURPHY
Staff Writer, (609) 272-7257

ATLANTIC CITY - Although a New York City firefighter's mayday call went unheard in a weekend blaze and 2,700 new digital handheld radios were yanked off the street there, officials here said Thursday that they will proceed with plans to change over to the same 800 megahertz Motorola system.

That's causing some static.

The firefighters' Local 198 President James Morgan expressed concern Thursday, saying that he would be investigating the situation and contacting state union officials.

According to reports, the New York firefighter's call for help over his digital handheld radio was received blocks away by a different group of firefighters, not those at the scene of the basement blaze he was fighting in Queens.

He apparently got lost on his way out of the fire because of a tangled hose line and ran out of air, became disoriented and then collapsed. He was treated and wasn't seriously injured.

The incident prompted the New York City Fire Department to withdraw the handheld radios from firefighters just a week after they were put to use. The department cited numerous communication complaints from firefighters.

In Atlantic City, the equipment for the switch to a Motorola digital 800 megahertz system already has arrived, Emergency Management Chief Bob Levy said. The city has spent about $675,000 so far and plans to switch over the Fire Department from its current radio frequencies by April or May.

Levy said he is aware of the situation concerning New York City, but that the resort's firefighters will be better trained to use the new radios and that all airwave transmissions will be simulcast over the old radio frequencies for at least a month as a safety backup.

He said there's a panic button firefighters can press on the radio that will alert others.

"I know he said, 'Mayday, mayday,' " Levy said of the New York firefighter, adding that the panic button essentially "says it for you."

"The one thing I see possibly done wrong there was they went right to the system and they didn't simulcast," Levy said.

"I spoke to Chief Brenner about this numerous times, and that's why we feel so strongly about simulcasting. My son is a firefighter. I have strong personal feelings here," he said, adding that Atlantic City will field-test its radios.

Two messages left at Fire Chief Benjamin Brenner's office were not returned Thursday.

The Police Department's changeover to the new system could be months down the road. The approximate $1 million needed to buy the equipment for the police currently is not available, but it's included in the 2001 budget, Levy said. The 2001 budget has yet to be approved.

Last year's budget wasn't approved by City Council until August.

In addition to concerns about the reliability of the new equipment, the potential delay could create a different kind of friction - with equipment presently being used.

Officials have said in the past that the city is upgrading the system to eliminate so-called "dead zones," or places where current radios can have transmission problems, such as inside the casinos or the Atlantic City Convention Center.

One communications official said some of the current radios are so old that they're being held together by rubber bands and wires because replacement parts are no longer made.

"We've been concerned about this for years. Thankfully there hasn't been a critical incident," city police union President Sean McCausland said. "We hope they approve the budget and hope it gets moving along expeditiously."

In the meantime, having the fire and police departments on two different systems won't be a problem, police spokesman Sgt. Michael Tullio said Thursday on behalf of Police Chief Arthur Snellbaker.

"We don't operate on the same frequencies at this time, so it's not something that will negatively impact the Police Department's communications. When it's time for the upgrade, we'll welcome it."

Other officials agree there's no real cause for alarm.

"We're being super cautious here. Right now we have plenty of backup. If we have to keep backup, we will. We're doing this as a team," Levy said.

A consequence of the system changeover is that police and fire transmissions will no longer be audible to casual listeners and scanner buffs.

"Yes, that's true. I'm very sorry about that," Levy said Thursday. "But the public safety of our officers is uppermost in our mind and it's secure."

Atlantic County to upgrade radio system

- March 23, 2001 - 12:22 AM
The move will facilitate communications between different municipalities' emergency-response teams.

By THOMAS BARLAS
Staff Writer, (609) 272-7201

Atlantic County is taking the "first concrete step" toward a uniform radio communications system involving county and municipal law enforcement, fire and other emergency-related units.

The goal is to install 800-megahurtz systems, making it easy for those units to communicate with each other by using the same radio frequency instead of the hodge-podge communications methods now in place.

It also scraps an earlier plan for a central county dispatch system, something balked at by municipal police officials, who felt their departments know their communities better than a central dispatch operation would.

"The key thing is a police officer in Northfield can call the county prosecutor and communicate with them directly if they have a fugitive or something," said Freeholder Director Kirk Conover. "There's no need to do roundabout communications or go to a pay phone."

While as yet there's no firm cost for the project, county officials estimate the price tag at around $6 million.

"It's not cheap, but I think the benefit to the public is obvious," Conover said.

The Atlantic County Board of Freeholders this week decided to apply for a $26,250 state Department of Community Affairs grant that will pay for a study of the costs involved in the changeover.

Brigantine, Egg Harbor Township and Galloway Township have already installed some of the equipment that the county is proposing.

"Some towns are ahead of the curve," Conover said. "There needs to be a way that everyone is treated fairly financially."

Capt. Jeff Doran of the Brigantine Police Department said the new equipment has some obvious benefits - it provides for almost unlimited channels for municipal departments and allows Brigantine, Egg Harbor Township and Galloway Township to use each other's systems as backup systems.

However, Doran said he's still concerned about the county and municipalities using systems that turn out to be truly compatible.

"In effect, we haven't really addressed the countywide communications issue yet," he said.

For instance, police note that Atlantic City is about to upgrade its system with equipment from Motorola - a company different than the one that provided the equipment for Brigantine, Egg Harbor Township and Galloway Township.

Conover and Atlantic City officials said they believe equipment from different companies can be made compatible.

The project developed out of a task force that formed five years ago to study the possibility of creating a central county-dispatch system. While the central dispatch system idea was dropped, the task force indicated there was a need for all police, fire and emergency-related units to better communicate with each other.

While the idea sounded simple, Conover said an inventory of just the county's communications system for units like the Proescutor's Office, Sheriff's Office and county jail showed "there was nothing uniform with what we did within the county."

An additional report filed with the county late last year outlines the equipment and other measures necessary to make the proposed system work.

"The key thing to the system is that the operator of the communication device doesn't have to change channels," Conover said.

While the county and municipalities would be using the same radio frequency, Conover said the system is designed so municipalities won't interfere with each other's communications.

Conover said Brigantine, Egg Harbor Township and Galloway Township would serve as the "backbone" of the system because they already have some of the necessary equipment. Other municipalities would eventually start "filling in" with their equipment, he said, and some new communications towers might have to be built, probably in the area of Buena Vista Township.

Conover said the county would like its portion of the system to go online in 2003, when the county's new criminal justice complex in Mays Landing is tentatively scheduled to open.

"That would probably be the logical time," he said.

Do you believe that they are not harmful?

> ...I was just pointing out how silly it was to use something you
> consider harmful to justify legalizing something else that is
> harmful.

I'm having trouble parsing this. It doesn't make any sense to me.

Could you rephrase it?

This matter of harm is poorly understood and even worse discussed. All medicines can be harmful under certain circumstances (and cannabis, opium, tobacco, coca and alcohol are all medicines, whether or not they are part of modern American standard medical practice). It's a matter of relative harm balanced against potential benefit.

>> So your personal experience is far more
>> perceptive than 3 Presidential commissions,
>> the AMA and hundreds of university studies.

> When it comes to my personal opinions (and the way I will continue
> to vote on the drug issue), yes, my personal experience absolutely

> advocates.

And in fact you'd be a fool if you ruled your personal behavior by anything but your personal experience.

The problem comes when you want to rule the behavior of others by your personal experience.

The real problem comes when you take other people's money which you then use to force them to act the way that you want.

Oh, OK, you got me. I'm just trying to piss you guys off. But, wait, what if you are attacked by a fairly large mob armed to the teeth and there's no way in hell you stand a chance with a six-gun. Can you at least use a flame-thrower on the punks? What about Mustard Gas?

> > Now, it would seem to me that the very same

Although, some would say this becomes borderline genocide. Like shooting fish in the barrell. Like working DX in nets.

> In fact, the primary appeal of the automatic is that it can fire a
> single round in hunting situations, but can also be used an automatic when

Dwight, please read the last part of my previous post and then see how much of an anti-gun, anti-police and anti-whatever advocate I am.

We are dealing with legislation in both cases, and legislation is never written in stone. Just as slavery was legal one day and illegal the next one, the same thing can happen to the "right to bear arms". Surely there is such a thing as a constitutional procedure to repeal amendments.

Well, as long as we're swapping life stories, I'll admit that I've always been sorry that I did not have a shotgun when a burglar broke into my apartment some years ago (while I was in it). Not because he broke in and tried to rob me in order to feed his habit, but because the son of a bitch came back that night and set the balcony on fire and we almost got burned alive.

Do you guys read the damn thing to the end before you hit the Reply button, or what? Both you and Dwight called me an "anti-gun" advocate even though I clearly stated in my previous message that "I do support a right to bear a handgun or two".

> I have absolutely no intention of killing anyone with
> a gun, but I also have no intention of allowing you to confiscate them.

Fine, I have absolutely no intention of killing anyone with a TND, but I also have no intention of allowing you to confiscate it. Let's assume I have one, for the sake of the argument.

> I DO have an intent to use them - the mere existance and presence - to

The problem arises when a monkey wrench is thrown into the "natural progression of things", like all those high schools shootings in the last few years.

> Soit was when columnist Mr. Carl Rowan, a rabid anti-gunner, shot an
> intruder. He sure changed his tune in a hurry. Curious thing, that he
> even OWNED a gun, what with all his anti-gun rhetoric, isn't it? Do YOU

:-)))))))) Please refer back to my previous message where it clearly says: "I own neither a handgun nor a TND".

> I'm not real eager to take seriously the opinion of anyone who can't
> differentiate between a personal firearm and a nuclear weapon. Looks
> like a screw may be loose somewhere.

It is mind boggling how quickly a reasonably normal discussion turns into name calling. This means either that you and your militia are already polishing a silver

bullet with my name on it, or you are out of arguments.

>
> Not at all. We use little of our UHF/SHF allocations, and it might very
> well be in our best interests to "trade" some of that unused real estate
> for some we could make better use of, maybe on HF or VHF.

How the hell you gonna trade it if and when you lose it? Your statement is paradoxical: on one hand you're saying that it is not in our interest to retain as much spectrum as possible, and on the other that we need to trade it. Even so, I got your point and I happen to agree with it - I would gladly give up MHz's of UHF/SHF allocations for expanded HF bands, but the only problem is that people who are willing to pay gold for UHF have nothing to offer in return - they don't own any HF and they don't care for it, unless one day 80 meters becomes the best bet for cellphone use.

LEO's need this secure communication. How else are they going to violate minorities rights and get away with murder. Ask Officer Perez, one of this nations leading LEO. Besides LEO's have nothing to hide. There all on the up and up.
"I never knew a LEO who didn't abuse his LEO authority." God bless those men in blue. There just doing gods work.....keeping the white race white.

Hi all
I have a 930 service manual that is missing the large foldout insert schematics for the signal board. I need both , for the two different serial number models. If anyone has a service manual , I would appreciate someone mailing me the two signal board schematics so I could copy them or copying them for me ... I will pay all shipping cost......

Thanks John KI4NR

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday April 15th 2001
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20.00 or the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

SEASON PASS + Advance Seller Discount

A sellers discount season pass is available which
offers a 33% discount. See the registration form
below for full seller info.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

4998. 10 Meter Intruders

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-29 14:04:31 UTC
From: W2ZB <w2zb@juno.com>
Message-ID: <haHw6.316$Uc2.9430@eagle.america.net>
Source record: 91577

Between 28.0 mhz and 28.3 mhz, are there any particular
"channels" or freqs. where intruders are congregating?

I finally convinced my boss (a two star) to do a study, for
training purposes in signal exploitation and analysis, in this freq.
range. Some of our younger troops have no idea what an intruder
is. We'll probably submit data collected at the end of the study to
the commission and the ARRL, for what it's worth.

Your effort is appreciated. However....learning Morse by eyeball will NOT help to learn it. In fact it will hinder you. Stick with the tried and true proven methods.

More kids are killed in high school sports than in high school shootings.
Magnitudes more are killed in automobile accidents. We seem to have lost
all perspective when it comes to guns. Punish the criminals, not the guns.

Yep, the repeal of slavery took a constitutional amendment and the repeal of
the right to bear arms will take a constitutional amendment. If guns are outlawed,
unarmed citizens will be absolutely helpless against armed criminals who don't
care about gun laws. England is doctoring her stats to try to hide the fact
that their armed criminals are out of control. If an armed perp gets off on
a technicality, that crime is erased from the stats.

> Well, as long as we're swapping life stories, I'll admit that I've always been sorry

> fire and we almost got burned alive.

In this country, guns have always been used for more good than evil. The
liberal press simply doesn't report the good done by guns. Gun laws will
disarm the good guys and leave the bad guys armed - bad idea.

How true. When I went to school in Los Angels areas of California in the 60's and 70's almost every kid I knew had access to a firearm at home. Back then you could buy a gun over the counter at Sears, Montgomery Wards, JC Penny, Pep Boys, True Value Hardware, etc. cash and carry. You had to be 16 to buy a long gun, and 21 to buy a pistol but there were no laws against your parents buying you a pistol if they wanted to.

Many of the kids I went to school with were regular hunters and outdoorsmen along with their fathers, uncles, etc. I had three younger siblings and we all had our own rifles which our parents gave us as Christmas presents around the ages of 10 or 12.

There was never a firearms related incident in any of my schools, or even in my neighborhood (unless you count the time one of my neighbors shot some low-life who was trying to rob the local shoe store during the original Watts Riots).

There were also no drug dealers and gang bangers on every corner when I was in school. The record companies would never dream of putting out any of the "Cop Killer" Rap music which is present today - and the kids' parents would kick their butts if they ever tried to bring that kind of crap home.

The police were allowed to actively suppress crime rather than just reacting to it after the fact, but now days every hoodlum is taught at a young age "I know my rights, I'll sue you for ..." And parents are regularly prosecuted for "Child Abuse" if they try to make any attempts to prevent an out-of-control juvenile from running wild on the streets.

Yes, we have a big problem these days in the schools - and in society in general - but it is not, and has never been, a gun problem. It's a people problem, and as long as nobody in power has the "brass" to address it for what it is, it will only get worse...

ROFLMAO! The 3 presidential commissions would hardly be considered "pro-drug
advocates" nor can one say the AMA is either. You do know what AMA stands
for don't you?

> when it comes to all of those.

IOW ignorance is bliss. Just be honest and say your anti-drug stance is not based on facts or logic but purely on your emotional bias and ignorance of the issue. You used the things it had done to your family and friends as one of the reasons for you stance yet can't address the below but choose to snip it out of your reply.

"Alcohol is a legal drug as is nicotine. If you are so taken by the damage drugs have done to your friends and family you would feel the same about these two and the horrors they have put famlies through and the many deaths they have caused. The numbers are astronomical compared to illegal drugs.

OTOH if it's just a legal issue you need not bring up the family and tragedy side, it has nothing to do with the legal issue."

Nope...doing it by that method will add another wall in the learning process. If one is deaf it would be better to use the hand to feel the code. If one must use the eyes then use a flashing LED.

You ask what is the difference? Think about it.....if one uses flash cards with the 'dot and dash' then the brain must then translate the 'dot and dash' into a form the brain can interpret.

If one uses the eyes and/or the fingers that step is no longer needed.

Your brain will tend to memorize the dot and dash and add that delay. It won't show up until you try to get over 10 wpm. And by then its too late and you will need to relearn CW. Not fun.

Why do I know this? I did it that way. I also ended up memorizing the record(thats right the record). And had to re-learn it. I now do quite well at CW. But it WAS a tough row to hoe.

There is an area in Fairfax County that does not have zoning or deed
restrictions.
It is immediately south of Route 7. The entries are Delta Glen CT. and
Colvin Forest Drive. Most of the other newer areas have zoning
restrictions.

We used to live at the end of Dunn Meadow.

The way most of the jimmied radios work, they repeat the channels in 450 kHz intervals so that for example, Channel 19 'two up' is 27.185 plus 900 or 28.085. This is probably the most prevalent English speaking one you will hear. But they will, of course, come in 10 kHz increments ending in 5.

I figured as much.

It's a funny thing that people feel the need to try to get people's accounts cancelled because they don't agree with them, or find their views unacceptable. I wouldn't want Steve's (from cotse) job, it would drive me nuts. When idiots start complaining that so and so made fun of one of so and so's sock puppets, and that it was libel or slander and such, I would sit back and wonder why I even come to work every day.

This is all I'll say on the matter unless he starts doing it again.

There's been an easy solution for that one for quite some time...cell
phones.

>However, Doran said he's still concerned about the county and municipalities
>using systems that turn out to be truly compatible.

Go back to yelling.

>"In effect, we haven't really addressed the countywide communications issue
>yet," he said.

Yell real loud.

>"The key thing to the system is that the operator of the communication
>device doesn't have to change channels," Conover said.
>
>While the county and municipalities would be using the same radio frequency,
>Conover said the system is designed so municipalities won't interfere with
>each other's communications.

Changing PL's is somehow simpler than changing channels? Or will they
just be assigned time slots so they don't interfere with each other?
Police get to use the radio for the first 15 minutes of each hour,
then fire for 15min, then EMS, then city services.

Hey there everyone,
After an extended absence from newsgroups, I am returning with an observation that I have made over the past few months. After viewing biographies on QRZ.com, viewing web pages of individual hams, and listening to conversations on the air, it is clear that a noticeable number of the current crop of hams, and even hams that have been around for a while, are severely lacking in basic English spelling and grammar skills. The fact that an item known as spelling/grammar check exists makes this situation even worse. I would be embarrassed to publish something on the web that was strewn with errors in spelling and grammar. Apparently, others do not really care what kind of image they are portraying of themselves. Forget passing your General or Extra, people, and try attending high school perhaps! If nothing else at least keep in mind that there are spelling and grammar check utilities that do exist, and are not there to lie dormant on your hard drives.

Culley,
I think your correct, most people learning CW for use
on the radio have no use for flash cards. That's a very
bad idea for 'audible' code. For 'visual' methods of using
CW (blinkers, etc.), it should be very useful.
'Doc

X-FLARE: A powerful X-class solar flare
erupted near sunspot group 9393 on March
29th at 1015 UT. The blast sent a coronal
mass ejection (pictured right side in a SOHO
coronagraph animation on SOHO web) toward Earth -- the
second in as many days. The first of the
two incoming CMEs will likely hit Earth's
magnetosphere on Friday; today's
expanding cloud will arrive approximately a
day later, on Saturday.

Forecasters say there is a good chance (15-25%) of severe
geomagnetic storming when the CMEs strike.

:
: Changing PL's is somehow simpler than changing channels? Or will they
: just be assigned time slots so they don't interfere with each other?
: Police get to use the radio for the first 15 minutes of each hour,
: then fire for 15min, then EMS, then city services.

The new 800 Mhz trunking systems do not use PL's (CTCSS) codes.
Rather they use a "number" that IDs a talk group.

If you are saying that the flashcards will have either the words 'dah dit'
or 'dit dash' or if it is in the form of ' _ .' etc.. then the problem
is still there.

Forget the flash cards. Use the ear method, unless you are handicapped,
which you have not mentioned.

Of course if you are only interested in doing 5 wpm (why bother) then the
flashcards will work. Probably....but you wont get much faster.

Another place to do this work would be between 26.000 and 26.965. I just heard one of the local cb trash talking about how he was on the lowbands (that is the frequencies below channel one on a CB radio) talking all around.

I think that the FCC should open up the 80 meter band low end of 40, 20 15 and 10 meters to voice. It would surely help the over crowding problem. maybe they should save 20 khz at the bottem end of each bands for cw and data. CW will be gone it the next 10 years.

Not that difficult in implementing an 800Mhz trunked system
>
> : >making it easy for those units
> : >to communicate with each other by using the same radio frequency
> :
> : That does tend to help.

Actually it would be a number of frequencies. Typical big systems run at 20
channels which is 20 frequencies, and your smaller systems running at 5
channels.
> :
> : >"The key thing is a police officer in Northfield can call the county

And that has been available in trunking systems for as long as cellular has
been around.
>

No seperate talk groups, and depending on the number of channels available,
they can all talk at the same time on different channels.

There is a big difference between unwilling and unable. Only these hordes of people getting sexually harassed by this poster with the supernatural ability to will them to read his posts can stop it. It is called "subpoena logs and legally pursue the user in the proper forum", but we have been through this before.

There is also another option, convince some LE that these posts are against the law, we'll work with LE in legal issues. But, of course you always have your preferred option, whine in the newsgroups about it.

You don't know the half of it. :) Fortunately, I found someone
mentally ill enough to want to handle and develop the abuse desk and was
able to turn it over a while ago. Now the only ones I see are those
posted to Usenet.

But this is only the tip of the iceberg...even the trolls complain about
each other and threaten legal action when trying to term each others
accounts.

Usenet reading by millions goes like this:

- Read Group
- Complain to ISP for everyone who posted
- Answer posts by calling poster same names back and stating that the
childish antics don't bother them
- Complain again with legal threats

Presuming that you have no handicaps, like all have said, forget about
any "aids" that depend on reading. Think about it: CW is mostly about
hearing sounds that you quickly (and, later, automatically) interpret as
letters or words. Use AUDIO aids instead of anything that you read or
memorize. The fellows are telling you exactly right: the use of "read-
ing" aids will only add to the learning process and hinder your learning
of CW. There are a variety of tapes available to progressively move
you along to 5, 10, or faster speeds. Also, DO NOT touch a sending key
at all. The objective is to learn the sounds thru practice. One day,
you will reach the point where you automatically hear the letters/words
without having to "think" about it. It becomes like a second language.

> many complaints from its targets.

How, and please be specific, can somebody "sexually harass" on usenet.
Usenet, has no sex. A man can post with a woman's name, a woman can
post pretending she is a man, anybody can be anything they want. In
the group I frequent, (alt.2600) we have a crustacean that regularly posts,
we have a millipede, as far as I can see there has also been a "Dragon Lady"
(whatever that is), and a "moist creme filled cake" has been seen recently.
Lets see KC8JBO sexually harass one of those characters if he or she can
figure out which sex they are. Usenet can be used to find information, to
share a joke, to learn about the life experiences of others or to share your
own. But it certainly is NOT REAL. There is nothing legally binding about
anything anybody says. It's just for fun, you take it far too seriously.

>

It appears here that you are saying that if one allows people to exercise
freedom of speech, one must be stopped. Perhaps a move to Afghanistan
will help change your mind and also teach you what REAL sexual harassment is.

> Unfortunately for those remailers which ARE enabling freedom of speech
> responsibly, such behavior will ultimately wind up grist for the mills

CW will not go away. A lot of hams love it and will in the
future. Just because it's out dated does not mean it is not use full
or enjoyable. Just look how many sailboats are sailing the lakes and
seas of the world, shore they are outdated but are still enjoyed in
the year 2001. Spectrum needs to be set aside as they are today so
those who enjoy CW have a place to do it.

Okay, in that case you can use thermonuclear device. However, you'll have to limit it's yield, say perhaps to a small tactical device capable of taking out a smaller town instead of the whole city. :-)

> Although, some would say this becomes
> borderline genocide. Like shooting fish
> in the barrell. Like working DX in nets.

Well, that might be true. Of course, it depends on what you're shooting at. My brother-in-law uses an assualt rifle to keep the bears and coyote (wolves, or whatever they are) away from his farm animals in Wyoming. Of course, it is also effective for smaller animals also - he can't hit them, but the sound, and dirt flying up from nearby hits, is enough to scare the holy heck out of them.

> Holy crap, which part of the country do
> you live in? East LA?

Not at the moment (my mother-in-law lives there, though). No, its fairly peaceful where I'm at now, so I mainly use my guns for target practice at the moment. However, when I move (yes, I've been saying that for a year), I intend to move a little further in the woods, and would appreciate having a good weapon around (just for my own peace of mind).

Absolutely well written, W6DKN. The problem is not guns, or the cars used for joy riding, or the street corners used to sell drugs, or anything else beyond the people involved. Until attitudes change, and we end this seemingly endless tolerance to everything subversive to civilized society, the problems are simply not going to stop.

Okay, to defend your argument that certain drugs should be legalized, you pointed out that those drugs are no more harmful then alcohol and nicotine, which are both legal. And I responded that it was silly to point to something harmful in an attempt to justify the legalization of something else that is harmful. If you're right that alcohol and nicotine are harmful (and I have made no comment on that, one way or the other), why would we want to add to those problems by legalizing something else that is harmful, even if it is no more harmful the alcohol and nicotine? Got it, now? It is a silly argument that hardly justifies the legalization of drugs.

First of all, there is nobody alive today that is ignorant of drugs. The problems associated them exist throughout our country - in the smallest towns and the largest cities. And I'm not basing my opinion on emotional bias - I'm opposed to any use of drugs, even where there are no emotional attachments involved with the people using those drugs. Again, my opposition is directly as a result of my own personal observations of those around me who use drugs.

> "Alcohol is a legal drug as is nicotine. If

I've already addressed that, Glen. Several times (note my post to Josh Geller in the "Drug Prohibition" thread, a thread that was started from this thread, for my most recent response). I'm not going to keep repeating myself for those asking the exact same thing that has been asked before.

Oris,
Your right, CW is out-dated. But if the idea is the transfering of information, all the voice modes ate out-dated too! Instead of thinking of the 'bottom' end of the bands as being for CW, think of them being for the digital modes. That may help your dis-satisfaction factor.
Just for 'grins', and like it or not, CW ain't going away any time soon. If you don't want to use it, don't.

The trade would be by/with the FCC, not other users. The Amateur Radio
Spectrum Protection bill that has been kicking around in congress for a
few years says something to that effect, not that it will ever actually
become law.

No one's taking your guns away, Dick. If we lived in a perfect world where everybody's happy and friendly and lovey-dovey, there would be no need for firearms, but sadly this will never be. Until then, it will take a majority of Americans to amend the Second Amendment, and it's not happening in our lifetime.

Anyway, 73 to you and Dwight and everyone else taking part in this gun-free exchange. I'm QRT.

The FCC does not own any spectrum, but they are more or less a combination of the Wall Street and
Judge Judy when it comes to spectrum assignment. The Wall Street part of them would like to auction off every Hz to the highest bidder, and the Judge Judy in them would like to make everybody happy while collecting a large salary. Since this is irreconcilable, we have a problem,
and that problem is an increased pressure on our bands. Now, the real owner of the bands is actually everyone and no one, which means that regular Joe Sixpacks eventually may get to determine the fate of amateur radio (indirectly, of course - whoever heard of Joe Sixpacks running the country; that's what we have politicians for). As a matter of fact, "our" bands are
not at all ours, since we have already stated that everyone owns the spectrum, and the ham-radio
population happens to be a very small percentage of the US (and world) population, which means
that Joe Sixpacks don't give a rat's behind about us and our perceived needs. Therefore, if there
is no strong, organized and unified effort of the entire ham-radio population, the spectrum will
start to disappear no matter how many no-code licenses are given out and no matter how many VHF
radios are sold. By far the best vehicle for such an effort is always a national ham-radio organization, which in the US happens to be the ARRL. That is why it is my belief that every US
radio-amateur should support the ARRL in one way or another, even if he/she differs

philosophically with it in some or most other issues.
I haven't even begun to address the problem of the international scope: the HF spectrum demands
of the developing countries. The WARC and ITU will not so much as glance at petitions coming from
any sources other than recognized national ham-radio organizations. The FCC can only go so far
within the limits of the international agreements, so the real battleground is actually outside
of the US soil.

And now I rest my case.

73 ..... Zoran

When I listen to the bands during the day I wonder if the FCC is going to shrink the Voice portions and give these frequencies away to some group who will make better use of them. Back in the 60's and 70's there was over crowding on the bands - but today - nonsense.

When there are CW contests the band is over crowded. The same is true when there are SSB contests.

Shrinking the CW portion would do far more harm than good to the Ham Radio hobby.

: to survive a hostile takeover.
:
: Prohibition supports this crap.
:
: Do you?
:

Same is true about daily life. Those who have people around
that support them in their beliefs, who will come to their defense
are often more successful. Groups have more power (strength
in numbers) than individuals. The more organized the group, the
more likely that no one messes with them. Also if you pool your
assets then you can afford better lawyers. Even government leaves
you alone and seeks easier targets.

Although I hate responding to trolls, two items:

1. The lower ends are open to any narrow mode from RTTY to PSK31.

2. We traditionally limit phone activity to give the rest of the world a
place to hide from us. Less so of recent years but particularly true of
15 and 20 meters.

:
: Don't you?

No, just legalizing drugs will not get rid of the gangs. They will
just move on to other criminal activities. That is because they are
more about "political" power. A gang is a way for oppressed groups
to protect themselves while making money. They have found that
there is strength in numbers, as opposite to the extreme individualism
of many here on the NGs.

Plus, as I have said before, we might see marijuana legalized but it will
be regulated like tobacco. In fact I would expect to see Big Tobacco

control pot if it is legalized. But then pot is a small problem compared with cocaine or meth. And pot does not generate the money that coke does.

Heroin will not be legalized but rather will be treated as a medical problem .
Most likely heroin addicts will be allowed to buy the drug thru clinics for $20 a fix but have to use it on site. But again, heroin is not the problem, nor the money maker, that cocaine and meth are.

No one knows how to regulate cocaine and meth. Users can be violent. Usage can cause death. Even a light version of meth, Ecstasy, causes a lot of deaths thru misusage. And coke and meth are where most of the money is.

Don't look now, but the Second Amendment has already been essentially
repealed. Am I free to bear arms inside a US Post Office? A lot of
the federal gun laws are unconstitutional.

Thank God! You had better hope and pray that those in power are never able to convene a Constitutional Convention again. With the current beliefs and attitudes of many in Congress these days the Second Amendment is not the only thing that would be at risk. The First Amendment would be right behind it, and then the Fourth, etc.

A Constitutional Convention is the single most dangerous thing that the current crop of politicians could do. The aftermath would be the end of the United States as we know it...

Mr. Stewart, I did no such thing.

That was, I believe, the person you responded to when you said <<<...I
was just pointing out...>>> above. That person is not I.

I would never make the argument you specify.

> If you're right that alcohol and nicotine are harmful
> (and I have made no comment on that, one way or the other)...

This is the other thing you said before.

I asked you if you believed that they were not harmful.

I ask you again, sir: do you think that the currently legal drugs
alcohol and tobacco are harmful?

Don't assume that you know what argument I am making. If you have read
my posts at all, you know what my attitude is. If not, it will come
out in the course of this conversation.

And please sir, do not confuse me with any of the other people you may
have been arguing with earlier on in this thread. I do thank you
sincerely.

Yes, I remember when Uncle Charlie opened up twenty meters phone a bit.
From 14.200 down to 14.175, then later down to 14.150. The 'non US' guys
had a flippin fit. hi.

I was on the other side of that also. While in Germany I operated as DA2LJ
in the DX window on 75. In Europe the band ended at 3.800.

One evening we were minding our business happily working DX in the window
when the "Geritol Net" fired up. Been downhill ever since. hi.

I think the reduction of the CW bands is ALRIGHT. I am a CW and digital
operator. 50kc is plenty for CW. Actually probably less would really do.

But this won't work on 40 as it is presently assigned worldwide. Perhaps
the next WARC will help.

I'm sure marijuana, heroine, pcp, e, or any number of alphabet soup of chemicals surely increase a persons ability to perceive the world around them. What planet are you from kid? They do nothing of the sort but IMPAIR your ability to act properly in society.

> Isn't that what the government has been attempting to do, and failing
> miserably.

Simply, as the criminals that drug users are, they tend to hide like rats in the sewers of society to avoid prosecution. If you guys so vehemently believed that drugs should be legal why don't you stasnd by your convictions and do them in public in plain sight and in the day time where everyone can see you (and label you a junky)?

> Also, have you ever thought that the restriction might add to the sorts

It is all wrong. (period) Whether its speed, acid or mary jane. Doesn't matter. They are one in the same crime and you should be punished the same.

No you haven't. You said ". And I responded that it was silly to point to something harmful in an attempt to justify the legalization of something else that is harmful."

I am not saying to legalize drugs. Read it again and try a real answer this time. Why do you choose to fight the few horrors of illegal drugs but ignore the many horrors caused by legal drugs? Why do you not condemn them all?

Glenn

Talk about dueling realities!

>> And wouldn't it be a good idea to eliminate
>> them from use ?

I don't think that anything in the pharmacopeia should be thrown out,
even if these moderns think that their new drugs work better.

I think that people should have available to them any medicine that
might possibly be useful in curing the extensive variety of ailments
that inflict living beings.

> Isn't that what the government has been attempting to do, and failing

> them.

Dear Rob,

Cannabis has been used as medicine for tens of thousands of years,
right up until the twentieth century. It is good for all sorts of
things.

You don't have to take my word for this. It is merely necessary to
condsult a sufficiently old pharmacopeia or materia medica.

Cannabis doesn't necessarily impair a person, though it can be
abused like any medicine can be abused.

Heroin is an extract of the opium poppy. It is extremely useful for
treating very severe pain, and is so used in a number of places. It is
extremely addictive, but otherwise reasonably harmless,

PCP is an animal anesthetic. Its effect seems to be similar to some of
the various medicines that traditional priests and magicians have used
for a very long time. The deleriant effect resembles datura or
belladona: the storied 'superhuman strength' resembles amanita
muscaria.

All of these latter are extremely serious drugs, and I personally
could not in good conscience recommend that anyone use them. They are
undeniably useful when used properly, but it is very easy to wind up
dead or insane.

Ecstasy I don't know much about. It's a new drug, which in itself
disinterests me. I figure that you can't really work out the bugs in a
medicine in less than a couple of thousand years minimum. Still, some
people seem to enjoy it, and they seem to be pretty harmless folks,
taking one with another.

> They ... IMPAIR your ability to act properly in society.

The PCP certainly can.

Heroin can if you are addicted to it and the price is kept
artificially high.

Cannabis, as I say, is basically harmless. All sorts of people
(including myself) use cannabis daily and function quite well.

I suppose its possible that there is some long-term effect from
ecstasy that won't show up until later life. That's certainly not
sufficient reason, in my mind, to keep a free adult person from using
it.

I have a question for you.

What is 'acting properly'?

>> Isn't that what the government has been attempting to do, and failing
>> miserably.

> Simply, as the criminals that drug users are, they tend to hide like rats in
> the sewers of society to avoid prosecution. If you guys so vehemently
> believed that drugs should be legal why don't you stasnd by your convictions
> and do them in public in plain sight and in the day time where everyone can
> see you (and label you a junky)?

Some people are more subject to personal fear than others, Rob.

Personally, I take little or no trouble to hide my cannabis use.

Best to you,

Get Real. A doper is the last person that those in control would worry about affecting their ability to conduct business. Do you really think that Congress gives a rats' a.. what the wino and druggie on skid row think about them ?

This is a typical doper's argument. How about providing a reference to a legitimate study that can prove your claims? All the legitimate medical research I have seen is universal in finding that drug abuse decreases the capacity to reason clearly, diminishes sensory acuteness, impairs speech and balance, and can actually destroy brain cells and damage other internal organs.

As with most all chemically induced alterations to consciousness, any improvement in the doper's capabilities is only perceived in the mind of the chemically impaired user. It's no different than the local drunk, who after getting a snootfull, then thinks he is "10 feet tall and bullet proof"... and promptly gets his butt kicked by any sober person he picks a fight with.

??? As far as I know, tobacco does not "limit your ability to reason". It
may limit your ability to live, but that's a different story.

The withdrawal from tobacco sure does "limit your ability to reason"
(speaking from experience).

But alcohol certainly does limit your ability to reason and can make you a
danger to society. I was asking this poster if, given that as a rationale
for eliminating drugs, would he support eliminating alcohol.

I agree.

That's what we're going to ban next, though.

I don't agree with it. I use tobacco myself.

> The withdrawal from tobacco sure does "limit your ability to reason"
> (speaking from experience).

I've been using this caporal rolling tobacco recently. I smoke
anywhere from one to half a dozen cigarettes a day.

It's much nicer than any commercial cigarette. Those things are bad
for you. As much as 30% of a manufactured cigarette is not tobacco at
all, and the manufacturers are not in any way obligated to tell you
what all else is in there.

> But alcohol certainly does limit your ability to reason and can make you a

I don't like this relative harm argument.

A free adult human being has the right to do what he likes, as long as he doesn't harm anyone else.

That's the American way, and that's the basis for my opposition to drug laws.

ejh3,
I wonder what HF frequencies you listen to, in the day time,
that are not crowded? Are they frequencies that are normally
'open' during the day? I have a feeling that your not listening
to the same frequencies that I am! Show me a frequency during
the day that has decent propogation, that doesn't have at least
one conversation going on it. 'Vacant' frequencies on HF don't
stay 'vacant' too long.

I'm a Cowboy, not an Indian. :-) And Robin Hood would probably have traded
his bow and arrow for my SKS with a 30 round magazine full of armor-piercing
ammo. Can you imagine the king's armored knights charging Robin Hood equipped
with an SKS?

I never said that medicine (adminstered legally)should be banned. But those
that are already illegal, and illegal use of legal drugs should remain
banned and the police whose duty it is to arrest the users should be
commended and there should be more of them!

These laws fail because they attempt to ban popular activities.

A lot of people like to use drugs, but if you exclude alcohol and
tobacco, they are still a minority.

Most people like to drink.

There are good arguments for prohibition - well, there is one - but I
have rarely seen anyone make it.

> Dear Rob,
>
> Cannabis has been used as medicine for tens of thousands of years,
> right up until the twentieth century. It is good for all sorts of
> things.

Once again. Marijuana is used regularily for glaucoma patients. I see no wrong in this and the fact is it is legal for medicinal purposes. But, those who use it because they don't enjoy life as it is and use it illegally to fix this I do find trouble with. Perhaps councelling and legal drugs could aid in making life better for them. but the fact is drugs are a quicker (and less effective) means of doing what a doctor could. And, often drug users are in the same boat as suicidals, as they are looking for the easy way out of lifes problems.

> You don't have to take my word for this. It is merely necessary to
> condsult a sufficiently old pharmacopeia or materia medica.

I have no problem with other peoples opinions. I state mine based on the legalities of the country I am in. If I don't agree with the law, I don't break it. I would however lobby to have it corrected.

> Cannabis doesn't necessarily impair a person, though it can be
> abused like any medicine can be abused.

And abusing medications is just as illegal as illicit drug use. And you have to face it, the average drug user does not do so socially, but to get stoned.

> Heroin is an extract of the opium poppy. It is extremely useful for
> treating very severe pain, and is so used in a number of places. It is
> extremely addictive, but otherwise reasonably harmless,

As I mentioned before, I am not here to negotiate the medicinal purposes of certain illicit drugs, but the fact that there are reasons why there are laws to guard against their use because people abuse them readily!

> PCP is an animal anesthetic. Its effect seems to be similar to some of
> the various medicines that traditional priests and magicians have used
> for a very long time. The deleriant effect resembles datura or
> belladona: the storied 'superhuman strength' resembles amanita
> muscaria.

Any use of any one of these drugs without a prescription and not within the means of the prescription is an abuse. As simple as that. You are not a

doctor and thereby you can not prescribe a drug for your use nor could you for any one elses use legally. It is a simple matter ... you can't very well go out and break any law that you simply don't agree with, that puts you in the same boat as homophobes who believe in killing gays and white power guys who kill blacks (among others). They break laws because they feel that they have a right to bsaed on their belief system.

> All of these latter are extremely serious drugs, and I personally
> could not in good conscience recommend that anyone use them. They are
> undeniably useful when used properly, but it is very easy to wind up
> dead or insane.

Even moderate use of marijuana, hash oil have been proven to damage certain portions of neurons (namely dendrites)

> Ecstasy I don't know much about. It's a new drug, which in itself
> disinterests me. I figure that you can't really work out the bugs in a
> medicine in less than a couple of thousand years minimum. Still, some
> people seem to enjoy it, and they seem to be pretty harmless folks,
> taking one with another.

As mentioned before, the average user does not take drugs socially, but so that they can get buzzed. And, once again, as mentioned previously, moderate drug use does have effects, albeit not as severe, but they are cumulative and over time will lead to serious damage.

> > They ... IMPAIR your ability to act properly in society.
>
> The PCP certainly can.
>
> Heroin can if you are addicted to it and the price is kept
> artificially high.
>
> Cannabis, as I say, is basically harmless. All sorts of people
> (including myself) use cannabis daily and function quite well.

I can guarantee you that you do not perform as well as you would have if had you not been on it. The very fact that you use it daily shows an addiction, which on its own can be an impairment.

> I suppose its possible that there is some long-term effect from
> ecstasy that won't show up until later life. That's certainly not
> sufficient reason, in my mind, to keep a free adult person from using
> it.

You sure wouldn't think that if yu met up with someone who had been using it before getting behind a wheel of a car.

> I have a question for you.
>
> What is 'acting properly'?

Well within the bounds of the law of course. That, and being able to reason properly (having your wits about you). And, being able to differentiate the difference between fact and fantasy. (Which in my experience with dealing with active drug users is a majority of the problem)

> Some people are more subject to personal fear than others, Rob.
>
> Personally, I take little or no trouble to hide my cannabis use.

I very well doubt you'd go out with a pipe and a bag marked pot and go smoke in public. More than likely you roll a cigarette so as to hide its true nature.

Simply because people dislike living within the laws. Until they affect them negatively.

> laws.

The problem of it all was people are hedons. They do things that make them
feel good regardless of what it does to others. Thats why we have laws to
begin with

True -- in most cases that would make my #2 unworkable. But, in the unpredictable twists of the law, it might apply in some cases. More promising, however, would be my point #1:

>>(1) The accused and/or his lawyer, could be offered a videotaped
>>Sixth-Amendment chance to "confront" the witness during the original
>>"deposition" or immediately thereafter.

I'm all for drugs as long as they are easily available for cheap so people don't run around beating each other over
the head and pawning everyone's stuff.
Also, it should be manditory that people should only be able to do drugs behind closed doors.
Absolutely no driving while on drugs or coming off drugs and absolutely no being on drugs in public.
THe penalty? Being shot on the spot for endangering and risking the lives and well being of others.

HAMFEST/COMPUTERFEST CALENDAR 2001 - ILLINOIS
last updated February 4, 2001

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Ralph Zancha, and ARRL for providing some of the information.

APRIL 2001

Apr 1 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM.

Apr 1 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Apr 29 (Sun): Arthur, IL - Moultrie ARK. 8AM - 1PM. Info: Ralph Zancha, WC9V, PO Box 55, Lovington, IL 61937. Daytime phone 217-543-2178 evening 217-873-5287. Email: rzancha@one-eleven.net Or write to M.A.R.K., P.O. Box 91, Lovington, Illinois, 61937.

MAY 2001

May 6 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

May 6 (Sun) - Sandwich, IL - DeKalb Hamfest. Sandwich Fairgrounds (intersection of Suydam and Gletty roads). 8AM - 1PM. 3 indoor buildings. Admission $6.00. No VEC testing. Talk-in on 146.730/- or 146.520. Info: W9ICU at (815)895-3310, email w9icu@home.com. http://tbcnet.com/~jleonard/hamfest.htm (small to mid-sized hamfest. Nice drive in the country. Good restrooms. -AJ9S)

May 27 (Sun): Chicago, IL - Chicago ARC Hamfest. DeVry Institute of Technology, 3300 N. Campbell, Chicago, IL. 8 AM - 2 PM. setup at 6 AM. Indoor/outdoor flea market. Free parking. Tickets $5 at the door. Outdoor fleamarket space is free. Indoor table space is $1.50/ft. Info: George (773)545-3622 or Dean (708)331-7764 or write to CARC, PO BOX 410535, Chicago, IL 60641-0535.

JUNE 2001

Jun 3 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Jun 3 (Sun): Princeton - IL Starved Rock RC. Bureau County Fairgrounds. Exit 56 from I-80. Admission $7 (ouch!) at gate. Talk-in 146.955, -600, PL103.5 Hz. info: tel. 1-815-856-3773, (Usually an excellent hamfest. Unlimited space outdoor flea market, some indoor space, though few big name commercial vendors. Crude restroom facilities. - AJ9S)

Jun 10 (Sun): Wheaton, IL - Six Meter Club of Chicago. DuPage County Fairgrounds. 2015 Manchester Rd (north of Roosevelt Rd, east of County Farm Rd). Gates open at 7 AM, buildings open to public at 8 AM. Admission $6. VE testing. Talk-in on 146.52 and 146.37/97 (107.2 Hz PL). Info: http://cyberconnect.com/orion/hamfest.htm or contact Joseph Gutwein, WA9RIJ, 7109 Blackburn Avenue, Downers Grove, IL 60516-3925. Tel: 708-442-4961 . Email: wa9rij@mc.net

JULY 2001

Jul 7 (Sat): Oak Creek, WI - South Milwaukee ARC. American Legion Post 434, 9327 South Shepard Ave. Admission $5. Starts at 6 AM. Talk-in 146.52 MHz (WA9TXE). Info, call (414)762-3235.

Jul 8 (Sun): Peotone, IL - Kankakee Area Radio Society, Will County Fairgrounds. I-57 to Peotone exist 327 (East). Free parking. Talk-in 146.94 MHz repeater. http://www.w9az.com. Admission $6. Info: Chip Moore, K9IOC, 289 S. Euclid Ave., Bradley, IL 60915. Email: karsfest@yahoo.com

Jul 15 (Sun): Washington, MO - Zero Beaters ARC Hamfest. Bernie E. Hillerman Park (Washington Fairgrounds) Free parking. Free admission. VE exams. Talk-in on 147.24 MHz repeater. Info: Keith Wilson K0ZH (636)629-2264, fax (636)629-1196. Bob Goza W0BOB (573)484-3718, w0bob@arrl.net. http://www.yhti.net/~w0bob/zbarc

Jul 22 (Sun): Sugar Grove, IL - Fox River Radio League Hamfest. Waubonsee Community College. Rt 47 at Harter Rd. Admission $5. http://www.frrl.org/hamfest.html (good, small to midsized hamfest. Easy parking. Modern restroom facilities. - AJ9S)

AUGUST 2001

Aug 5 (Sun): Gurnee, IL - Computer Country Expo (see below). Ballroom of the Holiday Inn, 6161 W. Grand Avenue.

Aug 12 (Sun): Peotone, IL - 67th Annual Hamfesters Hamfest. Will County Fairgrounds. 45 mintues from Downtown Chicago, take I-57 to Peotone Exut 327 (East). 35 acres of free parking. 14,200 square feet of exhibits open at 8 AM. Flea

market open at 6 AM to 3 PM. No additional charge for flea market space. Rain or shine -six covered pavilions for Flea Market. Tickets are $5.00 in advance with double stub, $6.00 at gate with single stub. Children under 12 free. I have given ample reasons why. You give me a reason (other than because
having rules isn't good for you) drugs should be illegal

and well being of others.

A person who's drunk in public or drinks and drives is breaking the law.
But people still do it. Banning it is the only way to ultimately limit the
crimes people commit because of drugs

Don't bother. It's pointless to try and reason
with puritans on a crusade. Just *resist* them.

I wouldn't write CW off just yet.

I do think it likely that more automated narrow band communications
like PSK31 will gradually begin to gain on CW, but just as there
are people who still enjoy bicycling, sailing and running, there
will always be people who enjoy operating CW.

I personally don't view overcrowding as a problem. After all, it means
that people are using the bandwidth allocated to the ARS. I don't see how
that is a bad thing.

You mean that these people make trouble for you?

How do they do that?

>> Cannabis doesn't necessarily impair a person, though it can be
>> abused like any medicine can be abused.

> And abusing medications is just as illegal as illicit drug use. And
> you have to face it, the average drug user does not do so socially,
> but to get stoned.

What I'm trying to find out, though, is why you care so much about
this.

They want to get stoned, let them get stoned.

If they make a problem when they're stoned, sanction them for making
the problem.

> It is a simple matter ... you can't very
> well go out and break any law that you simply don't agree with, that puts

You know, I've looked at this, and I've thought about it, and I think
you're dead wrong.

I don't think that it is immoral to break immoral laws.

I don't consider laws against murder to be immoral.

Of course, you can do as you like. I'm not in the business of minding
other people's business.

I actually don't habitually break any laws currently.

> Even moderate use of marijuana, hash oil have been proven to damage certain
> portions of neurons (namely dendrites)

You got a url that points to a technical paper that describes this?

> have if had you not been on it.

I do OK. Make decent money, pay my taxes, support my family. My
companies make their payroll.

If I don't smoke weed my back hurts really bad, and I twitch. Also, my
productivity goes way down.

So, thanks for your concern, but I think I'll just keep on like I've
been doing. I just thank God that medical cannabis is legal in California
and I don't have to worry (at least) about going to jail for smoking.

Here's the difference between you and me:

You are sitting there telling me how I should live.

I am not sitting here telling you how you should live.

>> I suppose its possible that there is some long-term effect from

>> sufficient reason, in my mind, to keep a free adult person from using
>> it.

> You sure wouldn't think that if yu met up with someone who had been
> using it before getting behind a wheel of a car.

No, I think that if someone does something that endangers other
people, they should be stopped.

So if someone's driving like a fool, I don't care if they are stoned or sober, I want them off the road.

It certainly has no effect on the opinion I express above.

If someone wilfully impairs themself and gets behind the wheel, that's another matter. I don't think that that should be lawful.

>> I have a question for you.

>> What is 'acting properly'?

>> Personally, I take little or no trouble to hide my cannabis use.

> I very well doubt you'd go out with a pipe and a bag marked pot and
> go smoke in public.

Well, like I say, I smoke weed legally, these days, and it is part of the law that you aren't supposed to smoke in a public place. So I'll go off somewhere.

> More than likely you roll a cigarette so as to
> hide its true nature.

No, if you see me smoking a cigarette, it's got tobacco in it, even if it does look hand rolled. Cannabis goes better in a pipe, though, at least in my opinion.

You know, Rob, I don't think we are going to agree on this one.

5109. W9INN antennas web page

W9INN (Bill) has granted me permission to create and publish a web page devoted to his outstanding antennas. It includes a diagram of one of his more popular 5-band resonant HF fan-dipoles - the MPD-5C which comes in either a 78ft or 87 ft model. I have included contact info for Bill and included the measured 2:1 VSWR bandwidths I obtained.

Just click on this link http://www.ab7sl.com and then the W9INN Antennas button .

I have worked 289 DXCC countries (ssb-only) on Bill's antenna (in less than 5 years) and felt he deserved a little internet presence as he has yet to create his own site. All the info you need to reach Bill is on this page. 73 / DX

Rob, I don't think that drugs should be illegal.

They weren't any of them illegal up until about 1912.

I want to return to the status quo ante.

I don't have a problem with reasonable laws.

Laws against murder, theft, assault, rape.

That kind of thing.

Say Rob, do you think fornication should be illegal?

How about adultery? Sodomy?

Naah, but everyone has things they dislike ... its just a fact of life ...
I've just had so many bad dealings with people who use and abuse drugs that
I am quite biased in the opinion.

> What I'm trying to find out, though, is why you care so much about

I used to work in shelters here in ottawa. There was a stabbing over one
stupid joint. enough said. If they weren't drug addicts then there
wouldn't have been a problem.

> You know, I've looked at this, and I've thought about it, and I think

Well, I believe that the laws are there for the good of the country (sounds
corny but if people obeyed them society would work far better). It's just
that when you do drugs, it's not just your business, because the people who
you live with have to deal with you that way, that goes for people outside
the house too.

> > Even moderate use of marijuana, hash oil have been proven to damage
certain

I'll check it up ... gimme a few days ... working on something right now

> I think that the E-heads do mostly use socially. Who ever heard of a
> one man rave?

What I meant by social was they do it because the others do it ... and not
jsut to enhance the mood (most drinkers use that excuse) but to get full
blown stoned.

> I do OK. Make decent money, pay my taxes, support my family. My
> companies make their payroll.

See if people were able to use in moderation, and not hurt others than
legalisation would work. But, unfortunately they won't. More people would
abuse and drive, or commit crimes to obtain them.

> Well, like I say, I smoke weed legally, these days, and it is part of
> the law that you aren't supposed to smoke in a public place. So I'll
> go off somewhere.

Up here it's still illegal

> No, if you see me smoking a cigarette, it's got tobacco in it, even if

See thats the fun about debating ... its far more enjoyable to talk about contraversy than to a bunch of guys who have the same opinion and agree to every word that you say.

But to prove my point ... someone keeps calling my cell to tell me to post in alt.radio.flame_fest (i think thats it) when for the most part I believe i have tried to keep this quite civil.

as i mentioned before ... people will abuse the right ... it is proven even when it is illegal that they go and do it anyways. What will they do when and if it become legal? They will have free rein.

I got a nice used SG 2020 about 3 weeks ago for $400. I really like it. Built like a tank. Got it for HF use while hiking using a portable dipole. Have worked VK land already. Can run it from less than 1 watt up to close to 30 watts on some bands. The only change I want to make to it is to add a Heil mic. The 817 is great too, but if conditions are bad and you want a little more than 5 watts you are stuck unless you have an amp. Both of these rigs have their little qirks. You could always check out some of the ft-817 and SGC groups on Yahoogroups.com to learn more about these rigs. Ken

As I said in the beginning post of this thread I do belive that a portion of the HF bands for that old outdated form of communications. I think that we need more room for voice.
I also think that CB radio as we know it should be outlawedor moved to 220MHz. Amateur Radio should annex 11 meters and a new ticket should be formed to accomadate the trash that is already there. It would surly put a end to all the crap that the FCC has to put up with because of that band.
Here in Madison Co GA the police aern't doing anything about the illeagal ops.

: to dictate the way other people conduct their lives.
:
: Or do I misunderstand you in some way?

I think that you have nailed it. It is not socialism but rather
Puritanism which is at work. It is as American as apple pie.
It is small town America, sticking your nose into other people's
business and telling how to run their lives. Millions of American
women have done so for centuries.

Even Victorian England was much the same. Now we have a
neo-Victorian Age. And many American women have made
it their duty to ban smoking, guns, drugs, or male behavior. If
they can not ban the activity then they banish those who do so.
Prison for those who do drugs and out of the office for those
who smoke. And God help you if you act like a male.

: >> Have you ever thought that drugs which enhance a persons ability to
: >> perceive and disseminate information, to be objective, pose a danger to
: >> those who shape society for their own benefit?
:
: > I'm sure marijuana, heroine, pcp, e, or any number of alphabet soup of
: > chemicals surely increase a persons ability to perceive the world around
: > them.
:
: Dear Rob,
:
: Cannabis has been used as medicine for tens of thousands of years,
: right up until the twentieth century. It is good for all sorts of
: things.
:
: You don't have to take my word for this. It is merely necessary to
: condsult a sufficiently old pharmacopeia or materia medica.
:
: Cannabis doesn't necessarily impair a person, though it can be
: abused like any medicine can be abused.
:
: Heroin is an extract of the opium poppy. It is extremely useful for
: treating very severe pain, and is so used in a number of places. It is
: extremely addictive, but otherwise reasonably harmless,
:
: PCP is an animal anesthetic. Its effect seems to be similar to some of
: the various medicines that traditional priests and magicians have used
: for a very long time. The deleriant effect resembles datura or
: belladona: the storied 'superhuman strength' resembles amanita
: muscaria.
:
: All of these latter are extremely serious drugs, and I personally
: could not in good conscience recommend that anyone use them. They are
: undeniably useful when used properly, but it is very easy to wind up
: dead or insane.
:
: Ecstasy I don't know much about. It's a new drug, which in itself
: disinterests me. I figure that you can't really work out the bugs in a
: medicine in less than a couple of thousand years minimum. Still, some
: people seem to enjoy it, and they seem to be pretty harmless folks,
: taking one with another.

Modern American Puritanism does not allow you to
make that decision. Unless you are supervised, no

drugs. The women of America demand that you be
under control.

: > They ... IMPAIR your ability to act properly in society.
:
: The PCP certainly can.
:
: Heroin can if you are addicted to it and the price is kept
: artificially high.
:
: Cannabis, as I say, is basically harmless. All sorts of people
: (including myself) use cannabis daily and function quite well.
:
: I suppose its possible that there is some long-term effect from
: ecstasy that won't show up until later life. That's certainly not
: sufficient reason, in my mind, to keep a free adult person from using
: it.
:
: I have a question for you.
:
: What is 'acting properly'?

Being a proper "Victorian male". Being under
the control of the well educated women of America.

: >> Isn't that what the government has been attempting to do, and failing
: >> miserably.
:
: > Simply, as the criminals that drug users are, they tend to hide like
rats in
: > the sewers of society to avoid prosecution. If you guys so vehemently
: > believed that drugs should be legal why don't you stasnd by your
convictions
: > and do them in public in plain sight and in the day time where everyone
can
: > see you (and label you a junky)?
:
: Some people are more subject to personal fear than others, Rob.
:
: Personally, I take little or no trouble to hide my cannabis use.

But then you are an uncontrolled "male". And males like
you are dangerous, even anti woman.

> else that is harmful."

And that's the answer, Glenn. What else can I say? The "legal drug" versus "illegal drug" argument is silly, therefore it is simply silly to discuss it further.

> I am not saying to legalize drugs.

Oh, come on. At least try to be honest. Your whole effort in this thread so far has been to minimize the harmful effects of illegal drugs with the goal of convincing people that those illegal drugs should be made legal like alcohol and nicotine.

> Read it again and try a real answer this
> time. Why do you choose to fight the few
> horrors of illegal drugs but ignore the
> many horrors caused by legal drugs? Why
> do you not condemn them all?

I'm not saying more about alcohol and nicotine because I don't want to talk about that beyond what has already been said. Now, if you want to talk about alcohol and nicotine, that's your business, but I'm obligated to answer you. Instead, I'll continue to address the topic of illegal drugs, which is why I joined this thread and not a thread about alcohol and nicotine.

However, with that said, I will add that I'm no fan of alcohol. Partly because my father died as a direct result of alcohol, and partly because I think getting drunk is really stupid, I don't drink alcohol of any kind. However, I still don't think alcohol is in the same ballpark as most illegal drugs and therefore see no problem with one being legal and the other illegal.

As for nicotine, I think it is absurd to associate it with any of these (alcohol or illegal drugs). I'm not convinced the studies have been entirely unbiased, and I'm certain that the dangers are being greatly exaggerated (note that I didn't say the dangers don't exist, only that they're being exaggerated). Whatever the case, people don't drive drunk with nicotine, and people don't stand on street corners selling drugs, themselves, or anything else they can, to get nicotine.

And, please, I've heard all the arguments before, including the argument that those things (selling drugs, prostitution, robbery, etc) are the result of drugs being illegal, not the drugs themselves. The facts simply don't support that argument. In countries that have tried some limited drug legalization, drug use increased, the illegal drug trade increased (dealers simply switched to other drugs or stronger version of the drugs that were legalized), crime by drug users increased, and drug related deaths increased. That is why most of those countries are now backing away from drug legalization.

Now, that is all I intend to say about alcohol and nicotine. If you wish to continue discussing these instead of the real subject (illegal drugs), than you'll have to do it on your own. I will not respond further on this.

Sorry for the confusion. You and Glenn are both asking questions along the same vein (both posting virtually the same questions at about the same time), so please forgive me if I get confused over which one I'm talking to at any given moment.

> I asked you if you believed that they
> were not harmful. I ask you again, sir:
> do you think that the currently legal drugs
> alcohol and tobacco are harmful?

And this is a perfect example. Both you and Glenn asked this question at about the same time, and I have tried to avoid it (I have no desire to talk about alcohol and nicotine). However, I did finally give up and answer Glenn's question about five minutes ago, so I urge you to read that message if you feel you absolutely must have an answer to your question.

No, I believe that, in this free democracy, I have the absolute right to vote the way I personally feel when it comes to the issue of illegal drugs, and you have absolutely no right to criticize me for that simply because you want to use those drugs. I didn't say anything personal about you, my friend. So back off trying to belittle me with bullcrap like you posted above.

I have yet to see any evidence of enhanced ability to perceive, or disseminate information, in the drug users I've seen. Most have a hard time even getting shoes on their feet correctly while high on drugs and even fewer could speak well enough to clearly disseminate any information at all (including their own name).

John,
My son passed his tech last year when he was 10. I realize every child
is different, but I found a few items you might want to consider.

We did not study before bedtime. After a day of school, boy scouts,
playing, etc, he was too tired to keep his mind on the material. We
usually tried to get some study time either before or right after supper.

We limited the study time to about 30 minutes. After that long, his
mind (or mine) would start to begin chasing rabbits...

After we went over the entire question pool a couple of times, we
forgot the pools and he began taking practice tests on the net.
Sticking to the 30 minute time limit, he could usually knock out at least
two tests per session.

Some nights he (or I) was too tired to do any studying. I did not think it
was a major deal if we skipped a night once in a while to give him a break.

Was it worth it? You bet. There's the thrill when he passes his exam and
the same thrill every time I hear his callsign on the radio. He's a first
class
OP. (Better than some who are a lot older and have been licensed a lot
longer...).

Good luck to your son...
73,
David K5DEL
Father of D.J. N5DEL

I haven't seen an accident yet that has been traced to smoking.
Yes, there have been accidents related to falling ashes, but no more
than spilled coffee, changing radio channels, or talking.

> Or not to mention those who do it while
> they are in bed and fall asleep and burn
> the building down.

You're right, we should ban all smoking in bed. And, while we're at
it, we can add in a ban of the other causes of fire accidents in the
home - stoves, fireplaces, candles, heaters, electrical wiring, and so forth.

> Not to mention the fact it bothers the hell
> out of non-smokers who in turn look at the

Yeah, for Geronimo too. So what?

5134. BOYCOTT KENWOOD! Confirmed Anti-coders!

Newsgroup: rec.radio.amateur.misc
Date: 2001-03-31 05:28:58 UTC
From: Robert <dxopr@gtel.net>
Message-ID: <3AC56B1A.B547D5FA@gtel.net>
Source record: 91363

BOYCOTT KENWOOD!

Confirmed Anti-Coders!

Here is an equipment manufacturer lobbying the FCC to drop CW testing.

This is a quote from Federal Communications Commission REPORT AND ORDER
Adopted: December 22, 1999

Released: December 30, 1999

By the Commission: (The entire document can be viewed in plain text at
http://www.fcc.gov/Daily_Releases/Daily_Business/1999/db991230/fcc99412.txt

)

28. ... Kenwood states that licensing of persons because they are
proficient in Morse code is inconsistent with encouraging those
interested in modern telecommunications to join the ranks of amateurs
and become skilled in the technical sciences. ...
29. On the other hand, several commenters equate passing a telegraphy
examination to the type of on-the-air operator a licensee will be, proof

of skill level, or emergency communication capabilities. Kenwood,
however, states that Morse code telecommunications is not a skill used
often in emergency communications or disaster relief any longer. Other
comments express a personal preference for exchanging messages with
other amateur radio stations using telegraphy. While Kenwood agrees with

these observations, it states, however, they are not a sufficient
justification for keeping Morse code proficiency as a licensing
requirement. ...

NO CW TEST means CB.

And only CBers would want to eliminate the only thing keeping ham
radio from becoming CB. It is high time for firm action to save ham
radio from the CBers and the lobbying profiteers. (The FCC mentions
"Kenwood" in a policy-making action eleven times!!)

Since Kenwood has now entered the political arena, they are now subject
to political response. WE DON'T NEED KENWOOD!

DO NOT BUY KENWOOD GEAR!

SIGN YOUR CALL WITH "BOYCOTT KENWOOD!"

> AIDS INFECTED "Uncle Roger" <Woger@rumpjumpers. comm> confessed he
> made love to his retarded sister in a moment of drunken weakness. His 14 year old sister was drunk. Roger was sober. She enticed Roger by going to the outhouse and leaving the door open so Roger could watch.
Roger told the prosecuting attorney that he was NOT the father and he is demanding that his sister has to cut off a finger on her newborn baby so they can compare the fingerprints of the baby to Roger's fingerprints. The Prosecutor declined to order a DNA test since everybody in Roger's West Virginia town has the same DNA, rendering that inadmissable in a court of law.
Roger maintains that the finger print will vindicate him and when the investigation is finished Roger claims that the evidence will show that his step father is the daddy of his sister's new baby.
Roger says he NEVER had sex with his 14 year old sister. He said what he did to her when she was 12 years old doesn't count since she never got pregnant.

> money is.

Easy. Mandatory tripling of sentance, and raise of one grade
(ie. class B misdimeanor becomes class A... Class A misdemeanor
becomes a class D felony, etc.), or maybe two, for any crime committed
under any psycho-active drug not taken under the supervision and/or
prescription of a physician.

That way, the emphasis becomes....if you mess with drugs, you had better
keep your behavior absolutely clean.

Drug users say "they can handle it"...so...obviously, if they demonstrate
(throuhg the commission of a crime under the influence) that they
canNOT "handle it"...then throw the book at them.

James Vincent O'Brien the turd and his wife, Donna the Turd were featured guests on the Jerry Springer show last week in Atlanta. Jerry Springer interviewed the O'Briens and looked at their living conditions with his camera crew in tow.
Springer. "Tell me, Dimmy, why do you still have raw drywall in most of the rooms of your house?"
Dimmy "Well, Donna never got around to finishing the walls."
Springer "Why is that?"
Dimmy "Well, I could never get her off her ass long enough to finish it."
Springer "Did you ever think about doing the finishing for her?"
Dimmy "Hell, NO! I don't get up until two in the afternoon and by then it is too
late to start.
Springer "Why is that?"
Dimmy "You ever try to finish drywall when you are hung over?"
Springer "Well, no."
Dimmy "There you have it. I don't do menial work before noon."
Springer "It seems you don't do menial work at all, do you?"
Dimmy "I am a Navy Veteran. I am a hero. I don't have to work."
Springer "Why is that? Were you in a combat zone?"
Dimmy "No. I am just lazy and mostly unemployable but I DO lie about my Navy
Honorable discharges.
Springer "You are an honorably discharged Vet?"
Dimmy "Well, yeah. I printed out not one, but two Honorable Discharges. Good
ones, too. I put em' on my web page. They look pretty real, too. Want to see one?
Springer "Well, no. I'll take your word for it if you say so."
Dimmy "I say so."
Springer "Well, Dimmy, I have to move on and interview Roger. I hear he is hiding out in the hills somewhere in West Virginia."
Dimmy "That is what I hear, too. Bet you will never find him, though."
Springer "Why is that?"
Dimmy "He's dodging a Paternity case. His sister is accusing him of being the father of her new baby.
Springer "Could that be true?"
Dimmy "No, Roger had his nuts cut off three years ago when he got my sister pregnant. I have his nuts in a jar on the mantle behind me. Want to see them?"
Springer "I think I will pass. Thanks for the interview anyway."

> I haven't seen an accident yet that has been traced to smoking.
> Yes, there have been accidents related to falling ashes, but no more
> than spilled coffee, changing radio channels, or talking.

But ahh yes, a smoker often tends to carry the cigarette in their hand while driving, thus decreasing the control they have on the car. Accidents have happend due to loss of controil, which has been attributed t osmoking.

> You're right, we should ban all smoking in bed. And, while we're at
> it, we can add in a ban of the other causes of fire accidents in the
> home - stoves, fireplaces, candles, heaters, electrical wiring, and so
forth.

Accidents occur due to faulty wiring, candles that have been knocked over etc. It is DIRECTLY related to stupidity t hat a person burns their house down because they neglected to put the cigarette down when they went to bed. It is common sense that they would not have control over it when they are asleep.

> That's alright, we look at your hateful attitude towards others with
> equal disdain.

How hateful is it that we non smokers simply don't want to be exposed to it. We are notstopping smokers from going to public places, just we would preferthey not do their drug where it will affect us. You force us to smoke when you light up.

Ok you old timers, put on your memory caps. A co-worker hauled in, you know what haul means if you recall this rig, a Heathkit Seneca xmtr yesterday. We set it up on the bench at work, and it seems to have screen modulation vs plate. My co-worker, he's ok even if he's an army officer, said that was the downfall of the Seneca, and soon after it was marketed in the 50s, sales fell. Ultimately, if I recall, the Seneca disappeared off the market as quickly as it appeared. You rarely see them at flea markets. Last one I saw was at the Atlanta fest a few years ago, and the old timer trying to unload it did not want to discuss problems with screen modulation.

Can anyone recall if, in fact, there were specific problems with screen modulation in this rig?

After a hard Saturday night of playing in Woger Wisman's Greyhound Bus Station Men's Room Band, Wittle Woger will drop by the corner bar, down a few hard belts to build up his low self-esteem and then proceed to hit on all the 50 plus divorcees at the bar. Poor Woger, just can't relate to women his own age or younger. I bet you've never made it with a young womam Woger. I'll further bet the only women you've ever had, and that's dam few, have been in excess of 50. Must be a real downer when a fairly good looking 52 year old hag tells you to fuck off and walks out with a guy older than you. Poor Woger, drink up, toke up, you'll feel good eventually.

oh? more than one you say?
care to cite the source?
c'mon Roger, this is an old game you're playing and all the tricks are well known.

So far as I know, I received 1 letter on account of a single complaint and it
turned out that
I was not in violation at all (receiver equipment had a defective filter). so, the
complaint
was dismissed... this was in 1993.

Other than that, no other complaints OF ANY SORT were filed against me
(that I know of). I was involved in a case where a bootlegger used my
call on numerous occasions on the VHF and HF bands in an attempt to harass
me or otherwise generate harassment by inciting others to write the FCC.
He was eventually caught (the FCC V. Timothy Harold Hoffman <or also
known as "The phoenix jammers case">).

so, I have 1 complaint of record that was dismissed and listed as
satisfied... can you say that, roger?

After a hard Saturday night of playing in the men's woom at the Greyhound Bus Station, I will drop by the corner gay bar, down a
few hard dicks to build up his low white-blood cell count and then proceed to hit on all the 50 plus hermorphadites at the bar. Pity poor me known as Pubic, I just can't relate to women my own age or younger. I 've never made it with a
young woman. I admit I'm just a cocksucking FAGGOT. I'll further admit the only men I've ever had, and that's damn many, have been in excess of 50. It's a real downer when a fairly good looking 52 year old fag hag tells me to fuck off and walks out with a guy older than me. Pity poor me, I'll drink up, and toke up tonight, jam on 75 meters and i'll feel my mommy's cunt with my tongue eventually. Then I'll sodomize my widdle brother, just after my daddy sodomizes me. It's no wonder I have a criminal record in Arizona.
Maybe Steve Turdeater N8WGM, will go out with me. Maybe Steve Turdeater won't take so much speed befoer he gets on the Nazi net on 3.950

This is just one page from Roger's childhood diary.
<<<<<<<<<<<<<<<<<<<<>>>>>>>>>>>>>>>>>>>>
One morning after Dad finishes his workout, he pulls a fold-down bunk from the wall and lies down, still unclothed. I sit on the floor beside him. I watch
his erection. He slaps his tummy with it. He laughs as if he is surprised. "Touch it," he says, holding his penis up, offering it to me. I reach over, hold
it with my fingers, and let it go, making a thwack. He laughs. "Now I'll look at yours," he says. "Stand up." He pulls my pajamas down. He holds my
penis between his thumb and forefinger and squeezed. "Don't," I say. "I want to make sure it's growing right," he tells me. He studies it, he hums, he tugs and twists. "Let go." I try to force his hand
away. He ignores me, but then he eases back on his strokes and lies down on the bunk. He pulls at his own penis. He closes his eyes. I watch him,
see his lips tighten into thin lines. He lies flat, grim, as if he is extracting
some splinter from deep within himself. I stand by the bunk. I have seen his penis before when it is hard. He'd tried to put it into my bottom. He
is going to do it again, isn't he? I hope so.

It's doubtful you could pass the test the FIRST time. And that includes the Technician, who'd you PAY to pass it?

> Riley nailed Roger to the wall and made him re-test to keep his ticket.

Bullshit. Riley gave no reason why I had to retest. But then, if you were able to read and comprehend you'd realize how fucking STUPID you made yourself look.
Go and read it DUMBFUCK:

www.rainreport.com\0letters/wisemanretest.htm

>Bet you can't make that kind of al brag, can you?

I bet you still can't pass the General test after how many years now????

> Roger was caught red-handed maliciously jamming others and he had the
> privilege of being one of the few, the proud, the RETESTED!

Bullshit. I wasn't caught doing anything. The one warning letter of November, 1999, by its nature is neither proof of the activity, nor guarantee of the validity of the evidence, if any. We can presume with equal validity that the first warning letter was based on bad information and was therefore improperly presented.
So, then, your "caught red-handed evidence" has slipped to zero. Nada. Zilch.

Considering the quantity and times of Roger's Usenet postings, one
wonders if Roger has ANY life other than Usenet? Is Roger Gay?
Is Roger bisexual? Is Roger straight? Does Roger do ANYTHING other
than spew hate and filth on Usenet? What kind of person fills all
their time spewing hate and filth on Usenet? Poor Roger, even gay
people have a life other than Usenet. Poor Roger, no life, no income,
just a welfare wacko who sits in a filthy smelly dimly lit room, filled
with fast food wrappers and empty pizza delivery boxes, while he
spews filth and hate across cyber space. Poor Roger, how awful that
any human would voluntarily choose to live such a horrid lifestyle.
Poor Roger, who has never allowed himself the company of a lovely
young female. Is Roger afraid of women? Does Roger hate women?
Does Roger recognize or is he arroused by the sight of a young
woman in a tight skirt and heels? Perhaps Roger would prefer wearing
the tight skirt and heels himself, while he pounds his keyboard and
his penis gets hard. How perveted, poor Roger.....

There was a middle-aged couple who had two stunningly beautiful blonde
teen-aged daughters. They decided to try one last time for the son they
always wanted. After months of trying, the wife became pregnant and, sure
enough, nine months later delivered a healthy baby boy. The joyful father
rushed to the nursery to see his new son, Shitholelicker Lee. He took one
look and was horrified to see the ugliest child he had ever seen. He went to
his wife and said that there was no way he could be the father of that
child. "Look at the two beautiful daughters I fathered." Then he gave her a
stern look and asked, "Have you been fooling around on me?"
The wife just smiled sweetly and said, "Not this time."

> But you *would* be welcomed with open arms by cotse and Steve Gielda and

Errrr, Rog, without actually saying it, I think you revealed your problem today. My sister is a buyer for a large chain of women's fashion shops, and she says she will be glad to send you the....errr larger sizes if you say it is ok. We know you must wear female clothing to get excited while you post on Usenet. Uhhh, don't pass up this opportunity Roger, all free stuff, you know, last year's fashions that the ladies no longer want, but they will get you very arroused....plenty of the under things too Roger...nice and frilly stuff. Garsh Roger, you could order pizza delivery tonight, while dressed in your ladies garments, then after you have a large enough erection, you could start a great string of postings on the Usenet. Just post your men's sizes. Sis says she will convert them to ladies sizes for you.

> :
> : Comprende?

No...it make no sense.
Our biggest interference issue right now is with "mixing" on a local Border patrol channel. The interference comes from mexico. Business on the 460 bands have begun to hire RSI to jam mexican users...RSI works much faster than hams do...and they are pros at signal detection. As far as pimple kids go. A visit from the 3 thugs from RSI is a lot scarier than a visit from the FCC.
If some hams want to get all ballsey...they should track lojacks in mexico....I hear that RSI and local bounty hunters are getting $2500 to locate stolen cars with lojack in Tijuana.......Hummmmmmmmm And all they have to do is locate them...and get a pic for the insurance co.

Ain't that wonderful? Mr. Turd "knows a word". He must be taking a class or something on so-called "smooth brain disorder."

I wonder if they taught him the difference between magnetic resonance imaging and proton magnetic resonance? Longitudinal and transverse relaxation times? Electron spin resonance and nuclear magnetic resonance? Nawwwww.

Technicians are never really taught physics. They just think they know something.

> We had a discussion on this within the NGs are few months ago.

Ya we did....it was a reach then...and still is.
If I was soooo concerned about rival gangs and cops grabbing my stash...I would go "low profile"..
If some i had some spotter working for me with a carload of antennas...I would prolly shoot him and burn his car just because he is such a dork thinking we operated in such a high profile mode.

I know cops that stop cars with antenna farms on them...they just wanna know who you are...the drug runner story is used just to make you feel better and more important. it's also good cover for the "stop and shop"

FYI...most runners are on prepaid and stolen cell phones. Most intel is gathered on a much higher level...One local department in texas charges runners $30 per mile...Arizona is charging $45 per mile on some rural roads.

Go for it John. Get the lad into the hobby. It can only grow from his young
age.
Over here, in New Zealand, we used to have (maybe we still do) the award
for "Young Amateur of the Year" and you would be surprised at the ages of
some of the recipients. It has died off a bit now but we did have a few
young guys and girls at these ages coming through..... Many of the voices,
then, are all grown up now, but it is nice to know that youngsters are
still interested.
As you teach him, watch for signs of him wanting a break or for his mind
wandering, then ease off. You will get to know how much and how often. I
taught a few "adults" the basics of eletronics for their licenses a few
years back - they are exactly the same,, only your son has a "want" to
learn whereas those adult had a "need" to learn for their license. Kids are
like sponges,,, they soak it all up and usually never forget.

Pull out the stops and go for it....

I am sorry for my constant use of foul, filthy language. I cannot help it. It is not my fault. You see, I suffer from a rare mental disorder called "Tourette Syndrome". Maybe you saw the story they did about me on Sixty Minutes last year. The story explained that those of us with Tourette Syndrome often, involuntarily blurt out obscenities over which we have no control.
I apologize for having offended you.

Know what, Zoran; I give up.

There are people who are thoughtless drones, no matter how hard you hit them with a hammer. Charles is one of them. He doesn't care about usenet and he doesn't care about other people's interest in this fabulous medium. He sees it as the perfect place to run his adv^H^H^HSPAM and think that it's just great.

He behaves like the simplex idiot who is too stupid to grasp the concept of split operating. In that vein he is unable to grasp the concept of a text based, ad-free and multicultural environment that has been designed to discuss ideas, not to promote ridiculously bad designed and contentless webpages. He laughs at people who think that his fullquotes, referenceless drivels are a waste of conceptual bandwidth.

Let him have it his way. Let him be happy in his dysfunctional way of not understanding what 2-way communication at its best can be. Let's leave him alone and pray for www.usenet2.org where mindless people like him will never have a place.

Actually, I was referring to the fact that you have a brain like a rat:
smooth and with no frontal lobes. I was not referring to it as a disease,
but that it was an evolutionary difference between you and myself.
Your branch of the tree went off in a somewhat different direction to
mine so to speak. Mine went the way of superior brain capacity, and
yours the direction of the honey badger.

That is the first thing you have EVER written that has a modicum of accuracy,
the answer is no. However, you don't need that kind of specialized knowledge
to determine lissencephally and basic brain morphology. You need only
discriminate between Pavlovian behavior and higher order cognition.
>
> Technicians are never really taught physics. They just think they know

So are you implying that you actually KNOW these things, or did you just
look them up on "whatis.com"? If the latter is the case just take the magnet
and shove it up your ass, if the former is the case I applaud your insight into
the differences in depth of knowledge between technician vs. physicist,
but what is your point? Ahh, you might as well just shove the magnet and
the coil up your ass anyway.

I'm stunned.....truly stunned!
Well if you want to contact the robbery division of the San Diego Police
Department...they will be happy to let you know they would love ANY info they
can get on a string of cigarette robberys.....maybe 60 or so in the last
year...that's just in the city...the sheriff has the same problem...211pc with
cigarettes taken only.
As far as the beer comment...
I thought you had a scanner at home or something. How many drunken idiots does
your police department arrest each night? How many stoned cookie robbers with
the munchies do they arrest???

> And before you mention traffic accidents, whether high or drunk, the driver
> is just as deadly, but a doper is much more likely to cause a pursuit than
> a drunk.

Most pursuits that have a driver under the influence.,are booze related...1 in
7 chases involve other drugs...or undocumented workers in the San Diego area.
"Just one more beer!"

Maybe you live around too many stoners...watch your candy and chips!

You can thank the liberals for that. They have succeeded in raising the price of cigarettes to where it is now profitable to steal them for resale. Just like guns, an AKM that used to sell for $199.00 legally is now worth $800-$1000 on the black market.

These robberies weren't done by an individual because he needed a smoke. They were done to obtain mass quantities for resale on the black market. This kind of crime occurs with anything that has a large resale value - TV's, VCR's, Camcorders, etc. But with a doper, it's quite common to have them injure or kill somebody for 5 or 10 dollars just so they can do another "rock"... or a little more "dust"... or another "fix"... or a little "snort"...

Better read that TOS again roger.
there are specific parts of it that deal with issues like this
(such as slander or libel, or harassment or how about cyberstalking?).

You're statements are just borderline legal.. wouldn't take but
1 little push and over you go down the slippery slope of
litigation....

Why don't you get a real, bonified (read that as qualified) lawyer
and have him explain it to you (assuming you can afford $300.00/hour
in fees).

Until then, why don't you just shut up and leave me out of your
pedophile like fantasies.

5203. FCC Chairman Wants Change in Amateur Frequency Usage and A End to Morse Code.

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-01 08:23:00 UTC
From: Keith <kewyatt@apexmail.com>
Message-ID: <3ac6e514$1_1@spamkiller.newsfeeds.com>
Source record: 91482

April 1, 2001 -(AP)
FCC Chairman wants to eliminate Morse Code and wasted spectrum by Hams.

In a speech Saturday night to the telecommunications industry FCC Chairman Michael Powell spoke out against the use of Morse Code and the waste of valuable spectrum by ham radio operators, ham radio operators are licensed CB operators that pass a Morse Code test. The Chairman is concerned about the waste of spectrum worth billions of dollars to the telecommunications industry that is currently being used by Ham Radio operators.

The Chairman also wants a big change in the spectrum wasted in the Ultra High Frequency area of spectrum in which Ham Radio Operators hold a staggering sixty megahertz of spectrum, more then any other radio service.

"Amateur Radio operators in this frequency band only need about two megahertz to chat with each other about the weather. Cellular and portable communications are in great demand and the FCC should not allow a few thousand people to hog spectrum needed by millions of consumers."

In a detailed presentation he outlined his plan to ask the International Telecommunications Union for the reassignment of a four megahertz chunk of spectrum to the airline industry that is presently held by amateurs near the overcrowded civilian aircraft band. He also outlined the conversion of thirty megahertz of frequency for use by telecommunications providers for data systems that could be used to supply high-speed access to the internet via radio frequencies.

To demonstrate why the FCC Chairman believes the Amateur Radio Service is wasting spectrum he played several tapes of licensed ham operators using vulgar language and jamming stations in the band he wishes to convert to the airline industry.

When asked by reporters about the possible opposition to his plan by ham radio operators the Chairman smiled and exclaimed, "We are going to cut it off and kill it!"

April 1, 2001 -(AP)
FCC Chairman wants to eliminate Morse Code and wasted spectrum by Hams.

In a speech Saturday night to the telecommunications industry FCC Chairman Michael Powell spoke out against the use of Morse Code and the waste of valuable spectrum by ham radio operators, ham radio operators are licensed CB operators that pass a Morse Code test. The Chairman is concerned about the waste of spectrum worth billions of dollars to the telecommunications industry that is currently being used by Ham Radio operators.

The Chairman also wants a big change in the spectrum wasted in the Ultra High Frequency area of spectrum in which Ham Radio Operators hold a staggering sixty megahertz of spectrum, more then any other radio service.

"Amateur Radio operators in this frequency band only need about two megahertz to chat with each other about the weather. Cellular and portable communications are in great demand and the FCC should not allow a few thousand people to hog spectrum needed by millions of consumers."

In a detailed presentation he outlined his plan to ask the International Telecommunications Union for the reassignment of a four megahertz chunk of spectrum to the airline industry that is presently held by amateurs near the overcrowded civilian aircraft band. He also outlined the conversion of thirty megahertz of frequency for use by telecommunications providers for data systems that could be used to supply high-speed access to the internet via radio frequencies.

To demonstrate why the FCC Chairman believes the Amateur Radio Service is wasting spectrum he played several tapes of licensed ham operators using vulgar language and jamming stations in the band he wishes to convert to the airline industry.

When asked by reporters about the possible opposition to his plan by ham radio operators the Chairman smiled and exclaimed, "We are going to cut it off and kill it!"

:
: ??? As far as I know, tobacco does not "limit your ability to reason". It
: may limit your ability to live, but that's a different story.
:
: The withdrawal from tobacco sure does "limit your ability to reason"
: (speaking from experience).
:
: But alcohol certainly does limit your ability to reason and can make you a
: danger to society. I was asking this poster if, given that as a rationale
: for eliminating drugs, would he support eliminating alcohol.
:
: /Sarcasm on
: It sure worked well during prohibition
: /Sarcasm off

Tell that to the anti tobacco nazis that are on every college
campus. Remember there are "puritans" in the left wing of
American politics as well as the right.

The real goal is that you reject middle class morality. You are
not political correct. You are not under the control of the university
educated women of America (the new Victorians). Therefore what
you do is banned and you are banished.

: I'm all for drugs as long as they are easily available for cheap so people
don't run around beating each other over
: the head and pawning everyone's stuff.
: Also, it should be manditory that people should only be able to do drugs
behind closed doors.
: Absolutely no driving while on drugs or coming off drugs and absolutely no
being on drugs in public.
: THe penalty? Being shot on the spot for endangering and risking the lives
and well being of others.

The problem is that we still have drunks, they still drink and
drive (often without a license so there goes the automobile
example of gun control) and often kill while drunk. Legalization
did not get rid of them.

And if we legalize drugs then drug users will find other ways
to reject society and cause problems. The real solution is to
rid ourselves of those who have a tendency to use drugs, to
find out why they have so many demons within their souls.

Part of "resistance" is making sure there's no
such thing as a "posession" conviction.

Arguing with the puritans won't do this. If
anything, it will only concentrate their minds
and make them put more effort into draconian
laws. Things drift more and more towards a
black and white, pro OR con, public mindset
while the middle is squeezed out.

Instead of trying to go *through* puritans you
have to go *around* them. Instead of fighting
THEM, you instead appeal to the center - those
who still realize there's a middle ground, a
grey area. Make NOT taking a side on this issue
honorable and acceptable.

Unable to cultivate the necessary degree of
fanaticism in such a public, the puritan crusade
will slowly lose force and wither away. This is
what happened to the great anti-alcohol crusade.
It wasn't so much "opposed" as it was "forgotten"

by a public which streamed more and more towards
the middle ground.

news:3ACCAC31@MailAndNews.com...
> Is it just me or has anyone noticed the constant downgrading of individual
> behavior and low mentality garbage in this newsgroup?

James,

No, it's not just you. It's as much the "amplifying effect" of the
technology as anything.

Anyone can jump on Usenet or set up a web page and essentially become a
small-press publisher or discussion-group leader at virtually no cost, and
with the potential for almost unlimited distribution. This is (as far as I
can tell)
unprecedented in the history of man. No longer must you own a newspaper or
travel in elite circles, or be born into
a rich oil family to have your opinions heard and taken
seriously by thousands. Which is largely a very good thing.

In practice, what happens is that those with the strongest views participate
early and often, expend a
far greater effort toward expressing their opinions, and
thus constitute a much larger presence than the silent majority, who simply
don't participate all that much. Hence, you get a highly underestimated
notion of the
number of moderate, reasonable people vs. the hugely
vocal extremists. (The anonymity of the technology also allows one person
to pose as many, further distorting the picture, and it's pretty clear this
is
going on here in rec.radio.shortwave among the facist
rightwing elements.)

Polls prove that the *overwhelming* majority of people are *NOT* violent
racists, filthy hate-mongers, idiot religious dogmatists, or murderous
pseudo-intellectuals like William Pierce who wallow in neo-Nazi intellectual
squalor to
justify treason, yet you read frequent posts from just those
sorts of junk-people. But if you took a survey of those
on-line, you'd find that we're talking about maybe
< 0.1% of the population who firmly hold such
dangerously violent views. Timothy McVeigh is the
exception to the rule. So relax.

We will never be rid of them.

Some problems are not solvable.

"The poor are always with us" - so are the drunks.

> And if we legalize drugs then drug users will find other ways

Any serious attempt to do the first of these would be pretty horrible.

Better to accept that there are a certain number of people who are
damn fools, and punish them for specific acts of foolishness or
malice.

The solution is not in contraband laws...as they merely make breaking
the law profitable....but in automatic multiplication of the penalty
for any criminal offence committed under the influence of drugs.

Monster Sunspot Hurls Solar Flares Toward Earth

News/Current Events News
Source: Reuters via DailyNews.Yahoo.com
Published: 04/01/2001 Author: Reuters, Deborah Zabarenko
Posted on 04/01/2001 07:58:02 PDT by GeekDejure

WASHINGTON (Reuters) - Four solar flares and a pair of powerful magnetic
gas clouds spawned in a monster sunspot were headed for Earth and could affect power systems,
satellites and some radio transmissions, a top space weather forecaster said.

They might also provide a dazzling display of the northern lights if
they arrived at night, said Gary Heckman, senior forecaster for the U.S. Space Environment Center
in
Boulder, Colorado.

``They're headed our way,'' Heckman said in a telephone interview. ``But
these still aren't the barnburner events. ... It will tickle some power systems. Satellite operators will
notice.''

The solar flares -- explosions in the sun's atmosphere -- and the
fast-moving magnetic gas clouds, known as coronal mass ejections, were hurled at Earth from the
biggest sunspot
scientists have seen in the past decade. The sunspot was about 86,800 miles in diameter and had
about 13
times the surface area of the Earth, according to the National Science Foundation (NSF) and the
U.S.
Geological Survey (USGS). The spot is so big it can be seen unaided as long as filters are used to
protect the eyes from damage, the NSF said in a statement.

Sunspots are dark patches on the sun's surface caused by a concentration
of distorted magnetic fields. Violent solar activity is believed to be caused by the release of
magnetic energy. The first bit of stormy solar weather left the sun on Wednesday, and the first
effects of it

were expected to reach Earth late on Friday and continue through the weekend, Heckman said.

The USGS, which monitors solar weather at a network of magnetic observatories around the world, said Earth's geomagnetic field ``is expected to become quite disturbed'' by this solar activity. ``While geomagnetic storms give rise to the beautiful northern lights, they can also pose a serious threat for commercial and military satellite operators, power companies, astronauts, and they can even shorten the life of oil pipelines in Alaska by increasing pipeline corrosion,'' a USGS statement said.

Heckman said it takes about two days from the time the sun fires off flares or throws out a coronal mass ejection until its effects can be felt on Earth, when a hot ionized gas of charged solar particles hits the Earth's magnetic field, causing fluctuations in it. The big sunspot has another week to go before it rotates away from Earth, but that could be plenty of time to cause mischief, Heckman said.

``The monster sunspot's still there,'' he said on Friday afternoon. ``That region (of the sun) has been storing energy for more than 24 hours. It's just building it up, so when it's released, there is the potential for a really large event there. ... It's rather ominous just sitting there for the last 24 hours.''

An image of Thursday's coronal mass ejections can be seen online at http://www.spaceweather.com

Oh here we go again...another stumpjumper twist of the facts. One more time boys and girls.

1. I was NEVER GIVEN A RADIO. Why would I need a radio when at the time you are refering to I had a pair of Kenwood Twins and the SB-220, a FT-101e Yaesu, and a Kenwood TS-820S.

2. The TS-820S was sent out to 'butchy baby' in Texas, who stiffed me in paying for it. After finally getting it back from butchy baby it was tore totally up. I decided not
to bother with it.

3. Randy, W7CPA, hearing of the situation, decided to offer 'stock certificates' at the Dayton Hamfest. The money that was collected was sent to me. This paid for the radio. I sent the radio to the Stumpjumpers/Abernathy radio group, to do with it what they want.

4. I have never received a PENSION from Uncle Sam.

Another example of the disfunctional mind of a BARF/Stumper/ARG member.

What a bunch of looooooooossssssseeeeeeerrrrrrssss!

```
: >> >This would include alcohol?
: >>
: >> Don't bother. It's pointless to try and reason
: >> with puritans on a crusade. Just *resist* them.
: >
: >Resist all you want, but don't expect to have a sympathetic ear
: >when you get a possession conviction
:
: Part of "resistance" is making sure there's no
: such thing as a "posession" conviction.
:
: Arguing with the puritans won't do this. If
: anything, it will only concentrate their minds
: and make them put more effort into draconian
: laws. Things drift more and more towards a
: black and white, pro OR con, public mindset
: while the middle is squeezed out.
:
: Instead of trying to go *through* puritans you
: have to go *around* them. Instead of fighting
: THEM, you instead appeal to the center - those
: who still realize there's a middle ground, a
: grey area. Make NOT taking a side on this issue
: honorable and acceptable.
:
: Unable to cultivate the necessary degree of
: fanaticism in such a public, the puritan crusade
: will slowly lose force and wither away. This is
: what happened to the great anti-alcohol crusade.
: It wasn't so much "opposed" as it was "forgotten"
: by a public which streamed more and more towards
: the middle ground.

Except that those "moderates" are right in the middle of
the anti smoking campaigns as well as groups like MADD.

"Puritarism" is as American as apple pie. And we are now
in the middle of a neo-Victorian Age, led by moderate "yuppie"
women with college educations. Little boys can not be little
boys. No, they have to be on Ritalin. The Buster Brown suit
has been replaced by bicycle helmets. Anything male, like
violence, is banned. And drug heads like yourself are banished.
```

: > The problem is that we still have drunks, they still drink and
: > drive (often without a license so there goes the automobile
: > example of gun control) and often kill while drunk. Legalization
: > did not get rid of them.
:
: We will never be rid of them.
:
: Some problems are not solvable.
:
: "The poor are always with us" - so are the drunks.

Even mass executions do not work. They seem
to reproduce.

: > And if we legalize drugs then drug users will find other ways
: > to reject society and cause problems. The real solution is to
: > rid ourselves of those who have a tendency to use drugs, to
: > find out why they have so many demons within their souls.
:
: Any serious attempt to do the first of these would be pretty horrible.
:
: Better to accept that there are a certain number of people who are
: damn fools, and punish them for specific acts of foolishness or
: malice.

We are. It is just that we now use the drug laws to target
them. If the drug laws go away then there will be other things
that they can be put in prison for. But judges are no longer
willing to let the mentally ill and the emotionally ill roam the
streets.

5225. New to amateur radio

Hi all,

I just got my license and I am looking for suggestions for a decent middle of the road tranceiver. I have some ideas of what I might like to have but I am not sure of the best place to get started. I want something that will work well but not cost me an arm and a leg. Any suggestions would be appreciated.

By all means help him along. Also check to see if any local groups or clubs may be able to assist. Don't overlook groups that are not ham specific, such as Boy Scouts, you may (or may not) find resources in all kinds of places.

Good luck. He won't be the first, or last, 8 year old to obtain a license, but he will be among a very elite group - there are not many that license at that age.

CSRO Newsletter
Volume 1 Number 5
HTTP://WWW.TITANICSTREAMS.COM
Channel V 8 on iM_Networks (formerly Sonicbox, Inc.)
adora@titanicstreams.com

Directory :

1. Re-Live The Legends : Solo Stream
2. John F. Kennedy Memorial Stream
3. April is Judy Garland Month!
4. April Schedule (Re-vised)
5. CSR Chat
6. Do your own show!

1.Re-Live The Legends : Solo Stream

Classic Stars Radio presents a brand new & seperate stream for all you Legends fans out there! This stream is dedicated to re-playing the shows you've heard on Thursday nights program "Re-Live The Legends". If you have Real Player all you need do is click on the link below, let real player pop up, and be transported back into yesterday with the stars that made 1940's Hollywood every Americans dream!

Currently on the stream are James Stewart, Cary Grant, & Myrna Loy!

http://www.titanicstreams.com/legends.ram

2.John F. Kennedy Memorial Stream

Where were you on November 22nd, 1963 at 12:30pm CST? If, like me, you were not born yet, find out why all who were alive remember exactly where they were on that day. On this stream you will find six hours of JFK assassination coverage. You'll hear the first confused moments where nobody knew what to expect, all through the afternoon where details slowly trickled in, and finally Lindon Johnsons address to the crowd as he arrives in Washington D.C. as the newly sworn in president of the United States. Here is your chance to re-live a time in history that nobody has forgetton, and you will never forget.

http://www.titanicstreams.com/jfk.ram

3.April is Judy Garland Month!

If you are a fan of Judys' then you are going to be in heaven each Thursday night during the month of April! We have chosen Ms. Garland as April's legend of the month. What that means is that each Thursday night at 9:00pm EST during the month of April, we will be devoting an hour to her radio appearences! From her Lux Radio appearence in A Star Is Born to The Wizard of Oz, this is the place for Judy Garland old time radio!

http://www.titanicstreams.com/legends.htm

4.April Schedule

Ye Olde Time Sundays

4:00pm - 4:30pm EST : Halls of Ivy

It would be great for the fastest growing industries in the
country - the "prison system" - the "criminal justice system"
and - lawyers.

Besides further hardening the public arteries toward crime,
all that this would do is increase the street price and give
LEO/prosecutors/politicians more "tools" to railroad
whomever they want.

Just plant a little dope, claim or stage some criminal
behavior and presto, opposition is gone forever, legally.

Why not just take the next logical step and "authorize"
on-the-spot execution of anyone suspected of any crime.

And to think that hemp was once a legitimate and useful crop and that addicts could steal peaceably across the tracks and lay quietly for days in their fantasy haze.

5236. VHF NTS Net in Bay Area

Congrats on getting your ticket. Most techs hang around in the VHF and UHF bands on repeatersThe questions I would ask to detemrine what kind of radio is right for you are as follows:
1- Do you want a handheld (HT) or a car radio (mobile)? (HT's go anywhere, but have significantly less power which = range)
2- Do you know if there are repeaters in your area other than those in the 2m band? (If not a mono band radio should do you just fine and is a bit cheaper)
3- How much do you want to spend? (You can get more bang for your buck on a used, but buyer beware. You don't need anything too fancy to get on the air. Most recent radios have all the functions you'll need)
If you can find a radio club in your area or make your way to a hamfest it'd be worth your while to play with some radios to see whats out there. Sorry to ramble. I hope this was somewhat helpful. Good luck.

To each his own, Peter. Spam will be with us no matter what, and probably the best way to deal with it is a filter. I tend to not use filters in newsgroups because, to quote a friend of mine who does the same: "I like to have the latest figure of the index of stupidity".

If you want HF gear, consider getting an older used radio. I was in the same boat when I was first licensed. I ended up with a Kenwood TS-520. It doesn't have a digital readout, and it has tubes in the final amplifier, but I haven't had a lick of trouble with it for since I bought it 10 years ago.

One word of advice though: If you go this route, take along someone who is knowledgeable about older radios to check things out for you.

Whew!! Thank goodness. Something about addin and subtracticatin letters just taxes me. But $19.95 is a might steep for an action figure. Even if it is Mc Veigh.
Think I'll stick with "Lil Patriot Toys". You can find one of these cheaper. Check em out at www.militia.somewhere.net and click on Lil Patriot Toys.
or go straight to http://sonoguy.tripod.com/toys.html
and remember...there's a Lil Patriot in every good American.
Note: This is not for the humor impaired!

Sort of like youre fucking identity, huh, AIDS infected Transsexual FAGGOT?
Well, the quadratic formula as shown in theis textbook has no parentheses.
Of course, your substandard English skill preclude you from actually READING
a
textbook, but since the computer has no square root key so to speak, and
anybody even vaguely familiar with the formula knows that the sqare root in
the formula encompasses the b squared-4ac. Maybe one needs to draw you a
picture to help your ill-educated brain stem to comprehend the formula.

x= -b +- The square root of B^2-4ac divided by 2a.
The result will be two answers: one real one imaginary...(the imaginary
number
being what's been documented as your IQ range)

Woger...wearn to spell. "Illitrate" is NOT in the new Webster's Dictionary. Of course it is possible that there is a "new" West By God Virginia dictionary. If this is the case, then you are forgiven. Of course one must also entertain the idea that you are home schooled, and perhaps this is how Big Marie lurnt you.

Jeff. Please do not confuse Roger any more than he already is. The guy counts by using his fingers and when you introduce those negative values, he cuts off a finger and places it aside, thus disabling his nose-picking capabilities.
He used to use an abacus, but the poor guy ate all the little beads. So much for Roger's foray into "new math".
I did hear, though, that Roger counts using base 12 since he has (or had) six fingers on each hand. He stopped using base 13 in high school since THAT digit is but a fraction.

Hope you catch the bootlegger. I will keep my CW ear out for this culprit and advise you should I hear any further.

Hello all!
I love to DX and do limited contesting. I have been searching for awhile (and doing some posting out here) in search for the right antenna. Because of my living situation (an apartment) the antenna has to be a vertical, not over 20 feet tall, and no radials or counterpoises sticking out all over the place, wires laid out on the roof for radials are OK tho. I would like to work the bands 10 -20m including the WARC bands. Any suggestions for an antenna that would fit this need??
Please email me direct at: NZ8C@aol.com

5274. Hara Arena 2-B sold to developers?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-03 17:42:33 UTC
From: Barry <bhorowitz99@cooper.com>
Message-ID: <dYny6.1206$rk1.132948@newsread2.prod.itd.earthlink.net>
Source record: 91253
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

Was listening in the advanced portion of 75 last
night to an rountable of 8-land stations. One topic
that was discussed was the possibility that this
year may be the last year for the Dayton Hamvention
to be held at the Hara Arena. Reasons stated was
that the owners of the Hara have been seeing revenue
drop below the bare minimum for profit margins, not
only due to the continued drop per year at the Hamvention
but cancellations and moving of other events that the Hara
hosts throughout the Year. To put it plainly, the word is that
the Hara Arena will be sold to developers before
November 2001, who then plan to demolish the site and
put up an upscale condo complex with an associated shopping
center on the site. The Arena has outlasted it's intended
life and is now a financial liability to it's owners, so that
means it's "time to sell". Anyone know any more about this ??

5275. JBO is right about me

Jake,

I know I shouldn't, but...

If Erik is genuine, I'm sure you understand his surprise at the
state of conversations on the news groups. Some people have no manners
and no self respect...a...a... and never grow up to boot. It's just
best to ignore them.
While your first two points are indeed arguable, I found Erik's
writing quite good. The sentences are complex, I agree, but quite
understandable and, I believe, correct. I would only remove perhaps 1-2
commas.
Could you expand on your criticism ?... of course, constructively.

Also, If Erik is genuine, I don't think it is intentional flame
bait. Inadvertant, perhaps, but not intentional.

Finally, RE: "I shouldn't even want to associate with you." Why
not? You start out sounding reasonable, pointing out sone arguable
points which, though very commonly discussed, are valid.

Isn't it nice I can set my own hours, when I have a position that allows me
to
do so? It sounds like a career minimum wage earner is jealous.
Posting at 9 or 10 a.m. wins out posting at midnight and 3 am.. But then
they
could be posted from a remailer with a preset delay, but you're too fucking
stupid to figure how to do just that....what's the matter, the gay porn
sites
shut you out of their access for downloading too much "material" from them
again? Or that stolen 486 can't handle the load? What a fucking LOSER,
instead
of giving the wrinkled war bride the high hard one, you're posting answers
to
my EVERY post with a reponse that Pavlov would be proud of you.
Now, answer each and every post, BITCH!!!!!!!!
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!

> Did Big Marie

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
"Big Marie", is petite sized and weighs just over 100 lbs, Doodlefuck. Try
again. Maybe you're talking about your older transsexual "bride," Arselicks.
You know, the one that gives you those charity fucks, just so you can say
you
finally got some.

> go off to work

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!
Marie "retired" in 1976.....early....BWHAHAHAHAHAHAHAHAHAHAHA!!
Isn't it nice we have money??? Poor jealous Herpes.
>and leave you home alone to play on her computer today? Most folks are at
>work at this time of the day, but not you! No! Not Woger Dodger.

I WAS posting from *work*, you stupid FUCK. And it sure as hell wasn't
GMAAC,

because I've never worked for GMAC, Shit-for-brains.

> He has his mommy to support and feed him.

No, I feed and support myself. Not like the welfare recipient Herpes Herbie.
Poor thing, with that feolony record, you just can't keep a job, can you
Arselicks?

>45 year old man, still living at home with his mommy. Go figure.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
Try living in a home with my mom staying there. Can't you EVER get the facts
straight? Oh, well, I suppose you're used to talk out of your wide ass,
Obese
one.
